and \$9,785,000. The revenues, which amounted to \$309,455,000, exceeded the expenditure by \$77,765,000. The deficit must be attributed to bad crops and to the construction of 3,000 miles of new lines. The greatest deficit was that of the Siberian Railroad, which amounted to \$11,330,000.

His Imperial Highness Prince Pu Lun and party (consisting of seventeen persons) left Yoko-hama for the United States on the O. & O. steamer Gaelic. The Prince will travel eastward on the Southern Pacific and Union Pacific Railroads The Gaelic also took Vice-Admiral Sir Cyprian Bridge, Commander-in-chief of the China Squadwhose place has been taken by Sir Gerard

Mr. Uchida, Japanese Consul General at New York, telegraphed on March 25th that the market being effected by the fall in Italy, some transac-Russian troops at Anjut and in the northern districts are now withdrawing, and a severe collision will take place in about ten days.

The dead body of a farmer, M. Hashimoto (46), Honmoku, Yokohama, was found on March 28th on the shore near No. 20, Yamashita-cho. He has been missing since the 21st when he was fishing off Honmoku.

> Mr. August W. Machen, formerly General Superintendent of the Free Delivery Postal Service; Dr. George F. Lorenz, of Toledo, once postmaster of that city, and Diller B. Groff, of Washington, all of whom were convicted of conspiracy against the U.S. Government in connection with the supply of Groff fasteners to the Post Office Department, have been sentenced by Judge Pritchard to two years' imprisonment in the Moundsville, W. Va., penitentiary and a fine of \$10,000 each. The defendants immediately gave notice of appeal to Court of Appeals and were released on \$20,000 bonds each.

> The N.-C. Daily News of March 15 reproduces the poem "Dulce et decorum est pro patria mori," which was originally written for the Japan Mail by myoung English lady resident in Tokyo. Before reaching Shanghai, however, the poem seems to have been reprinted, without any acknowledgement, in the Osaka Asahi, for we find our Shanghai contemporary writing:—" The following poem is printed, in English, in the Osaka Asaki. It fairly represents, we are assured, the universal sentiment of the people of Japan." "M. K.," we feel sure, will be delighted to hear it.

Colonel E. Cotter has lectured at the United Prince Fushimi arrived on March 28th at from Kochi prefecture, proved to be of superior Imperial Standpoint." Admiral Close, who took yoto by the 3.37 p.m. train from Shimbashi, quality, and the nominal price given was six part in the subequent discussion, said he was a hundred yen per hundred kin. It is added by a astonished at the want of proper defences in the astonished at the want of proper defences in the Thames. If Germany declared war one day they could have a couple of gunboats up the river to Athenian, which will leave this port on May 4th the middle of London the next night. London for America, would never be safe until they had a couple of such craft stationed in the river. Any gunboat could get past Sheerness, and there would be nothing to stop it except a few police boats. Invading vessels could inflict any amount of damage. They would destroy the Houses of Parliament, the Tower, and play havoc with the shipping.

> In the recent address before the Liverpool Chamber of Commerce, Mr. H. Fulford Bush stated that Dalny occupies the side formerly known as Odin Bay, from the fact that during the China war in 1858, H.M.S. Odin was stationed there, the place being used as a military depôt. When his father, Mr. Henry E. Bush, passed through the place some years afterwards on his overland journey from Newchwang to Port Arthur, in mid-winter, performed in those days on horseback, several of the men repeated the comho goes home on leave.

CORRESPONDENCE.

SYMPATHY.

SYMPATHY.

(TO THE EDITOR OF THE "JAPAN MAIL")

SIR,—The bursting of the storm of war in the Far East has produced great excitement throughout America. The people very naturally take a deep interest in the struggle and await with much anxiety the issues of the war. With but few exceptions the conscience of the people, as well as their heart, are with Japan in the brave struggle she is putting forth for her own life and to insure the new and better era in the Far East. Some Irish-Americans have given expression to pro-Russian sentiments, but the reason for this is well understood. The journals of this country are pretty nearly unantimous in the expression of friendly feelings toward Japan. They have sent many brilliant men to the seat of war in order to thoroughly study the problem. Conspicuous among these is the Outlook, which has commissioned the well known traveller, George Kennan, to devote a whole year of impartial study of the problems of the Far East and lay the results before its readers. The conduct of the Japanese in the United States awakens unqualified admiration. The prompt return of those liable to military duty and the extraordinary liberality, as shown in their subscriptions to the war fund and the Red Cross Society, coupled with their quiet and serious bearing in public, have made a very favourable impression upon all classes. Brilliant victories won by the feet in the opening days of the conflict sent a thrill of admiration throughout the country.

The statement by the Japanese Government, setting forth the causes for the severance of relations with Russia, and the appeal to the sword, convinced most readers of the justness of Japan's claim. Americans are naturally proud of their great Secretary. John Hay. His prompt action with a view to confining the arena of struggle to the smallest limits and for the protection of the integrity of China, and the ready response of all the Powers to his proposition, raises him still higher in the estimation of his countrymen as well as that of the world.

Whi (TO THE EDITOR OF THE " JAPAN MAIL")

Supt., Japan Mission.

REPORT OF THE YOKOHAMA FOREIGN BOARD OF TRADE FOR THE YEAR 1903.

San Francisco, Cal., March 5th, 1904.

THE COURSE OF TRADE .- The returns of the foreign trade of Japan for the year 1903 continue to show an increase both in Imports and Exports.

	1903. Yen,	1902. Yen.
	ren.	
Total Exports	289,502,442	258,303,065
Total Exports from Yoko-		
hama		139.015,675
Total Imports A	317,135,518	271,731,258
Total Imports to Yoko-		
hama	110,878,968	89,292,505
	1901.	1900.
	Yen.	Yen.
Total Exports		204,429,994
Total Exports from Yoko-		
hama	133,822,517	96.125.275
'Total Exports	255,816,645	287,261,846
Total Imports to Yoko-		
hama		109.775,317
The total value of the I	Foreign Trade	of Japan in

The total value of the Foreign Trade of Japan in 1903 was yen 606,637,960, in 1902 530,034,323, in 1901 yen 508,166,188, and in 1900 yen 491,691,840.

The principal anticles of Export showing an increase during 1903 were Habutai, Cotton Goods, Porcelain, Cotton Yarn, Straw Braid, Tea, Coal, and Copper; while Raw Silk, Matting, and Rice showed a decrease compared with the figures of the previous year. In Imports an increase is found principally in Wool, Iron and Steel of various kinds (including Rails). Dried Indigo, Wootlen Cloth, Mousseline, Sugar, Rice, Peas, and Beans; those commodities showing a decrease being Raw Cotton, European Paper, Italian Cloth, Shirtings, Prints, Flannels, and Velvets.

Velvets.

The export of Bullion during the year was about seventeen millions of year more than in 1902 and the import about five millions less.

Notwithstanding the heavy Rice crop harvested last year—the best for the past ten years except 1898 and 1901 which were only slightly in excess of it—the import of foreign Rice was no less than 12,162,405 piculs of the Customs value of nearly fifty-two million year, and exceeding the import of the previous year by nearly eight million piculs. The official returns give the crop of 1903 as 46,475,038 koku,

which is six millions and a quarter koku above the average and nine millions and a half more than the crop of the previous year. Deducting the export of Rice during the year—which was less than a million piculs—and adding the large import, give figures approaching 130,000,000 piculs.

MATCHES.—There is an increase in the export of Matches, but it is small compared with the excess in the same direction in 1002 over the previous year. STRAW BRAID has continued in good demand, and an increase of nearly a million year in value has been the result of the export of 1903 over that of 1902.

YANNS.—The export of 1903 over that of 1902.

the result of the export of 1903 over that of 1902.

YARNS.—The export of Japanese Yarns in 1903 amounted to eleven and a half million yen more than in the previous year, and that of manufactured Cotton Goods to about a million. What the prospects are in the immediate future for these commodities in China it would be difficult to determine, though at present communication with Shanghai and the southern ports is not interfered with.

In Jungate Equation Pages shows a decline of

In Imports, Foreign Paper shows a decline of more than half a million in value in 1903 compared with 1902, against an increase in the latter year of a million and a half over 1901.

Wool figured for an increase of a million and a half in 1903 over the previous year, and continues to be in good demand.

MACHINERY and LOCOMOTIVES also show a small increase in value in 1903.

The decrease in the value of RAW COTTON imported was ten million yen and in Petroleum three and a half millions. a half millions.

The value of the deliveries of the principal articles of Import in Yokohama during the rast year as compared with 1902 has increased about half a million year, and the value of Exports from Yokohama about five and a haif million yes.

The increase in foreign tonnage at Yokohama was nearly 300,000 tons in 1903 over that of the previous

The following are the values of the Exports and Imports for the past two years

THE BREAKWATER .- Extensive repairs are in pro-THE BREAKWATER.—Extensive repairs are in progress on this work, the total cost of which is estimated at over a million and a quarter yen, which will probably be spread over three years. Most of the damage was caused by a violent storm in September, 1902, when over 3,000 feet of the work suffered. The result of an unusually heavy gale on this structure has not been altogether unforceseen, as the original plans for the foundation were set aside 461,544 account of cost.

account of cost.

Dredging has been carried on during the year, but in a more or less desultory manner, and vessels have touched bottom approaching the Pier. Although a dredger paid one visit during the year to the mouth of the Creek, the depth of water at this place is still insufficient, and a crowd of craft may often be seen waiting for the rise of the tide. This is particularly inconvenient to the discharge of Kerosene, and, in addition to the time lost over the work, lighters oil-laden get aground in the Creek itself, where two or three may be seen lying within a few feet of flaring fires on other barges, where men are cooking rice, to the great danger of a conflagration, which, if it broke out, would reach the houses on one side if not on both.

YOROHAMA-HACHOJI RAILWAY.—It was stated to-

side if not on both.
YOKOHAMA-HACHOJI RAILWAY.—It was stated towards the end of the year that nearly the whole of
the shares in this undertaking had been subscribed
for, and that as soon as this was the case the company would apply to the Authorities for permission
to commence construction, also for a provisional
charter for the laying of a line of 1 mile 26 chains
to be exclusively used for the transportation of freight
and to run between the Customs Pier and the neighbourhood of Nakakido. The line to Hachioji is
expected to be open for traffic by the end of 1905.
This company is said to have acquired the right to
reclaim 90,000 tsuth of the foreshore of the harbour, reclaim 90,000 tsubo of the foreshore of the harbour, 20,000 tsubo of which will be required for the railway works.

way works.

CUSTOMS TARIFE.—In consequence of the issue by the Customs of Supplementary Classifications of Imports, it was deemed necessary that the Board should publish a revised edition of the Tariff. This was decided upon by the Committee in April, and the work being immediately put in hand was shortly after published.

New CONTRACT FORM FOR TEXTILES.—An agreement was proposed for a Form of Contract, by the

New CONTRACT FORM FOR TEXTILES.—An agreement was proposed for a Form of Contract by the Woollen Goods Dealers' Association, which, after due consideration by the Committee and a diaft of the document being submitted to the Members, was finally subjected to slight amendments which were sent to the Association for approval. The alterations by the Committee having been accepted by the Association, together with a Japanese translation, the document was printed in English and Japanese and a good sent to all Members.

the Rules and Procedure of the Arbitration Court of

the Rules and Procedure of the Arbitration Court of the London Chamber of Commerce, which were obtained as a guide, has been completed. When the papers were finally in order they were submitted to the Members for approval, and the signatures of those who were willing to serve as Arbiters invited; over sixty Members signified their readiness to serve. Tea Substate.—A letter from the Tea exporting firms of the port was addressed to the Board in reference to the Government grant to the Japanese Tea Guild which amounted to yer 70,000 annually for seven years. This letter, which stated that the subsidy was "contrary to the Treaty," was forwarded under cover of a letter from the Chairman to the British and American Ministers, who undertook the representation of the case to the Authorities, with the result that the subsidy has been cut off. It is stated, result that the subsidy has been cut off. It is stated, however, that the Guld will push matters in the direction of obtaining a renewal of the grant.

direction of obtaining a renewal of the grant.

REGISTRATION.—The registration of the Chamber has been completed, and the following Gircular has been issued to all Members and to correspondents in various parts of the world:—"In order to comply with Japanese laws, one of which provides that only one Chamber of Commerce, using that title, can exist in any one city in Japan, the Yokohama Foreign Chamber of Commerce has changed its title to Yokohama Foreign Board of Trade. This has become necessary in order to obtain registration as a juridical person for this Institution under the Revised Treaties, and on account of the existence in Yokohama of a Japanese Chamber of Commerce. The functions of the Yokohama Foreign Board of Trade, hama of a Jananese Champer of Commerce. The functions of the Yokohama Foreign Board of Trade, however, will not differ in any respect from those carried on during the past thirty-seven years as the Chamber of Commerce; the bi-monthly Trade Report and the Annual Report and Statistics will be published as heretofore, and Arbitrations and Surveys will be undertaken as the state of the published. will be undertaken as in the past."

EXPORTS.

RAW SILK.—The Custom House export figures for the calendar year 1903 are 73,216 piculs, valued at year 74,327,602, as against 80,059 piculs, valued at 76,768,740 for 1902. These figures being for this calendar year show the volume of trade in Raw Silk for that period, but afford no indication of the actual progress in the production of Raw Silk in each successive working season, which commences in July and ends in June of the following year, a period of twelve months within which the crop of Silk is produced and marketed. The following table, which gives the total export in bales for each season, and place of destination, shows clearly the growth of the place of destination, shows clearly the growth of the export trade during the past few years:—

1902-02. Continent of Europe 28,182 England - America	1901-02. 27,080 16 41,459	1900-01. 30,973 459 35,252

quoted at yen 910.

The demand for Europe for fine sizes also fell off

The demand for Europe for fine sizes also fell off in September, and prices by the end of December had receded to yen 1,000 for best 9/11 den.

In regard to the quality of the new Silk, it was remarked in last Report that Sinshiu Filatures had proved disappointing to consumers abroad, owing to careless reeling and unevenness in size, and it is to be regretted that no material improvement is yet noticeable in this respect.

The class of Silk most in favour with American buyers throughout the year has been Receded Mysters throughout the year has been Receded Mysters.

buyers throughout the year has been Rerceled My-bash, and the supply not being equal to the demand this Silk has at times fetched the same price as No. Ins sink has a tables recorded the same price is No. 1 Sinshin Filatures, and during September yen 10/15 per picul higher than that grade. Koshin Filatures have also been in excellent demand at very full prices, and deservedly so, as much greater care has been paid to produce good winding and even-sized Silk than in the neighbouring province of Shinshiu. Several years of careful attention will be necessary

Several years of careful attention will be necessary to restore to favour Shinshiu Filatunes which from a large portion of the Silk produced in Japan.

WASTE SILK.—During the first six months of the year under review prices remained very steady, but with the opening of the new season higher rates were demanded. Shippers then hold aloof for a few weeks, but early in September a considerable amount of business was put through and prices advanced rapidly, reaching as high as:—

MANUFACTURED SILKS.—It will be seen from the following table that, whereas the gross of the Manufactured Silk exported during 1903 shows a net increase of 3½ per cent, the development of trade is confined to the Plain material or Habutai, the steady growth in which has off-set the marked decrease in the two next leading lines of Kaiki and Silk Hand-kerchiefs:—

Man Cassacs	•		
	1903.	1902.

PLAIN SILKS.-The trade of the twelve months

Prices for new Silk opened in June at yen 1,050 for No. I coarse sizes for the New York market, but buyers for Europo were unable to pay the high prices asked for fine-sized Filatures, and held aloof from the market until towards the end of July when holders decided to give way and business resulted at yen 1,040/1,050 for Good Fls. 9/rt den. European buyers were attincted by these prices, which were relatively cheaper than Builan Silks, and the demand increasing, this class of Silk had advanced by September to yen 1,120 per picul. America would not follow this movement, and prices dropped to yen 1,051 for Best Sinshiu Filatures by the end of July, rallying to yen 1,045 in September, but only for a short time; the market again weakened, and the year closed with a dull market, and this Silk was quoted at yen 910. anticipated that the outbreak of hostilities would result in the falling off of supplies, and they therefore proceeded to purchase with undue haste and excitement. The basis of prices would have been pushed still higher had hot the heavy stocks of Raw Silk formed a wholesome check to the upward movement. The period of activity was short-lived, for about the middle of November a sharp reaction set in, resulting in rates dropping to a level fully 10% below the highest point touched in October. This basis was practically maintained until the close of the year, notwithstanding the occasional fluctuations caused by political rumours, favourable and otherwise.

KAGA HABUTAL-The above remarks refer principally to Echizen material, but it is noteworthy that Kaga weaves are steadily gaining in popularity, and, if the present conditions continue, with outsets if the present conditions continue, will out-strip Echican. The production in the former district is increasing steadily, whereas in the latter the output shows a falling off.

KAWAMATA.—The trade in this light-grade material has again been adversely affected by the short-sighted policy of the weavers, who continue to load their productions with an excessive percentage of starch. This practice has naturally brought Kawamala into bad repute both in Europe and America, and the industry will be permanently impaired if this abuse is not checked.

Twills.—This once popular weave has passed through another year of neglect, and the prospect is decidedly discouraging. The European market has been able to supply its own requirements, and American decidedly discouraging. rican consumers appear to take but little interest in

KAIKI.—This style of fancy material has again been entirely out of the market. Some few stocks are still held locally, but these are offered at 20 per cent. below cost without buyers responding.

Early in the year efforts,—more or less official—were made to arrest the growing practice of increasing the weight of Echizen and Kaga Habutai by the addition of moisture. The Fukui kenzajo, or inspection office, instituted a standard and framed regulations to deal with the matter, but in effect these measures proved futile, and the adulteration was continued with increasing sangfreid. The quasi official stamping of the correct weight upon each piece likewise proved ineffectual, owing to the difficulty of establishing a definite basis and the impracticability of any theoretical standard such as prevails in Raw Silk conditioning. In August, the leading local foreign exporting houses investigated the matter, and a small Committee representing their interests acted in co-operation with the Japanese Early in the year efforts,-more or less officialinterests acted in co-operation with the Japanese Habutai Guild, drawing the attention of the Minister of Agriculture and Commerce to the practice referred of Agriculture and Commerce to the practice released to. Pressure was brought to bear upon the weavers in Echizon and Kaga, and for a time they were frightened into discontinuing their tricks. This wholesome corrective, however, is rapidly losing its effect, and more drastic measures should be promptly taken to prevent a recrudescence of the trouble.

Basing statistics upon Custom House returns (which, as previously noted form an unreliable record owing to the inaccurate destinations still declared by some shippers), it appears that the American trade in Habutai shows a slight decrease (4 per cent.), whereas European consumption has developed, and other smaller markets like Australia (20 per cent.)

previous year. The principal decrease is shown in the shipments to America and Great Britain (20 per shipments to America and Great Dittain (and Shipments to America and Great Dittain (and Canada evince and Canada evince marked growth.

marked growth.

TEA.—The season of 1903 has been notable for the high prices paid for both First and Second Cropleaf, but more particularly for First Crop, this higher range of prices having been made possible by the removal of the duty in the United States. First arrivals of the new leaf appeared on the market a few days earlier than in the previous year, and these were early hought up by speculators for a speculators. few days earlier than in the previous year, and these were eagerly bought up by speculators (or a speculator), and shipped by the first steamer with the object, apparently, of placing the shipper in the position of being the only holder of new Teas on the other side during the few days' interval between deliveries of the first and second steamers; the result of this policy was that first arrivals on this market varied in price from yen 12.00 to yen 20.00 per picul over the rate of the previous season.

To was of course impossible for sellers to maintain

over the rate of the previous scason.

It was of course impossible for sellers to maintain these prices, but holders in the interior were undoubtedly encouraged by them to demand more for their Teas than they would otherwise have been willing to accept, and when the market settled down to regular business, prices were still yen 10,00 to yen 12,00 per picul over the previous year, and were maintained at this figure practically for the whole of the Eirch Coop. the First Crop.

The quality of the First Crop pickings was about up to the average, the market ruled very steady, and by the end of June settlements at this port were about piculs 20,000 more than the same point of the pre-

Arrivals of the Second Crop were disappointing in quality; the liquor at first drew unusually dark, but later arrivals showed an improvement in this respect. The leaf, however, was dry and had the appearance of being roughly prepared. Prices for Second Crop leaf ruled from yen 4.00 to yen 7.00 per picul higher than the previous season, but, later on, pickings in the lower grades more nearly approximated the prices willing in 1002.

Total settlements for the year at this port about piculs 195,000, against piculs 180,000 for the

about piculs 195,000, against piculs 180,000 for the previous year.

The favourable conditions ruling on American markets in 1902 encouraged the increase of small firing establishments in the interior, and it is estimated that about piculs 55,000 to piculs 60,000 were fired in Shizuoka Ken during this season; this business was divided between about thirty firms of varying importance, and most of the Teas were shipped direct to America, but some found purchasers among the foreign firms of this port or were shipped under direct to America, but some found prichases attoring the foreign firms of this port or were shipped under their names; in the normal course of things the season under review could have proved anything but encouraging to small native consigners, but the late enquiry consequent on the outbreak of war may have helped out those who were able to wait long enough.

COPPER.—The prices ruling during 1903 have been favourable to Japanese producers, starting at pen 30.00 for Furukawa Bessemer and reaching top point in December with 12th 33½.

Export figures have remained about the same in Yokohama, whilst Kobe shows a considerable increase, viz.:—

	1903.	1902.
Yokohama	10,500 tons.	10,150 tons.
Kobe		8,850 tons.
	23,400 lons.	19,000 tons

Added to this, a decided increase in the home consumption, Japan's total production of 1903 shows a considerable development.

Fish OIL.—Owing to a good demand from European markets, the small stocks carried over from

1902 changed hands at prices up to about yen 8.00 per 100 kin, at which figure even forward contracts for delivery beginning in June-July were closed; but, in consequence of a very heavy summer calch, prices dropped gradually to yen 6.00 per 100 kin, and, in view of good prospects for a favourable outturn of the winter Sardine catch, gave way further, reaching their lowest point at yen 5.30. After fair transactions at that price, the market hardened gradually and

closed pretty firm at about yen 6.00 per 100 kin at the end of December, with only small stocks left.

JAPAN YARNS.—The export of these Yarns, which showed a decrease in 1902 as compared with the two preceding years, have not only recovered but now show a large increase, as will be seen by the figures

	Piculs.	Value,
		Yen.
1903	 921,608	31,418.613
1902	 592,443	19,901,522
1901	 627,517	21,465,572

IMPORTS.

RAW COTTON.-The tendency of prices during the year under review has been continuously rising; the market opened in January at :-

Y.26.00 per picul for American Middling, closing in Dec. at Y.38.50 Y.23.50 per picul for Broach Middling, closing in Dec. at Y.36.75 Y.21.50 per picul for Chinese Middling, closing in Dec. at.....

Market values for manufactured goods did not follow those enormous advances in the same proportion, consequently spinners were obliged to restrict their working time as well as purchases of raw material to some extent. These facts account for the decrease of the import of Raw Cotton by about yen 10,300,000, as the following figures show, viz:—

Value of import during 1902 79,800,000 1903 69,500,000 11

YARNS.—The figures for 1903 show a decline of about 74 per cent, on those of 1902, and say 90 per cent on those of four to five years ago. Consumption of English Varns in this country has been rapidly diminishing for some time, and the absence of any recovery during a year in which economical conditions were more or less favourable to such clearly indicates that the trade is doomed. Native spindles now supply the ordinary demand, and it is only for the superfine qualities that weavers turn to the imported article. Comparative totals of imports in bales are:-

1901, 1900. ... 2,414 6,766 15,795 19.497 17,475 33,465 Manchester quotations were abnormally high throughout the year, and sales were more or less confined to the disposal of stocks at fully 10 per cent.

confined to the disposal of stocks at fully to per cent. below replacing cost.

Owing to the outbreak of plague in the Tokyo "Gassed" Yarn, Mill early in January, importers were placed in an advantageous position which they held during that month and the next. With the resumption of work by the native operatives, however, sales immediately fell off and were almost null in March-May. Rates were maintained though, with a strong cotton market to support them, and sellers, for the most part, were proof against the temptation to dispose of their stocks wholesale. Clearances were at their best in June, and brought a short period of activity. of activity.

of activity.

This was followed by a break lasting through August-September, and, though there was a temporary improvement later, political difference between Japan and Russia caused a depression which rought business to a complete standstill in December. Sales in the principal counts were approximately

16/24's. 2/60's. 2/80's. 2/100's (liales 400 lbs.) 25 744 949 210
GREY SHIRTINGS — High producing cost restricted business considerably, and the aggregate of packages imported was only about 60 per cent, of that in the previous year, when, however, the article was probably overdone. Fear of a surfeit continually haunted the minds of dealers who adopted a policy of weakness. Prices obtainable were therefore unsurfeit for the product of satisfactory, and importers found difficulty in clearing their holdings with a margin. Stocks carried over to 1904 amount to some 145,000 pieces. Compara-

tive imports are :-

	T ICCCP
1903	463,743
1902	
1901	
1900	
1899	748 820
1808	8 48.630

WHITE SHIRTINGS .- Apparently the market can only absorb about 120,000 pieces per annum, and, as importers do not realise this, the supply is nearly always greater than the demand. Although in 1903 arrivals were only about one-half the above quantity, for ten months sellers had to contend with a glut. As soon as there was room for further commitments the prohibitive price of American cotton made them

FANCY COTTONS AND WOOLLENS.

UNION ITALIANS.—Business in this class of goods shows a falling off, when compared with the previous year, of about 10 per cent. This is in a great measure attributable to the increasing popularity of Silk finished, Schreinerized, or Mercerized cotton goods.

finished, Schreinerized, or Mercerized cotton goods. A few of the favourite cloths have been in demand to a certain extent, but the lower qualities are now seldom, if ever, asked for.

COTTON SATTEENS.—Trade in these goods was overdone, although importations show a decrease compared with 1902. The considerable carry-over from the previous year and fair-sized purchases at the commencement of 1903, were evidently more than the market can stand, and dealers generally have had to submit to considerable sacrifices before being able to clear their commitments. Prices were unsatisfactory on the whole, though there was a spurt in Schreinerized good, owing to depleted stocks, to in Schreinerized good, owing to depleted stocks, to-wards the end of the year.

Prints.—This has been an unsatisfactory business

to Yokohama importers, the volume of the trade done being less than half of that transacted in 1903. The second half of the year in the Print business proved to be one of disappointment, one of the principal reasons of this being a repetition of the unloading process in Tokyo of the speculatively bought Osaka stocks. Dealers have not made money out of Prints, and importers have suffered also owing to protracted deliveries.

deliveries.

Velyets.—A most unsatisfactory trade, with poor prices and wretched deliveries. It is very improbable that money has been made in the aggregate in this line, either by importers or native merchants.

Victoria Lawns.—A steady business throughout the year, with better prices ruling towards the end of the twelve months, owing to a diminution of stocks.

stocks.

CLOTH.—In woollens and worsteds trade in the country was bad. It is computed that over 15 per cent, less was done than in the preceding year. Late clearances, as is usual in this class of goods was again the cause of considerable loss to the importer.

the cause of considerable loss to the importer. Business generally in Fancy Goods was very disappointing, a combination of forces, namely, dear cotton, the bad rice crop of 1902, political troubles, and fear of war, together with the withdrawal of normal banking facilities to the native dealer, resulted in a general disinclination to trade in any but a hand to mouth fashion, and the destruction of that confidence on the part of importer and dealer alike which is so noticeable during a year of good trade conditions. conditions.

FANCY COTTONS.

WOOLLEN CLOTH.—The past year may be considered normal, and fairly satisfactory on the whole. The spring market opened well, and imports found a ready safe from March to May, and by the end of the spring season only small stocks were left with Yokohama importers. The orders for spring 1904 showed a decrease when compared with those of previous seasons owing to a rise in the home market, to which Japanese importers in many cases refused to respond.

to respond.

At the opening of the winter season, imports seemed rather small, and clearances were brisk in Septemed rather small, and clearances were brisk in September and the first half of October, but falling off gradually and resulting in a dult market at low rates towards the close of the year. This change was due (1) to old stocks from 1901 and 1902, which were offered at considerably lower figures than new imports and frequently sold at heavy losses; (2) to a large number of auction sales, when goods are disposed of on long credit and retailers over-buy themselves; and (3) to an unusually large quantity of stock thrown on this market from Osaka (chiefly low erade).

Undelivered stocks at the end of the winter were rather heavier than last year, and will no doubt influence the coming autumn market.

influence the coming autumn market.

Forward orders were given on a smaller scale than usual owing to the political situation, which made native speculators and foreign firms hesitate before placing and accepting new orders, but still, contracts placed together with stocks on hand may be expected to fully meet the demand.

Cheap Army Cloth continues to be favoured as against President and Union Cloth, and in better grade Worsteds no particular line can be said to have been in fashion during the past season, while dealers seemed quite undecided as to qualities and shades for their forward orders.

FLANKELS—Native manufacturers compete suc-

FLANNELS.—Native manufacturers compete successfully with the imported article, and this trade is more or less finished for importers.

BLANKETS.—Owing to the political situation there was a good demand towards the end of 1903, but the bulk of the trade was done in the native-made product.

METALS.—It will be seen from the Customs Returns that the trade in almost all lines has been greater for the period under review than for the previous year. The most important feature in connection with the Metal trade bf 1903 is that native importers have figured in it to a much larger extent than in former years. This has resulted in a number of foreign merchanis withdrawing from the field, as with the increased competition the profits to be obtained were not sufficiently attractive. METALS. -It will be seen from the Customs

The demand throughout the year was fairly good, and probably above the average, and especially was this the case during November and December. The increased activity was undoubtedly due to a speculative demand in anticipation of war, and as a result stocks were moved at fairly remunerative

BAR IRON.—Imports amount to about 29,700 tons, which is a slight advance over the business of the

PLATES AND SHEETS.—The above remarks also apply here. Imports about 11,700 tons.
PIG IRON.—Imports of this article were about 50 0/0 in excess of the previous year.
WIRE NAILS.—Here also a large increase is notice-

Digitized by Google

able, the imports amounting to piculs 141,466 as against piculs 70,768 for the year 1902.

against piculs 70,768 for the year 1902.

KEROSENE OIL.—Since the beginning of the year under review prices have gradually advanced, American Oil having reached a level of 40 to 50 ten a case, and Russian Oil 35 to 40 sen a case higher than the highest point touched in 1902. The price of American Oil was yen 2.84 in January, and it gradually advanced during the year to 12th 3.35 in December whilst Russian Oil showed a fluctuation from yen 2.70 to 12th 3.03 during the same time. The natural result of these advances was a slight decrease in the trade. In spite of this decrease, however, business has been entinently satisfactory from the importer's point of view, and although the number of cases consumed may be rather less than last year, the amount of the turnover is probably last year, the amount of the turnover is probably in excess, owing to the enhanced prices obtained. As will be seen by the tables below, deliveries of American Oil have decleased by about 28,000 cases, whilst Russian Case Oil has increased by about 17,000 cases and Tank Oil by about 109,000

Cases.

Business in Echigo Oil appears to have been nearly the same as last year, viz., 1,500,000 cases, dealt with chiefly by the Hoden Oil Co., to the extent of 700,000 cases, the Nippon Oil Co., 400,000 cases, the International Oil Co., 300,000 cases, and sundry small companies 100,000 cases. It appears certain that several of the old wells have given out and their place taken by fresh burgings.

place taken by fresh borings.

Considerable attention has been paid during the year to prospecting in Hokkaido, where the International Co. have acquired territories said to amount to 100,000,000 (subbo, of which part is said to be very hopeful. The Hoden Co. are now also interesting themselves in this part of Japan, and have started boring and making explorations. The same company also have oil wells in Formosa, but it appears that operations are conducted in such a primitive manner that it cannot be said to have much value at present. Considerable attention has been paid during the

present.

As regards Liquid Foel, which was successfully tried on the Imperial Government Railways last year, business has been much restricted owing to a considerable advance in price.

The arrivals and deliveries of American and Russian Oile ware

Sugak.— This has been, perhaps, the worst of the
last ten years for Refined Sugar (especially Hongkong Refined), sales having been very considerably
less even than in the previous year, and quotations
at times so low that refineries have had \$\omega\$ sell without profit merely to keep in touch with consumers.
On the other hand, there was a very active market
for Brown Sugar, especially during the first four
months, although the ample stock then in hand prevented prices from advancing in proportion to the
demand. During the summer months the arrivals of
Refined foreign Sugar were small, increasing the
demand for the native article, and prices consequently advanced in August-September. The
market, however, became dull again towards the
close of the year, though the threatening state of
political affairs promised to bring about a fair speculative business. The total sales of Hongkong Refined Sugar during 1903 amounted to less than 40
per cent, of those of the previous year.

PLANT INDIGO.—During the first three months of
the past year, trade in Plant Indigo was brisk, and
this led to the market being freely supplied from
India and Java, and the total value of the import
was in excess of 1902. Prices commenced to decline
in April, and the downward tendency continued until

India and Java, and the total value of the import was in excess of 1902. Prices commenced to decline in April, and the downward tendency continued until September, when a slight reaction set in, and demand improved. The improvement, however, was shortlived, and the last few months of the year witnessed a sharp decline in values, due principally to the competition of Artificial Indigo, which has been forced upon the market at ever declining prices. The outlook for Plant Indigo for the coming year is not promising. promising.

Promising.

ARTHFICIAL INDICO.—The increase of the import of Artificial Indigo during the year under review has again been remarkable as shown in the following

Year.	Kin.	Value yen.
1898	613	3.395.71
1899	13,113	51,892.32
1900	30,899	111,390.08
1901	76,709	246,579.15
1902	323,316	997,069.55
1903	463,025	1,345,024.87
During 1002 further	price redu	ctions have take

place, and to-day powder containing about 97 per cent. indigotine can be had almost at yen 2 per lb. against a price of yen 2.70 per lb. at the end of 1902, so that the artificial product compares very favourably with any Plant Indigo. Divers therefore prefer the synthetic stuff, and many Indigo dealers who are really against the artificial product are compelled to sell it, as otherwise they would lose customers.

The bitter contest between the natural and artificial dye is at its highest. There are now two large rival factories pushing their artificial Indigo here, and the result of their energetic movements can hardly be to the advantage of Plant Indigo, of which large stocks at high cost are still kept unsold.

FREIGHTS.—The rates for Europe at the close of 1902 were maintained throughout 1903 for general cargo, namely, 50 shillings (45 shillings for B class, 40 shillings for C class). But for Waste Silk per 40 cubic feet, which had stood for some time previous at

cubic feet, which had stood for some time previous at yen 27.50 declined to yen 22.00 and continued at that rate till the end of the year.

For New York, vià Canal, the rate opened in 1903 at 25 shillings and remained so till June, when 20 shillings became the figure, but in August it was again put up to 25 shillings and remained so till the close of the year.

For the Pacific the freight on Tea, which closed in 1902 at 1 ½ cent per pound, continued throughout 1903 at the same rate. Measurement cargo for New York and Overland points opened at \$10 per 40 cubic feet and continued so until November, when \$8 became the rate for the remainder of the year.

RAILWAYS.—But little progress was made in rail-way extension during 1903, the new mileage opened of both Government and private railways being only 111 miles. It had been anticipated that foreign capital would have been obtained for the prosecution capital would have been obtained for the prosecution of schemes for improved communication, surveys having been made and chatters granted for a considerable addition to the mileage now in operation, but the security offered to foreign capitalists by railway promoters appears to have been unsatisfactory, and consequently the required assistance was not forthcoming. There was a falling off in the passenger traffic on both Government and private lines during the year, but a slight increase in the receipts the latter fact is due to the raising of rates. The goods traffic makes a better showing by the carriage of 1,712,919 tons of freight more than in the previous year, which increased the receipts by 3,894,882 year. Following are the figures for the year under review:—

	Total Miles.	Hileage, Chains		overthe is year. Chains
Government Railways		56	167	8
Private Railways	3,010	60	44	12
Total	4,237	36	211	20
	1	Passengers No.	R	rceipts. Yezi.

THE GOLD STANDARD	—Th	e Gold	Stand	lard of

Japan, which has now been in operation for over six years, having come into force on the 1st October, 1897, continues to work smoothly and to facilitate trade, affording great convenience in all transactions with foreign countries.

with foreign countries.

The Gold Reserve of the Bank of Japan, which at the commencement of the year under review stood at Jen 108,033,000, against a Note issue of yen 230,809,000, rose steadily between the months of March and September, and by the end of the year stood at yen 113,384,000, against a Note issue of yen 211,896,000. These figures, compared with the position at the end of each of the four previous years, as shown below, will be regarded as very satisfactory:

Gold Reserve. Note Icene

Gold Reserve.	Note Issue

	yen.	yen.
1903	113.384,003	211,896,000
1902	108,033,000	230,800,000
1001	68,500,000	186,000,000
1900	66,000,000	215,000,000
1899	110,500,000	225,000,000

It is noteworthy that, notwithstanding the balance of trade for the year 1903 being yes 27,633,000 against Japan, the imports of Treasure exceeded the Exports by yes 8,806,000.

The following table gives the Imports and Exports of Gold during the past eight years, and embraces the whole period affected by Japan's adoption of the Gold Standard:—

		Imports.	Exports.
		Yen.	Yen.
1896	,	10,217,458	1,996,575

2/0¾ on the 12th January

2/0½, ... 15th ...

2/0½, ... 20th ... at which it remained stationary until the 19th May when an advance of ½th of a penny took place, followed by another ½, th on the 29th idem. There was no futher movement until the 1st September, when a rise to 2/0½ occurred. This quotation remained in force for over two months, but on the 7th November there was a sudden decline of ½th of a penny to 2/0½, and on the 12th November a further fall to 2/0½. There was, however, a recovery of ½th on the 20th November to be followed by a decline again to 2/0½, on the 9th December, and a further fall to 2/0½ on the 24th December and to 2/0½, on the 29th. and to 2/0,6 on the 29th.

Accounts.—The accounts have been audited by Messrs. J. Cox-Edwards and A. J. McClure. These show a balance, including the dependency set down in the printed statement, of yen 3,665,12 against yem. 3,290.71 in the previous year.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

REVOLT OF ALBANIANS.

London, March 25

Ten thousand Albanians have revolted at Baba Tepe. Shakir Pasha with twelve bat-talions is surrounding them and ten other battalions are hastening to his assistance from various points.

NEW KNIGHTS.

King Edward has knighted the sons of the late Duke of Cambridge.

CHINA DENOUNCES THE EX-CLUSION TREATY.

Later.

In spite of strong American opposition China has denounced the Chinese Exclusion Treaty which expires on Dec. 27th.

SIR EDWIN ARNOLD DEAD. Sir Edwin Arnold is dead.

THE ANGLO-FRENCH AGREE-MENTS.

With reference to the Anglo-French greements mentioned in the telegram of March 17th, it is understood that those which relate to Newfoundland and Nigeria have been completed. France renounces all territorial claims in Newfoundland, and England agrees to pay a small compensation for a few lobster canneries on the "French coast." Great Britain makes the concession of owning a French short cut to Lake Chad. With regard to Morocco and Egypt each party engages practically not to stand in the way of the other, but the committal of this to paper is difficult.

FRANCE AND THE VATICAN.

London, March 26.

France has vigorously protested at the Vatican against the speech delivered by the Pope on the 19th inst.

THE BALKANS.

Turkey continues her preparations for all emergencies in Macedonia. Greece has

ADMIRAL WIRENIUS' SQUADRON.

The Russian cruiser Oslabia and two destroyers have arrived at Algiers from Suda Bay, and will probably proceed to Lisbon on Tuesday next.

THE UNIVERSITY BOAT RACE.

London, March 27.

Cambridge won by four lengths WAR MOVEMENTS IN KOREA.

It is stated in St. Pctersburg that a considerable Cossack force is operating on the south-east of the Japanese communications between Anju and Pingyang with the object apparently of preventing a junction between the troops landed at Chinnampo on the west and Gensan on the east.

CANADA AND JAPANESE IMMIGRANTS.

The Dominion Government has disallowed on imperial grounds three acts passed by the Legislature of British Columbia, imposing restrictions on Japanese.

THE FIRST LAND ADVANCE

London, March 27. It is reported from St. Petersburg that the Russian troops between the Yalu and Pingyang have been compelled to retire on an entrenchment on the south bank of the Yalu, before the first Japanese army of 40,000 men, whose advance guard, with artillery, oc-cupied a fortified line of forty-five miles, extending from Kazan, Anju, and Yengying to Pek-chen.

A further advance is improbable till the streams are clear of ice, as the retiring Russians destroyed the bridges over five rivers along the road to Wiju.

KUROPATKIN.

London, March 28.

General Kuropatkin has proceeded to Mukden.

VLADIVOSTOCK.

It is announced at St. Petersburg that a proclamation has been issued by the Commandant of Vladivostock in which he urges the inhabitants to remain, but only those will be allowed to stay who possess the specified amount.

It is calculated that there are cereals to last for eight months in Vladivostock. The banks are closed and no money is circulating

LORD CURZON.

Lord Curzon has been appointed Warden of the Cinque Ports.

BRITAIN AND NEWCHWANG.

London, March 29.

Earl Percy, speaking in the House of Commons, said that the British Consul at Newchwang had urged the importance of maintaining a warship there, but Admiral Sir Gerard Noel agreed with Sir Cyprian Bridge that such a step would not be

THE LAND FIGHTING.

London, March 30,

It is reported from Seoul that an engage-ment took place on March 23rd between a detachment of Japanese infantry and a force of Cossacks between Anju and Chong-The Japanese were victorious, the Russians retiring slowly. The Japanese had fifty killed; the Russian loss is unknown.

(RECEIVED AT THE LEGATION OF FRANCE.) THE LATEST NAVAL ENGAGEMENT.

Saigon, March 24. St. Petersburg reports that during the night of the 21st-22nd six Japanese destroy-

called out one class of reserves, ostensibly ers attacked Port Arthur. The Japanese squadron bombarded it in the morning, discharging 208 shells without doing any Five Russians were killed and 9 wounded. A Japanese war-ship was injured.

(RECEIVED AT THE FOREIGN OFFICE) MAKAROFF'S REPORT.

Admiral Makaroff reports: At 2 a.m. on the 27th four large Japanese steamers, accompanied by six destroyers, were brought into the field of the Russian search lights. As they were making for the mouth of the harbour we opened fire on them and ultimately three of the Japanese steamers went ashore on the right of the harbour entrance, and one on the left, obstructing the fairway. The Russian destroyer Silni fought with the six Japanese destroyers, and had several men killed and 13 wounded, among the latter being the commander. At dawn the Japanese squadron stood in, and the Russian ships went out to meet it, thus showing that the Jap anese enterprise had failed.

(SPECIAL TO "JAPAN MAIL.") U.S. CONSUL AT KOBE II.L.

Kobe, March 29.

(FROM THE "JIJI SHIMPO.") LIAO-TUNG NEUTRALITY QUESTION

London, March 24. Russia has endeavoured to induce the United Russia has endeavoned to mande the coned States Government to consent to neutralizing Newchwarg and the western coast of the Lino-tung peninsula. The object of Russia is to prevent the Japanese from landing forces or making their military bases there. America has declined to consent to the request of Russia on the ground that it will amou lanan. will annoy Japan.

SIR EDWIN ARNOLD,

Sir Edwin Arnold is dead. His age was seventy-

THE RUSSO-JAPANESE NEGOTIATIONS

London, March 25 With reference to the correspondence regarding the negotiations between Japan and Russia which was recently presented to the Diet, the London Times states, that the earnest wish of Japan to obtain the consent of Russia was carried so far as to be almost servile, but Russia refused her claim. The paper believes that Russia never expected that Japan would embark

upon war.

According to information from Russian sources the Russians believe that the Japanese forces will land at Chin-wang-tao.

THE SECOND BLOCKING OPERATION,

London, March 27.
Early on the morning of the 27th the Japanese again attempted to block the mouth of Port Arthur by sinking four steamers, and severe fighting occurred between the destroyers of both ficets. According to official information issued at St. Petersburg, the enterprise of the Japanese failed, the entrance being still clear.

THE RUSSIAN SQUADRON AT PORT ARTHUR,

Admiral Makaroff reports that he started out from Port Arthur on the morning of the 26th (Saturday) accompanied by battleships, cruisers, destroyers, etc., and reconnoitered the adjacent islands.

NAVAL AND LAND FIGHTING

According to a telegram from Chefoo to an Italian of Admiral Makaroff has fought the Japaness seventy miles east of Port Arthur, the result being that the former retired to the port after sustaining

mage.
The Russians have withdrawn over the Yalu before the First Corps of the Japanese army consisting of forty thousand.

GENERAL KUROPATKIN.

Russian Naval officers are on their way to Finme, Austria, to take delivery of Whitehead torpedoes which are to be employed by the Pacific Squadron. GENERAL KUROPATKIN.

General Kuropatkin has arrived at Lino-yang-NEWCHWANG.

The chief of the Russian Civil Office at Newchwang has proclaimed the port of Newchwang and the town to be within the zone of hostilities. The Consuls of the Powers are awaiting the instruction of their ministers.

(FROM THE " ASAIH SHIMBUS." THE JAPANESE WHITE-BOOK.

London, March 25.
Public opinion regarding the Japanese White-book is entirely favourable to Japan, whose offer respecting Manchuria is considered magnanimous.

ADMIRAL WIRENIU'S SQUADRON.

Admiral Wirenius' squadron has been ordered to remain at the Pineus, under the friendly neutrality of Greece.

A FRENCH MILITARY ATTACHE.

Colonel Marchand has been attached to General Kuropatkin's Staff, in order to follow the military

PROBABLE MOVEMENTS.

Military experts generally believe that the Japanese will land at Newchwang.

RUSSIAN TROOPS.

London, March 26. Russia has declared that a bundred thousand soldiers have been sent to the Far East by the Sibe-

THE ASIATIC TRADE OF RUSSIA.

London, March 26.

Russian trade is greatly impeded by the suspension of the transportation of merchandise by the Siberian railway. The traders of Moscow intend to carry on their business with Asia over the routes which they had employed before the construction of the railway.

TURKEY.

Demonstrations sympathizing with Japan are taking place in Turkey.
THE "TIMES" AND JAPAN.

London, March 28.

The war expert of the London Times earnestly advises Japan not to land her troops at places remote from Manchuria.

. THE DONATION.

The amount donated by the British towards the fund to relieve the widows of soldiers and delivered to Viscountess Hayashi has reached £12,460.

(FROM THE " N.-C. DAILY NEWS.") THE SUBMARINE DISASTER.

London, March 21. It is officially announced that an examination of the hull of the sunken submarine proves that there was no defect in her, and the sinking was clearly due to the collision with the liner.

The exposed position of the wreck prevents lifting her, and she will be repaired and then floated.

PLAGUE IN THE TRANSVAAL.

l'ague has broken out in the coolie location at Johannesburg, and there have been several deaths. BRITISH MISSION TO THIBET.

The Thibet mission is to advance immediately. THE LATE DUKE OF CAMBRIDGE

A military memorial service of an impressive character was held at the Hongkong Cathedral today in honour of the late Duke of Cambridge, as Honorary Chief Colonel of the Forces.

Rev. E. J. Hardy, the army chaplain, officiated, and the attendance included the Acting Governor, General Hatton, Admiral Noel, Admiral Curzon Howe, the Foreign Consuls, and the members of the Legislative Council.

THE VOTE OF CENSULPS

THE VOTE OF CENSURE IN PARLIAMENT.

THE VOTE OF CENSURE IN PARLIAMENT. Sir Henry Campbell-Bannerman, in moving the vote of censure with reference to the Transvaal Chinese Labour Ordinance, said that the British workmen in the Transvaal would be snuffed out by the biggest scheme for human dumping since the middle passage was abolished. The scheme in many respects, he said, was indistinguishable from slavery, and he demanded the deliberately expressed views of the Transvaalers.

The Hon. A. Lyttleton. Colonial Secretary, said that the Government would not have given its assistance to the ordinance unless a preponderating manner.

GENERAL KUROPATKIN.

General Kuropatkin left Harbin yesterday for lukden.

RUSSIAN TORPEDOES.

London, March 28.

According to information from St. Petersburg, in each village a month before the recruiter arrived,

and the labourers would receive at least twelve or fifteen times the wages they samed in China. denied that Chinamen are immoral.

(From the "Hongkong Daily Press.") THE THIBET MISSION.

The Thibet Mission has been overtaken by a blizzard. The cold was intense, and for 36 hours there was no food to be had.

PORT ARTHUR.

London, March 17. General Kuropatkin has ordered Admiral Stoesset to hold Port Arthur. The General intends to place 250,000 troops on the Yalu and to guard the railway

with 150,000. (FROM THE "S.-C. MORNING POST.")

RUSSIAN WAR NEWS London, March 13. Admiral Makaroffs arrival at Port Arthur on the

Admirat Makaroli's arrival at Fort Arthur on the 3rd inst., has inspiringly affected the officers and men of the Russian fleet.

He only took over command on Wednesday, the 9th inst., but he immediately made his influence flee the reports that the crews of the Russian men-of-war were perfectly cool during the fight and the work on board is proceeding as usual despite the rain and fragments from bursting shells. and fragments from bursting shells.

London, March 14.

Order have been received at Kronstadt to begin the arming of the warships preparatory to their leaving for the Far East.

for the Far Fast.

The fifteenth Russian Army Corps will leave
Moscow for Manchuria in a few days.

The tenth Army Corps will also shortly leave

Charkoff for the front.

The Czar of Russia has announced that the

The Czar of Russia has announced that the German and French Red Cross Societies have offered active assistance in the present war to the Russian troops, which he has accepted.

The Hamburg-America steamer Pennsylvania left Hamburg with 2,200 steerage passengers. They were mostly Russians, Poles and Finns, escaping from Russian territory for the purpose of evading military exprise in the Parasit Supportion.

military service in the present campaign.

The Russian authorities succeeded in stopping a number of others who had brooked by the Pennsylvania at the moment of their leaving Russia.

and others.

and others.

THE PUBLIC 77: LE MAIRE EMILE.

The first trial before this newly-established tribunal provoked much interest, and the Court Room, 17: The Bund, was crowded with brokers and bank clerks from the adjacent establishment which were closed for an "extra" holiday to mark the occasion. Anti-pating a reform which we understand is to be introduced "in another place," a thoughtful management provided sandwiches and lemonade in an adioping apartment, which had lemonade in an adjoining aparament, which had been carefully labelled "Reserved for the Bar." In the Courtroom itself the last few specks of dust had been removed from the President's neally-ordered table, immediately beneath which a comfortably

upholstered armchair, facing a pile of note-books, three quill pens, an inkstand and a small flask of Aquarius, marked the seat of the Court Stenographer. The remainder of the Pressgang, several of whom had hurriedly shaved, constituted the jury and were

A tap on the table by the President with a pair of silver scissors, and the defendant was led in by the foreman locker-up. He was wearing a pallid smile, a fiercely curled moustache, and a pink how. He kowtowed three times to the Court and was then permitted to seat himself on an inverted waste-paper basket.

Mr. Orlando Ryte appeared to conduct the p secution and Mr. Cawnpore O'Shady was for defendant.

defendant.

The petition put in was very brief. It formally recited that the defendant being a citizen, etc., of full years of discretion, etc., resident at Shanghai aforesaid, etc., and being in sole charge and control of ecertain public print, did knowingly, willingly, and of malice aforethought omit to supply the public, his patrons, with full particulars, plans, illustrations and eye-witnesses narratives of the fall of Port Arthur, to the loss, detriment and damage of the said public.

The answer admitted that the information called for had been withheld, but pleaded in justification

The answer admitted that the information called for had been withheld, but pleaded in justification that there was reason to question whether Port Arthur had actually fallen. In further answer it was pleaded that the defendant had published fuller accounts than any other paper of the glorious victory achieved by a Russian cruiser off Chemulpo on the 7th February, It had also demonstrated clearly that David in an historic engagement took an unfair advantage over his opponent Goliath by attacking him with a weapon of barbarism, to sit a sling, and without a previous declaration of war.

During the reading of the petition and answer de-

During the reading of the petition and answer de-indant was observed to be weeping silently. Mr. Ryte opened the case in measured hexame-

ters, which at once had their effect on the jury, who ordered another "case" forthwilt, Proceeding, he proved by a series of paragrams, supported by copious citations from the Desk Hong List, that the first

Mr. Osnady asked what bearing this had on the petition put in.

Mr. Ryte said be was coming to that. The defendant had deliberately and designedly refused to comply with the section quoted, and had wasted valuable ink and paper on an "Address to the Mandiour.

The Court ruled any reference to Japanese cruisers at Woosing to be irrelevant, incompetent, and im-

Mr. Ryte said he would not pursue the point. He

Mr. Ryte said he would not pursue the point. He had said enough.
Mr. O'Shady—Hear, hear.
The Court pleaded with counsel to maintain order.
Mr. O'Shady said he was congratulating himself on finding himself in agreement with his learned friend.
This amende honorable was accepted.
Baron Monchausen, called for the prosecution, said he had searched through the file of defendant's paper since the beginning of the century and found no mention of the annihilation of St. Petersburg.
Cross-examined—He had just arrived from a ten

no mention of the annihilation of St. Petersburg.

Cross-examined—He had just arrived from a ten
years' holiday at the North Pole and met a Baltic
squadron under full steam in the Arctic Ocean.

Mr. L. de Rougemont said he had never felt so
vellow before as when reading defendant's paper.

It made him wish he had been a journalist.

This witness was immediately added to the jury.

Mr. O'Shady said that after the unanswerable
evidence put in by the prosecution, he had advised
his client to plead guilty and to throw himself on the
Court. There were extenuating circumstances, which Court. There were extenuating circumstances, which

Court. There were extenualing circumstances, which the jury could not fail to uncover.

The jury, without leaving the box, returned a unanimous verdict, hononrably acquitting the accused.

The President that ked the jury for the close attention they had given to a particularly simple case and excused them from reading defendant's paper for a month of Sundays.

Defendant failured by recovered on being taking

Defendant fainted but recovered on being taking

into the Bar enclosure.

RUSSIA AND AMERICA.

St. Petersburg, March 4.
The Russian press hailed with great satisfaction the American dispatches of the last few days as indicating a change in the disposition of the Washington Government toward Russia. The Bourse Gazette

and the Novoe Vremya this morning discuss in a sober-minded fashion Russo-American relations and

and the Novoe Vremya this morning discuss in a sober-minded fushion Russo-American relations and the danger of a permanent estrangement. The Binnse Grazette says there is something profoundly regrettable in the present relations between these two world powers and continues:

"They transcend the bounds of common logic. The position taken by America since last June and the anti-Russian newspaper campaign in the United States are so inexplicable that they seem like a nightmare. Since the beginning of its history America has inspired the liveliest feelings of friendship and admiration among Russians, and diplomatic and political expressions of these feelings have been continuous and constant. In Russian social circles there has ever been a veritable worship of the classic land of liberty, and the Americans have always heretofore made Russian friendship the corner stone of their foreign policy. Suddenly, as if an evil spirit had broken loose, the Americans, despite their practical turn of mind, began to do everything to stimulate Japanese aggressiveness, and seem now to be anxiously awaiting Japanese victories. seem now to be anxiously awaiting Japanese victories in Asia, where important American commercial interests are centered. As a matter of fact, hostility between the United States and Russia would be as

between the United States and Russia would be as great a misfortime to civilization in the twentieth century as was the rivalry between France and Germany in the nineteenth. The duty of every rightminded man is to arrest the growth of this animosity.

Russian diplomacy owes it to the Americans and to the whole civilized world to do its utmost. We are not called upon to re-echo hostile sounds coming from beyond the Atlantic, because the unfriendly sentiments do not exist among us. The latest advices permit the belief that it will be much easier to remove the misunderstanding than the enemies of Russia may think."

The Novoe Vremya says it does not know whether

may think.

The Novoe Vremya says it does not know whether the Washington Cabinet influenced such incidents as the gift of \$10,000 by Charles R. Crane of Chicago to the young Czarina's fund for Russian soldiers and sailors, the pro-Russia Irish demonstration in New York and the quieter tone of the business press, but ous citations from the Desk Hong List, that the first essential is an editor was a knowledge of a proper the paper believes it notes an important change in Land and the guieter tone of the business press, but essential is an editor was a knowledge of a proper the paper believes it notes an important change in American official tactics beginning with a disinclivivid imagination. By the Statue of Manila (2nd Rsvlt. cap. 1, sec. o1) it was definitely laid down that "in any war between the Imperial Government of the Rising Sun, it shall be lawful to summise not wore than three United States Consults to Antung and Moukden at victories per diem, to suit the susceptibility of readers, and any paper neglecting to record the sinking of a battleship at least once a week shall be subject to summary extinction."

Mr. O'Shady asked what bearing this had on the pair and the quieter tone of the business press, but the session to fall what an important change in American official tactics beginning with a disinclination to favor the Japanese cable project, followed the anti-Russian press campaign, which disposition was further proved by his not insisting on dispatching use further proved by his not insisting on dispatching this time, which quite agrees with President Roosevel's decision to allow Morgan (appointed United States Consult at Port Dalny) to remain at home for the present and not to send the battle-ship Kentucky to the scene of hostilities in the Far East. The pretition put in. adde .

paper adds:

"We are certain that this change is as agreeable to the Americans as it is to us. The antagonism of "We are certain that this change is as agreeable to the Americans as it is to us. The antagonism of Washington distressed but did not frighten us, for things could not come to a rupture, as prudence must end always in dominating impulse, and there being no serious reason for a quarret. The practical Yankees must realize that the telegram of the American Consul at Moscow to Chicago, to the effect that American business in Russia was suffering by reason of the amir-Russian feeling said to exist in the United States, illustrated the feelings not only of the Moscow merchants but of all branches of the Russian trade. What he predicted happened in the case of England after the Crimean war. Germany stepped into the British shoes."

In conclusion the Nowe Vrenya says:—"All is well that ends well. If the light cool fog which has been hanging over Washington is dispelled, and the good old feelings return, we shall be the first to welcome them."

welcome them.

EXPORTS. RAW SILK.

A small daily business continues. Quotations are nominally unchanged. Good silks are worth good money, while inferior parcets can be had at a reduction. Spring reelings are now coming in, but on the whole are not of very desirable quality. Advices from Lyons are dull and dispiriting, but they seem willing to take silk at a price all the same.

Dry Thin and Falling Hair and Red Rough Hands Prevented by

ILLIONS use Cuticula Soaf, assisted by Cuticula Ointherf, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. Cuticula Soaf combines delicate emollient properties derived from Cuticula Ointherm, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus II combines in Ore Soaf at One Paice, the nest skin and complexion soap, and the beet toilet and ILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT, PRICE, the BEST skin and complexion soap, and the BEST toilet and baby scap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of cruets and scales, and soften the thickened cuticle; CUTICURA ONTMENT, to instantly allay itching, inflammation, and irritation, and southe and heal; and CUTICURA RESOLVENT PILLS, to ceel and cleanse the blood. A SINGLE SET is often sufficient to cure torturing, disfiguring humanns, exceeding, reshes, and irritations, with loss of hair, when all else fails. Soid throughout the world. Australian Depot: R. Towks & Co., Sydney. British Depot: 27-29, Charterbouse Sq., Lendon. French Depot and Chem Corr., Soil Fropx., Boscov, O.S.A.

Field, M.A., FRANCIS JAMES HALL, fourth son of the Rev. T. O. Hall, of MADDE SUCKLING BARON, Youngest daughter of the late Rev. W. J. Baron, of Withybrook Vicarage, Coventry, England.

SUMMARY OF NEWS.

construction at the Kawasaki Shipbuilding Yard, Kobe, has been completed.

A TELEGRAM from Ujina states that a steam launch took fire on April 3rd in the harbour. The hull was destroyed.

A WOMEN of about twenty-two years of age, well dressed, committed stricide at noon on March 30th on the railway near Shinagawa.

A TELEGRAM from Shidzuoka reports that two hundred kwamme of new tea have been put on the market, the price being forty yen per kwamme.

The Nippon Yusen Kaisha has purchased the British steamers Mogul and Afridi and renamed them the Jinsen Maru and the Kirin Maru respectively.

The amount donated to the Gunjin Kyugo-kai (society for succouring the distressed families of soldiers -at the front) now aggregates yen

Kato, a soldier of the third regiment of cavalry Nagoya, committed suicide on March 30th. The cause was that his application to go to the front

MR. KNIGHT, war correspondent of the London Times, and seven others arrived on April 5th at Shimonoseki on their way to Korea. They were to leave on the following day

An old woman the wife of S. Nakamura, a fisherman at Haneda, near Kawasaki, committed suicide on April 3rd by hanging herself. Poverty is reported to be the cause.

THE members of the Nobles' Club were to hold a meeting on April 7th at 3 p.m. when Lieut.-Commander Ogasawara of the Navy was to give a lecture with regard to the present situation.

Two cases of typhus are reported in the spinning factory at Honjo, Tokyo, the patients being female workers about sixteen years of age. Two cases of scarlet fever are also reported in Tokyo.

It is reported from Montreal that the Russian Government has offered the management of the Trans-Siberian Railway to Mr. William Whyte, the second Vice-President of the Canadian Pacific

A HAKODATE telegram announces that an en-gineer of a French sailing vessel, which arrived there on March 30th f.om. New York, has been attacked by cholera. The patient is under treatment.

MR. ISRAEL PUTNAM has announced the severance of his connection with the Manila Cablenews, which, from the 8th inst., has been leased to Mr. Frederick O'Brien, former business manager of that journal.

THE British steamer Ningchow arrived on March 30th at Nagasaki with sixteen hundred tons of cargo for Vladivostock. Among the goods, contraband of war was found, which the authorities are examining.

About fifty members of both Houses have applied to the authorities for permits to go to the front to observe affairs in Korea and Manchuria as well as to witness the land operations. Permission is reserved.

Over seven hundred farmers of the villages of Nogi and Koga near Utsunomiya who are opposing the construction of the canal at Shimo-tsuga,

authorities dispersed them, advising them to elect a few delegates for the purpose of presenting their petition.

BUN AOKI (47) and her daughter living in the district of Aiko, Kanagawa prefecture, committed suicide on April 4th by jumping into a well. Leprosy, from which they had been suffering for several years, is reported to be the cause.

A FATALITY occurred on board the P. and O. steamer Palawan on her passage from Penang to Hongkong. As the vessel was leaving Penang, Hongkong. As the vessel was leaving Penang, Thomas Wallace, a stoker of the first class, naval rating, jumped overboard and his body could not be recovered.

THE German cruiser Hansa arrived on March 27th at Chin-wang-tao from Taku. Many of the crew were permitted to land. A Chefoo telegram reports that a Chinese warship passed off the port on the morning of March 29th in an easterly direction.

THE libel case against the Chuo Shimbun filed by Mr. Ikariyama, chief of the Kaga-cho police, Yokohama, will be tried on April 13th in the Tokyo District Court. The action arises out of the trial of M. Takahashi, employed as a Russian spy, who was convicted in the Yokohama District Court.

Japan's consumption of American cotton has been rapidly increasing. In 1900 Japan used 348,406 baies of East Indian cotton and 278,725 bales of American cotton. In 1902 Japan used 437,466 bales of East Indian cotton and 166,617 bales of American cotton. This year Japan has not taken 50,000 bales up to date.

THE Nichi Nichi's Nagasaki correspondent states that about fifty workmen are now employed at Port Arthur in repairing the damage caused by the Japanese bombardment; and that the works at the barracks of the 18th regiment and a part of the offices of the Commander-in-Chief are now completed.

THE numinal editor of the Hesmin Shimbun was sentenced on April 5th in the Tokyo District Court to three months' minor imprisonment and the paper was suppressed. The charge was that March 27th it condemned the authorities for proposing increased taxes, in such a way that its statements were injurious to public order.

According to the Official Gasette, during the week ended March 27th, a hundred and thirtyseven cases of plague appeared in Formosa and eighty-eight proved fatal. From the first ap-pearance in January till the end of the same week the patients were calculated to be six hundred, and twenty one died.

PRINCE NASHIMOTO, who is a captain of infantry, arrived on the evening of April 4th at Yokohama by the steamer *Empress of India* from Vancouver. Marquis and Marchioness Nabeshina, Governor Sufu and various officials of the Kanagawa Ken-cho welcomed him. The Prince left by the 6.10 p.m. train for Tokyo. He has been in France studying military matters.

THE British steamer Fonar, owned by the Manchester District Shipping Company, arrived at Nagasaki at noon on March 30th with a full cargo from Cardiff. One of the ship's officers informed an interviewer that she was detained by a Russian cruiser and four destroyers on the Arabian coast, between Kunhidar and Port Mornington, in the Red Sea, at 4.30 p.m. on February 22nd last, and was boarded by Russian officer and four armed marines. The Russian officer inspected PRINCESS KUNI was delivered of a daughter on March 30th.

Again the Governor to stop the work. The Cyama police restrained them, upon which all papers, and allowed the steamer to continue on the torpedo-boat Hashitaka, which was under they left for their villages in procession. The her voyage after a detention of about 40 minutes.

PORT ARTHUR.

Friday, April 1. Accounts of the last blocking operation are beginning to come in. It is stated that at first the fire of the forts was very fierce, but the men in charge of the steamers, determined not to make a second failure, moved in steadily at the vessels' highest speed, not being deflected from their purpose in the smallest degree by the danger. When the steamers got closer in, it became impossible for the forts to fire on them freely owing to the danger of injuring their own men-of-war, and the Russians had nothing for it but to trust to their destroyers As to the statement that the Russian squadron moved out and attacked the Japanese, it is strenuously denied, but in fact no such statement was made by Admiral Makaroff. It may have been produced by the Mukden-

later and did not see anything of the Japanese. On the other hand, Admiral Makaroff's allegation that freedom of ingress was not at all impaired by the operation appears to be ridiculed in Japan. Freedom of egress had already been more or less impared even by the one steamer successfully sunk on the first occasion, and it is extravagant to pretend that 4 steamers sent to the bottom almost precisely in the manner designed have failed to accomplish anything. It is thought that if the Russian Admiral want of barbur subsquarts as he went out of harbour subsequently, as he says that he did, then probably he was carried by a destroyer and the squadron accompanying him consisted of torpedocraft only. The Japanese, it is easy to see and not difficult to imagine, bitterly resent the suggestion implied in the Admiral's recent the suggestion implied in the Admiral s recent to. Even the most timid must appreciate these points, and I warn you ultimo says that two Russian ships were give him battle in the open. Such a suggestion is manifestly extravagant. The Japanese squadron has been doing nothing all this their lives, these are the men that accomposition is manifestly extravagant. The Japanese squadron has been doing nothing all this their lives, these are the men that accomposition is manifestly extravagant. The Japanese squadron has been doing nothing all this their lives, these are the men that accomposition is manifestly extravagant. squadron has been doing nothing all this time but offering battle. On the occasion of the first attack the Russian ships steamed round and round in a circle, never going more than a mile and a half from the forts. They carefully avoided coming out into the open sea, and very likely their tactics were wise in the circumstances. Thereafter, as their own reports show, they never once went out of harbour during any one of the five engagements that have taken place, unless we except the occasion when Admiral Makaroff, emerging with the Askold and the Novik, saw one of his own destroyers sent to the bottom by the Japanese, and never struck in to her assistance, because-we follow his own account-she was surrounded by five Japanese cruisers. She can not have been surrounded by five Japanese cruisers for the simple reason that the engagement took place within the shadow of the forts, but even supposing that she was so sur-rounded, is it probable that naval history will applaud Admiral Makaroff's discretion? Men like Captain Trollope and ships like the Glatton are not to be looked for in every century, but we should be sorry to think that the unsuccoured fate of the Stereguschtchu is to be regarded as a normal incident of naval war-fare. And certainly it does not seem worthy of brave men to seek to spread abroad a belief that an enemy who has fruitlessly offered battle time after time, shuns

entrance of Port Arthur is 350 yards wide Asahi had chartered her, under guar-crew hesitated, utterly at a loss how and even though four steamers were sunk antee, for the purpose of patrolling the to proceed. But it was fortunately ob-

there at the best regulated intervals, they would scarcely prevent egress and ingress. Information. As for the assertion that a Then there is the possibility of subsequently Whitehead torpedo figured in the affair, the destroying them. It would seem that a Asahi's people deny it totally, and indeed it few charges of dynamite should suffice to that Japanese naval experts know what they pei became the recipient of 60 shells before are about. The steamer sunk in the fair-she went to the bottom. The Russians used way on the first occasion does not appear to have been yet blown up.

gressing vigorously.

It is now stated that the Russian destroyer put hors de combat by two Japanese torpedoboats on the 27th instant and subsequently seen at the base of the Hwan-kin-shan fort, so, two Russian destroyers suffered, for we can not imagine that Admiral Makaroft's But the falsehood may have emanated from Shanghai factory, but Admiral Makaroff reported that his ships went out some hours

account was incorrect. General Stoessel's general order addressed to the garrison of Port Arthur on the 27th of February and copied into the Novo Krai, is a suggestive document. The General infers from the persistence of the Japanese attacks that they are bent upon reducing Port Arthur, or at least, upon tearing up a part of the railway. "Remember," he says, "that they would regard the seizure of Port Arthur as a national glory. But as they have erred in their main ideas, so they will err in this. Our own people do not require to be told this, but I address myself to the inhabitants at large. From every point of view there is no reason for us to yield to the foe. A fortress must fight to the last, and I shall never give the word to surrender. Further, we have absolutely no place to retire to. Even the most timid must applish great things and make a name for themselves. On the contrary those that shrink from the combat and seek cravenly to save their own persons, these too must die, but die ingloriously, for from this fortress there is no escape. It has the sea on three sides, the enemy on the fourth. There is nothing for it but to fight. The Japanese will long remember the blow our brave soldiers will give them. I am confident, too, that even though a route of escape were open, our brave Russians would not take it, but would prefer to die at their posts. Remember, those that die in battle remain long in the memory of the world and achieve lasting

General Stoessel knows his own people, but, speaking frankly, it does not appear to us that his address is of the most inspiriting description. There is a kind of moriturite-salutamus ring about it.

The steamer sunk at the Miao Islands by the Russians on the 26th instant proves to have been the Hanyei Maru of 75 tons, the despatch boat of the Asahi Shimbun. had gone to the islands to purchase a junk, and was returning with it, having placed in it one Japanese subject and two Chinese. At 7 a.m. she fell in with a Russian squadron of ships and torpedo-craft from Port Arthur, and they immediately sunk the little steamer, making prisoners of her crew, with the exception of the master and two Japanlessly offered battle time after time, shuns it when the other side enters the arena.

There is one thing to be said about this blocking business—is it worth the cost of blocking business—is it worth the cost of lives and material? The channel at the less the arena ber boilers were renewed in 1902. The sian destroyer a short distance ahead. Her

coast of the Gulf of Pechili and obtaining is hard to see what the Hanyei can have undo all the trouble taken in placing the been doing with such a missile. In the obstacle. However, it must be assumed Nichi Nichi Shimbun we read that the Hanquick-firer, probably of very small calibre.

It is stated that a Berlin newspaper con-The work of repairing the damage done tains a strange statement, namely, that at to forts and public buildings at Port Arthur the time of the sinking of the Russian by the fire of the Japanese is said to be prodestroyer Stereguschtchi there were nine wounded men on the lower deck, but the Japanese battened them down and left them to perish. It is thought possible that this story was invented by the German news-paper for the purpose of exciting European was, not the Silni, but the Becchmuni. If sentiment against Japan; a sort of recrude-so, two Russian destroyers suffered, for we scence of South-African journalism, in fact. a Russian source, for the Russians also are busily inventing lies with the same object. They say, among other things, that the Japanese troops are behaving with the greatest licence in Korea, sacking villages and otherwise perpetrating all kinds of excesses.

The Novo Krai of the 25th ultimo says that the Japanese fired 208 twelve-inch shells into the town and the harbour and against the Liautishan forts on the 25rd instant. If that he so Port Arthur had 148,512 lbs. of iron hurled at it, or about 66 The Fuji and the Yashima have four 12-inch guns each, so, assuming that they used all their guns, which is very unlikely, each weapon must have fired 26 shells.

greatly doubt it.

Monday, April 4.

A Chinese junk-master who left the neighbourhood of Port Arthur on the 16th also alleges that in three villages between Port Arthur and Pigeon Bay twenty Russians were frozen to death, and that the killed and wounded in the bombardment totalled two hundred. The new forts on Liaotishan were greatly injured. Chinese subjects are taken into the Russian ranks, clad in Russian uniforms and paid 30 roubles per month. The manufacture of small arms is vigorously carried on. Stepsare also being taken to prepare large quantities of salt meat, and palisades have been constructed at the base of the Hwankinshan forts, the masts of junks being used for that purpose.

Some particulars of this enterprise are coming out. The Chiyo Maru went in first among the four steamers. She received a heavy fire from the forts and presently found herself between two Russian destroyers. But it appeared that these vessels endangered each other by their shooting. For that reason, or owing to some other cause, one of the forts made signals with a search light and the destroyers ceased their attack. The Chiyo Maru then pushed on and was able to anchor at the projected place, where her crew sunk her. She was not struck by a torpedo from first to last. When her crew had been picked up by a Japanese destroyer and were steaming back, it seems that they incurred a new peril by singing a war-song which drew a hail of shot from the enemy.

served that the Russian search-lights were craft like the Yoneyama. self and their source. The Japanese therefore rowed on. But as they passed the destroyer they observed, to their surprise, that she seemed not to have anyone on board. They conjectured that she was the the torpedo-boats Aotaka and Isubame, and had suffered so much as to be hors de

It is stated that each of the blocking steamers had a machine-gun on board, and that the crews worked these pieces vigorously as they hastened to their location. This provision was doubtless intended to inspirit a zone of fire without any means of ed certain.
returning it, and quite another thing It may be to pass through sustained by the excitement of giving back what one gets, in a measure at all events. Of course these machine-guns must have been abandoned with the steamers. And indeed there is collateral testimony that such was the case, for an official report from Mukden says that guns found in the steamers are now in the possession of the Port Arthur garrison. They have been raised, presumably, but it must be confessed that this supposition involves the idea of great celerity on the part of the Russians. The attack took place on the morning of the 27th and the Mukden report is dated the 29th. Therefore the guns must have been raised during the 27th or the 28th. On the other hand it is to be recalled that there is only 334 fathoms of water at the entrance of the harbour, so that salvage operations would be of the simplest nature.

We have had, via Paris, a remarkable story about the doings of the Silni; how, single-handed, she sunk the four Japanese steamers before they could reach their locations at the harbour's mouth, and how, single-handed, she engaged six Japanese destroyers. It is to be regretted that the romancists who spin these yarns do not exercise more reflection. Even supposing that the Silni accomplished the impossible feat of simultaneously torpedoing the whole four steamers at a distance of 2 miles from the harbour's mouth, they could easily make those two miles before sinkunless, indeed, their machinery were disabled, which does not appear to have occurred in any case. A steamer struck by a torpedo does not drop to the bottom in situ like a pheasant shot in cover. As for the Silni's splendid combat with six Japanese destroyers, it has a smell of men in buck-No doubt her officers and men fought stoutly and valiantly, and that makes it all the more regrettable that their record should be rendered ridiculous by incredible embroidery at the hands of romancists. Besides, how did it happen that only one Russjan destroyer was available for the defense of the port?

It is stated that the four blocking steamers were under fire for nearly 20 minutes before long interval must elapse before the comthey reached their destined places, but ap- pletion of the work. parently the Russian shells failed to burst when they struck, or failed to strike. A ing operation at Port Arthur was successful, Russian destroyer passed right between the and that only destroyers can now emerge Japanese topedo-boats Tubanue and Aotaka from the harbour. As to this it may be and received their full fire. Another des-noted that although the width of the entroyer was struck by the Yoncyama Maru, trance is 350 yards, the three-fathom channel which seems to have been steered direct at narrows at one place to 175 yards, and that

working entirely from within the harbour, passed through a veritable shower of shells, 300 feet in length finds difficulty in getting so that while objects outside were visible to but probably the Russians had finally to desist in or out. A small addition to the natural those inside, a vessel in the path of the beams could not see anything between her-their own people. It is related that more than one of the row-boats which took the crews off the steamers were riddled with bullets from quick-firers, but their inmates escaped quite miraculously. Special mention is made of a make his head-quarters for the present in warrant-officer, Yenya Minosuke, who was in the Yoneyama Maru. He received 4 from Kinchow, that is to say, from the key wounds simultaneously with the disablement to the Port Arthur position. It will evidentthat she seemed not to have anyone on miraculously. Special mention is made of a board. They conjectured that she was the warrant-officer, Yenya Minosuke, who was Silni, which had just been in action with in the Yoneyama Maru. He received 4 of Lieutenant Shimada, who had charge of ly be the great Russian base in Manchuria the machine gun. Nevertheless he assumed command of the gun and performed all his duties subsequently, dropping the anchor, lowering one of the boats and assisting to row her. It was not until the squadron was in sight that his strength failed him. He is the men. It is one thing to move through now in hospital and his recovery is consider-

It may be mentioned here that the X rays seem to be helping to save the lives of many among the Japanese wounded.

There is a project on foot to erect a bronze statue of Commander Hirose in the Hibiya Park. The *Jiji Shimpo* has begun to collect subscriptions and has already received a sum Park. of over a thousand yen. The remains of this brave officer have been brought to Saseho and will be buried with all honours on the 8th instant. We read also of the relics of chief-warrant-officer Sugino, but presumably these are only his clothes and other personal belongings, for his body went down with the Fukui Maru.

The despatch boat of The Times which passed Port Arthur at a distance of 14 or 15 miles is said to have observed that the available entrance to the harbour has been reduced to a width of some 26 yards. But it must be confessed that the opinions attributed to the folk on board the Haimun vary. Apparently one view was expressed by Captain Colquhoun, another by the steamer's chief engineer, and it is evident that at a distance of 14 or 15 miles the clearest observations can not be very trustworthy.

Takeshiki reports that according to intelligence received from the front the Russians have only torpedo-craft outside Port Arthur, and are engaged breaking up the steamers

sunk by the Japanese.
Prince Cyril, who last year paid a visit to

Japan, has arrived at Port Arthur.
One Kutami Soichi, apparently a merchant, who has just been released from prison at Port Arthur, where he was confined until March 31st, reports that the damage done to Port Arthur by the bombardment on the 10th of March was very considerable. The best quarter of the new town, the dock and the barracks suffered most. These details have not much interest except as showing that the place is not sufficiently defended.

Tuesday, April 5. The dock in Talien Bay has been pushed forward with great energy of late, but it is said that the site presents many difficulties, and that as all the stone has to be procured from an island off the coast of Shantung, a

Chefoo reports that the recent blockthe destroyer, though, of course, unless the although, within the heads, there is a width to its good old custom, but one would latter were disabled or taken by surprise of 430 yards between the end of the Tiger's scarcely have expected to find the fact illushe could easily have eluded a slow old Tail spit and the entrance to the basin, still, strated by Russians and Chinese. Yet it

The steamers even in normal circumstances, a vessel over 300 feet in length finds difficulty in getting roff would have reported free egress had the blocking operations been wholly successful.

It is stated that General Kuropatkin will after Harbin.

Thursday, April 7. Chefoo alleges that the available entrance to the harbour of Port Arthur has been reduced to 30 metres. A Chinese junk-master also has something to say on this subject but it is difficult to construct any intelligible story out of his statements. At all events he says that the line-of-battle ships can not get out at all and that even the cruisers find the navigation very difficult. Another steamer skilfully sunk would finish the job, he thinks. A Japanese naval officer is reported as saying that whereas the vessels sunk on the first occasion could be subsequently handled by the Russians, and thus dragged out of the fair-way, the steamers sent down on the 27th March can not be thus dealt with and must undoubtedly prove a very great obstruction. But it must be confessed that there is a great deal of conjecture about it all. Asahi Shimbun has news from Tientsin that the Japanese squadron approached Port Arthur on the 30th ultimo, but that its object was solely to ascertain the effect of the blocking operation.

The Americans and Japanese who were seized by the Russians on the 2nd instant on board the despatch steamer Furvan (?) are reported to be held prisoners at Newchwang on the charge of being Japanese spies. One of them, Mr. Washburn, is described as the son of a U. S. Senator.

Friday, April 8. On the 6th instant two steamers, the Chefoo and the Paoting, arrived at Chefoo from Newchwang. The former vessel reported that in the sea off Port Arthur she observed four steamers without lights of any kind, and the *Paoting* says that she sighted a large number of search-lights. These statements, if credible, would seem to indicate that Admiral Togo is bent upon filling up

the gap in the blocking line at Port Arthur.

Then we have another tale from the same place. It is carried by the S.S. Suchuan, said to have entered Chefoo on the 4th instant. She reports that on her outward voyage from Chefoo on the 28th of March, she encountered a fleet of no less than 27 Russian war-ships and was ordered to stop. The blocking operation took place on the 27th, so if 27 Russian ships were cruising about on the 28th it is plain that the opera-tion failed signally. On the other hand Takeshiki announces on avowedly good authority that the Russian ships are all lying quietly in Port Arthur, whence they have not emerged since the 27th of March. Their not emerged since the 27th of March. torpedo-crast come out, but retire speedily on sighting the Japanese guard-ships. It is further stated that the efforts of the Russians to remove the obstruction caused by the sunken ships have not been crowned with

History certainly repeats itself according

is indisputable that the public is to-day in precisely the same state of bewildered uncertainty about the Russian squadrons as it was about the Chinese squadron during the War of Reprisals in 1884-5 and during the China-Japan War of 1894-5. In the two latter cases the Chinese seemed to devote Admiral Courbet lay off Kelung, the Chinese hid themselves in Weihaiwei, in Port Arthur or at Taku. While Admiral Ito tapped the Chinese shield at Weihaiwei, Admiral Ting lay perdu in Port Arthur. And while Admiral Togo sends cannon-ball cartels once a week to Admiral Makaroff, the latter always manages to be non-inventus at the psychological moment. If Admiral Makaroff has a of Korea. Therefore the Korean Sovereign policy, if he aims at saving the remnant of and his pople might feel easy. his fleet from further perils, he is pursuing his aim at the cost of great moral sacrifices.

Our readers will remember that repeated reports were recently received as to the sinking of two vessels by the Russians in the fair-way at Port Arthur. An explanation is now furnished of this apparently strange manœuvre. The ships were sunk on either side of the Retvisan in connexion with the operation of floating her, which was successfully accomplished. But beyond getting life days." And they went back. Pak her into the harbour no useful result was attained, as the dock is not capable of the turn too sharp and tendered his reputareceiving her.

Chefoo telegraphs that according to a wire from Mukden the Japanese squadron looked in again at Port Arthur on the morning of the 5th instant and cannonaded the place. Nothing is said as to the effects. It is to be observed that we get all our news of doings at Port Arthur either from Chefoo or from St. Petersburg. The Japanese authorities, having no direct telegraphic communication with Manchuria, are naturally behind-hand.

the statement that the Boyarin (armoured cruiser) was sunk by contact with one of the floating mines laid by the Japanese destroyers on the 10th of March. The *Jiji* quotes a letter said to have been received in St. Petersburg. Its writer says that the possibility of raising and repairing the ship is under discussion, but that it is feared have formed has been injured. her frame has been injured.

There is a rumour, published by the Jiji Shimpo as having been transmitted from St. Petersburg by the correspondent of a French journal, that Admiral Starck, on receipt of General Meschenko reports that the Japanthe order depriving him of his command at ese cavalry and infantry attacked with great Port Arthur, committed suicide. The state-valour and that he believes their loss must ment is not verified.

KOREA.

Friday, April 1.

The two Koreans-Messrs. Hyong Sang-Kon and Li Hakkeun-who recently proceeded to Shanghai for the purpose of con-sulting M. Pavlow, are said (*Jiji Shimpo's* correspondence) to have addressed a secret letter to the Emperor of Korea, embodying the gist of their conference with the Russian diplomatist. M. Pavlow said, and indeed his answer might have been accurately predicted, that Russia would soon send to the Far East a great army which would roll the Japanese into the sea, whereafter she would take steps to secure the independence will, doubtless. Russia's method of securing Korea's independence and respecting her sovereignty is on record at Yong Am-pho and in the Yalu Valley.

Seoul has returned to its wallowing in the mire. No sooner was Marquis Ito's back turned than the high officials assembled, having breathed a long sigh of relief, said to one another, " let us go back to the smooth tion, which was accepted.

It has been finally settled, we read in the Jiji, that the Korean Government shall buy

the Seoul Electric Railway.

Asked in the House of Commons by what right Great Britain had sent 325 Russian marines from Chemulpo to Ceylon for detenat the latter place, M. A. J Balfour said that such a course seemed to be most consistent aving no direct telegraphic communication ith Manchuria, are naturally behind-hand.

There appears to be some confirmation of ment, however, had intimated that there would be no objection to the release of the prisoners if they took an oath to refrain from joining the fighting line while the war lasted, and steps were now being taken to effect that arrangement.

News has been received in Tokyo that General Kuropatkin telegraphed to St. Petesburg with reference to the fight at Chong-ju on the 28th instant that 5 officers were severely wounded, 3 troopers killed and 12 wounded. He mentions Major-General Meschenko was in the fight. The names of the wounded officers are given. have been very great. He adds that among the 12 wounded troopers 5 are seriously hurt, and he frankly states that the force retired to Kwaksan.

their old grooves. What the Emperor desires is to secure the safety of the Imperial House, and no means of attain-silver, and a Japanese silver yen can not be ing that end seem more trustworthy than bought for less than 130 gold sen. There to increase the army, which is just what should not be much difficulty in remedying Marquis Ito deprecated. Then again this state of affairs. His Majesty does not at all relish the idea It will be remembered that some time ago confidence. Min Yong-hwan was said to have advised

led immediately to 400 desertions. The story now told is that Mr. Min had no feeling of solicitude whatever about the northern frontier, and that his sole object was to remove the guards which the Emperor has at his command. From such a scheme the kind of spirit prevailing in Seoul may be inferred. The aged Minister Cho Pyong-sik is also mixed up in the intrigues, his aim being the elevation of Om to the post of empress.

The chief official in Wiju reports that the Russians have driven out 950 soldiers who formed the garrison of the town and have seized all their arms and other military be-

longings.

It is stated that the Korean head-man at Pakchhon was executed by the Russians for failing to supply provisions when required

to do so.

The Korean Minister of Justice is reported to have compiled and presented to the Privy Council for approval a law dealing with the offence of having recourse to a foreign country for aid. The methods of punishment applied are taken from the Min code, which is terribly severe, and the offences enumerated are: seeking the protection of a foreign State; revealing to foreigners the secrets of the country; making agreements to secure the loan of troops, of money, or of ships from a foreign country or for the grant of concessions for mines, railways, fisheries, salt factories, lands or forests; employing foreign advisers; seeking to obtain office by the assistance of aliens; making use of foreign aid to create domestic disturbances; selling or acting as nominal purchasers of lands or houses in the interests of foreigners; and obtaining foreign nationality without permission.

It is reported that the Russians have evacuated Son-chhon and that a collision between them and the Japanese troops has occurred at Chholson. Son-chhon is on the coast 19 miles north of Chonju, and Chholson is 161/2 miles still further north, If these statements be trustworthy the Japanthe 28th of March they fought at Chonju, and on the 1st of April we find them 35 1/2 miles nearer Wiju. Chholson is 32 1/2 miles

from Wiju.

Major-General Flug sends from Mukden to Major-General Decino in Shanghai one of the most perplexing accounts we have ever read. It relates to the fight at Chonju on the 28th ultimo, and it flatly contradicts the report of General Mitschenko himself. These perplexities must be left to unravel themselves

The First Bank has opened a branch in Anju. This bank intends, it is said, to push forward its branch as the army advances.

It is stated that a great scarcity of silver is Monday, April 4. felt in Northern Korea. The workmen in The business of the moment in Seoul the American mines at Unsan and the seems to be the restoration of all things to British mines at Yunsan are clamouring for their old grooves. What the Emperor silver. Neither they nor the Koreans in desires is to secure the safety of the general attach the same value to gold as to Imperial House, and no means of attain-silver, and a Japanese silver yen can not be

Much inconvenience having been caused of differentiating the Court and the Cabinet, by an exodus of the Korean population as the Japanese statesman suggested, where-lalong the route of the Japanese army's as some of his Ministers think that by no advance, the Emperor, at the request of Mr. other means can reform be accomplished. Hayashi, has sent a commissioner to restore,

that the prospect of such an expedition Minister, Pak Chesun, having resigned-

urging, in effect, the importance of the reforms advocated by Marquis Ito, namely, distinct differentiation of the Court and the vice versa, with the result that many complications and inconveniences occur.

There is a report from Shanghai that the Japanese Minister in Peking has intimated to the Chinese Government that Hon-chun may become the scene of fighting. Hon-chun is a town 60 miles from the mouth of the Tumen on the left bank, but not in Russian territory, being within the Manchurian border. Mr. Uchida has therefore warned the Chinese Government that the inhabitants of Honchun should withdraw.

That is a wonderful tale. It has never previously been the habit of diplomats to constitute themselves informers as to strate-

gical plans.

Takeshiki reports that the Vladivostock squadron seems to be engaged convoying provision-boats to the Tumen River for the use of the Russian forces at Hoi-ryong and Kyong-song. These are places within Korean territory south of the Tumen. If they be in Russian occupation, then it would follow that the situation on the north-east frontier of Korea is very similar to the situa-tion on the north-west, the Tumen in the former case taking the place of the Yalu in the latter; Antung being represented by Han-chun and Liaoyang by Possiet Bay.

Tuesday, April 5. The Nichi Nichi Shimbun's Seoul corres pondent sends detailed news in the sense that the American citizens prominently interested in the Scoul electric railway are acting in collusion with the Russo-phils. Rumours were circulated some time ago that the leaders of the Russo-phils, namely Messrs. Hyon Sang-kong and Li Hak-keun, were helped by the electric railway people to leave Korea and to call at Shanghai en route, where they had an interview with M. Pavlow. It was further stated that these Korean politicians had been instrumental in inducing the Emperor to prepare a considerable sum of money for use in the event of his flight to the French Legation. This money, we are now told, has disappeared in company with Messrs. Hyon and Li, who have also pocketed a sum of 400,000 yen, being plunder in connexion with the sale of the electric rail-The line would have been readily sold for a million yen, but by adroit mani-pulation the Russo-phils got it put through at 11/4 millions, receiving out of that total nearly one half of a million on their own account. They therefore leave Korea with well filled pockets.

The ginseng complication is said to have been settled by payment of compensation amounting to 20,000 yen. Probably our readers remember the story, namely, that whereas the Korean Government are pledged to farm the sale of the vegetable to the Mitsui Bussan Kaisha for a fixed term of years, the Court re-sold it to a French firm.

The latter now receives compensation for

breach of contract. instant says that, according to a statement value extends from while to chinang-song on published in the St. Petersburg Official the south bank of the river, and probably risk an engagement, great or small, on the actions-ju, and the Japanese force, raising greater. The troops in Chhang-song, who the Red-Cross flag, surrendered. That is a lare described as making advances into the river, and probably risk an engagement, great or small, on the extension on the north bank is not confirmation.

It will be remembered that a recent tele-

have retired to Wiju on the 2nd instant.

For the convenience of readers it may be well to tabulate the villages or towns along the high road from Chongju to Wiju:-

Kwaksan ... 5 miles north of Chonju, approximately. Sonchhon...11 Chholsan...161/2 Yongchhon.13 Sonchhon, Chholsan, Yongchhon, Wiju.....191/2

The recently appointed Korean Representative at the Japanese Court was to have left Seoul for Chemulpo on the 3rd instant, but apparently some difficulty has arisen owing to the unprecedentedly rapid promotion of this Mr. Hyon Yong-un, and it is now thought that his appointment will not materialize.

The Korean Government, it is reported, intend to send, at the close of this month, a commission to Wiju and Yong Ampho for the purpose of delimiting the projected settlements at those places, and the commission will be accompanied by some officials from the Japanese Legation in Seoul. This sounds just a little previous, seeing that Wiju is in Russian possession. Some newsmonger has been getting ahead with a vengeance.

The Emperor of Korea has addressed a proclamation to the people in the sense that the land tax will be remitted this spring in the case of districts within the limits of belligerent operations, but inasmuch as the Japanese soldiers observe perfect discipline and do not commit any outrages whatso-ever, neglect on the part of the inhabitants to prosecute their agricultural operations must be ascribed to idle fears and will be reckoned hereafter as their own fault.

Various articles taken by the Japanese Ti is stated that the total issue of notes by from the Varyag have reached Tokyo, the First Bank in Korea is one million three having been forwarded by Captain Hirose of hundred thousand yeu. The Bank is afforded to the control of the state of the stat the Oshima, which vessel appears to be chiefly engaged in the salvage operations. The objects will soon be shown to the public, probably at the Yushu-kwan in Kudan. Among them is a 37-m.m. gun.

Wednesday, April 6.

Accounts from north-east Korea suggest that small forces of Russians are occupying River, including Un-Kwi Bay, Kyong-heun and Chong-song. Apparently these troops are acting merely as posts of observation. They make no essay to penetrate into Korea, and it would seem that their chief function is to give timely notice of any at-tempt on the part of the Japanese to move against Vladivostock viâ Possiet Bay.

It is stated that a tolerably large body of Russians are making Chhang-song a basis and are pushing thence into Korea keeping touch at the same time with Kiulien-ching. importance in Manchuria after crossing the Yalu from Wiju. From this account it would with the official report made by the Russian left flam of the force which had been pushed outside the Japanese lines order was not General on the spot, we can not see just along the Pyongyang-Wiju road as far as preserved. This is partly confirmed by at present.

The Hochi and the Yomiuri allege that with the Japanese at Chong-ju. There is a the Russian force which retreated from road from Chhang-song to Sak-ju, and the Chongju on the 28th ultimo, marched direct latter is the meeting place of roads leading Cabinet. Mr. Hayashi points out that, with things as they are at present, the Court halt at Sonchhon, which is 16 miles south-west and to Nyong pyon on the often makes with foreigners engagements of which the Cabinet has no knowledge, and of the south-west and to Nyong pyon on the northward of Chonju. They left a detachment at Sonchhon, but this also is said to some importance and we may possibly hear some importance and we may possibly hear of a conflict there. The Asala's Seoul correspondent says that the Russians in all this district-north-west Korea-are seriously hampered by the want of good maps. They have a map, apparently, of the road between Wiju and Pyong-yang, but all the district eastward of that line is evidently little known to them, and being a very difficult district for military operations, this want interferes with their strategy.

It will be remembered that, two days ago, a rumour reached Tokyo-not, it must be confessed, from very trustworthy sourcesto the effect that a collision had taken place at Chholsan. Chholsan in 321/2 miles northward of Chonju, and another stand by the Russians might have been expected there. But the place is within some three miles of the sea-coast, and could therefore be bombarded by a Japanese gun-boat. The correspondents of Tokyo journals report, therefore, that the Russian outposts have been withdrawn from Chholsan, and even from Yongchhon, which is 13 miles further north. Of course if that be the case there is no obstacle between the Japanese and Wiju, but it seems probable that the advance upon Wiju is not regulated solely by the amount of direct opposition likely to be encountered there.

The Korean Government is thinking of abolishing the North-western Railway Bureau, which has its rather apocryphal existence in the construction of a line from Scoul to Wiju. If the Bureau be abolished, its work will be handed over to the Railway Department, and the latter will deal with all questions having relation to the Seoul-Fusan and Seoul-Wiju roads. It is stated that the total issue of notes by

ing great facilities to the army by opening branches in each place occupied, so that the military notes issued by the troops can be immediately changed for silver. These notes are now circulating at 90 sen.

The rice exchange at Chemulpo is to re-commence operations from the 19th instant. It had been closed owing to the dislocation of prices resulting from the war.

Both the Jiji Shimpo and the Asahi allege that the Japanese advanced guard entered Wiju on the 3rd instant, in the evening, and found no sign of the enemy. According to statements made by the people of the place, the Russians had crossed the river on the 2nd, the men in boats the horses swimming. From these same people it was learned that the Russian forces at points higher up the river, as Chhong-song, Pyok-tong and Chhosang, consist of small detachments. It is further rumoured that the Russians had Chhang-song is on the Yalu 42 miles above no commissariat arrangements south of the Wiju, and Kiulien-ching is the first place of Yalu and that they lived on such food as no commissariat arrangements south of the could be obtained in the district,

From the above it would seem that the A telegram from London dated the 2nd appear that the Russian position on the river was not bridged, and in that event the instant says that, according to a statement Yalu extends from Wiju to Chhang-song on Russians would of course take care not to river was not bridged, and in that event the

that it has been found necessary to post gendarmes at intervals along the line. There is also a report that three Japanese subjects, clog-makers, have been murdered at Kaheun in Chhung-chhong-do, whither they had gone to purchase wood for the purposes of

The Chuo Shimbun and the Jiji Shimpo say that according to a statement made by the Captain of the Hakuai Maru, which arrived at Shimonoseki on the 4th, twenty Russians were taken prisoners at Chongju.

It is further alleged that the number of sick and wounded carried by this vessel to Japan was 190, and that among the number 33 were serious cases. Of these patients 142 were sent to the Kokura hospital and 48 to Ujina.

Friday, April 8.

It is stated that the British Representative in Seoul has urged the necessity of sending some troops to Eunsan, as the inhabitants is scarcely to be expected that they will organize any movement deliberately intended to assist the latter. But their charity begins most essentially at home, and the most serious result of their unrest is that the timid Korean farmer refrains from tilling the ground, thus preparing the way for a famine now said to threaten the whole of northern Korea. It must be apparent, however, that to talk of crops not being put in while the snow is barely off the ground is premature. The Nichi Nichi reports that the Koreans

northward of Pyongyang show the best possible disposition towards the Japanese soldiery whom they regard as their deliverers from the Russians. The latter's conduct while riding hither and thither on their recent scouting expeditions seems to have

been execrable

THE YALU.

Monday, April 4, A junk which left the Yalu on the 28th ultimo and reached Chefoo on the 30th, reports that there are a thousand Russians in Antung and eight hundred at Tatungkou. These numbers sound very small, but may be correct none the less. Probably the Russians in the Yalu region are greatly scattered. Their programme is to harrass and delay the advance of the Japanese as much as possible, so as to give time for the arrival of a consolidating force from Liaoyang, 170 miles distant. To that end they would naturally divide into a number of loosely linked outposts-an easy and safe disposition may find a formidable army in possession of the entrenchments.

building of the Seoul-Fusan Railway, and General Artamanof with 500 Cossacks has the Russians admitted the superior rapidity occupied Unsan, and that he has thus forestalled the Japanese advancing from Chonju, This statement is inexplicable on the face of it, for Unsan is not at all connected with the main route from Chonju to Wiju. It is true that there is a road running north-east from Chonju via Kusong, and reaching Unsan at a distance of nearly 40 miles among the hills. In a certain sense, therefore, a Russian force at Unsan might be said to menace the flank of the Japanese advancing by the coast route to Wiju. But such a force would have to be very much larger than 500 Cossacks. It appears pro-bable that the St. Petersburg telegram was compiled by some one quite unacquainted with the geography of northern Korea.

The great point of uncertainty is whether the Russians have retired across the Yalu or whether they are still holding Wiju. It appears tolerably certain that they have alleged victors retired incontinently and evacuated the various strategical points inasmuch as General Mischenko himself evacuated the various strategical points between Chonju and Wiju, but it is not of the district show signs of unrest. Eunsan certain whether they have evacuated Wiju. of the district show signs of unrest. Eunsan is the site of British mining enterprise. It lies north-east of Pyong-yang and north of Sonchhon where the Tonghaks are said to have their head-quarters. These pests are showing some signs of activity. They have not actually risen in any force, but the idea is that they have been joined by a great a cheed or the southern hank. Some time the purveyors of news at the front would send intelligence as to whether the Russians have bridged the Yalu, we should have a tolerably trustworthy guide. If they have bridged the river, it may be taken for granted that they intend to make is that they have been joined by a great number of deserters from the Pyong-yang garrison who carried their arms with them when they fled. The Tong-haks are bitterly hostile to the Russians, and it publishes a report obtained from a Chinese There appears to have been another skir-Tokyo to the effect that a bridge of boats had been constructed, and the Asahi now publishes a report obtained from a Chinese subject who left Tatung-kou on the 28th ultimo, in the sense that at that place, at Yong Am-pho and at Wiju raft bridges have been built—three bridges in all. On the other hand we have the news received direct from the front on the 4th instant that the troops in Wiju have retired to direct from the front on the 4th instant that the troops in Wiju have retired to the north bank of the river, and that in doing so the men went in boats and the horses swam over. It seems impossible to arrive at a definite conclusion. Evidently if no bridges exist the Russians will not risk an engagement on the south bank. There is, indeed, some reason to doubt whether they contemplate any cardinal resistance at the Yalu. That will depend largely, we imagine, on the celerity of the Japanese army's movements. If the latter do not reach the river in force until the Russians have had time to concentrate a strong army on the northern bank, the Yalu Valley will be the scene of a great battle. At present it does not appear that the Russians have more than thirty thousand men of all arms in the region. But they are probably receiving re-inforcements constantly from Liaoyang; or, at least, they ought to be receiving re-inforcements, for it is quite plain that so long as the Yalu line can be Japanese operations from direction of the northern littoral of the Yellow Sea are scarcely possible, and more-over, the Russians remain free to make ulterior dispositions in Manchuria. If, however, the Japanese get quickly to the river, and, above all, if they effect a crossing at some point above Wiju so as to turn the left considering that they consist chiefly of flank of the Russians before the latter have cavalry. As each outpost is driven in, it sufficient force for covering purposes, we may expect that a point further westward will be the site of the first big battle. What cavalry. As each outpost is driven in, it sufficient force for covering purposes, we falls back towards the Yalu and by the may expect that a point further westward time that the Japanese reach the river, they will be the site of the first big battle. What will be the site of the first big battle. What one looks for now in vain is that strong and harassing resistance which General Mischenko and his 6,000 cavalry were preparing to offer to the Japanese advance as far back as the 23rd of March. Our readers doubt-less recall that telegram. It was published. Whit is safety, and that ordinary occupations may be tranquilly pursued, is connected with this state of affairs.

Friday, April 8.

All accounts agree in saying that after the affair at Chonju the Russians withdrew to less recall that telegram. It was published. vicinity is complicated by Reuter's telegram less recall that telegram. It was published Wiju, leaving outposts only at Sonchhon and conveying a St. Petersburg statement that here on March 25th and it said that while Chholson on the road between Chonju and

of Japanese concentration in northern Korea, and the effective fortification of Anju, they announced that General Mischenko with 6,000 cavalry was "prepared to harrass the enemy unceasingly so soon as he moved beyond Anju." Where is that big body of cavalry? Something was heard of them on the Kasan-Pakehhon road, which runs eastward from the sea at a distance of about 13 miles from Anju. There two squadrons of Russian cavalry advancing from opposite directions, impounded a patrol of 4 Japanese troopers on the 9th March and killed one of the latter. But after that effort General Mischenko seems to have fallen back with some 800 Cossacks upon Chonju, which is 33 miles north of Anju, and we know pretty accurately what happened at Chonju on the 28th of March. There have been attempts on the part of the Mukden-Shanghai factory to claim a Russian victory at Chonju, but inasmuch as the reported the necessity of that retreat, we may safely assume that the Japanese won the day: Since then nothing has been heard of the Russian General and his 6,000 Cossacks. Probably the 500 troopers now cossacks. Thousan the said to have occupied Unsan are part of the same mysterious force, and will accomplish just as little as has been achieved by the General himself.

There appears to have been another skirretreated and were taken prisoners.

It is stated that maritime communications between Chinnampo and the Chhongchhon River were to be opened on the 6th instant by the Hotta S.S. Company. Anju lies on the Chhongchhon, so that, in effect, the steamers will bring Anju into maritime touch with Pyong-yang. But we presumed that Government transports were already on the line.

There is a rumour that the 500 Korean soldiers who fled from Pyong-yang at the intelligence that they might be sent to defend the frontier against a Russian invasion, have assembled in the northern districts and, being in possession of arms, are harrassing the country and robbing the people. The Cossacks, too, appear to have. people. The Cossacks, too, appear to naved devoted themselves largely to denuding the country of all edibles. They have been movement and the small parties of about ing about rapidly in small parties of about 100, pillaging and destroying. The con-sequence is that the people have fled in all directions and that agricultural work having directions and that agricultural work having been abandoned, there is prospect of great distress, the collateral effect of which would probably be attacks upon the Japanese provision convoys. It is early still to speak of agricultural work being finally interrupted for the season. Probably the proclamation recently issued by the Courterling on the people to recognise that every calling on the people to recognise that everywhere within reach of the Japanese forces there is safety, and that ordinary occupations

the Yalu. Subsequently these outposts also information explains the discrepancy and railway, must be very considerable. Takuwere withdrawn. It appears that no attempts were made to bridge any of the rivers over Russian story. It appears from the statewhich the coastwise route runs. It is further ment of a Japanese trooper who has just the littoral of the Yellow Sea, is said to be stated that 8 guns which the enemy had brought as far as Chonju were subsequently taken back to Antung, and that there is no a reconnoitering squadron of 13 troopers which flows westward of Takushan. Chinese Russian force whatever at Yong Ampho. We hear again of Russian troopers taken prisoners, the number varying from 15 to chhon. The si 70, and some statements indicating Kasan attacked them.

Russians have abandoned all idea of offering resistance south of the Yalu. They hope to dispute the passage of the river resolutely, so as to hold the Japanese there while the movement of concentration from Liaoyang proceeds, and with that object they have erected batteries on the island of Hosan, to the conclusion that the Cossacks are which lies mid-way in the river opposite to Wiju. But of course it is in the last degree improbable that the Japanese will limit the basis of a triumphant Russian story. themselves to a direct attempt to cross the river in the face of Russian dispositions As to what the strategy now in progress may be, however, discussion in the columns of a newspaper is forbidden.

One is constrained to express astonishment at the moral tactics of the Russians as revealed in north-western Korea. The habit of head-quarter staffs in general is to minimize their own military resources and magnify those of the enemy, but the Russians seem to take the opposite line. short time ago they told the world that they had made arrangements for the constant impeding and harrassing of a Japanese advance beyond Anju, and that General Mischenko with six thousand Cossacks was thousand men. to undertake the task. But in sober fact the General and his cavalry seem to have confined their enterprise to a somewhat perfunctory standat Chonju, in which only 800 Cossacks were engaged. Then they told the world that they had retired on the Yalu, smashing all the bridges and destroying the roads as they went. There are five rivers which might have been thus treated, but it now appears that the Russians never bridged them at all, and consequently there were no bridges to smash. As for the roads, there is only one that would have been worthy of such treatment, and it seems to be no better nor any worse than it was before the Russians crossed the Yalu.

It is not quite certain, however, that the whole Russian force crossed the Yalu withand of the occupation of that place by the Japanese advance guard. Even assuming the truth of that statement, however, the affair may be supposed to have been of small importance. Those familiar with the topography of the region say that the Yalu offers few advantages to a defending force along the southern bank, but that the northern has many natural advantages. At all events the crossing of the river will be the next operation of cardinal importance. If that be effected, the Russians will probably fall back upon Feng-hwang, where they have now a

that a Japanese force of cavalry had been the Yellow Sea, so as to give timely notice connexion with the death of his brother. completely routed by the Cossacks near Chonju. In fact the story read like a new for this purpose and for watching the shores to himself and his family that such expression of the Chonju fight. Subsequent of Liaotung, to say nothing of guarding the shores of sympathy should have been sent.

shows that there was some ground for the Russian story. It appears from the state-ment of a Tapanese trooper who has just the littoral of the Yellow Sea, is said to be under the command of Cornet Muto, proceeded from Anju in the direction of Pak-The sighted 3 Cossacks and them. The Cossacks retreated as the place of capture while others mention rapidly, Muto's squadron pursuing, when the Chonju-Kusong road. The situation seems to be now that the erged from the shelter of a hill and opened that fact has comparatively little importance. ussians have abandoned all idea of offering a smart fire on the Japanese. The latter, Liaoyang is the chief base of the Yalu being completely outnumbered, retreated. One of their number (Inouye, who gives this account) was wounded as also were 4 seems to have lately visited Liaoyang, horses, one of which died. The Japanese reports that up to the 6th of March the search of the chief base
THE KOREAN FRONTIER AND THE YELLOW-SEA LITTORAL.

According to the Jiji Slumpo's information the Russians have cavalry posts distributed from Takushan to the Yalu; between Antung and Kiulienching they have constructed batteries on the heights, but with the exception of one hill there are no guns arrangements. mounted; and in the same district—i.e. be-tween Antung and Kiulien—they have erected parapets and palisades. As to the force at Antung, there is no definite information, but the people speak of one army corps, which would mean some thirty corps, which

basis of the Russian forces in the Yalu district. They intend to dispute the passage of owing to the break up of the frost. the river vigorously, and with that object they are keeping touch with the Japanese as the latter move northwards, the Russian aim being to obtain full notice of any flanking movement. Chonju, whence the most advanced Russian outpost was dislodged on encounter opposition en route. Great divergencies are noticeable in the various accounts the It is not quite certain, however, that the but the estimate stated above, namely, one whole Russian force crossed the Yalu without further resistance. Rumours arrive of an engagement at Wiju on the 5th instant, district. Of course it would be possible to take a much more intelligent view of the situation if we had any accurate knowledge of the front over which the Russians are and as to the former, accounts have differed so greatly that no assurance even approximate can be felt. Some authorities have a hope that if either fell in battle the other shown the Russian outposts as far up the might share his fate, and their wish was river as Chosan, which is 187 miles above fulfilled. everything is wrapped in profound silence; Wiju, while others have indicated Chhang-

junks appear to be carrying supplies of provisions to Takushan, Saho and Tatung, which doings a Japanese gunboat might well be detached to prevent. The whole disposition shows a marked scattering of forces, but in view of the great mobility of the Cossacks

Liaoyang is the chief base of the Yalu operations, and Liaoyang is 170 miles from Antung. The Asahi's special correspondent reports that up to the 6th of March there were active movements of troops at that place, but that since then comparative quiet has prevailed. He puts the total force there assembled at some 8,000 men, which estimate, if correct, would go to show that the main part of the immediately available troops have been moved to the Yalu Valley, and that the reinforcements arriving from the north will take their place at Liaoyang. Everything goes to indicate that one of the decisive battles of the war, one of the great contests of history, will be fought in the neighbour-hood of Antung, unless some powerful flanking movement dislocate all the Russian

The Asala's correspondent speaks of large stores of flour stocked in thousands of bags at a point northward of Liaoyang, and says that at five places between Liaoyang and Fenhwangting the commissariat has estaborps, which would mean some thirty lished stations where the baking of bread goes on continually. The roads, or rather It is at all events plain that Antung is the the one road, between Liaoyang and the Yalu is said to be in a terrible condition

CAPTAIN HIROSE AND WARRANT-OFFICER SUGINO.

It appears that these two gallant men who the 28th of March, is a little less than 70 lost their lives at Port Arthur on the 27th of March, were close friends. There had been an miles from Wiju. Several days must there. March, were close friends. There had been an fore elapse before the Japanese reach the immense number of applicants for the honour latter place, and it is probable that they will of taking in the blocking steamers, but the rule made and observed was that none of warrant-officers and men engaged as to the strength of the Russians at Antung, on the previous occasion should be again employed. An exception was made, however, in Sugino's favour on account of the special relations between him and Captain Hirose. Sugino had taken part in the torpedo enterprise at Wei-hai-wei in 1895. He was in the boat sent to cut the boom, the most perilous part of the undertaking. extended along the Yalu, and the extension ordinary circumstances an officer should have taken by the Japanese in advancing. But taken the place assigned to Sugino—the as to the latter point there is no information: affair on the 27th of March. But Captain

We are asked by Captain Hirose, elder song as the point of greatest extension, the brother of Commander Hirose, who was song as the point of greatest extension, the brother of Commander Hirose, who was song as the point of greatest extension, the brother of Commander Hirose, who was their available troops were concentrated from the surrounding country.

Will, while their later extension, the brother of Commander Hirose, who was song as the point of greatest extension, the brother of Commander Hirose, who was their available troops were concentrated from the surrounding country. It will be remembered that news arrived

It goes without saying that Russian cavalry of various nationalities who, by telegram or recently from a Russian source to the effect videttes are carefully patrolling the littoral of letter, have conveyed their condolences in

NEWCHWANG.

Friday, April 1. The foreign residents of Newchwang—according to a telegram in the Asahi Shimbun—held a meeting on the 25th inst., for the purpose of debating what course should be pursued to preserve order in the event of the Russians evacuating the place and the Japanese not immediately taking possession of it. A decision was taken in the sense of referring the matter to the consuls, but the meeting also passed a resolution expressing confidence in the ability and

intention of the Russians to preserve order.

A Chinese man-of-war is said to have seized some junks attempting to carry provisions from Chinwantao to Newchwang and Port Arthur. The provisions were confiscated and sold by public auction.

Monday, April 4.
It is reported that the British Consul at Newchwang has notified his nationals that no obligation devolves on them to observe the instructions contained in the Russian law of siege, pending the receipt of some official intimation from the Minister in Peking. But telegrams from Europe indicate that no complications are likely to arise in connexion with this matter.

At Newchwang four steamers are said to have arrived, but no business is doing, and the merchants have intimated to Shanghai that the further despatch of vessels would be too hazardous.

It is expected that the American and English gun-boats lying at Newchwang will leave the place on the 5th instant. They leave the place on the 5th instant. will be followed by a large exodus of the foreign population, which, indeed, is already reported to be breaking up.

Latest news from Newchwang, published by the Asalu, says that there are about

2,000 infantry quartered in Yingkow with 200 artillery and 8 guns, and from 200 to 300 cavalry. Along the river Liao southward of Yingkow, through a distance of about 20 miles, detachments are posted here and there, their total number being about In the fort at Newchwang 2 ship's guns have been mounted. Some trial shots were fired on the 22nd instant. The Sivoutch, from which these guns are said to have been taken, has an armament of one 9-inch, one 6-inch, six 9-prs. and five 1-prs. Apparently the 9-inch gun has not been disturbed. The Sivoutch herself is to be

used as a floating battery, it is said.

All the coal in Newchwang has been bought up, this correspondent alleges. locomotives are burning partly wood and partly coal, and their supply will last for only two months more. All valuables have been sent by the Chinese store-keepers to Shanhaikwan, and business is absolutely at a stand-still.

The sinking of stone-laden junks to obstruct the river seems to have been suspend- quite ed, temporarily at all events, in deference to the protests of the British merchants.

Tuesday, April 5. The Asahi's Tientsin correspondent says that the Russians have concentrated a force of ten thousand infantry and 3 brigades of artillery at a place within a few hours' march of Yingkow-probably Liaoyang-, and that they have mounted 5-inch and 6-inch guns in the forts on the west bank of the Liao. Had the Japanese landed on the Liao. Had the Japanese landed on the 10th of March, adds this correspondent, the Russians would have retired without offering that any stick does for beating the Japanese. Russians would have retired without offering that any stick does for beating the Japanese. Correspondents themselves take that view. But at times during their long spell of idle-leisure to make all the necessary preparation in the list of contraband ones some of them are said to have express-

tions and a landing would be vigorously opposed.

The British Consul at Newchwang has definitely informed his nationals, under instructions from Peking, that a gunboat can just ground of Japanese complaint. not remain at that place. This decision, which we know to have been taken by the home Government, has naturally caused much dissatisfaction among the British residents, who see themselves thus abandoned to all the vicissitudes of war. The Russians, of course, will be guided solely by strategical considerations, so long as the war lasts, and will give themselves little concern about preserving order in a operations-even Russian soldiers, too, are not always agreeable as fellow-residents. Hence at any moment the unfortunate inhabitants may find themselves at the mercy of the Chinese bandits. It is a painful situation, and the greatest sympathy must be felt for people exposed to such perils through no fault of their own.

The Russo-Chinese Bank is stated to have loans aggregating two millions of taels in the hands of Chinese merchants, but the latter, though pressed for payment, allege that owing to the official veto on the export of bean-cake, they are deprived of the resource from which they had intended to meet their obligations.

It should be noted that the placing of bean-cake on the list of contraband of war is primarily Russia's act. Bran is apparently the idea of the Chinese Government, and of course the veto upon this particular staple will be felt chiefly by Russia, for Japan does not import bran from China. The Russian list of contraband is very compendious. In addition to the various articles enumerated in detail, there is a rider covering all articles capable of being used for belligerent purposes on land or on sea. Any mer-chant desiring to export such goods to a neutral country is required to deposit their full value with the customs authorities by way of security, and as the customs are wholly under Russian control, that order places an effective barrier in the way of commerce. It is difficult to understand what the Russians mean by interdicting bean-cake. Unless it be held that since crops can not be grown without fertilizers, and since the growth of crops is ultimately essential to the maintenance of a fighting force, therefore fertilizers must be regarded as contraband of war, the only inference to be drawn from Russia's action is that she simply obeys an unreasoning impulse to incovenience the Japanese nation in every conceivable way. Still stranger is China's conduct. Every word written by the Jiji Shimpo on the subject seems to us to be fully justified.

In matters of serious moment China's neutrality is a mere farce. the slightest regard for Chinese rights of

betrays a temper which China should be the very last to display, and which, contrasted with her palpably invertebrate assertion of neutrality in other directions, constitutes a

Wednesday, April 6. A British steamer which arrived at Cheloo on the afternoon of the 4th carrying two thousand Chinese refugees from Newchwang, reports that at the latter place a steamer called the Fuwan, chartered by the Chicago Daily News syndicate for despatch purposes, had been seized by the Russians. She had two Japanese among her crew, but beyond that very slender fact no pretext for her seizure is suggested. The steamer's name is given as the Fuwan, but whether this is a Chinese name or a transliteration of "Fawn" we can not tell.

It is now stated that the Russians age bent upon sending the Sivoutch away from Newchwang. We have been hearing a great deal about this gun-boat of 950 tons. latest was that her armament had been partly employed for the purpose of equipping the shore-batteries, and that the ship herself was to be converted into a floating fort. But the talk now is of her putting to sea. She ought not to have much difficulty in reaching Port Arthur, but whether she could enter there is another matter.

Friday, April 8. It is stated that the Russians have carried out their intention of blocking the river at Newchwang by sinking junks and placing mines. But, on the other hand, Tientsin reports that large masses of floating ice are still carried down by the Liao, and that it has not yet been possible to lay torpedoes. The same rumour adds that a Japanese attack is daily expected there.

The correspondent of the Chicago Daily News, his two American companions and their two Japanese interpreters, who were seized a few days ago together with their ship by the Russians at Newchwang, are said to have been released on the 5th instant.

THE CORRESPONDENTS.

The correspondents who are to accompany the First Army have at length been allowed to go to the front. They are to assemble at Moji by the 6th instant, and will proceed thence by transport to Chemulpo, whereafter their destination will be announced and they will be carried to it by a Government vessel. They have certainly had to wait a long time for their permits, and doubtless the view some of them take is that whereas war has been going on for nearly two months no facilities have yet been granted to journalists. But the question is, have newspapers any right to Her con- be considered in preference to the interests of duct in the case of the Mandjur was an empire. It appears to us that they have quite comical, and she has cravenly allowed Russia to fix the limits of the bellithat newspapers have succeeded in arrogatgerent area in the West-Liao River precisely ing titles and setting up claims which have as suited Russian convenience and without no basis of reason. If secrecy be not only permitted in the case of diplomatic negotianeutrality. On the other hand, we now see tions but also considered essential in many the Chinese Customs not only observing instances, why should it not be permissible strict neutrality, but going far beyond the and sometimes essential in military and limits of any neutrality hitherto observed. naval matters, where undue disclosures of Eggs and bean-cake are put upon the list of plans or movements may involve not only reason except because Russia has arbitrarily but even the downfall of State? So far as chosen to make it contraband, and the former seemingly on the Russian principle experienced and responsible among the

ed doubts whether they would ever be permitted to go to the front at all, and whether the Japanese Head Quarter Staff was not deluding them with specious assurances and deceptive courtesies. Of course there was no real ground for any such apprehension. The delay has probably been greater than the Japanese Authorities themselves anticipated, but the causes of its prolongation have been beyond control. Not for a moment, however, was it to be imagined that had there been no intention of allowing the correspondents to go to the front at all, they would have been suffered to remain Japanese people. His Imperial Highness in Tokyo without a clear intimation of expressed great admiration for the generosity the fruitlessness of doing so. All that already displayed by the members of the Association and invited them to continue their effects in the cause of ultimate success. Government has made a new departure so far as choosing its own times and seasons is concerned. We think it very likely that this exceptional discretion will be observable in the nature of the censorship also, and that correspondents will be strictly limited to describing things which have already taken place, and not even these should inferences as to future movements be deducible from them. Military officers universally will welcome the innovation, but the public's craving for intelligence will not be fully satisfied. One class of correspondent especially will suffer—the correspondent that invents whereever his narrative wants picturesque padding, or even when facts fail. But correspondents are the curse of the whole craft, and their conscientious colleagues will heartily endorse any restraints put upon them.

THE POLITICAL PARTIES.

It is stated that the relations between the Seiyn-kai and the Progressists have become somewhat strained. The Progressists have shown a determination to discredit the Seiyu-kai by alleging, or suggesting, that face a supreme national crisis, under circumfrom the latter emanated the proposal to stances unprecedented in its history, our men increase the compensation given to the tocome to four years; a proposal which many people insist on ascribing to corrupt motives.

Mr. Hara Kei, speaking at the usual postsession general meeting of the Sciyu-kai justly ridiculed the pettiness of wrang-ling about the author of the proposal, instead of considering the proposal itself on its own merits. He claimed that the sole object of advising a change from three years income to four years' was to secure the assent of all parties to a measure savouring of confiscation. At the same time Mr. Hara explicitly denied that the proposal had come from the Seign-kai members of the Committee.

Nevertheless Messrs, Hara and Matsuda have insisted on resigning their positions as General Commissioners of the Party. No thinking person suspects either of these gentlemen of anything like corruption, but they naturally resent the treatment they have received. Their resignations are accepted nominally on the ground that they and gracious have long desired to be relieved of their Association.

It appears that Mr. Ozaki Yukio has not been a sufficiently striking figure as a member of the City Council of Tokyo. His colleagues have asked him to resign. The request is said to trouble him very little, but if he resigns his seat on the Council he will probably resign his position of Mayor also. There is one thing to report.

The resigns his position of Mayor also. There is one thing to report. The resign his position of Mayor also. There is one thing to report. The resign has position of Mayor also. Tokyo newspapers hint that there is an agitation against Mr. Ozaki because he does not favour the methods of Tammany Hall.

Tokyo from England and the ed to appoint and remove Chinese officials not favour the methods of Tammany Hall.

United States of America, where sympathy throughout the three provinces; that she

THE "GUNJIN YENGO-KAI."

This association held its inaugural meeting in the Nobles' Club on the 1st instant, under the presidency of His Imperial Highness Prince Arisugawa, the invitations having been issued by Counts Matsukata and Inouye. The Prince delivered a short address, saying that at a time of unprecedented national calamity like the present, everybody must forget self and selfish interests, and must work in their efforts in the cause of ultimate success. He also stated that the Emperor, the Empress, the Prince and Princess Imperial and the Princes of the Blood heartily sympathised with the Association's motives and had contributed the following sums :-

The Emperor and Empress 100,000
The Prince and Princess Imperial 10,000
Prince Arisugawa 5,000
Princes Komatsu, Fushimi, Kauin, Higashi-Fushimi, Yamashina, Kayo, Kuni, Nashi-moto, Kita-Shirakawa and Kwacho Fach

Count Matsukata returned thanks on behalf of the Association, and Count Inouye read a report showing that the money already collected within the short space of a month reached nearly a million pen, which subscriptions had come from Tokyo alone, and the total would doubtless be much augmented when the various provinces had contributed. A cold collation was then served and the party broke up at about 5 o'clock.

H.I.H. Prince Arisugawa, speaking at the inaugural meeting of the Teikoku Gunjin Yengokwai, which was held on April 1st at the Kazokukaikwan (Nobles' Club), said:—
"Now that our country has been forced to

serving in the Army and Navy are engaged in acts of danger and are sacrificing all their personal and family interests for the sake of their fatherland. At this unique period, this Association has been organized to assist them, in order to enable them to fight with contented minds and to devote all their energies to the ends of State. prise is a demonstration by solid facts of the loyal and patriotic spirit of the people. It is a praiseworthy act of rare occurrence. I can not but admire the patriotic conduct of those persons who have so promptly responded to the appeal of the Association and have so munificently subscribed to its funds. I hope that the Association will make successful progress and fully attain its object through your co-operation and endeavours.'

His Imperial Highness added that the organization of the Association had come to the knowledge of H.I.M. the Emperor, H.I.M. the Empress, H.I.H. the Crown Prince and H.I.H. the Crown Princes who had greatly approved of the undertaking and graciously given their patronage to the

with our country's cause is deep and extensive. Those gentlemen have shown us a great deal of sympathetic sentiment, have earnestly approved of the objects of our Association, and being actuated by an ardent desire to lend material assistance to our men serving in the army and navy, as well as their families or survivors, have come to the decision to tender their valuable services and will co-operate in writing and publishing a book the contents of which will be matters connected with their own personal experiences in recent wars, namely the Chino-Japanese War, the Spanish-American War, the South African War, the Boxer disturbance, etc., and the proceeds of the sales will be contributed to the funds of the Association. I. representing the Association, feel impelled to express our sincere thanks to those gentlemen for their sympathy and kind initiative.'

CHINA.

Friday, April 1. The Shogyo Shimpo alleges—on what authority we do not learn—that there is great mortality among the horses of the Russians in Manchuria, chiefly owing to

want of fodder. All the millet obtainable has been used, and the beans have now been dis-tributed, but the fact is that without great facilities for sending forward a supply of hay and oats the large number of horses now in the country can not be supported. The railway, however, is too much occupied with other matters to serve such a need, and it is possible that the fine Cossack cavalry

may be crippled.

Monday, April 4. According to the Asahi Shimbun, eight Chinese Representatives in foreign countries have addressed a joint memorial to the Throne urging the necessity of administra-tive reforms. They say that although the Russo-Japanese war may not continue long, fresh dangers for China will surely arise one after another at later dates, and disasters of the gravest nature are inevitable unless timely steps be taken to prepare against them. The Empress-Dowager is reported to have been much displeased by the memorial.

The Chinese Customs have now added bran to the list of contraband of war. Great complaint is said to be made by British merchants as well as by Japanese, but the Commissioner of Customs is said to have replied that though eggs might possibly be removed from the list, he has explicit instructions from Peking on the subject of bran and bean-cake. We can not understand the principle adopted in the case of bean-cake. Even among food-stuffs for pigs it does not find a place, being a fertilizer pure and simple. Bran certainly constitutes a staple of food for horses.

The Commissioner of Customs at Shang-

hai has suddenly announced that eggs must be included among food-stuffs and therefore treated as contraband of war. The Japanese Consul-General is reported to have protest-Association.

Count Matsukata, Vice-President, made a short speech in reply to the above address and expressed sincere thanks for the favour shown levels and potables is immensely complicated.

also has a right to collect the taxes; and unquestionably less than 3 miles from that the Chinese forces must not make the Miao Islands, and that a flagrant breach any movement without Russian orders, of China's neutrality was thus committed. Tseng declined to take that view of the situation

The Chinese Government has withdrawn the veto on the export of eggs and beancake. Probably the imposition of such a veto was due to a misunderstanding.

The Jiji Shimpo's Shanghai correspondent wires that Mr. Byron Brenan, one of the chief projectors of the Shanghai-Nanking Railway, has returned to England. He had attempted to induce the Chinese shareholders to postpone the construction of the line until the termination of the war, but being unsuccessful, has left for London to Islands was to procure a cargo of beche-de-

The Asahi gives a very long account of the sinking of the Hanyei Maru, but there are few incidents of special interest. It appears that the little steamer had gone to the Miao Islands to purchase a junk and was returning to Chefoo with her acquisition when she fell in with the Russian squadron. account given of the latter is very confused; we can not even discover the total number of vessels, but apparently there were 8 ships and 6 destroyers. It is true that the junk had a torpedo on board—a Russian torpedo which the junk-men had picked up and which they looked forward to selling for a round sum. The master of the steamer left the bridge and hid himself when he recognised that the squadron bearing down on him was Russian, and two of his crew followed his example. The result of this manœuvre was that, there being no Hirose to search for the missing men, and the Russians naturally concluding that all had been removed, the three fugitives had the pleasure of being in the vessel while she served as a target for the Russians. They say that 50 or 60 shots were discharged at her with quick-firing guns, but all the shells took effect above the waterline and it became necessary ultimately for one of the big ships to put a heavy shell into her vitals. All this time the master and his two contrades lay perdu, and presently they had the pleasure of hearing the Russian They then squadron take its departure. emerged from their hiding place, and the little steamer being in a sinking condition, they induced a passing junk to take them off in consideration of two bags of rice.

a distinct violation of China's neutrality. The Miao Islands are of course Chinese territory. Every one that has made the voyage from Shanghai to Taku knows them It remains to be determined, then, whether the *Han-yei* was within the three-mile limit of the islands. This three-mile limit, it may be remarked ea passant, will suffering personal animosities to over-ride yard and owned by Mr. Takamori of Hakosoon have to be altered. It was fixed in patriotic considerations. But there is a date. She was suited solely for coast tradesoon have to be altered. It was fixed in patriotic considerations. But there is a date. She was suited solely for coast trade old times solely with reference to the range limitless interval between that and the work and no reason can be conceived for of mediæval ordnance, but when guns have heinous crime of deliberately aiding the her presence at the entrance of the Gulf of

was fired on by the Russians at a point his traducers.

Chefoo telegraphs that on the 31st ultimo the ten Chinese members of the crew of the Hanyei Maru were taken by a Russian war-ship to a point ten miles from Port unless the so-called war-ship be a destroyer, which is likely enough. It is becoming water sumably this is on account of the order question of great interest to discover what effect the sinking of these four steamers of a certain store of grain must withdraw has had. As to the Hanyei Maru, it is now from the town.

A Tacoma newspaper states that Mr. John stated that her object in going to the Miao being unsuccessful, has left for London to Islands was to procure a cargo of beene-derarrange financial ways and means. Mean-mer. Her Japanese crew have not yet been released. They will be able to tell something interesting about Port Arthur if the Russians let them out, and it is scarcely likely that they will be held prisoners for any great length of time. The Norry Krai and the Elmack.

MR. AKIYAMA'S CASE.

Some time ago we received from Messrs. Ozaki Yukio and Inukai Ki a lengthy analysis in refutation of the charges preferred against Mr. Akiyama, proprietor of the Niroku Slumpo, and until recently a member of the House of Representatives. It was probably the desire of Messrs. Ozaki and Inukai that we should translate and publish their brochure, and we should willingly have done so had we not judged that the accusation against Mr. Akiyama would derive undue importance from such treat-ment. The whole incident was, in our opinion, a merely hysterical ebullition, and for the sake of the reputation of certain otherwise sedate men who, allowing themselves to be carried away by a wild vertigo, lent their aid to swell the agitation, our inclination would have been to suppress all allusion to the matter. We ourselves have had the honour to receive an anonymous letter charging us with being Russian spies and threatening vengeance, the basis of the accusation being our alleged intimacy with Mr. Akivama whom, unfortunately, we have never had the pleasure of meeting. The indictment in Mr. Akiyama's case had probably just as solid a foundation, and we should not for one moment think of dignify-ing such silliness by serious notice. Japan is passing through a great crisis, and the remarkable self-restraint and composure she Mr. Consul Mizuno, after investigating the circumstances of the sinking of the Hanyei to be off set by occasional ebullitions in whereas he vehemently urged them to minor affairs. The recent Ro-tan mania depart. When last seen he was standing at two seamen who escaped, claims emphatically that the incident occurred within tically that the incident occurred within the promoters will by and by look back upon their childish emotionalism with profound shame. It is essentially a malady whose cure may be trusted to time. Mr. Akiyama's name can only be injured by provoking controversy which in itself invariably becomes a vehicle for developing prejudice. The Niroku Shimpo deserved some The Satsuki Maru is a small steamer of 133 punishment for its extreme indiscretion; for tons built in Japan in 1889 at the Fukuzawa

WAR NOTES.

Friday, April 1 The withdrawal of inhabitants from Vladivostock seems to be attended with great difficulties. So many are making their exit and, on the other hand, so much military movement is going on that the railway is Arthur, and thence proceeded by junk to movement is going on that the railway is Chefoo, reaching it on the ard instant. If hopelessly congested and trains are detained Chefoo, reaching it on the 3rd instant. If hopelessly congested and trains are detained this be accurate, it would follow that the at out-of-the way stations for hours at a blocking operation has not been successful, time. . One instance is mentioned of a train

A Tacoma newspaper states that Mr. John Rosen, acting on behalf of the Russian Government, has purchased three steamers belonging to the Northern Pacific Steamer Company, namely, the Tacoma, the Olympia, and the Victoria, and that they have proceeded to Nome in Alaska. Nome being a any great length of time. The Nowy Krai place to which no importance has hitherto says that they number 10, and that they have been placed under guard on the Novik vessels are to pass through Behring Sea down the Kuriles and thus reach Vladivostock.

It is stated in Tokyo that, according to the Novoye Vremya, the Tsar, in appointing General Kuropatkin to command the troops in Manchuria and Admiral Makaroff to command the naval forces, informed Viceroy Alexieff that while both of these officers were to assist him, each was to have an independent and responsible post. Russian journal gives what purports to be an extract from a despatch of the Tsar to the Viceroy in the above sense. There can be no doubt if this statement be true, Viceroy Alexieff must regard himself as virtually dethroned. To be deprived of any control of the troops in the field or the ships on the sea, and to be reduced to the discharge of merely administrative duties, is to cease, in effect, to be Viceroy.

Monday, April 4 A trooper named Tadokoro was the first to fall in the land operations north of Pyong-yang. It appears that he and three other troopers under the orders of Lieutenant Maruo had! retreated eastward towards Pakchhon before a force of Cossacks moving southward along the coast road, when another body of Cossacks was descried moving westward from Pakchhon. The five Japanese, caught between two bodies of the enemy, saw nothing for it but to take refuge in a grove at some distance. Just as they were about to turn off the road along a track leading to the grove, Tadokoro's horse was shot. This involved a delay, the men some Koreans with a bullet through his body

Shanghai telegraphs that on the 30th ultimo a Russian squadron sunk the Satsuks Maru between Port Arthur and Weihaiwei. developed a range of 14 or 15 miles it enemies of one's country. Truth and justice Pechili. It is therefore conjectured that this becomes absurd that an enemy's ships should always come out on the top in the long run, story may be merely a mistaken version of be allowed to fire indiscriminately within 3 and Mr. Akiyama will be amply vindicated the sinking of the Hanyei Maru. The Jiji Meanwhile the silence of contempt is, we Shimpo's Shanghai correspondent says that The latest intelligence is that this vessel think, the proper attitude to adopt towards Admiral Makaroff has announced that he will be the story of the story o regard as an enemy's vessel and will sink

zone, does not show a light at night, does not run up her colours when challenged and the Crientals were accustomed. He said to suppose that in these circumstances not run up her colours when challenged and does not show her colours during day-light. The Admiral does not limit this announcement to merchantmen; he promises to treat men-of-war similarly. It is a fine role, this devotion of a great Power's fleet to purely predatory purposes. If Admiral Makaroff wanted an occupation worthier of the flag he flies, he could easily find it. But perhaps there might be "five cruisers" in the way.

The Japanese subjects who were recently sent from Blagovestchensk to Stretinsk seem to have been most kindly treated by the Russians at the former place. They have addressed a letter of thanks to the Blagovestchensk officials. Such incidents are very pleasant to record.

It is stated that the Russian authorities have decided to establish their principal hospitals for war purposes at Habarovsk, Chetah, Blagovestchensk, Stretinsk, Harbiu, Nikolisk and Vladivostock.

Tuesday, April 5. It is reported that a force of Russian infantry and cavalry had an engagement with bandits at some point on the north-east of the Liaotung peninsula on the 23rd ult., and that 40 of the latter were killed.

Roumania has declared strict neutrality, which contrasts with the conduct of the Servians, who have formed a volunteer corps for Russia.

The prospect that Russia may soon seek a foreign loan of a thousand million roubles has led to a discussion in Berlin, Paris and Amsterdam as to whether it would not be a breach of neutrality to supply money to a belligerent. The Emperor of Germany is represented as saying that if China fail to observe strict neutrality, Germany and France must supply to Russia all the money she needs, and that the same principle will apply in the event of England or America helping Japan with money. This statement comes from a French paper and sounds apocryphal.

Wednesday, April 6.

From the Mukden-Shanghai Factory paid a visit of inspection to Port Arthur on the 2nd instant, and that he found the harbour's entrance entirely unobstructed. But he was surprised at the shell-holes in the walls of the houses.

A Chinese subject who left Vladivostock on the 10th of March and reached Chefoo on the 21st of that month, is represented as saying that in the Japanese bombardment of Vladivostock on the 6th of March. several shells fell in or near the barracks on the east of the town, exploding a powdermagazine, destroying a telegraph-station and a Chinese cook-shop, and killing 3 marines and wounding 9. A Russian woman who happened to be drawing water from a well, was also killed. As to the forts, this Chinaman affirms that several shells fell in No. 5 fort and No. 9 fort, killing and wounding over 40 Russians and killing 3 Chinese coolies.

in the Bank was actually increasing, and bable at present that any craft will be cap- or disease contracted on service that their that if any metal was to be sent to the seat tured at a more convenient distance from parents, wives and children became in some

any ship which, being within the belligerent of war it would be silver, to the use of which the court's place of session. One is inclined that the Russian Mint was actually casting Admiral Makaroff would refrain from empty silver bars, similar to those employed in Manchuria, for the use of the Russian authorities there. Finally, the Minister depied all knowledge of any purpose in the denied all knowledge of any purpose on the part of Russia to float a loan in France.

Friday, April 8.

It appears that all the talk about eggs and bean-cake being placed on the list of contraband of war by the Customs at Shanghai, has no foundation in fact. The question of vetoing the export of these staples is said not to have been considered at all. The same is true of Chefoo. but it being understood that the Russian Consul there has expressed some objection, orders have been sent to the Customs Taotai to look into the

A Korean subject who has just returned from Vladivostock confirms the recently received rumours that the bombardment on the 6th of March was by no means the innocuous affair that the Russians made it out to be. A good deal of damage was done and the people of the town were so thoroughly alarmed that many effected their escape, as did also several soldiers.

The same informant says that the Russians who were at Possiet have all retired, civilians and soldiers alike, apprehending an attack by Japanese, and that there only remains a battalion at Honcheün.

M. Pavlow has arrived at Chefoo from

Shanghai and is supposed to be en ronte for Tientsin. We expect that he will furnish some sensation for the public.

BOMBAST.

The action of Admiral Makaroff has provoked some ridicule in Japan. He pro-claims that any ship found within the fight-ing zone (sakusen kodo no hani-nai) and not showing lights by night or colours by day will be treated as an enemy and sunk. What does the Admiral mean by the "fighting zone"? Where does there remain to Japanese ships are in sight, and to hurry back again as a timid leveret scurries squadrons in Far Eastern waters since the war began have been indeed stupendous. They have sunk two merchant steamers, one less than 400 tons register, the other only 70 tons. There was some excuse for the sinking of the former because to carry her into port, a distance of 400 miles, might have involved the formidable contingency of falling in with some Japanese men-of-Thursday, April 7.

The St. Petersburg correspondent of the Russians was so great that they

proclamations and vain threats, and that he would wait to accomplish something before so loudly announcing what he intends to do if he can catch any helpless merchantman without lights or colours.

That is the kind of criticism to which Admiral Makaroff is exposing himself at the hands of the Japanese, who fortunately have a sense of humour.

HENHWANGTING AND ITS NEIGHBOUR-HOOD.

The special correspondent of the Asahi Shimbun claims to have paid a visit in the middle of March to Fenhwangting and its neighbourhood. Fenhwangting is an important town on the main road from Kiulienching to Mukden. The correspondent found that between a point outside the south gate and the corner of the east gate, 500 infantry of the 14th Regiment were posted, together with 600 or 700 Cossacks. The Taotai had instructed the inhabitants of 16 neighbouring villages to supply, without charge, large baggagecarts drawn by 3 oxen or upwards for the use of the Russians, 2 for each village. It appeared, however, that the Russians were requisitioning many more, not for transport purposes, but to kill and eat the cattle. Bags of materials for making black bread were piled in great quantities near the South and East gates and were guarded by Chinese soldiers. The Russian officers were making their quarters in a temple near the West gate. All the salt obtainable had been requisitioned, doubtless for salting Since the Chinese New Year the local officials had been compelled to work in Russian interests and would not entertain any complaints from the people. There was any complaints from the people. There was much fort building going on in the vicinity of Fenhwangting. At Saho there were 3,000 infantry, and 500 artillery with 16 guns were on the west of Antung. Some 2,000 newly raised independent cavalry were in the neighbourhood of Kiulienching, and along From the Mukden-Shanghai Factory Russia any maritime fighting zone unless source it is alleged that Viceroy Alexieff paid a visit of inspection to Port Arthur paid a visit of inspection to Port Arthur on the 2nd instant and that he found the range of her guns at Port Arthur? The were posted. On the 20th and 21st of Admiral seems to pursue the tactics on February 2,000 cavalry and artillery under which his country has traded for so long, bluff and brag. He is not in command of any fighting zone. He does not venture to emerge from Port Arthur, unless it be to collected at Sakia on the north of the Yalu creep out for a few hours when no for the purpose of bridging the river, and Japanese ships are in sight, and to hurry iron pillars had been erected at each side of the river, but the sufficiency of boats had home to her form among the hill-side not yet been procured. The Russians had rushes. The achievements of the Russian placed sentries over all the shops where rice, milletand corn were sold, and would not allow any of these articles to be removed. On the south bank of the river-the Korean bankthe people had fled from the villages, filling up the wells beforehand so as to prevent the Russians from taking up their quarters there.

AN IMPERIAL ORDINANCE.

The Emperor has issued an Ordinance directing that State aid shall be given to the Petit Farisien reported on March 19th dared not loiter even on a three or four families of non-commissioned officers and that he had an interview with Finance hours' voyage, they could have carried the soldiers serving at the front, should it be as-Minister Kokovzoff, who expressed surprise Hangei to Port Arthur. They have a duly certained that these families are suffering desadding that Russia had profited by buying Russian stocks at bottom prices. The Minister declared that the gold reserve Hangei, for certainly it does not seem prowhen men fell in battle or died of wounds degree a public charge. The new Ordinance is to apply also, during a space of three months, to families whose breadwinners are killed, are undergoing treatment for wounds or illness, or have disappeared, and to the case of men whose period of service is extended owing to their being at the front. We do not clearly understand why men killed in action should be included in the category, but apparently the explana-tion is that whereas the families of these men become objects of State aid even under existing regulations, some time always elapses before they receive anything; the purpose of the Ordinance is to provide that any assistance they are in the act of receiv-ing under its provisions shall not be at once discontinued in view of the recipients coming within the purview of the normal system.

THE " MANDJOUR" AFFAIR.

The following official statement has been published.

The Russian gunboat Mandjour (1,224 tons) which had been staying for some time at Shanghai prior to the outbreak of the Russo-Japanese war, took on board a large quantity of coal after February 10th. On the 11th she was brought alongside the quay facing the Chinese Eastern Railway Company's godown and was taking a large quantity of ammunition on board. Upon this, on February 11th, the Japanese Consul-General at Shanghai called the attention of the Chinese local authorities to the matter. The Tao-tai of Shanghai required the com-The Tao-tai of Shanghai required the commander of the *Mandjour* to leave the port as soon as possible, but the latter did not consent. The Chinese Government proclaimed their rules of neutrality, about the middle of February, according to which belligerent warships were prohibited from staying more than 24 hours in any Chinese port except in certain specified cases. Consequently, on Feb. 19th, the Imperial Government instructed the Japanese Consul-General at Shanghai to demand that the Chinese at Shanghai to demand that the Chinese local authorities urge the departure of the Mandjour, pointing out that her presence at Shanghai constituted not only a menace to the trade but also a gross violation of the rules of neutrality proclaimed by the Chinese Government, and at the same time to announce that H.I.J.M.S. Akitsushima, which had proceeded to Woosung on Feb. 19th, would leave within 24 hours in accordance with the said rules.

Thereupon the Shanghai Tao-tai sent a note to the Russian Consul-General demanding the withdrawal of the Mandjour within 24 hours commencing from 5 p.m., Feb. 20th, to which the Russian Consul replied to the effect that as certain arrangements had been made between the Russian Minister in China and the Waiwu-pu, he desired to do nothing until he received instructions from the Rus-sian Minister.

On Feb. 22nd the Imperial Government instructed the Japanese Minister in China to declare to the Chinese Government that in case of the non-withdrawal of the Mandjour from Shanghai within the prescribed time, the Chinese Government should, by right of neut-

On February 24th the Chinese Government requested the acceptance by the Imperial Government of the following arrangements agreed upon between the Chinese Government and the Russian Minister to China, by which the Mandjour was to be disarmed leaving her guns, rifles and ammunition in charge of the Municipal Council and the Russian Minister would solemnly promise by an official communication that the gunboat should not leave Shanghai until the termination of the war. But the Imperial Government did not regard the above arrangement as a satisfactory guarantee for the future, and replied to the Chinese Government that the Imperial Government deemed it essential either to remove the machinery necessary for navigation or to place the vessel under the direct control of the Chinese

Upon this, further negotiations were carried on between the Chinese Government and the Russian Minister, and the Shanghai Taotai, on March 7th, informed the Japanese Consul-General at Shanghai that he had required the Russian Consul-General to remove the breech blocks of guns, rifles, ammunition and necessary machinery from the gunboat, and at the same time requested the withdrawal of the Japanese warship from Woosung

On March 10th, a proposal was made to the Japanese Consul-General at Shanghai by the French Consul at the request of the Russian authorities that, if it was not objec-tionable to the Imperial Government, the greater part of the crew of the Mandjour would be sent home by a French mail steamer, and that before their departure a written pledge not to engage in hostile acts against the Japanese in the present war. The disarmament of the Mandjour was slowly carried out then by removing the breech blocks of the guns, and by transhipping her ammunition to the Chinese warship Nansoy. Meanwhile the Shanghai Customs authorities expressed a desire to the Japanese Consul-General to leave the shells on board the ship as they feared accidents in handling the same, and the Imperial Government gave their consent thereto, and at the same time in-Mandjour question.

authorities to take charge of the rifles and fundamental idea of which is due to Mr. A.

China requested the Chinese Government ed on the steamers of the Metropolitan to cause the Japanese warship to withdraw Steamship Company, the masters of which at once from the port, on the ground vessels report "that they have been able, that the disarmament of the Russian war-invariably, to locate, actually, the Boston ship had been completed. To this the Wei-lightship, upon which a submerged bell chinese Government should, y, you the gunboat in such a condition during the continuance of the war as to be unable to participate in belligerent action, and that in case of failure to effect this obligation of neutrality on the part of China, the Imperial Government will be forced to advance their warship to Shanghai, and that the Chinese Government shall be held responsible for any consequences arising out of such a step.

that the disarmament of the ship had been completed. To this the Wei-lightship, upon when a procaching at full machinery was, in accordance with previous speed (namely, 16 knots an hour), at disarrangement, removed from the Russian tances of three miles and upward. These warship, they could not demand the withat the Chinese Government shall be held responsible for any consequences arising out of such a long side the wharf of the Chinese Eastern on a Sunday last October when the James Railway Company and at last landed the S. Whitney was approaching the Boston

vital part of her machinery. The written pledge given by the commander of the Russian warship (as to the crew who were to be sent home by the French mail leaving on March 30th) was handed over through the French Consul to the Japanese Consul-General at Shanghai.

On March 30th the Japanese Consul-Generalat Shanghai together with the commander of the Akitsushima inspected the arms removed from the Russian warship. of these proved quite satisfactory, the Akitsushima cleared from the port on March 31st, upon receipt of a telegraphic instruction, and the Imperial Japanese Minister at Peking has been instructed to communicate the above fact to the Chinese Government.

THE SAN-SHAN ISLAND INCIDENT.

It proves to be true that the French Representative in Tokyo addressed on the 24th instant, a remonstrance which the Russian Government asked France to convey to Japan with reference to the alleged destruction of a sanitorium on one of the San-Shan Islands on the 10th of March. This act is declared to have been contrary to Art. No. 25 of the appendix of the Hague Convention. The Japanese Minister of Foreign Affairs replied that there had not yet been any report on the subject from the Japanese Admiral, but that, at any rate, the Article quoted had reference to military operations on land only and did not refer to naval operations.

In this matter the Japanese seem to be in the right. The part referred to in the Hague Convention of 1899 is distinctly limited to written pledge would be given that they would not participate in the present war. The would not participate in the present war. The Imperial Government replied through the Consul-General that they had no objection to sending the greater part of the crew home under ed only a hope. Finally, the Japanese say that so far as they know, there was no sanatorium on this island: the only buildings were a naval signalling station and a few other public bulldings.

SUBMARINE SIGNALLING.

Apparently an immense addition has been made to practically useful apparatus by the completion of the Mundy-Gray-Millet system of submarine signalling. Science had not yet discovered any method of warnstructed the Japanese Minister at Peking to ing ships against the dangers of collision on urge upon the Chinese Government to account of fogs, or against the perils that bring about a speedy solution of the seem to result from the development of the formidable submarine torpedo-boat. On March 31st, the Japanese Consul-General at Shanghai telegraphed that, as it through the atmosphere have proved more or was inconvenient for the Shanghai Customs less unsuccessful. But this new system, the authorities to take charge of the files and pistols and keep them in good condition, I. Mundy, which was carried through its initiatory stages by the late Professor Elisha Mandjour now that the necessary machinery and which has now been made a as well as the ammunition were to be landed. This was also consented to by the Imperial Government.

On March 23rd, the Russian Minister to For some time back it has been installed.

lightship on her return from New York. Owing to the severe gale which had been blowing for several days, the seas were mountainous. As the steamer came up Boston bay, the Boston lightship was obscured by heavy rain and fog. Not hearing the fog horn on the Boston lightship when expecting to, Capt. Grove turned to the signal apparatus, and putting the ear pieces to his ear, immediately heard the submarine bell and got his direction. Five minutes later, having meanwhile proceeded on the course so obtained, he heard, for the first time, the whistle on the lightship. No better test of the value of this invention could possibly be asked." American journals contain a great deal about this invention and it appears destined to be of immense importance in saving life and property.

GERMANY AND JAPAN.

Earl Percy, in reply to a question, stated that the British Government had no information about an alleged arrangement between Germany and Russia; an arrangement under which the former Power was to assist the latter-presumably by supplying arms and ammunition during the war with Japanwhile the latter, in return, would promote the Germany Bagdad-Railway project and would otherwise aid her aspirations in Asia Minor. This account of parliamentary proceedings is taken from telegrams in a Hawaii news-

In this context may be quoted the follow ing from the Berlin correspondent of The Times, under date of February 12th:—

Times, under date of February 12th:—

In previous despatches it has been pointed out that, apart from the strength of Russia's position on her Western frontier, she did not need to entertain any apprehensions regarding the attitude of her Western neighbours. With Austria she is actually co-operating in the Macedonian question, while Germany has neither any inclination to attack Russia, nor has she anything to gain by doing so. In these circumstances it is somewhat surprising to be told, on the authority of the demi-semi-official Lokalanseiger, that during the recert Imperial needings at Wiesbaden and at Darmstadt Germany was sounded on this subject by Russia. It is added that the German Government may be taken to have described proposals of this as superfluous, on the ground that there was absolutely no reason why Germany should give any cause for for anxiety to her Eastern neighbour while Russia was occupied in East Asia. According to other accounts the German assurances were of a spontaneous and cordial character.

It has not hitherto been the custom for Prussia or

It has not hitherto been the custom for Prussia or for Germany to issue a declaration of neutrality. The Lokalunzize, however, amicipates that on the present occasion an exception will be made and that German neutrality will be officially pre-claimed.

The Huwver Courier learns that the Russian Government, in anticipation of war with Japan, "made definite proposals to the Berlin Government, which could only have been based upon the idea that the conflagration in East Asia would not remain localized." These proposals "would have amounted to a Russo-German alliance, and were certainly of a promising character from the German point of view, since they would not have interfered with Germany's obligations towards her old allies." It is a Ided that Germany did not respond to these offers on the sole ground that to hove accepted them might have involved obligations which would have inhade it difficult for Germany to observe neutrality in all the stages through which the war may pass. This neutrality Germany will and must in all circumstances maintain in her own interest.

All these hints and tumours, which are doubtless.

diplomacy from being crossed by inconvenient manifestations of popular opinion such as the recent vigorous articles of the leading Clerical organ, the Koelnische Volkszeituna. In some quarters it seems to be believed that opportunities for reviving the-reputation of German diplomacy will not be lacking, but as yet the occasion for efforts of this nature has not arrived. It remains to be seen whether anything can be made out of the American proposal for the neutralization of China.

RELIGIOUS SYMPATHIES IN THE EUSSO-JAPANESE WAR.

In its attitude toward the war in the Far East the Christian press of America, paradoxical as it may at first sight appear, is overwhelmingly in sympathy with the non-Christian combatant, says the Literary Digest. This feeling of sympathy exists, says the Boston Congregationalist, "not at all because Christendom has ceased to value Christianity and long for its ulti-mate triumph in Asia," but because it recognizes that Japan's greater toleration of religious views and her modernity in point of view offer conditions for religious propaganda and civilizing work which would be impossible under Russian domination. "In her spirit, her political and religious institu-tions, her agrarian life," observes the New York Ontlook, "Russia represents the sixteenth century; Japan the twentieth." The New York Independent declares:

The New York Independent declares:

"Russia claims to be fighting the battle of Christian claims to be fighting the battle of Christian against a pagan nation. It is not so easy to say which is the Christian nation. Japan allows liberty of conscience. There are inembers of Christian churches who command her battle-ships, who sit in her cabinet, who preside over her parliament. There is the full civilization that has grown out of Christianity: public schools, the best education, the institutions of business and benvolence which are the preduct of Christian nations, frankly adopted from this and other countries. There is a consitutional government, elected rulers, courts, and freedom. freedom.

freedom.

"But what do we see in Russia? An absolutely autocratic government, with no local self-government, no congress, no constitution, no public school system, no religious liberty, the Dukhobortsi, the Jews, and the Lutheran Finns equally forced into exile, and the Armenians in the Caucasus driven to frenzy by the robberty of their churches and schools. Which is the Christian country?" Christian country?'

The sympathy of America, says The Universalist Leader (Boston), "instinctively goes out to Japan, which country has been bullied by the big neighbour into striking the blow which may involve the nations of the world." Japan is "the rising star of the Fast," adds *The Presbyterian Banner* (Pittsburg), "and the world hopes to see it ascend to the zenith." And *The Christian Intelli*gencer (New York) comments:

" However much as Americans we may remember "However much as Americans we may remember the traditional friendship of Russia, may admite the presonal character of the Czar, and sympathize with the very proper aspiration for an open port, we can not but wish victory may come in the present conflict to the Sunrise Kingdom, the nation of the East which has been the first to welcome the civilization of the Most of the West.

Many religious papers, while affirming their sympathy with Japan, take the view that there are dangers, in the triumph of either combatant. In cases Japan wins, remarks The Western Christian Advocate (Cincinnati), "there is some reason for apprehension of a 'yellow peril' in the consequent self-assertiveness of paganism." The Ram's Horn (Chicago) says:

tiest admiration; but it must be confessed that this surest admiration; but it must be confessed that this very progress has made Japan conceited and self-assured, and in a sense farther beyond the reach of Christian appeal. It seems to many that slower development would have been better for her, permanently, if in the mean time her foundations could be laid in the solid masonry of Christian principles. Japan is not ready for so grave a trust as the leadership of Asia, . . . Though our sympathies are with Japan, prayers can not follow her into battle."

Russia's only support in the religious press, so far as we have noted, comes from Roman Catholic papers, and even these are divided in their opinions as to the merits of the controversy. The sympathies of *The Catholic Citizen* (Milwaukee) lean toward Japan. The Boston Pilot and the San Francisco Monitor favour Russia. The New World (Chicago) is emphatic in its support of the Russian side of the argument:

"What cause have we to sympathize with Japan? "What cause have we to sympathize with Japan? What has Japan ever done for us, further than to take Mr. Lafcadio Hearn off our hands? Russia, on the other hand, stood by the United States during the great civil struggle, and this at a time when England was our enemy. She stood by this country during the Venezuela difficulty, morever; and would it become us, as a people, to repay her kindness with ingratitude?

would it become us, as a people, to repay her knuness with ingratitude?

"Finally, if this is a Chistian nation, its sympathies
ought to go out to a Christian rather than a paganpeople. Crush Russia and paganism will be unified
and strengthened throughout India, Korea, Japan,
China, and Turkey. The Russians are schismatic
Catholic, it is true, but they are Christians. If they
win in the approaching conflict, Korea, Manchuria,
and China will be made Christian before the century
closes. If they lose, Christian civilization in Europe
may begin to take flight. For our part, we can not
see how Christians consistently can wish to see
Russia overwhelmed. In any case, we believe the
loudly trumpeted sympathy of Amerians for Japan
exists chiefly on paper."

The Eviends' Intelligences (Philadelphia)

phasized the essential sinfulness of all war. Why is it taken for granted, it asks, that "war should seem inevitable," and that after twenty centuries of preaching the gospel of the "Prince of Peace," two nations should have the right to settle their differences by "fighting it out like beasts or savages"? The same paper continues:

"It is not necessary every time we have occasion to speak of economic or political tendencies that point toward war to add a dissertation on the sinfulness and foolishness of war. But the editorial columns of a religious paper are not supposed to be devoted primarily to economics exclusive of their religious bearings.

"Are we to think that whole masses of Christians

"Are we to think that whole masses of Christians are being taught by their leaders, by implication, if not in so many words, that it is impossible to be fully and completely followers of Christ? As long as we do not behive it possible to get along without war, it is impossible, and because of our very unbelief. Such unbelief is widely enough spread and does not need to be preached by Christians, who, in this respect at least, have not yet seen their way clear to give themselves wholly to Christ."

NOTES ON CURRENT EVENTS.

A brilliant banquet and reception were given at the United States Legation on the evening of the 30th instant. Among those that sat down to dinner were His Imperial Highness Prince Kanin, Their Excellencies Gemany will and must in all cicumstances maintain in her own interest.

All these hints and rumours, which are doubtless extremely inexact and misleading, may best be studied in the light of a lecture which the Kalional-Zeitung administers to a section of the French Press. In this reprimand it is suggested that a systematic attempt is being made by certain French pournals to produce in Russia the impression that German public opinion and its organs sympathiae with Japan and are full of administion for the master-with Japan and are full of administion for the master-with Japan and are full of administion for the master-with Japan and are full of administion for the master-with Japan and are full of administion for the master-with Japan and are full of administion for the master-with Japan and a tribute is paid to the gallantry displayed by the Russian ships at Chemulpo in their encounter with a superior force. Every endeavour is being made to prevent the "tortuous paths" of paganism, the progress achieved provokes the hearlasted until nearly midnight.

We regret to learn from a telegram in the Asahi Shimbun that on the morning of the 30th of March Mr. N. Th. Kolessow, First Interpreter of the Russian Legation in Peking, committed suicide. He discharged two barrels of revolver into his head and one bullet entered the brain. Intemperance is said to have been the cause. Mr. Kolessow was an accomplished Chinese scholar, and his loss will be severely felt by the Legation.

We are informed that telegraphic advices have been received from the London Office of the Chartered Bank of L, A, and C, that at the approaching meeting of shareholders the Directors will recommend a dividend for the half year ended 31st December last at the rate of 10 per cent. per annum free of Income Tax, placing £75,000 to the Reserve Fund, which will then stand at £800,000, and carrying forward £63,000.

Eugene d'Albert announces in the Frankfurter Zeitung that German musical art at present is passing through a crisis which is not only critical for the concerns of to-day, but threatens the fruitfulness of the future. He says that, with the exception of Richard Strauss, Germany to-day contains only three great composers, and has no "young school" of coming eminence comparable to the young French school. Herr d'Albert, who is one of Germany's greatest pianists, concludes his arraignment as follows:—"The fault is directly due to the fact that Germany has become the land of materialism within the last few years. In former times we had artists who lived solely for their ideals, thinking little of material things; at the present time matters have completely changed the artist, placing his ideal, if he have one, after his love for material things. All means have become good, from the most vulgar advertisement to the most absurd seeking after foreign prestige, if the one seeking after foreign prestige, if the one permission to distribute the Scriptures among great result is obtained of drawing the crowd and filling the theatre. It may be said that even the teachers of piano-playing have become business men exactly as in England and America. The public no longer troops were furnished as they went to the believes in true talent, and yet the German youth does not lack in genius. There youth does not lack in genius. are many among the younger generation who would reach vast heights if they did not come in contact with professors who are not artists and consequently destroy the and German armies considerably exceeded a million copies, and cost the Society over evil to be remedied? First and above all, \$\(\frac{\partial 20,000}{\partial 0000}\). In 1894, when China and Japan it is necessary that all those who have not were at war, the Bible Committee in Japan an absolute confidence in the power of their distributed 113,939 copies of the Scriptures. vocation give up the artistic career, for every other career is open to them and will bring them in greater profits. The instructors should speak in this way to their pupils and but equal facilities have been granted the they should also stifle their personal desire. of making their pupils appear in public. Instructors should spare no pains in the formation of the vocation, for on this the entire future of the artist depends, and the pupils should be advised of the dangers and disillusions of the artistic career."

The Japanese Consul at Bombay reports that the sentiment in India is remarkably strong in Japan's favour. Innumerable

the capital assembled and the conversazione families, a sum of 20,000 rupees was subscribed in 10 days.

> Prince Li, Korea's special envoy to Japan, is expected to set out on the 15th instant. It is stated that his preparations have been of a somewhat elaborate character as they included the ordering of a foreign costume and the dressing of his hair in foreign style.

Out of 700 Japanese fishermen who remained in Saghalien from last year, 22 have returned to Hakodate. They report that all the Japanese hitherto upon the east coast of the island have removed to the west coast. Everything is quiet, but there is a rumour that the Russian Government intends to arm and use as soldiers the 25,000 convicts now on the island.

The first overhead railway in Japan was opened to traffic on the 6th instant. It connects Ryogoku with Honjo on the Sobu Railway, and has a length of 75 chains. The work was commenced on the 18th of April, 1903, and the sum expended has been 1 1/2 million yen, of which 600,000 yen was on account of the line itself. Another overhead line opened on the same day may be said to be a part of the above system. It is from Azuma-bashi to Kameido, which also is on the Sobu line. This second railway is called the Tobu Tetsudo. These lines will give facilities for flower viewing at Mukojima and Kameido.

On the 6th instant Sir William Nicholson and Sir Ian Hamilton were received in audience by the Emperor, being presented by Sir Claude MacDonald.

To the British and Foreign Bible Society any declaration of war means sudden increase of work in a way that is hardly realised by the outside world. Before the war was declared between Japan and Russia the Society's agent in Yokohama had obtained from General Terauchi, Minister of War, permission to distribute the Scriptures among copies of the Scriptures were circulated among both the Allies and the enemy. In the Franco-German war the issues to the French At the present moment not only is the Society's agent in Japan supplying the troops with such Scriptures as they may require, churia.

WEDDINGS.

The wedding of Miss Agnes Laurina Beatrice Ross, niece of Captain and Mrs. James Martin, to Mr. W. E. L. Sweet, of Kumanioto, attracted a large congregation to Christ Church on Tuesday afternoon, despite the unpropititious weather. Two

of orange blossoms above her bridal veil. The bridegroon had as best man, Mr. O. M. Poole, while the officiating clergymen were the Rev. W. P. G. Field and the Rev. W. Weston. After a reception at the residence of Captain and Mrs. Martin, the happy couple left for the South.

The marriage of Mr. F. J. Hall and Miss B. M. S. Baron, of Coventry, took place on Wednesday in Christ Church, the Rev. W. P. G. Field officiating, assisted by the Rev. W. Weston. There was a large and fashionable congregation. The church was beautifully decorated with masses of cherry blossom and white lilies, and the music incidental to the occasion—the Invocatory Psalm, the hybrid "The Voice that Inradied o'er the hymns, "The Voice that breathed o'er Eden" and "O, Perfect Love," and the Wedding March-was most appreciatively played by Mrs.

The bride was given away by Dr. E. Wheeler, at whose residence a reception was held after the ceremony. The bridesmaids, Miss Eileen Showler and Miss Doris Healing, wore Empire frocks of net over white silk, with red shoes and Dutch caps made of lace. They carried red baskets arranged with white marguerites and tied with red ribbons, with write marguerites and tied with red filbons, and wore gold crescent brooches set with pearls, the gifts of the bridegroon. Mr. C. Gibbens acted as best man, and the ushers were Messrs. F. E. White, F. W. R. Ward, W. G. Peter, E. R. Thompson, H. Gunn and S. Wheeler. The bride wore a dress of ivory satin trimmed with ruffled chiffon and a berthe of old Honiton lease (the gift of her mother), her weil being for lace (the gift of her mother), her veil being fas-tened with a wreath of orange blossoms. Her bouquet was composed of bride roses and lilies of the valley, bridal wreath and myrtle. The bride's travelling costume was of cream serge trimmed with white moire silk, and black picture

A meeting of the members of the Yokohama A meeting of the inembers of the Foxondar Amateur Rowing Club took place on April 5th at the Boathouse for the purpose of presenting to Mr. F. J. Hall, Captain of the Club, a token of their respect and esteem on the occasion of his

approaching marriage.

Mr. H. C. Litchfield, who has been president of the Club for many years, made the presentation and referred to the long connection of Mr. Hall with the Club and to the valuable services he had

rendered to it in every capacity.

Mr. HALL very briefly replied, assuring the members that he would as far as would be in his power, continue to interest himself in the affairs of the Club, and that he would endeavour to enlist the interest of his future wife in the sport with which the Club is so closely identified

NOTICES TO MARINERS.

The Minister of State for Communications notifies as follows:-

Notice is hereby given that Kawara-su Buoy, Southward of Hiro-shima, Shi-aku-seto, Inland Sea, which was notified to have been withdrawn temporarily, by the Notification No. 92 of Department of Communications, has now been replaced in its former

position.

Notice is hereby given that a Buoy has been established by the Department of Communications to mark the position of the Souken Rock Osone, the entrance to Nagasaki Harbour, Province of Hizen, as the temporary buoy moored there by Nagasaki Prefecture was withdrawn.

The Buoy is moored on the rock, in 6½ fathoms water at Low Water Spring Tides.

The Buoy is made of Iron, Conical in shape, painted red and black horizontal bands, and is surmounted by a Spherical topmark standing to feet labove the sea.

above the sea.

The magnetic bearings from the Buoy are as

Kagenoo-jima Lighthouse S. 73° 45′ W. lojima Lighthouse...... N. 84° 5′ W. S. W. end of Nezumi-jima N. 28° 30′ W.

scheme involving an increase of the aggre-

THE TOBACCO MONOPOLY.

THE stenographic records of the proceedings in committee show that the House of Representatives found itself much perplexed in dealing with the question of the State Monopoly of Tobacco Manufacture. Contrary to general expectation the principle of such an enterprise was not seriously called in question. There had been predictions that in view of past experience little disposition would be felt to sanction any renewal or extension of official incursions into the domain of industry, and that the tobaccomanufacturers themselves would be able to marshal formidable opposition. But these forecasts seem to have been ill-founded. The House accepted the Bill in principle. What puzzled the legislature was the problem of compensation. Something substantial had to be done for the forcibly dispossessed manufacturers. But how to do it? Originally the Government's scheme partook of the nature of confiscation; it was proposed to allot to each manufacturer a sum representing one year's net income of his business. That kind of high-handed dealing would never have secured parliamentary consent. More liberals counsel prevailed, and the Bill recently submitted to the Diet provided that each manufacturer should receive commutation amounting to the total of three years' net earnings. For the purpose of determining these earnings the Government conceived that the income tax returns would furnish the safest guide. There were 5,682 manufacturers in all, and of these 2,951 paid taxes on incomes returned as aggregating 2,836,159 yen. The rest reported their incomes as under 300 yen annually, and were consequently not liable for income tax. On these bases it appeared that the Treasury would have to pay commutation amounting to 9,100,000 yen in round figures, which sum it was proposed to hand over in bonds bearing 5 per cent, interest and redeemable in 7 years. But this method did not commend itself to the committee of the Lower House. It is well known that in Japan the public conscience does not acknowledge rigid obligations in the matter of income tax. People have not yet learned to think that there devolves on them any peremptory duty of assisting the Authorities to tax them. MURAI BROS, more than one half of the total Hence, speaking broadly, the income re-turns furnished by the tobacco-manufacturers could not be supposed to represent their real carnings. Some members of the Committee leading to such a result struck them as inequitable. But they will surely be ac-Hence, speaking broadly, the income rewere disposed to ignore that consideration. They took the view that if tradesfolk compiled deceptive statements the consequences must fall on the heads of the deceivers. The majority, however, while admitting the abstract justice of the the street instead of inviduously discriminating against cuesed of inviduously discriminating against consequences. majority, however, while admitting the ab-bying was done by the manufacturers who would have suffered under the threeapply it would partake of punitory proceedapply it would partake of punitory proceed-ure, whereas the Dict's business was, not foreign capital did not carry any weight. to punish the tobacco-manufacturers, but to discover some just and impartial method of buying them out. Thus far the Committee behaved in a logical manner, and had they then gone on to devise some other interests.

gate compensation, they would have been consistent. But they did not do that. They resolved to work within the Government's limits and to change only the method of distribution. In other words, they decided that the manufacturers should receive, en bloc, 9,100,000 yen, as planned by the Treasury, but that the money should be differently divided among them. Now it is evident that if this aggregate were just, then some of the manufacturers must be assumed to have over-stated their incomes by as much as others had understated theirs That it exactly what the Committee appear to have thought. They observed a great discrepancy in the income-tax returns of the manufacturers; for whereas one company declared an income which meant that its net profits amounted to about 18 per cent. of its gross sales, the others showed profits seldom exceeding 6 per cent. Looking at these figures and failing to appreciate any valid reasons for such variations, the Committee seem to have concluded that the very high returns had been compiled with reference to the contingency of a state monopoly, and that the very low returns erred equally in the other direction. So they set aside all the returns and resolved that compensation should be paid on the basis of actual transactions, 20 per cent. of one year's gross sales being allowed to each manufacturer instead of three years' net profits. This change works out disastrously for the principal company, since, its rate of profit being about 18 per cent. of its sales, it would receive 54 per cent. of the latter under the three-years' system, whereas under the new system it will receive only 20 per cent. Now this Company-Messrs. MURAI BRO-THERS-is maintained chiefly with British capital, and some people are disposed to believe that the true motive of the change made by the Committee is to discriminate against foreigners. We can not discover any evidence that such was the case. The stenographic records show that not a word on the subject of foreign capital was spoken either in the Committee-room or in the Chamber. It does indeed appear plainly enough that the Committee were startled by finding that the three-years' system would give to Messrs.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

As indicated in former Summaries, the Departof Education has been attacked in various newspapers and magazines in connection with its hasty compilation of text-books for Primary Schools. It has now sent to the newspapers

a long defence of its action, the substance of which we give below.

(1.) Certain of the books that are now being issued have been in hand over three years. is the case with the works on Morals. It is admitted that neither these books nor those that have necessarily been compiled hastily are ideal works, and the compilers have no wish to suppress any criticism that may be offered on the part of educationists. It is said that since the books hitherto in use have been franked by the Department, they have been declared suitable for their purpose and hence there is no need of the Department's going to the expense of compiling new books. But in franking books the Depart-ment has had to be content with the best it could get. Its franking of books may be compared to that school rule which allows students who have over 60 marks to pass. It is a compromise be-tween a very high and a very low standard. That books have been franked is no proof that they are as good as the Department considers they might be made. The books which have recently been compiled by the Department are in the opinion of the compilers no whit inferior to those used in past years. Free criticism is invited, and the compilers are ready to improve the newly is-sued works to any extent that may seem desirable. If by the expenditure of 200,000 yen even, a higher standard in the matter of text-books can be reached, previously existing abuses avoided and the minds of anxious parents throughout the country set at rest, the money will have been well spent. Hitherto the press has done next to nothing to improve the character of text-books. It has left them undiscussed (Jūrai no kyōkwa-sho ga kōhyō ni yotte kairyō seraretaru no jijitsu no kinshō naru wa, jūzen shimbun zasshi no kyōkwasho no hihyō no ideshi koto hotondo zetsunuu naru jijitsu wo mite mo shirubeshi.

(2) In only printing a limited number of copies of each book the compilers have been guided by two considerations, one being the matter of ex-pense, the other the question of the merits of the books prepared. The books are given to the world as specimens, and, instead of the compilers being afraid of criticism, they invite it. There is no objection to persons applying to the Mombusho for

leave to inspect the books.

(3) The assertion that the Mombushō have insisted on their newly compiled text-books being used in places where no case of bribery occurred under the old system, is baseless. But what has happened is that books have been condemned on account of the acceptance of bribes from their publishers, and so even in places where there has been no bribery, the use of these volumes has been rendered impossible.

(4) Those who complain that in the Readers there is a scarcity of history overlook the fact that the children who use these books are taught Geography and History together in the latter half of the school year.

The other points touched on in the Mounbusho defence concern the order of teaching Japanese sounds to beginners, the verb endings to be adopted, the method of spelling, and the like. Into these matters we have no space to go here.

The whole literary world has gone crazy over the war. All the magazines discuss the situation and its probable outcome. The Tulyō this month is full of war articles. We shall notice some of these presently, but first we purpose giving readers some idea of the enormous interest evoked by the war by furnishing a list of the publications which have sprung into existence during the past few weeks. They are quite phenomenal. It will be observed that all the big publishing houses in

of which are illustrated;

(1) Nichi-Ro Sensō Jikki (An Accurate Chronicle of the Russo-Japan War) 3 issues a month, at 10 sen a copy. Hakubunkan.
(2) Nichi-Ro Sensōki—Issued every Saturday at 10 sen a copy. Kinködö.
(3) Nichi-Ro Sensō Jikki—Fortnightly, 12 sen. Ikuzeisha.
(4) Nichi-Ro Kasearabu (22 188 bit) 6 issues

(4) Nichi-Ro Kosenroku (交 戰 錄)—6 issues in the month, 8 sen. Shunyodo.

(5) Nichi-Ro Sempo (戰報)—Thrice monthly, Fuzambō.

10 sen. Fuzambō.
(6) Nichi-Ro Sensō Shōhō (章報)—Fortnightly, 10 sen. Heiji Zasshisha.
(7) Nichi-Ro Daisensō-ki. Twice monthly, 7 sen. Daigakukan.
(8) Sei-Ro Sempō (在課職). Three times a month, 12 sen. Jitsugyō-no-Nihonsha.
(9) Nichi-Ro Senshi (誌). Fortnightly, 13 Kimbun Kan.

(10) Shonen Nichi-Ro Senki (War Record for Young People). 3 times a month, 6 sen. Iku-

(11) Senji Gwaho. Monthly, 18 sen. Senji Gwahosha

(12) Gunji Gwaho. Weekly, 10 sen. Gunji

(13) Sempō (War News). 3 times ■ month, 5 n. Sokumeisha. Printed in English and Japan

sen. Sokumeisha. Printed in English and Japan ese—for school students.

(14) The Russo-Japan War. Monthly, 12 sen. Printed in English only. Sonoya.

(15) The Kinködö has made an arrangement for publishing twice a quarter an English Record of the War, to be compiled by Mr. Yano Jirō, Rev. Arthur Lloyd, and some of the professors in the Military Academy. This, it is said, will be something very superior. The first number has something very superior. The first number has

ot yet appeared.

(16) Sei-Ro Zuye (Illustrated Account of the Expedition Against Russia). To be issued occasionally, 15, sen. Füzoku Gwahôsha.

occasionally, 15 sen. FUZOKU CWAIDSHA.

Omitting the small pamphlets which have been pouring forth from the press, the following books are announced as on sale. Gunjin no Komon (Advice for Warriors) price 25 sen. Kinōdō. Advice for Warriors) price 25 sen. Kinodo.

Nichi-Ro Gunka: Songs, compiled by Owada

Tateki on the war and set to music, 5 sen.

Gunkoku no Yeisei (The Preservation of Health

Gunkoku no Yeisei (The Preservation of Health in War time)—price 50 sen, Sekibunsha. Sensö Shösetsn, a novel by Emi Sui-in, 10 sen, Seibunsha. Nichi-Ro no fijvoku (The Russo-Japanese Crisis) 20 sen. Kinködö.
Nichi-Ro Senshi (t) by the Editor of the Tökyö Asahi Shimbun, Mr. Kurishima Yanuanosuke, subscription price one yen, Itakuraya. Maruya has just published a new Japanese-Russian Dictionary, compiled by Futatsubashi Ken; price 2 yen 50 sen. A phrase book designed to teach colloquial Russian is announced by the Nanködö at 50 sen a conv. called nounced by the Nanködö at 50 sen a copy, called Nichi-Ro Kwaiwa Shōkei (Chikamichi). A phrase book designed to teach soldiers Chinese

colloquial is announced by the Zenrin S o in under the title Shina-go sokusei (速成) Heiji Kwaiwa, price 20 sen.

Another work, entitled Nichi, Ro, Shin, Kan Kwaiwa "A Conversation Phrase-book on Japanese, Russian, Chinese and Korean" 20 sen, the Kaibunsha.

The subjoined learned works have all been called forth by the war, or though previously in print have been in large demand during the past few weeks. Senji Kohusai Koho (International few weeks. Senji Kohusai Koho (International Law in War Time). By Dr. Takahashi Sakue, price † yen 75 sen, Tetsugaku Sho-in. Senso Tetsugaku (War Philosophy). By Mr. Takahashi Gorō, 40 sen, Bunyeikaku. Nichi-Shin Senyeki Kohusaihō-ron. By Dr. Ariga, 1 yen. Tetsu-Gorō, 40 sen, Bunyeikaku. Nichi-Shin Senyek Kokusaihō-ron. By Dt. Ariga, 1 yen. Tetsu-gaku Shoin. Shichi hakase ikensho Kisō Temmatsu. This is an enlargement of the essay of the seven doctors which advocated war with Russia very strongly over a year ago. The Russia very strongly over a year ago. The book sells at 60 sen at the Shimizu Shoten. It is said that in its present shape it is one of the best representations published on Japan's political situation in the Far East. As to war maps their name is legion. We have made a list of no less than 17 different maps. According to good authorities the best of these is a map on modern Korea and Manchuria published by the Sanseido the Mombu called Saishin (最新) Man-Kan Chizu, And Sumaker)

The Taiyo's immense size allows of its finding space for articles on other than war topics. It is pointed out in the March number of the Kyôiku-kai by Mr. Kubota, the Minister of Education, that the country's permanent interests will best be furthered by the attention of all civilians and of students and teachers especially to the business

changes to be made.

The details are yet to be decided on. The recent (1) The alteration of our school system so as to make the connection between the various schools closer and to prevent such embarrassing of pupils as now exists. (2) The creation of Pre-paratory Departments in Middle Schools and schools. (3) The placing of half of the High Schools under the Universities and the conversion of the other half into technical colleges. (4) The reform of the University system of education and the creation of additional Universities; the design being to set apart the two existing Univer-sities as seats of high learning and for the encouragement of theoretical investigation of all kinds and the devotion of the newly created Universities to the training of practical men such as modern times call for. (5) The alteration of the rules of the Universities so as to allow students within certain limits to choose the subjects which they wish to study; the at-tendance on certain lectures only being com-pulsory; the rest being made voluntary. pulsory; the rest being made voluntary,

(6) The reform of the High Normal Schools and of all Provincial Normal Schools. (7) The enlargement of such technical and business schools as exist and the creation of new ones, in order to supply the increasing demand of the country for practical, well trained men.
(8) The improvement and stimulation of female education. (9) The adoption of such measures as may be deemed necessary for the stamping out of the idle, purposeless, theorizing class of student and for the creation of an energetic race of boys and girls, who shall glory in work of a practical kind and be endowed with pluck to overcome all difficulties. (10) In all ordinary schools the habit of exalting intellectual culture above moral and physical culture shall be abandoned. (11) The compilation of new rules relating to Education Societies.† (12) The shortening of school courses wherever such a measure is feasible, (13) The re-vision of the curricula of all schools, so as to lighten the burdens of the students. (14) The further development of the half-day school system, (15) The correction of abuses connected with examinations. (16) An increase in the number of good teachers, in the improvement of methods of teaching and in the methods of conducting schools, so as to allow of greater progress being made.
(17) Revision of the school fees, involving an increase of the charges in all schools but Primary

* In one large garrison town the students belong-

as for histories of the war and the events that and Special Schools. Then follow mumber of particulars bearing on the manner of dealing with teachers. More care is to be taken in the choice of directors of schools. The school inspection of directors of schools. The school inspection system, and the rules relating to the granting of degrees are to be revised and other minor changes commotion has, it is felt, been overdone in many places.*

The outlines of the reform of the educational system of the country embodied in a Departmental Order issued by the Mombustio on January 25th are given in this month's Tuiyo. We furnish the following short account of the nature of the country embodied in the nature of the country embodied in the country embodied in a Departmental order issued by the Mombustio on January 25th are given in this month's Tuiyo. We furnish the following short account of the nature of the country embodied in the country embodied in the country embodied in the country embodied in a Departmental country is the country embodied in a Departmental embodied in the country embodied in a Departmental country is the country embodied in a Departmental
Mr. Sasa Tomofusa, M.P., on the war are given in this month's Taiyo. Count Okuma says that Order simply lays down principles to be observed the strain on the nation can be easily borne in the reform which the present minister is bent on if the burdens are skilfully distributed. In carrying out if allowed a free hand. One has to taxation and in floating loaus much care will have bear in mind, however, that this order was prepared to be taken that things are not carried to excess before war was absolutely certain. Any changes in any one direction. We must be prepared, says before war was absolutely certain. Any changes in any one direction. We must be prepared, says that require extra funds, it is pretty sure, will not be effected within the next few years. Here are the bare principles as stated in the Order. following special characteristics of the present war. (1) In the first place Japan will have to put more men into the field than she has done in any previous war. (2) In the great wars of history usually when small countries have fought successfully against big countries, the former have been more civilised than the latter, and the war has not infrequently been in reality a contest between a higher and lower type of civilisation. So it was when in a single day the Greeks destroyed the Persian fleet and so was it when England fought against the great Spanish Armada. And so it is to-day when civilised Japan finds herself confronted with barbarian Russia. (Kondo no tatakai wa Nihon naru bummei shōkoku (1]. [2] ga Russia naru yaban no taikoku wo utsu no de, jūrai rei no nai tatakai de, Nihon rva bummei no gisen rvo yaru no de aru). for a principle in the way Japan is doing. There was no such war in the nineteenth century ‡ Japan fights on behalf of all civilised peoples. If she comes off victorious, it will then be seen that it is possible for a non-Christian country to act in highly honourable, generous, and humane manner, and so the myth that these virtues ex-clusively belong to Christians will be effectually exploded. As one of the results of this war, certain long standing race antipathies will be re-moved and international relations will enter on an entirely new era. (4) In uncivilised countries war is waged at the bidding of a despotic monarch and with the object of gaining his favour. The Russians fight for the Czar*, but this war as far as we fight for the Czarr, but this war as iar as we are concerned is waged on behalf of the whole nation. It is essentially the people's war. (Nihon no kondo no tatakai wa kokumin ga yō-kyū shita no de, kokumin teki no gun to Kunshu teki no gun to shōhai wo kessuru no de aru kara, kore mata ōini rekiski-jō ni atai aru koto de arō to omou). (5) The question of how far it will be necessary for us to extend military operations in order to obtain what we are fighting for is a difficult one. There will have to be a great decisive battle in Manchuria where the two armies will meet in full force. Supposing that we are victorious and that the Russian forces are driven out of Manchuria, a not improbable contingency would be jealousy of our power on the part of

† This is certainly questionable. The Americans, for instance, maintain that their war was fought to establish a principle.—(WRITER OF SUMMARY.)

If n one large garrison town the students belong, establish a principle.—(Writer of Summary.)

*This reminds us of Alfred Austin's recent poem, batches, stood by the side of a road where the soldiers were passing in order to cheer them. Study stopped and it took days after the week was over to quiet the minds of the boys in order to teach them.—(Writer of Summary.)

†These Societies, though professing to be voluntary and independent, are in reality creations of the Mombushö or of their employees.—(Writer of Summary.)

Summary.

*This reminds us of Alfred Austin's recent poem. "Moving Onward," published in the Times early in analysis of the Tsar." Another verse ends "while their sons and lovers march warward, deathward, doing the will of the Tsar." But the Japanese or complaint so far is that the Muscovite does not march "warward" nor "deathward," if there is any other way to go. But things may alter.—(Writer Of Summary). OF SUMMARY).

ome Western countries, and we might be forceds to collect material for an exhaustive history of under these circumstances to accept terms which would not be altogether satisfactory. But if this of the kind now given to the public. The sub"King Lear" "Hamlet," and the "Comedy of would not be altogether satisfactory. But if this does not occur, then we must be prepared not only to conquer Siberia, but to go as far as St. Petersburg and make our terms there. But if this be considered too great an undertaking, we may be able by negotiation with other Powers to take measures that shall prevent Russia's future incursions on Chinese territory.

Viscount Tani writes of his experience of Rusviscount 1 ant writes of this experience of Assistant troops. He does not think that the Japanese have anything to fear from them. As warriors they have many grave defects when compared with Japanese soldiers; but still Japan will not have such easy work as when fighting against the Chieffer and the must get very cautiously. the Chinese, and she must act very cautiously.

Mr. Sasa Tomofusa speaks in high praise of the manner in which long, wearisome, temper-trying negotiations were conducted by the Katsura Cabinet. Many hard things were said against the Government while the public were in ignorance of what was going on, but to-day it appears that in continuing the negotiations as long as there was the faintest chance of this country's obtaining its object without war, the country's obtaining its object without war, the Government was winning renown for itself in foreign countries and enlisting the sympathy of all fair-minded persons on Japan's side in the event of war. For the sake of this the Katsura Cabinet cheerfully bore the charge of timidity and lack of backbone. They realised that Japan's final success depends upon her receiving the support of unprejudiced Western Powers.†

In the form of occasional extra numbers of the Taiyo, the Hakubutsukan issues valuable historical Taupo, the Hakubutsukan issues valuable historical and other works. On January 15th last a "History of the Japanese Imperial Diet" appeared as Vol. I. of the "History of the Meiji Era," which this big publishing house has in contemplation. this big publishing house has in contemplation. The work proper covers 189 large-sized, closely printed pages. It is followed by a supplement, entitled a "History of the 36th years of Meiji" (1903). In the preface to the History of the Diet, the author, whose name is not given, says:—The compiler of this history has made it his chief which to furnish a correct personnt of the principal. object to furnish a correct account of the principal business transacted by the Diet during its 19 sessions, to draw attention to the great questions discussed and to describe the conflicts between the Cabinet and the Diet during the period under review. This being a history of the Diet and not a history of Japanese politics generally, a number of political questions of interest are not treated or even mentioned here. The history of the Diet having stretched over 14 years and the changes of Cabinet during that time having been very numerous, it was only by strictly excluding all extraneous matter that the history could be kept within the prescribed limits. Lengthy and involved discussions have as a rule had to be omit-But in the discussions on the Budget the author has deemed it necessary to go into details author has declined it necessary to go into details somewhat closely. It has been usually over the Budget that the greatest conflicts between the Diet and the Government have taken place. The work, says the author, pretends to be no more than a bare record of salients facts and there has been record of salients facts and there has been no attempt to present the facts in a taking manner; but great care has been exercised in the choice of material and exaggeration of every kind has been avoided. The book begins with an account of the condition of affairs prior to the opening of the Diet, a brief account of the first General Election and the choice of Presidents and Vice-Presidents of the Houses, etc., and then goes on to record in order the business of the first Session. As a handy book of reference the Gikai-Shi will be welcomed by Japanese politicians and by foreign scholars. The whole volume, covering 263 pages, sells at 25 sen a copy.

The Hakubunkan announces that it proposes

† The protracted negotiations benefited Japan in another way; they threw Russia off her guard and made her think that this patient and polite little country would not dream of going to war without giving ample notice to the enemy to enable him to make all necessary preparations.—(Writer of Summary).

* This work existed before, but it was greatly all the said that geniuses are born and not made, all necessary preparations.—(Writer of Summary). How then can they be educated, as the title of

jects to be treated hereafter are stated to be, Foreign Intercourse and Diplomacy, Finance, Military Affairs, Literature and Art, Law, Education, Production and Means of Communication. As a supplement to each volume a history of the previous year will be given; so that the reader may be able to trace clearly the steps of progress made in various particulars year by year. As the chief object of this scheme is to collect historical material of a thoroughly reliable character, the records will not voice personal or party opinions of any kind, but will be compiled in a thoroughly impartial and unimpassioned

The "History of 1903" forming the Supplement of the Gikai-Shi, is given under the following headings. (1) Politics, p. 202-p. 214. (2) Diplomacy, p. 214-p. 230-giving a detailed account of the Far Eastern crisis and the various negotiations with Russia, Korea and China. (3) Military and Naval Affairs, pp. 230, 231. (4) Finance, Economy, &c., p. 232-p. 240. Under this heading, Commerce, Communication, Productions, &c., are dealt with. (5) Society and Education p. 240-p. 250. Under this heading a number of interesting facts are recorded. Such as the establishment of the New Medical College at Education p. 240-p. 250. Medical College at Fukuoka, which at present is subject to the control of the Kyōto University, but eventually will become independent, it is said; the founding of a high class School of Forestry and Agriculture at Morioka, the Conversion of the Waseda Semmon Gakkō into a University and the treatment of certain of the Tokyo Law Schools in the same manner. (6) Religion p. 250—p. 253. (7) Fine Art p. 253—p. 258. 250—p. 253. (7) Fine Art p. 253—p. 258. (8) Literature, p. 258—p. 263. Under this heading the losses the literary world sustained last year in the deaths of Dr. Takayama, Mr. Ozaki Köyö, Mr. Ochiai Nawobumi and Mr. Masaoka Shiki are dwelt upon. Among these four Mr. Ozaki was the most prolific writer. During the past 15 years his works have been pouring out of the press. His first novel came out in 1889, entitled Faryū Kyōningyō. The next year he published "Yes and No." The works which followed up to the time of his death number nearly 60. Some of these of course were very short, but together they cover a wide area very short, but together they cover a wide area and reveal no ordinary amount of originality. He died at the age of 38. Mr. Ochiai was a native of Sendai. He studied at the Imperial University Japanese ancient literature and devoted his after-Japanese ancient literature and devoted his afterlife to writing works on the Japanese language.

He left the University to serve his term in the
army without graduating. He was the author of
a grammar called Nihon Daibunten, of a Dictionary called Koloba no Isumi,* of an Historical
Reader called Nihon Rekishi Tokuhon, of a
"Minute Commentary" on the Ukagami called

Lat we way the control of the Ukagami called 大鏡詳解, Ōkagami Shōkai, and of another Commentary called Kokubun Hyōshaku. He was engaged in the compilation of a big literary work called the ■本文學全書, Nihon Bungaku-zensho, up to the time of his last illness.

called the 圖本文學全會, Nihon Bungakuzensho, up to the time of his last illness.

Commenting in general way on the history of
literature in 1903 the work we are reviewing says:
Funeral followed funeral. Beyond that there is
little of great importance to record. But the passing away of our greatest realistic fiction-writer
will probably have marked effect on literature and turn public attention none too early to
quite another class of novel, the "purposequite another class of novel, the "purposenovel." Mr. Ozaki's fiction, continues this writer,

Errors.

The religious world, says this history, has not during the past year shown any tendency to stir up the philosophic world, but rather has been swayed by two philosophical works which have appeared, Mr. Kuroiwa's Tenjin Ron and Mr. Takahashi Corole Jinesishana I waysofishilosophy. Takahashi Gorō's /inseikwan. Loversof philosophy will be pleased to know that all Plato's works have been translated into Japanese by Dr. Matsumoto and Mr. Kinura Takatarō. This is an addition to our reference books on philosophy addition to our reference books on philosophy that is of priceless value. As to works on history there is little to be said. Dr. Tsuboi's Shigaku Kenkyū-hō is perhaps the only new and valuable work on this subject that appeared during the year, if the Zoku Kokushi Taikei, the Yashi (Ff h) and the Nisshin Senshi, works subscribed for a long time see he were the little of the subscribed for a long time see he were the little of the subscribed for a long time see he were the subscribed for a long time see he were the little of the subscribed for a long time see he were the subscribed for a long time see he were the subscribed for a long time see he were the subscribed for a long time see he were the subscribed for a long time see he were the subscribed for the subsc ed for a long time ago, be excepted.

Orthographic reform looks to be a little nearer than it was a few years ago. Certain high Mombu-sho officials seem at last to see that the thing must come sooner or later otherwise Japan will be hopelessly handicapped in the race for precedence among the nations of the world. A few months ago Mr. Sawayanagi published an article in the Kyōikukai entitled Kokumin no ichi Daimondai (A great National Question), in which he advocates radical changes, leaning to the side of those who re-commend the adoption of Roman letters. In the March number of the Kyöikukai Mr. Terata Yukichi (formerly Director of the Tokyo High Commercial School) comments on Mr. Sawaya-nagi's essay. While agreeing with it on the whole, he thinks that Mr. Sawayanagi has not taken into consideration the difficulties connected with writing the language used to-day either in Kana or Romaji. The number of homonyms is far too large, says Mr. Terata. The first step in the desired reform is to substitute other terms for the majority of those now in use, thus rendering the remaining ones capable of being understood without the characters. Mr. Terada, we observe, recommends the appointment of another committee of investigation. Why, such Committees are the laughing stock of the nation. Dr. Katō Hiroyuki observed a long time ago in Dr. Kato Hiroyuki observed a long time ago in reference to the committee of inquiry on which he himself was sitting that such bodies would never accomplish anything. They waste time over endless discussion as to methods of procedure. Unless the Mombusho has the pluck to take the bull by the horns and enforce some radical change in all their schools, the thing will never come. The settling on suitable substitutes for all the homoryms in use, as recommended. never come. The settling on suitable substitutes for all the homonyms in use, as recommended by Mr. Terada, would take half a century, we should say. Homonyms could be written so as to avoid mistunderstanding in an infinitely simpler way than they are now written in China and Japan by the exercise of a little ingenuity and the free use of diacritical marks. To alter the whole language in order to enable it to be

will probably have marked effect on literature and turn public attention none too early to quite another class of novel, the "purposenovel." Mr. Ozaki's fiction, continues this writer, does not go very deep into the workings of the human heart. There is realism and realism. Mr. Ozaki's was surface realism. Among purposenovels Mr. Tokutomi Rokwa's (the brother of the Editor of the Kokumin Skimbun) Kuroshiwo stands high. Kosugi Tengwai's realistic work, Makaze, Koikaze (The Devil's Wind and Love's Wind) is much read. Both these works are very up-to-date in their ideas. Other novels that are attracting attention are Kōda Rohan's Sora utsu Nami and Kawakami Bisan's Ishimaki Shozaemon, both long works and well written. Among transin military circles there is mourning over the death of Major-General Tamura, who was Second in Command of the Head-Quarter Staff.

this article suggests? There is a sense in which geniuses may be educated. Education being essentially and principally the granting of special facilities for the development of innate, intellectual powers, we can materially aid the production of geniuses by preparing suitable soil for their growth. Geniuses best thrive where intellectual freedom is, where there is no attempt to enforce conformity to stringent rules or to follow timidly one un-bending system of education. To seek to mould the minds of the young according to one fixed pattern is the sure way to prevent the rise of such men as we lost last year. Given the existence of an original mind, the amount of development it undergoes will depend largely on its surround-ings. If educationists can not manufacture genuises, they can create a congenial intellectual atmosphere by the aid of which gifted minds may reach a high state of perfection.

LITERARY GOSSIP.

Nearly three centuries ago, as a correspondent is at pains to point out in *The Times*, Ben Jonson is at pains to point out in The Times, Ben Jonson foreshadowed the invention of the torpedo. In the "Staple of News," produced in 1625, there is reference to an invisible eel made for the Hollanders "to swim the haven at Kunkirk and sink all the shipping there." Cymbal describes it thus: "It is an Automa, suns under water, with a snug nose, and has a nimble tail made like an auger, with which tail she wriggles betwixt the costs (ribs) of a ship, and sinks it straight.— Pennyboy.—A most brave device, to murder their flat bottoms."

flat bottoms."

The Pall Mall Gazette popular vote as to the best ten novels issued in 1903 has resulted in giving Henry Seton Merriman's "Barlasch of the Guard" a percentage of 81, Mrs. Humphry Ward's "Lady Rose's Daughter" a percentage of 65, F. Marion Crawford's "Heart of Rome" 51, Whiteing's "Yellow Van" 50, Stanley Weyman's "The Long Night" 44, Frank Danby's "Pigs in Clover" 44, Ellen Fowler's "Place and Power" 37, Quiller Couch's "Hetty Wesley" 32, Beatrice Haraaden's "Kathrine Frenscham" 32, and E. F. Benson's "Relentiess City" 30. The deductions are made from the voting, firstly, that the public is tired of the problem novel and that the public is tired of the problem novel and also the work dealing with serious social questions; secondly, that illustrations play a prominent part in the successful work,

Elwell's "Advanced Bridge" is just published by Charles Scribner's Sons. This volume, by the leading American teacher of Bridge, whose book, "Elwell on Bridge," has already become the This volume, by the authority, is intended to aid the student in acquiring a practical acquaintance with the various forms of attack and defense as outlined by the best players. Particular attention is given to the dealer's play of the dumind hany; the manage-ment of trumps is outlined in detail, and the underlying principles are fully illustrated by the complete play of selected hands. The writer has endeavored to make this work simple in arrangement and style, so as to be adapted to the capacity of all lovers of Bridge, and comprehensive and complete so as to be a sufficient and certain guide in the most difficult as well as in the easy

In a few weeks the Scribners will publish a novel of American Navy life by Anna A. Roger, author of "Sweethearts and Wives" which will bear the title "Peace and the Vices." The ac-

expect from the author of "Sweethearts and the whole world, is not a vital question. Wives.'

A special interest attaches to "The Log of H.M.S. Goliath, China Station, 1900-1903," as written by J. B. Brodie and A. F. Ray, and published as No. 5 of the "Log Series" by the Westminster Press (Gerrard's Limited). The narrative, besides dealing with life at what is now the scene of war, testifies to the very good feeling which existed throughout between our English bluejackets and those of the American and Japanese ships with whom they consorted. Of the Goliath of the past Mr. Lionel Yexley tells the reader in a spirited introduction. The Goliath of to-day was commissioned for service on the China Station in March, 1900, and was paid off at Chatham in September, 1903. Most of the photographic reproductions here given represent scenes and groups on board ship, but a few of them portray Japan and the Japanese, of which and whom the text gives us many glimpses

The modern novelist, who ventures to deal with heraldry or archæology in one of his stories, must go in fear and trembling, unless he has an absolutely wide and accurate knowledge of past years, and does not let the romancer's lawful vividness of imagination do duty in this respect. That very terrible man, the editor of the Ancestor. castigates two more victims of their own temerity; one of them a story-writer who has ventured to construct an ancient house at whose moat the English law had stayed. "'Every lord of the manor his own judge, jury, and executioner, the squire would say, modestly refusing to recognise the rare character of his family privileges." But as the squire possessed "a suit of Saxon armour, all of steel," anything might be expected of him. But a greater writer of to-day blunders over Charing Cross, which he recklessly describes as a beautiful old stone cross, oblivious of the fact that the Gothic toy in the Station yard was placed there in the middle of the last century by the Fouth-Eastern Railway Company. Nor does the modern cross stand on the site of the old one, for the once famous cross stood close to where King Charles rides, looking down White-hall—the one statue in London which, according to the experts, pleases the eye. After all it is easy to avoid writing about matters of which one is ignorant, and one of the most seductive pitfalls to be evaded is that provided by heraldry and archæology.

An interesting book is that just issued by the Rev. Morris Joseph under the title of "Judaism as Creed and Life. He tries to take a position between the Talmudists and the Liberal Jews, but leans mostly, to the conservative side. regard to the question of the Messiah, we find him writing: "Who would dare to tell these companies of sorrowing, trusting souls that their hope is vain, their faith a chimera?"—the hope of an independent Palestine under Messiah the Prince. But there is, he thinks, a more excellent way. The prospect of more far-seeing and enlightened souls is wider and larger: "In common with all Jews, they believe in a future not only for Israel, but for all mankind. They sincerely cherish the Prophetic faith in the advent of a Golden Age of universal peace and brotherly love. But they do not lay much stress upon details. Their picture of the earthly Paradise is purposely vague as is the Jewish dream of the heavenly Eden. A half-Divine figure, who is to change the existing order of things by the waving of a magic wand, has no author of "Sweethearts and Wives" which will place in their thoughts. They believe implicitly bear the title "Peace and the Vices." The action begins in Washington, moves to Japan, where the principal episodes take place, and ends on a ranch in California, on the eve of the war with Israel had no longer a Messiah, seeing that he had spain. The book is a refreshing variation from the ordinary run of fiction. The serious element that the prophetic utterances which seem to fore that the prophetic utterances which seem to fore studies of marked individuality. A large part at liberty to forbid these opinions than we opening that the story grows out of the fact are free to rebuke the minds that reject them. The union, feeling, power, dramatic interest, suspense, all are here, blended in just the Ternale in Jerusalem the religious centre of the Temple in Jerusalem the religious centre of the formal break-up of that double-edged policy of inclusion and exclusion. It was the formal opening of Japan to Western, or Christian, opening of Japan

be equally good Jews whatever view we hold on these points. They are details on which freedom of thought can be tolerated without injury to the Faith. But the same cannot be said of the Messianic Idea. That is one of the essentials of our creed, without which Judaism would have neither meaning nor life. If there is no Golden Age in store for the world, which the Jew is to bring nearer by his belief and his example, if Israel is never to behold the triumph of the great principles to which he has borne such pathetic witness the Ludeign in winter. witness, then Judaism is vain. To despair of that triumph is to confess that Judaism has no purposes to fulfil in God's scheme. It is to deny its truth. If the dogma of the Divine Unity is the foundation of our religion, the Messianic Idea is its coping-stone."

THE LAW COURTS.

HAIM v. BRETSCHNEIDER.

The hearing of this case, in which plaintiff claims yen 1,413.25 with interest, was resumed on April 5th in the Yokohama District Court before Judge Danno, when two Japanese were examined as witnesses.

U. Kitagawa stated that October 1903 Mr. Yokota received from defendant an order for 450,000 cups at sen 7½ per piece, with a dis-count of twenty per cent. for lower qualities. Two months after the contract was made the delivery of fifty cases was to take place, and at the end of every forty-five days fifty cases each till the execution of the order. On Dec. 25th witness gave defendant delivery of two cases containing 3,080 cups, when a foreign gentleman inspected the porcelain in the godown of defendant. This gentleman was Mr. Haim who had been a customer of defendant for the earthenware. The whole of the cups were to be packed in three hundred

Another witness, Takagi, stated that in the middle of November, 1903, Mr. Bretschneider ordered from the brother of witness about fifty cases containing sixty or seventy thousand cups. In the beginning of Dec. the witness gave delivery of one case containing fifteen hundred pieces on behalf of his brother. After having examined the porcelain, defendant refused to take delivery of them on the ground that the goods were not in unison with the sample offered, but later he paid the value of the goods. The porcelain was, however, exactly the same as the sample.

Mr. Akiyama, plaintiff's counsel asked the Court for leave to examine a foreign merchant as an expert as to commercial custom.

The case was adjourned.

A MURDERER SENTENCED.

Mr. Hara, an ex-policeman of the Kanda Station, Tokyo, who murdered a woman named Hana Miyamoto, was sentenced on April 5th in the Tokyo District Court to twelve years' penal servitude. According to the decision, the con-vict asked the woman for a loan of money and as she refused the request he committed the crime by strangling her with a cord. After having murdered her, he stole a gold watch belonging to the victim. He gave himself up at a police

JAPAN AND THE UNITED STATES.

March 31, 1904, was the semi-centennial anniversary of the signing of Perry's treaty of peace and amity with Japan. As the first treaty made with a foreign nation since the time when Japan had been secluded from the world, it was the formal break-up of that double-edged policy of inclusion and exclusion. It was the formal opening of Japan to Western, or Christian,

I. Peace and friendship.
II. Ports of Shimoda and Hakodate open to American ships, and necessary provisions to be

supplied them.

III. Relief to ship-wrecked people; expenses therefor to be refunded.

IV. Americans to be free as in other countries, but

amenable to just laws.
V. Americans at Shimoda and Hakodate not to he subject to restrictions; free to go about within

defined limits.

VI. Careful deliberation in transacting business which affects the welfare of either party.

VII. Trade in open ports subject to local regu-

VIII. Wood, water, provisions, coal, etc., to be procured through Japanese officers only.

IX. Most favoured nation clause.

X. U.S. ships restricted to the port of Shimoda and Hakodate, except when forced by stress of

weather.

XI. U.S. Consuls or agents to reside at Shimoda.

XII. Ratifications to be exchanged within eighteen

We feel inclined, however, to quote in full Article I, which reads as follows

"There shall be a perfect, permanent and universal peace, and a sincere and cordial amity, between the United States of America on the one part, and the Empire of Japan on the other, and between their people, respectively, without exception of persons or

We are pleased that present indications point to the complete fulfillment of the pledges made in that article and the desire expressed in the Preamble to "establish firm, lasting and sincere friendship;" and we most sincerely trust that nothing will ever happen to disturb the perfect peace and cordial amity between the two neigh-bours on the opposite shores of the Pacific Ocean. Concerning the significance of this treaty, Dr.

Nitobe writes as tollows: --

"Thus did the sailor-diplomat succeed in wresting from the reluctant nation a surety of friendship. Thus did Perry, America. Aryan civilization, science and Christianity triumph. Perry's—or let me say rather America's—coming was most providentially opportune. Had it been a little earlier, when the Japanese mind had not been prepared, or a little latter when the whole country was plunged in intestine turmoil, there is no saying what might have been America's success or Japan's fate."

success or Japan's fate."

Truly, the glory as well as the responsibility of having introduced Japan to Western civilization falls upon the United States of America.

One incident during the negotiations impresses one both favorably and unfavorably. It is graphically described* in the biography of "Mathew Galbraith Perry" by Dr. Griffis, who thus refers to "the presents which revealed the secrets of the foreigners' power":—

"Rifles and gun-powder, the electric telegraph the steam-locomotive and train, [the telescope, lifeboats, stoves, clocks, sewing machines, agricultural implements and machinery, standard scales, weights, measures, maps and charts, the works of Audubon and other American authors, were presented. * * * The American authors were presented. * * * The American may proudly note how very large a share his countrymen bave had in inventions and in applications of the great nutural forces that have revolutionized modern society. That one mile of telegraph wire has now become thousands; and that tiny railway, with toy locomotive and one car able to hold only a child, was the germ of the railway system in the Mikado's empire. Historic truth compels us to add, that among the presents there were one hundred barrels [gallons?] of whisky, a good supply of cherry cordial and champague. Thus did the new civilization with its good and evit confront the old. New Japan was to be born in the age of steam, electricity, the photograph, the newspaper and the printing-press; yet in the train of the culture of the West were to follow its curses and enemies. With the sons of God comes Suan also."

The treaty itself was not very long, but need not be transcribed in full; the following synopsis will suffice for present purposes:—

I. Peace and friendship.

multitude of sins; and encouragement in liquor the total cost of maintaining such a government drinking and attendant debauchery was unnecessary. It is to the everlasting share of America think that from the present there was need of that such articles should have been included much additional legislation beyond what was sary. It is to the everlasting sharne of America that such articles should have been included among the samples of our civilization. The wine, the champagne and the whiskey have been followed by ale, rum, beer and all other kinds of intoxicating liquors.

"Tis true 'tis pity, And pity 'tis 'tis true."

Milwaukee, for instance, is well-known in Japan, and "it's the beer that made Milwaukee famous here as elsewhere. It thus becomes America's enhanced responsibility and unavoidable duty, not merely to offset beer with bread, champagne with cotton, whisky with wheat, but also to instruct Japan faithfully in righteousness and tem-perance, in the love of God, in the consolations of Christ, in the consolations of the Holy Spirit. It is quite encouraging to note that Americans

have been, and are, foremost in all good works in Japan, in everything that makes for righteous-ness. The details of what they have done to advance Christian civilization in Japan may be found in such books as "The Intercourse between the United States and Japan" (Nitobe) and # America in the East" (Griffis). The assistance rendered by America and Americans to the rapidly developing civilization of New Japan has been generously given along national, political, diplomatic, social, legal, educational, scientific, agricultural, mercantile, philanthropic, moral and religious lines. And it now devolves upon the United States, not merely not to abate her efforts, but rather to increase her help, especially in this critical period in the history of New Japan.

Upon no other Christian nation presses so heavily the responsibility for the evangelization of Japan as upon the United States of America. And, in so far as the Christians of the United States fufil their duty, will Japan either praise or censure the nation which, through Perry's treaty, signed on March 31, 1854, forced her to come out of her seclusion into relations with the rest of the world.

E.W.C.

AMERICAN TOPICS.

President Roosevelt has directed the transfer of Mr. John Barrett, present U. S. Minister to the Argentine Republic, to be Minister to Panama. Mr. W. W. Russell, at present *Charge d'Affaires* at Panama, has been made Minister to Colombia, and Mr. Arthur W. Beaupré, now Minister to Colombia, has been made Minister to the Argen-

one who discharges a workman because he is a member of a labour union. The statute has been in force for more than two years, its passage being traceable to the support of legislators who feared the "labour vote" some time back.

Mr. Horace G. Burt, formerly President of the Union Pacific, has accepted the office of chief consulting engineer of the 'Trans-Siberian Railis to remain in the employ of the company for at least one year. Mr. Burt is to remain in the employ of the company for at least one year. His work will be to plan improvements along the Orenburg and Tashkend, Trans-Baikal, and Trans-Siberian railways.

The annual report of Comptroller Grout of New York City shows an unexpended balance for 1903 of nearly \$8,000,000 out of the \$97,000,000 appropriated for that year. This unexpended surplus, added to the budget for 1904, will give

contained in the Spooner act.

The opinion of the Supreme Court of the United States in the case of the Northern Securi-ties Co. vs. the United States, involving the mer-ger of the Northern Pacific and the Great Northern Railroad companies, was handed down on March 14th and was in favour of the Government. The decision, read by Justice Harlan, was concurred in by Justices Brown, Brewer, McKenna and Day, while the Chief Justice and Justices White, Peckham and Holmes dissented. Justice Brewer con-curred in affirming the merger decision, but for different reasons than that of the majority,

Mr. Charles Carroll Whitney, Secretary of the New York Life Insurance Co., died under painfully sudden circumstances in a coach on the way to his home at No. 260 Garfield Place, Brooklyn, to his nome at No. 200 Carnell Place, Brooklyn, on March 4th. He left his office at No. 346 Broadway late in the afternoon, and when the coach got to his home the driver waited some time for him to get out. Then he opened the door. Mr. Whitney was leaning back in the seat with a half-smoked cigar in his hand. The driver thought he was merely unconscious and called a doctor, who pronounced Mr. Whitney dead.

The States which lead Washington in the The States which lead Washington in the average wages paid farm hands are all on the Pacific coast. They are, in order named, Nevada, Montana, Wyoming, Idaho, and California. The difference is not very great between any of the States, that between California and Washington being but a few cents on the month. The wages paid in the State of Washington during 1902 were the highest ever recorded. The low-water mark was reached in 1805, when farm labourers without was reached in 1895, when farm labourers, without board, received \$28.27; and with board received \$17.64. In 1902 the figures were: With board, \$28.35, and without board \$40.54 per month.

Gifts have been reported recently of \$250,000 by Mr. J. Ogden Armour for the Armour Institute of Technology; \$500,000 by the will of Mr. Louis Gans, of New York city, to various charities, principally in New York city; \$25 each to 2,000 workinen and \$125,000 to the workmen's hearital by From York pridon, of the lead hospital by Frau Krupp, the widow of the late cannon-maker; \$600,000 to Boston university and \$300,000 each to Radcliffe and Wellesley Colombia, has been made Minister to the Argentine Republic, to succeed Mr. Barrett.

The Supreme Court of Ohio has declared unconstitutional the law that provides a penalty of the will of Mrs. Annie E. Moore, of Altoona, Pennsylvania; and \$80,000 to various constitutional the law that provides a penalty of the will of Mrs. Elizabeth W. Aldrich, of New York city.

Estimates of the yearly food bill of the people Estimates of the yearly food bill of the people of the United States show that there is business in plenty to be had by merchants who will go after it. The yearly food bill of the people of the United States is \$8,000,000. Eight billion dollars for food alone goes over the counters and into the tills of the retailers every year, to say nothing of all the other billions which are annually spent for clothing, for boots and shoes and hats and caps and underwear and hosiery, and still other billions for crockery and hard-ware, etc., etc. All these billions are too large a sum to comprehend: but the figures are not exaggerated: the money is actually spent every year, actually passes into retailers hands every

The American Locomotive Company has purchased the Locomotive & Machine Company of Montreal for \$1,500,000, 33 per cent. of which With the sons of God comes Sitten also."

It is, indeed, most fortunate that America has the honour of having introduced Japan to such blessings of Western civilization as those mentioned above; but it is also most unfortunate that America has likewise the disgrace and terrible responsibility of introducing the worst curses of Occidental civilization. Intemperance was already a national vice; sake was sufficient to cover a "It is more fully described in the official report of Perry's Expedition."

Montreal for \$1,500,000, 33 per cent. of which will be paid in cash and \$50,000, 16 will be paid in cash and \$50,000, 16 will be paid in cash and \$50,000, 17 the financing of the purchase will be of the amount to be raised by bond issues. Bonds to the amount of \$25,000,000 to \$50,000,000 to \$50,000,000 to \$50,000,000 to \$60,000 to the amount of \$25,000,000 to \$60,000 to the amount of \$25,000,000 to \$60,000 to the amount of \$25,000,000 to \$60,000 to the financing of the purchase will be paid in cash and \$50,000 in 4 per cent. bonds by the American Locomotive Commentioned, the bonds will be held in the treasury of the American Locomotive Company, the payment of cash being made out of the stream Committee on Interstate and Foreign Commerce acquisition of this plant is an advantage for the at its hearing on the bill to provide a form of American Locomotive Company, in that is now government for the Canal zone, that in his opinion expenses of the city government, exclusive of the amount of \$25,000,000 to \$65,000,000 to \$65 on engines for Canadian use, on which there is now a duty to that amount.

The United States Census Bureau has given out the following preliminary statement concerning irrigation in the territory of Arizona in 1902. The industrial art of irrigation in the United States began in Arizona, and indications are found throughout the valleys of the Gila and Salt rivers that large areas now barren and forbidding were once occupied by a numerous, prehistoric race. The canals now in use in many places follow quite closely the lines of those ancient systems. These early ditches reveal engineering skill of a high order, and must have required an immense expenditure of labour. Their origin is lost, even in tradition, for they were abandoned as early as 1542, when Coronado visited these valleys in search of the "Seven cities of Cibola," but ethnologists date their operation as early as the eighth or ninth century. Portions of the beds of these ancient ditches are to-day utilized in modern systems. The United States Census Bureau has given utilized.in modern systems.

The Schenectady plant of the American Loco-The Schenectady plant of the American Locomotive Works has under way the building of the largest locomotive in the world. It is to be the Mallet articulated type, will weigh 465,000 pounds when completed, which is 207 ½ tons, and is intended for freight work on the Baltimore & Ohio Railroad. The machine will be of the tandem compound style, with a peculiar arrangement of drive wheels and cylinders. It is being built as an experiment, and is intended for use as a balter on the mountain divisions of the road. built as an experiment, and is intended for use as a helper on the mountain divisions of the road. The heaviest engine now in use on the Baltimore & Ohio weighs 162½ tons. The new locomotive will have 320,000 pounds on the drivers, a tender weighing 143,000 pounds with coal capacity of 13 tons and matter capacity of 7,000 gallons. The wheel base is to be 30½ feet, the traction power 70,000 pounds, and on a perfectly level track the engine is expected to hanlover 10,000 tons. engine is expected to hanl over 10,000 tons.

Much has been made of the last lines written by Senator Hanna, a penciled note to President Roosevelt, reading as follows:

Roosevelt, reading as follows:

"My Dear Mr. President: You touched a
tender spot, old man, when you called personally
to inquire after me this A. M. I may be worse before I can be better, but all the same such drops of
kindness are good for a fellow.

"Friday, P. M. Sincerely yours.

"A. HANNA"

"Friday, P. M. M. A. HANNA."
The next day a reply was received from the President, with a note saying that it was to be shown to the Senator when Mrs. Hanna thought Senator Hanna never saw the reply, which

"Dear Senator: Indeed, it is your letter from your sick bed which is touching, not my visit. May you very soon be with us again, old fellow, as strong in body and as vigorous in your leadership and your friendship as ever.

Faithfully yours,

"THEODORE ROOSEVELT."

Exports of American manufactures in January show a larger total than ever before in the same portions of the year. In January they amounted to \$38,213,352, while the highest January record on any former occasion was that of 1900, when they were \$35,586.940. For the seven months ending with January they amounted to \$250,214,936, and the highest record for that seven months' period in any preceding year was that ending with January, 1901, when the total was \$239,564,064. By far the largest increase occurs in manufactured copper, of which the exports in the seven months ending with January, 1904, are reported at \$31,552,677, against Exports of American manufactures in January 1904, are reported at \$31,552,677, against for tiffin. Splendid yachting weath \$22,514,843 in 1903 and \$19,038,328 in 1902. Refined mineral oil is next in the list of minufactured articles showing an increase in export values, being for the seven months ending with values, being for the seven months ending with January, 1904, \$42,029,461, against \$35,324,067 in 1903 and \$40,664,900 in 1902. Iron and steel follow with a total of \$59,125, 780, against \$55,997,942 in the like seven months of 1903 and \$57,310,128 in 1902. For January alone the exports of iron and steel were \$8,171,738, against \$7,437,298 in January, 1903, making the increase for the single month \$734,440 and for the seven

months about \$3,000,000. to a little over \$2,000,000 for the seven months ending with January, 1904, as compared with the corresponding months of last year, and about \$4,000,000 increase as compared with the seven months ending with January, 1902.

With 10,000,000-bale cotton crops at good With 10,000,000-bale cotton crops at good prices, a 25,000,000-ton coal output, a 2,500,000-ton pig iron production, to says nothing of lumber, tolacco, fruit and other crops and products, the southern states are creating conditions unknown in their previous history, remarks the New York Sun. While the measure of prosperity has varied in the different lines, all have contributed to an unprecedented activity and a substantial increase in general wealth. Manufacturing enter-prises have taken the place of the old-time plantations and have established new channels of employment for the people. The south has prospered, and its prosperity continues. The results of all this are manifest not alone in the cities, but in almost every town, village and hamlet. New buildings appear everywhere. Sewer systems, works, electric plants for lighting and for trolby lines are fast becoming as nuch of a necessity as they are in the north and the west, and the south has the money to pay for them. Municipal bond issues have reached a luge aggregate, and have, in general, found ready sale at good prices, often in the immediate local market. Southern ports have done an enormously increased business, and southern railways have been hard pressed to handle their traffic. The establishment of these new conditions upon \(\end{array} \) foundation of unquestionemployment for the people. The south has pronew conditions upon ■ foundation of unquestionnew conditions upon moundation of unquestionable firmness opens a broad vista. The south has not yet been an objective point for the homesecker, to whom it really offers so much that a day will soon come when its many advantages for settlers will command wider attention and draw to it a few millions of those whose industry would contribute still further to southern development and progress.

DESULTORY NOTES ON SPORT.

Reuter evidently does not consider us a sufficiently sporting community to be interested in the Grand National Steeplechase. That very important event came off on the 25th March, but so far no public news has reached Yokohama as to the winner.

Owing to the heavy flooding of the Thames Valley, the February fixture at Windsor under National Hunt Rules had to be abandoned. There were two feet of water in the weighing room, and the racecourse rails were submerged.

The entries for the Spring Meeting of the Nippon Race Club close this afternoon, and on this occasion timely reminders have been given to those interested. It will be remembered that at the Autumn Meeting last year one owner overlooked the date, and did not send in his entries in time.

Leaving Yokohama after breakfast on Friday, they did such a quick run down the Bay that they were both in the harbour of Aburatsubo in time for tiffin. Splendid yachting weather was experienced with Mardan Grant Parkers. perienced until Monday afternoon, and it is sur-

The Royal Bombay Yacht Club brought their racing reason to a close with Regatta Week at the end of February. Amongst the prizes competed for during the five days' racing, was a Challenge Club presented by the Viceroy, H.E. Lord Curzon. Fine weather and an abundance of good exiling hereges halved to make the Regatta the steamer Tosa Marn went ashore on the morning of April 5th off the village of Kamiyo, Kaka sailing breezes helped to make the Regatta the most successful of recent years.

Smith of the 10th Hussars, and Jack Months like the state of the contest like the state of the state o Auliffe, who was starring in Kobe a couple of years ago. Smith is the champion heavyweight boxer of the Army, and having a great advantage in both weight and years, disposed of his plucky antagonist in the fifth round, and took the purse, which amounted to \$10,000.

One of the most exciting incidents in the racing career of the late Lord Alington is associated with the Cambridgeshire Stakes of 1863, won by Catch' Em Alive, owned by Lord Alington (then Mr. Sturt) and Sir W. Codrington. When it came to weighing in, Sam Adams, the jockey, failed to draw the correct weight, and, of course, an objection was lodged by Lord Westmoreland, the owner of the second horse, Merry Heart, whose jockey succeeded in turning the scale. whose jockey succeeded in turning the scale. When, however, the rider of the third horse was also unable to draw the ascribed weight the scales were examined, and it was found that lead had been fixed to the bottom of the weight scale. The culprit was never discovered, although a reward was offered.

NEWS OF THE WEEK.

Mr. K. Nozaki, Chief Procurator of the Court of Cassation, has resigned.

The N. Y. K. have purchased the British steamer Willowdene, and she is now being overhauled at the Yokohama Dock.

The Empress, who has been at Hayama since Jan. 16th, returned on April 4th, arriving at Shimbashi by the 11.56 a.m. train.

The Kokumin's Seoul telegram states that the Russian warship Varyag, which was sunk at Chemulpo, will be successfully floated.

Viscount Matsudaira Naohira, a member of the Upper House, will leave to-day (April 7th) by the steamer America Maru for San Francisco.

A bye-election of members of the Kanagawa Prefectural Assembly will take place to-day (April 6th) at 8 a.m. in the room of the Chamber of Commerce.

The French Consul at Kobe arrived on the night of April 1st at Matsuyama, Iyo province, and paid a visit on the following day to the Russian prisoners.

Tokyo papers agree in reporting that Mr. Kurino, formerly Japanese Minister at St. Petersburg, is expected to arrive to-day (April 7th) at Nagasaki by the German mail.

Mr. Ogasawara, an official of the Imperial Household, left on April 3rd for Kyoto to in-spect the Palace where the Emperor will shortly remove with the Headquarter Staff.

Kotake, a bluejacket of the destroyer Asashio, who was killed in the engagement of March 10th, has been posthumously promoted to the junior class of the Seventh Rank.

The Italian cruiser Elba arrived on April 3rd at Chemulpo. Four officers and twenty-five bluejackets proceeded to Scoul in order to take the place of the present guards of the legation.

The Niigata Sayetsu Steamship Company's steamer roth Wadatsu Maru went ashore on the morning of April 3rd off Sakata. Her cargo and crew were saved. No damage seems to have

A telegram from Nagasaki states that 11,240 casks of corned beef, which had been confiscated

The fiji's Kagoshima telegram reports that the steamer Tosa harn went ashore on the morning of April 5th off the village of Kamiyo, Kaka district. Details are not yet known. It may be remarked that this vessel was employed to run In Calcutta a large audience assembled at the between Sanyo and Kyushu and that she must

not be confused with the Tosa Maru of the Nippon Yusen Kaisha.

April 9, 1904.]

Prince Nashimoto, who recently returned from France via Vancouver, was appointed on April 6th an attaché on the General Staff.

It is stated by a telegram from Shimonoseki that a French steamer is now being examined by the Japanese authorities on suspicion that she carries contraband of war.

We are asked to say that the best thanks of the Commander, officers and crew of H.R.I.M. ship Puglia are due to all persons who kindly assisted at the funeral of the sailor Resinese Federico or the 31st March.

I. Ishitani, a student of the Tokyo Eigo Gakko committed suicide on April 6th by jumping into the crater of the Asama volcano, in Nagano pre-fecture. The cause is reported to be his failure to pass certain examinations.

Baron Yamamoto, Minister for the Navy, has resented five hundred yen to the parents of K. Koike, a bluejacket who was killed in the second blocking operation. The money was delivered to them by Mr. Kinoshita, Governor of Saitama prefecture.

The Emperor of Korea intends to reward with special medals those who assisted the Japanese by supplying provisions, forage, etc. The Korean Government has ordered a Japanese manufacturer, through Mr. G. Hayashi, Minister at Seoul, to make the medals.

The S.-C. Morning Post reports that the cable ship Scotia which has been at work on the cable of the Commercial Pacific Co. is wrecked at Guam It is not known whether the vessel will be a total loss or not. The Scotia is 4667 tons register and was on her way from Hongkong to Guam.

Marquis Oyama, Chief of the General Staff on April 4th entertained Generals Nicholson and Hamilton, who recently arrived in Tokyo on their way to the front. Sir Claude MacDonald the British Minister, Marquis Yamagata, General Terauchi, Minister for War, etc., were also present.

The King of Siam has decorated Baron Komura, Minister for Foreign Affairs, with the first order of the White Lion, Mr. Y. Yoshida, confidential secretary to the Minister for Foreign Affairs, with the third of the Crown, and Lieut-Colonel T. Ozawa with the fourth of the White . Lion.

Baron Yamamoto, Minister for the Navy, paid a visit on April 5th to the family of Commander Hirose, who was killed in the second blocking operation at Port Arthur, and expressed his pro-found condolences. The funeral of the late officer will take place on the 13th from Suikosha Naval Club, Tsukiji.

The Modernian has now reached its fourth number and continues to be a brightly written record of the Modern school's progress in the study as well as in the playing fields. The photographs are, as usual, interesting, though they would have stood a little more enlarging to advantage. The new assistant master is expected advantage. from England in May, we learn.

Mr. S. Kuchiami, who was arrested on Feb. 7th by the Russians at the Nan-kwan-tien station of the East China Railway on suspicion of bains East China Railway on suspicion of being a military spy, arrived on April 5th at Nagasaki from Newchwang via Shanghai. He was released on March 21st after a lengthy examination and was delivered to the U.S. Consul at Newchwang.

The Tokyo Marine Insurance Company held a general meeting on April 4th, when the accounts for the last half year were submitted. The net profit was yen 99,699.59. Of this yen 4,800 was set apart as legal reserve, yen 45,000 to be paid as an interim dividend at the rate of six per cent., and yen 49,899.59 to be carried forward to the

men, and refused to reduce his escort, which became unruly and menacing. The Resident became unruly and menacing. The Resident then promptly paraded the Buffs, the Bombay Infantry, and the Artillery, and sent an ultimatum to the chief to quit, when he reluctantly complied.

Probate of the will of Admiral the Hon. Sir Harry Keppel, G.C.B., who died on January 17, aged ninety-five years, has been granted to his son and sole executor, Captain Colin R. Keppel, C.B., D.S.O., by whom the testator's estate is sworn at £3,551 11s. 6d., including £3,468 14s. 9d. net

Art circles in Paris are greatly interested in the discovery of an alleged Raphael which was recently bought in Paris at a second-hand store for 44 francs. The picture is believed to be the original "La Belle Jardinière," and as the Louvre contains, as one of its most precious treasures, a picture which also purports to be the original "La Belle Jardinière," the situation is perplexing.

The citizens of Sheffield gave to the Duchess of Norfolk as a wedding present a diamond necklace, costing $\pounds_{1,000}$; and the gift received characteristic acknowledgment from the Duke. He forwarded to the Lord Mayor of Sheffield a contribution of $\pounds_{1,000}$ to the Sheffield Distress Fund, and presented the town with a park fortyeight acres in extent, in commemoration of his marriage.

In one way at least, says the New York Commercial, the war in the Far East is making itself felt in trade circles. The price of gum camphor, for supplies of which the world depends upon Japan, has risen steadily since the first rumour of war. Last October the wholesale price of cam-phor was about 58 cents a pound in bulk. The last shipment from Japan was in December, and since then prices have gone up to nearly \$1 a pound in bulk at wholesale.

About 7 o'clock this morning (says the Straits Times of Mar. 14th) the Shell and Transport Trading Co.'s steamer Bullmouth arrived from Palembang with the same Co.'s steamer Murex in tow. Both steamers are oiltankers. It appears that about 8 o'clock on the morning of the 6th, while the Murex was in the Palembang river, a serious fire broke out in the stokehold. A tin of petroleum was accidentally upset and this set fire to the oil burners. The machinery and boilers were disabled. It is understood that the Murex will have to be docked here for three or four months to have the damage repaired.

A crusade has been started by a Liverpool paper against one of the most popular dances of the ball room—viz., the lancers. Indignant letters from correspondents have been published protesting against what one writer calls "indecency and indecorum of the modern lancers." Every mother, it is asserted, must feel ashamed of the scenes now witnessed in every ball-room, "where, instead of pretty frocks—which are almost torn off the backs of girls in the mad grip of rough young men—golf cloth or sacking will need to be worn. It is an insult to girls to bang them about and whirl them often off their feet," says another correspondent.

The Naval and Military Record contains the following figures relative to the coaling of war-

mips in mongkor	ig last Janu:	ary :—	
Ship.	Amount received.	Average per hour.	Greatest quantity reed in one hour.
	Tons,	Tons.	Tons,
Leviathan		314.2	450
Amphitrite	1,650	227.5	330
Vengeance	1,500	214.28	300
Albion	1,540	205.3	280
Ocean	1.350	205.16	260
Centurion	730	104.2	100

The Rear-Admiral signalled his appreciation of the results attained by the *Leviathan*, and congratulated the officers and men on their good work.

with a hundred followers, arrived with 250 armed began his connection with the river more than forty years ago in one of Dent & Co.'s steamers. He subsequently joined the Shanghai Steam Navigation Co., and was in command of the paddle steamer Szechuen when she was lost while paddle steamer Szechuen when she was lost while in charge of the pilot. A quarter of a century ago he entered the service of the Indo-China Steam Navigation Co.; commanding the Taiwo and other steamers. He had at one time charge of the Yuen Fah, Messrs. Jardine, Matheson & Co.'s receiving ship, and when gout made it difficult for him to continue active service affoat, he took charge of the Indo-China hulk at Hanlow and then at Chinkiang where he died kow, and then at Chinkiang where he died.

> Everything that can be done is being done in France just now to stimulate popular sentiment in favour of the Russian Alliance. Among other bonds of sympathy it is being recalled that even as the Japanese Navy is the child of that of Britain, so the Russian springs direct from that of France. It was, in fact, about 1717 that Peter the Great sent 20 young Russians of good family to serve the training period of five years in the to serve the training period of five years in the French Marines of the Guard at Brest and Toulon. The Count of Toulouse, Grand Admiral of France, under orders from Louis XV.'s Government, watched over their studies with especial care, and in 1722 the Regent handed to them their com-missions as ensigns. With these credentials they betook themselves to become the instructors of cadets in their own country, and thus became the progenitors of the Russian Navy.

> Bernald David (26), a Filipino, was arrested on March 31st by the Bluff Police at Hommoku, Yokohama, on a charge of having forged a diploma of the College of Engineering. He was temporarily released on the following day under surveillance. The Bluff Police on April 2nd removed all of the evidence to the office of the Public Procurator, in the Yokohama District Court. It appears that the accused arrived in Tokyo in 1896 for the sake of study. In September, 1899, he attended the mechanical department of the Engineering College and thence removed to the Engineering College and thence removed to the Practical Chemical Department, but left without graduating. He came to Yokohama taking up his residence at Idzumiyato, Kitagata. In November, 1902, he ordered from G. Okawa, printer, Otamachi, fifty diplomas of the Engineering College and also ordered S. Nagai to cut four stamps—for the President of the Imperial University and for the professors concerned—with which materials he forged a certificate.

CORRESPONDENCE.

THE VALUE OF MONEY.

(To the Editor of the " Japan Mail.")

Vol. V. pu ears by that statement?

Vol. V. p. 22. I read:—

"* * * speaking roughly, money is ten times as valuable in Japan as in England."

Can you enlighten me as to what the distinguished author means by that statement?

Yours truly.

BARO.

Yours truly, Yokohama, 31st March, 1904.

Probably that a Japanese with an income of £10 a month can live on a scale—measured by Japanese standards—about equal to that on which a European with £100 a month lives.—ED. f.M.]

THE FRENCH PERFORMANCE FOR THE RED CROSS SOCIETY.

TO THE EDITOR OF THE "JAPAN MAU."

To the Editor of the "Japan Mall."

Sir,—I have the honour to inform you that the net profit of the representation given on the 23rd March by the Société Dramatique Française amounted to yen 462.83, which sum has been handed to His Excellency the Governor of Kanagawa.

The Société Dramatique Française desires to tender its acknowledgments to all those who rendered it such disinterested and kindly assistance: to Mme. Frique and the ladies who at her request spared no trouble in the sale of tickets in Tokyo and Yokohama; to those persons who generously took tickets and so contributed to the financial success of the representation; to the Orchestre-Bijou whose as an interim dividend at the rate of six per cent., and yen 49,899.59 to be carried forward to the next account.

A very old Shanghai and river hand passed away at Chinkiang on Thursday, March 24th captain Alphonzo T. Friend. Born some seventy of the performance; to Mr. G. G. Brady, who conversely as a count.

An Arab chief, who was permitted to visit Aden famous by Rudyard Kipling, Captain Friend members of our Society, and whose talent is only

equalled by his readiness to render his valuable assistance; to the A.D.C. who kindly lent their stage scenery to our Society; to Mr. E. J. Moss, who lent all the furniture for the various changes of scene demanded of him with the greatest generosity; to Mr. Philipson who gratuitously made numerous accessories of which we had great need; to the Public Hall Company, to Messrs. Thwaites & Co. and to the Yokohama Pursery for considerable reductions in their charges, and lastly and not the least to the Fress of Yokohama, always ready to aid a good cause, which afforded us, spontaneously and generously, the publicity of their columns: to all we tender our warmest thanks.

Yours very truly, M. J. DAYET.

M. J. DAYET, Hon. Secretary. Yours very truly,

BRITAIN'S BATTLESHIP PROGRAMME.

(To the Editor of the "Japan Mail.")

Sir.—A few weeks ago the Prime Minister and the Secretary of State for War announced a new Government policy. We are to rely exclusively on the Secretary of State for War announced a new Government policy. We are to rely exclusively on the Navy to defend the country against invasion, and the Army is to be organised for service oversea. The policy involves a sea supremacy based on modern battleships. It is natural that there should be some anxiety as to the battles in programme authorised by the Committee of Defence in furtherance of this policy.

modern battleships. It is natural that there should be some anxiety as to the battles in programme authorised by the Committee of Defence in furtherance of this policy.

In the autumn of 1898, when we were organising the Army as a so-called second line of defence, and therefore, in a measure as a substitute for naval defence, the Government, with the complete agreement of the House of Commons, introduced supplementary estimates to provide for a programme, matching ship for ship, the £11.000.000 Russian programme, matching ship for ship, the £11.000.000 Russian programme of that year. In 1903, before the decision as to the new policy, we failed to respond to a similar though more threatening Russian programme, of which already four battleships are nearing the period for launching. Here, then, is a touch-stone of the earnestness of the new Government provide for meeting the latest Russian programme, as was done at once in 1898, they will give the best practical proof of the inauguration of the new policy. If stand by the principle," said Lord Goschen in introducing the Supplementary Estimates on July 22, 1898, "the principle which we have followed, and intend to follow, that we must be equal in number to the fleets of any two Powers. That is the principle, as I say, we have acted upon from the first, and now, in consequence of the action of another Power, the same principle compels us to take further action by a supplementary programme, But, deeply as I regret that we should be forced into that position, we must take parallel action taken by other Powers." It is to be noted that Lord Goschen's Board held (his programme to be necessary in order to secure "a bare equality" in efficient battleships with France and Russia. Since then we have witnessed the rise of the German Navy, the great development of the Whitehead torpedo, and the new invention of sobmarine boats, all of which so threaten our fleets that a substantial margin of safety over the original standard of mere equality in nutrhers h

Battleships laid down since Admiralty return

Russia 12

evicence that we are not providing the margin of safety, and we are positively losing ground.

If we take the ships building or projected from the last Admiralty Return (May, 1903), making allowance for the gross error of omitting four current quarter as it represents the work of six or Russian battleships, which have since been laid down long before our own three projected battleships, we get the following as building!

BATTLESHIPS NOW BUILDING:

BATTLESHIPS NOW BUILDING.

Eattleships, 1st class 17 7 12 8 14 do 2nd nil 1 nil nil nil nil

We are not even building to a two-Power standard and it is in spite of this knowledge that the statement has been circulated that the Government consider and it is in spite of this knowledge that the statement has been circulated that the Government consider themselves absolved from the distinct promise made to the House of Commons on August 5, 1903, to lay down three battleships in April. The Swiftsare and Triumph, of 11,800 tons, were described by the Prime Minister as "not suitable for our purpose," and though wonderful results are achieved on the tonnage, with 7 in. armour and 13 in. guns they cannot be considered as in any sense a reply to the Russian programme ships of 16,500 tons. In a few weeks time the House of Commons will be deciding our naval position in the year 1907, having regard to the facts we have cited, and to the impending programmes of foreign Powers. In the House of Lords, July 5, 1901, Lord Goschen impressed on Lord Selborne the great value of having a minimum standard to build to, for, he said, "My noble friend's view of what the standard should be was somewhat vague." He added, "I would say that it should be a two Power standard at least, but with a margin. . . . I would only say, if my noble friend would hear it in mind, that it is a useful thing to have at least a minimum, but whether that minimum is sufficient is a matter which the Government must most carefully examine, not only with reference to two Powers with which we that minimum is sufficient is a matter which the Government must most carefully examine, not only with reference to two Powers with which we might be engaged, but with reference to the standard generally, and the increasing naval forces of other Powers." Throughout 1903 Lord Selborne has chosen to neglect the warning of his predecessor. The new policy of the Government to rely entirely on the Navy for the defence of the United Kingdom gives him the opportunity to retrieve a grave blunder.

I have the honour to be, Sir, your obedient servant, the SEYMOUR TROWER.

H. SEYMOUR TROWER,

Chairman of the Executive Committee

WM. CAIUS CRUTCHLEY, " Secretary."

The Navy League, 10 Victoria Street, London S.W.

February 16, 1904.

CHRISTIAN BLIND SCHOOL

(TO THE EDITOR OF THE " JAPAN MAIL.,") SIR,—Will you kindly insert the enclosed statement in the Mail in the interests of the work for the Blind and thus greatly oblige

GIDEON F. DRAPER Yours truly,

No. 222 Bluff, April 5.

STATEMENT OF THE YOKOHAMA CHRISTIAN BLIND SCHOOL.

For the Three Months, January-March, 1904. EXPENDITURES.

Assislant	0.00
Rent	
Musical Instruction	7-45
lanitor	9.00
Miscellaneous, Fuel, etc	5-33
New Tables	5.40
Total	
RECEIPTS.	Yen.
Mrs. P. A. Smith, Hiroshima	10,00
W. P. Rollstin	1.00
Miss Ethel Griffin	21,00
King's Daughters, Aoyama, Tokyo	7.00
Birthday Box, Union S. S. of Yokohama	15.30
Proceeds of Magic Lantern Exhibition;	
through Mr. C. Griffin	10.00
Profits from Sale-of Drawn work	81.83
Tuitions	2.10
Total	148.23
The above statement for three months only	is sent
in the Contraction to the United	States

out now in view of my return to the United States. Miss A. B. Slate of No. 221 Bluff, Yokohama, has kindly consented to take the oversight of the School from now on but cannot assume any financial responsibility for it so that the practical sympathy

shown by friends in the past will be all the more appreciated if continued during my absence. The amount of profits from the sale of drawn work as shown above can not be duplicated during the current quarter as it represents the work of six or eight months.

Of course the expenditures given represent merely the cost of the morning's instruction. Most of the pupils support themselves by their trade of shampooing or massage, working in the afternoon and evening. One half of the item for rent, however, is for aid given to help some of the young men to a more ing or massage, working in the alternoon and evening. One half of the item for rent, however, is for
aid given to help some of the young men to a more
suitable boarding place.

I take this opportunity of thanking all who have so
generously helped in the past years, and hope that
interest in this effort for the enlightenment of so needy
a class may be greatly increased.

FIFTIETH ANNIVERSARY OF FIRST AMERICAN TREATY.

Thursday's meeting at the Young Men's Christian Association Hall, Kanda, in commemoration of the half century anniversary of the opening of the country by Commodore Perry, was successful beyond all expectation, says the Japan Times. The spacious hall was packed to overflowing, one side of the floor being occupied by a large party of American gentlemen and ladies. On the platform were their Excellencies Count Matsukata, Count Okuma, Count Inouye, and Mr. Griscom, the American Minister, Mr. Saburo Shimada. M.P., Bishop McKim, Bishop Moore. Mr. Ehara M.P., Dr. De Forest and Mr. Honda, the two last-named gentlemen acting alternately as Chairman. nately as Chairman.

nately as Chairman.

The meeting opened with a prayer by Mr. Honda.

He was followed by Mr. Soroku Ebara, M.P. who in
a brief speech alluded to the importance of the
historic event in commemoration of which the meeting was held. Among other things he observed that,
although Japan had for over two centuries been
sleeping, it was not the slumber of a feeble and sickly
people, but that it was the energy-giving slumber of
a vigorous and healthy nation.

MB. SUMADA'S SPECH.

MR. SHIMADA'S SPEECH.

MR. SHIMADA'S SPEECH.

Mr. Saburo Shimada, M.P., said that the event which they were commemorating on the present occasion was pregnant with far-reaching meaning for the future not only of Japan but of Asia, and not only of Asia but of the world at large. The treaty which had been signed at the village of Yokohama half a century ago was a very simple document. It was not a treaty of commerce, but a treaty of unique character, whose principal concern was the relief of the shipwrecked and such other matters of a purely humanitarian nature. In this the eminent American sailor entrusted with this difficult mission displayed a rare sagacity and a wonderful insight into the real character of the obstacles lying in the path of the Japanese Government of those days. Perry thus succeeded in opening the door of seclusion so long and so jealously kept by Japan. From this dated a series of memorable events of the utmost importance in the history of Japan,—the restoration of administrative powers to the Imperial Court, the abolition of feudalism, and those reforms which culminated in the establishment able events of the utmost importance in the history of Japan,—the restoration of administrative powers to the Imperial Court, the abolition of feudalism, and those reforms which culminated in the establishment of a constitutional form of Government. During all these years of steady progress, Japan had always enjoyed the invariable sympathy and active assistance of the Government and people of the United States. The trans-Pacific Republic by introducing Japan to the world,—continued the speaker,—had given Japan the proud position of being a harmoniser and middleman between the West and East. Japan had herself experienced a severe conflict of old and new ideas, and no doubt in her endeavours to introduce Western civilization to the rest of Asia a similar difficulty would have to be encountered. But Mr. Shimada felt sure that the wise Providence would help Japan in the discharge of her important mission as it had wonderfully helped her thus far. Then after going into some historical details about the conclusion of the memorable treaty of March 31, 1854, Mr. Shimada wished to call attention to an interesting incident to which Japan owed the advantage and pleasure of having the United States as her first and unassisted introducer to the world. Commodore Perry had been preceded by the Russian envoy, Poultatine, whose overtures had been totally rejected by the Shogun's Government. Poutiatine subsequently met Perry at Nawa in Okinawa (Loo Choo), and Poutiatine suggested to Perry that joint pressure on the Japanese Government should be applied. This proposal was wisely rejected by the sagacious American officer, who was confident of succeeding where others had failed. Be the reason what it may why he decided not to act in common with the Russian, the result, said Mr. Shimada, was happy to Japan, who thus had the fortune of being ushered to the world by the speaker then referred to the heavy debt of gratitude

^{*} Including the purchased ships Swiftsure and

[†] For purposes of comparison, the Swiftsure and Triumph have been included in this total

Japan owed to Townsend Harris, whose friendly counsels saved her from many pitfalls in the path of foreign intercourse, notably in the matter of the prohibition of the importation of opium. Another instance of Japan's indebtedness to America cited by Mr. Shimada was o gour's mission to the States, which was sent over by the Shogunate Court in response to American advice in 1859. [The date manner that the real opic of missionaites in the Far East behaved in such a response to American advice in 1859. [The date manner that the rulers of Japan came to the commerce amistake, as was pointed out by the next speaker, Count Okuma.] According to all accounts, it was certain that every attention and facility was accorded it. In illustration of how solicitous the Americans were for the comfort and pleasure of the party, kept by Miyake, an official in the suite of the Envoy, the party were treated to a Japanese dinner at Washington! The speaker was happy to be able to say that the attention paid to the party was not thrown away, for it was from the members of this mission that the real object of missionary work was to conquer the country. The home response to American induced by men of inferior people and to support that the real object of missionary work was to conquer the country. The home response to American induced by Mr. Shimada as 1860, but this is a manner that the real object of missionary work was to conquer the country. The home response to American the people began to suspect that the real object of missionary work was to conquer the country. The home revised of Mr. Dension who after a distinguished service of 20 years still remained at his important protein missionary work was to conquer the country. The home isonary work was to conquer the country. The home instinction of the tistes, began to suspect that the real object of missionary and power and presence of foreign missionarted that the real object of missionaries were inimical to the peace and tranquilly of the country. At the time Japan adopted this year

centain that, early attention and facility was accorded policy, it so charact that Europe was also grippling to easy factors and pleasure of the party, where the native of the party was not greatly and the street that recorded the same and applications of the count of the party, which is not not the street that recorded the same and applications of the count of the party was not applied by Minkey, an official in the suite of the same and the synthatic testing and the street that recorded the same and applications of the present of the party was not applied by the same and applied to the same and applied to the count of the party was not applied as postular depends on the party was not applied as postular place for the present of the party was not applied as postular place for the present of the party was not applied as postular place for the present of the party was not applied as postular depends on the party was not applied as postular place for the present of the party was not applied as postular place for the present of the party was not applied as postular place for the present of the party of the party of the same and applied to the same place for the present of the party of the party of the same place for the present of the party of the pa Count Okuma now rose, amidst loud and prolonged clapping of hands. After a few preliminary remarks, the noble speaker said that during 200 years or more of our history previous to the advent of the Tokubawa Agnan had been a country of open doors. Our forefathers had always welcomed alien races, the result being the growth of a people of mixed race and mixed civilization. Why then the seclusion of more than two centuries under the fillustrious speakers, compelled Japan to this unfortunate course. For a long perior prior to the closing of her doors Japan had been in free and unfettered intercourse eld to the introduction of a new religion, which made such rapid progress that tradition put the number of converts at several millions within a hundred years. The first religious propagandists were men of rare nobility of character.

明治计五年三月青日第三種郵便物讓可

with any other similar projects that have been already started, but to supplement them and to endeavour to reach sources that would not otherwise be touched. Japan's sailors and soldiers have gone to the front, many of them never to return. There are already in Tokyo alone eight hundred destitute families, with all means of support suddenly cut off, and there will be throughout the Empire many thousands in a similar position before the termination of the war. The inevitable distress already begins to stare us in the face, and I for one feel most strongly that it is our privilege as well as our duty, not only to stretch out a helping hand ourselves, but to call upon our fellow countrymen at home to assist us. Why not begin to-day to crystallize into práctical and permanent form, and a form entirely consistent with our carefully preserved neutrality, the friendly feelings and charitable impulses which undoubtedly exist in the hearts of the American people? And lest I be misunderstood, I wish to add that charity is beyond the pale of politics, and therefore the praposition I now put forth has no significance whatever other than an appeal to those broad and powerful humanitarian sympathies that make of all nations of the earth one universal brotherhood.

to be allowed the privilege of putting his own name on the subscription list. Mr. J. W. Copman, Secretary of the American

on the subscription list.

Mr. J. W. Copman, Secretary of the American Asiatic Association, rising, said:

"Mr. N. F. Smith, President of the American Asiatic Association, rising, said:

"Mr. N. F. Smith, President of the American Asiatic Association, rising, said:

"Mr. N. F. Smith, President of the American Asiatic Association, rising, said:

"In Mr. N. F. Smith, President of the American Asiatic Association, on account of sickness from being present. On his behalf I may say that the gentlemen who have spoken have so clearly outlined the object under consideration that this in unnecessary for me to dwell upon it. I may say, however, I desire to say, in the hame of the president of the Association that this movement will have our hearty support, and I can safely assure you that we will support the Perry Relief Fund with a subscription of 10,000 yen from individual members. I have great pleasure in subscribing 2,000 yen. I see some of my associates here, and I call upon them to add their little mite to mine."

This call met an immediate and enthusiastic response. Altogether the subscriptions promised on the spot amounted to 63,811.86 yen. Among the principal subscribers were Baron Hisaya Iwasaki 10,000 yen, Baron Misui 10,000 yen, Mr. Masuda representing the Bussan Kaisha 10,000 yen, Mr. Masuda representing the Bussan Kaisha 10,000 yen, Mr. Bc. C. Howard 1,000 yen, Count Okuma 1,000 yen, Mr. Bc. C. Howard 1,000 yen, Mr. Frezer, 1,000 yen, Mr. R. Akaboshi 1,000 yen, Mr. Frezer, 1,000 yen, Mr. Thederick Palmer 500 yen, Mr. R. H. Davis 500 yen, Mr. Mcato 500 yen, Mr. R. K. Chodo 500 yen, Mr. Mr. R. K. Kato 500 yen, and Mr. S. Matsuo 500 yen, Prof. J. T. Swift, of the Higher Normal School, said:—

"It is evident that the cause that has been put be-

"It is evident that the cause that has been put be The sevident that the cause that has been put before us lies very near to the hearts of the two peoples. It in the cause of the fatherless; it is a strong cause. It needs to have opportunity to spread far beyond the limits of those represented by this assembly. I move, therefore, that this meeting instruct the Chairman to appoint a Committee with power to take such steps as shall serve and extend this movement for the fatherless in Janan in celebration of this fiftish as

man to appoint a Committee with power to take such steps as shall serve and extend this movement for the fatherless in Japan in celebration of this fiftieth anniversary of our international friendship."

Baron Hisaya Iwasaki seconded the motion. It being unanimously passed, the following gontlemen were appointed as Committee:—

Mr. N. F. Smith.

Mr. J. W. Copman.

Mr. B. C. Howard.

Mr. D. H. Blake.

Prof. J. D. Swift.

Mr. V. W. Helm.

Mr. Juichi Soyeda.

Mr. Aisuke Kabayama.

The Rev. Mr. Imbrie said:—

"I take it for granted that a committee will be appointed to extend this movement to the United States. Many here present are connected with mission boards in the United States. Such boards should be asked to co-operate with the American branch of the Committee."

Mr. G. M. Fisher, Secretary of the International Committee of the Y.M.C.A., said:—

"I expect to sail for America soon and to attend the International Convention of the Young Men's Christian Association, and I shall most heartily recommend this Perry Memorial Relief Fund to the generosity of the business men represented in that convention. I am sure it ought to receive the hearty support of the men constituting the Association in America."

Bishop D. H. Moore of the Methodist Episcopal Church, said:—

"This speaker touched my heart, for I also am on

Church, said:—
"This speaker touched my heart, for I also am on my way to America to appear before the General Conference of the Methodist Episcapal Church. With my little contribution of 50 yen (I wish it were 50,000) I promise you to do my utmost to spread this enthusiasm of benevolence through that conference, representing as it does one milition members."

Rev. H. H. Guy said:—

"I am sure the people I represent will be very glad

"I am sure the people stop.

to help."

Prof. E. W. Clement said:—

"I represent a family of six (you will pardon the personal reference.) My first child was born here. In behalf of the family of six that is so closely related to this land, I would like to subscribe 30 yen."

After the American national anthem had been played, Count Matsukata proposed three cheers for the President of the United States, which was heartily responded to.

responded to.

After the Kimiga yo was sung, H. E. Mr. Lloyd
C. Griscom, Minister of the United States, said;

"Count Matsukata has done us the honour of proposing three hanzai for the President of the United States. I now propose that we give three rousing cheers for His Majesty the Emperor of Japan."

Mr. Griscom led in the three cheers and a tiger. It was six o'clock when the meeting dispersed, with in most cases lighter pockets than they came with, but with the pleasing sense of having assisted at a worthy cause of humanity.

YOKOHAMA FOREIGN BOARD OF TRADE.

The annual meeting of members of the Yokohama Foreign Board of Trade was held on Thursday afternoon at the offices of the Board of Trade. In the absence of Mr. R. D. Robison, Chairman, Mr. E. C. Davis took the chair and there were also present: Messrs. V. R. Bowden J. Griffin, F. G. Sale, A. J. MacLure, F. M. Tegner, C. Griffin, M. Surth, L. Serkis and the Secretary, Mr. J. E. Beale.

After waiting for a considerable time the meeting as there was no quorum present decided on the motion of Mr. F. G. Sale seconded by Mr. J. Griffin to adjourn to Friday next at 4 p.m. The report as published in another place was presented and we subjoin the accounts which were also submitted.

FIRES.

On March 31st, at 3.50 a.m., fire broke out at Sueyoshi-cho, Yokohama, burning down eleven buildings, separated into twenty-one dwellings, and injuring four. A man was severely injured while endeavouring to save his property from the flames. Negligence is reported to be the cause.

Mr. S. Kishi, a lawyer of Tokyo, will leave on April 8th by the *Empress of China* for Vancouver, and is expected to return within a few mouths.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

SOUTH AFRICA.

London, March 29.

The Hon. E. Lyttleton, Colonial Secretary, speaking in the House of Commons, said that success had been met with in dealing with the recent outbreaks of plague in South Africa. He also said the Government had declined to prevent the introduction of Chinese into the Transvaal.

SIR MICHAEL HICKS BEACH.

London, March 31.

Sir Michael Hicks Beach has announced that he will not present himself again for election to Parliament.

PARLIAMENT.

Parliament has been adjourned to the 12th of April. Mr. Balfour has said that the budget will probably be presented on April 19th.

THE FRENCH NAVY.

London, March 31.

During a lengthy debate in the French Chamber on the condition of the navy M. Lockroy sharply criticised the administration of M. Pelletan. The latter repeated the points of defence which he gave on the 16th March (that since taking office, he had reinforced the squadron in the Far East, which would be completed by a torpedo destroyer division. He had also provided for the safety of the Colonies by the organization of mobile defences in the shape of destroyers and submarines wherein nothing previously had been done. The delay in the construction of ships was due to an improvement in designs. The personnel of the Navy was fairly satisfactory and the Channel and Mediterranean Squadrons could sail at a moment's notice.)

M. Combes supported M. Pelletan.

The Chamber passed a resolution, promising to institute a special enquiry into the state of affairs prevailing in the fleet.

RUSSIAN SUPPLIES IN MAN-CHURIA.

London, April 1.
The Russian Commissariat is not sending foodstuffs to Manchuria, relying entirely on the plentiful local supplies of cattle and grain which are accumulating at Harbin.

UNREST IN KOREA.

Unruly elements in Korea are giving trouble, the country being unsafe outside the Japanese lines.

ACCIDENT TO A GERMAN LINER.

The P. & O. steamer Marmora takes the passengers of the Oldenburg, which is lying disabled at Aden.

THE THIBET MISSION ATTACKED.

London, April 1. Reuter's correspondent at Tuna telegraphs that the Thibetans having asked the British mission to retire, Colonel Young-husband refused, with the result that two engagements were fought, wherein the Thibetans suffered most severely, and fled to the hills. Fifty or sixty of them, however, obstinately held their camp at Guru, which the transport of the sixty of the sixt which was finally taken by the mounted infantry and Goorkhas.

CHINA'S NEUTRALITY.

The Chinese Legation at St. Petersburg declares that China is sincerely and firmly resolved to observe neutrality, from which she will depart only in the event of the violation of Chinese territory by Russians or

ANTARCTIC EXPLORATION.

London, April 2.

The Antarctic vessels Discovery, Morning and Terra Nova have arrived at Lyttleton, New Zealand. The Morning and Terra Nova reached the Discovery on February 14, and found all well on board. It has been ascertained that the interior of Victoria land is continuous at a height of 900 feet and is evidently a vast continental plateau.

THIBETANS HAVE RUSSIAN RIFLES.

The Times finds it significant that the escort of the three Thibetan Generals were armed with rifles bearing the Russian Imperial stamp.

THE CREWS OF THE "VARYAG AND "KORIETZ" AT HOME.

The crews of the Varyag and Korietz have arrived at Odessa, a triumphant reception being accorded them.

THE FIGHTING IN THIBET.

London, April 3. It is officially stated the Thibetans had 300 killed and many wounded, 250 being made prisoners. The British had nine wounded. The newspapers hope that the sharp lesson administered to the Thibetans will render further fighting unnecessary

THE ANTARCTIC EXPEDITION.

Later.

The Antarctic Expedition ship Discovery reports important geographical and other scientific results. She found that Wilkes Land does not exist. She sailed over the place where it is shown on the chart. The work of extricating the Discovery was a gigantic task. She had to cut her way for over eighteen miles through the ice in order to reach open water.

THE THIBET MISSION.

London, April 4.

Reuter's correspondent at Tana says that the fighting will not alter the political character of the Mission, which is still going to Gyangtse.

THE GERMAN PRESS ON THE THIBETAN SITUATION.

The Berlin newspapers consider that Russian prestige has received a severe blow, and express curiosity as to Russia's attitude towards Thibet.

A RUSSIAN CRUISER SINKS

wires that the cruiser Jemtchug, completing cyclone in Reunion. at the Baltic yards, has begun to sink. It was found that the pipes leading from the furnaces to the sea had been left open and was found that the pipes leading from the of May, the Senate to the 25th.

The Thibetans attacked the Younghuswater was pouring into the vessel. Foul band mission at Chlumbi and were repulsed play is suspected.

THE THIBET EXPEDITION.

London, April 5.

Reuter's correspondent at Tana reports that the Chinese Amban has written to of the troops in Manchuria is satisfactory. Colonel, Younghusband to say that the The Russians have good relations with the Dalai Lama refused him transport. He is now coming to Gyangtze.

A reconnaissance made by the expedition found a strong abandoned camp six miles from the scene of the recent fight.

THE BALKAN TROUBLE.

Fighting has taken place at Cresna be-tween a Bulgarian band and a Turkish force. Several were wounded. Large bands have peasants are reported to be joining the lands an arbitration convention analogous insurgents.

NEWS FROM RUSSIA.

London, April 5.

It is stated at St. Petersburg that General

Unsan, thus forestalling the Japanese advancing from Chon-ju.

THE THIBETAN MISSION.

The Novot Vremya regards the British advance on Thibet as an important move, thereby dominating Thibet and the Dalai Lama's Government.

RUSSIAN TRANSPORT.

London, April 6.

Prince Hilkoff, Minister for Communications, has returned to St. Petersburg to confer with the authorities. He says that the scarcity of locomotives and cars on the eastern section of the Trans-Siberian railway has been remedied. West of Irkutsk there are ten trains and beyond Lake Baikal nine goods trains and five passenger and military trains running daily in either direc-tion. He returns in a fortnight to supervise the construction of the circum-Baikal line.

ANGLO-FRENCH RELATIONS.

London, April 7. It is declared by the highest authority in the press that there is no hitch in the Anglo-French negotiations. All questions are now practically settled.

RUSSIA RETRENCHING.

Later. The St. Petersburg Official Messenger notifies that the Government has decided to have recourse for the present to the so-called free cash reserve for war expenditure while retrenching in various directions, notably in the matter of railways. These retrench-

PRINCE KHILKOFF'S VIEWS.

PRINCE KHILKOFF'S VIEWS.

London, April 5.

Prince Khilkoff, Minister of State for Public Works, will leave shortly for the Far East. The Minister believes that the Japanese can not destroy the railway at any point in Manchuria, and states that the line round Lake Baikal will be completed in August. He adds that the Japanese will follow the tactics of the Boers, who alternately fought and retreated, so that the present campaign will be a long one. The Minister also believes that a great engagement will take place after June 6th. take place after June 6th.

FROM THE "CHINA MAIL." REUNION DEVASTATED.

A cyclone has passed over the Island of Reunion, utterly devastating the entire island.

All the crops have been totally destroyed, and immense damage has been done to property.

Thousands have been rendered homeless by the destruction of their houses, and many deaths are fremorted. THE KAISER'S TOUR.

THE KAISER'S TOUR.

Kaiser William II is at present at Naples, Italy. Prince Emmanuel, the heir apparent to the Italian throne, accompanied by the Ministers for Foreign Affairs and the Navy (Signor Tittoni and Admiral Morin), visited the Emperor on board the Imperial yacht Hohensollern, and they lunched together. The most cordial toasts were enthusiastically drunk, and expressions of the unchanging devotion of their respective subjects to the Triple Alliance between Austria, Germany and Italy, were delivered, The proceedings were marked throughout by the most intense fervency.

HUMOU ITCHING

SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTI-CURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA CHEMENT, for preserving, purifying, and beautifying the skin, for cleaming the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the tellet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

CUTICURA RESOLVENT PILLS, CHOCOLATE COATED,

Are a new, tasteless, douriess, economical substitute for the celebrated fluid CUTTOTEA

RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in surewcap pocket vials containing 60 doses. CUTTOTEA FILLS are alterative, antiseptic, tonic,
and digestive, and beyond question the purest, sweetest, meat successful and economical
blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

Cutiques Remember are sold throughout the world. Asstralian Depot: R. Towns & Co., Sydney. British Depot: 5-Rec de la Palz, Parts. Potter Devo and Cress. Depot: 5-Rec de la Palz, Parts. Potter Devo and Cress. Delgar, Sele Proces. Deston U.S. A.

COLEMAN'S

WINCARNIS

A delicious beverage and tonic made from choice wines, Liebig's

Extract of Meat, and Extract of Malt.

Over 6,000 Testimonials received from the Medical Profession of the United Kingdom.

WINCARNIS has an unrivalled reputation of over twenty years as the finest tonic and restorative in the world.

"An Ideal Pick-me-up. Suitable for all Climates."

Sole Manufacturers: COLEMAN & CO., Ltd., Norwich, England, Agents:—Japan: A. Cameron & Co., Kobe; Hongkong: A. S. Watson & Co.; Shanghai: J. Llewellyn & Co., Medical Hall; Penang: Georgetown Dispensary; Bangkok: English Pharmacy; Singapore: Maynard & Co. (Ltd).

HOLLOWAY'S OINTMENT

OINTIME

IS A HOUSEHOLD NECESSITY

It cures Rheumatism, Sciatica,
Stiff Joints,
Glandular Swellings,
Sore Throat, Quinsy, Mumps,
Burns, Piles, Fistulas, &c.

AND EVERY
FORM OF SKIN DISEASE.

Manufactured only at 78, New Oxford St. (into 588, Caford St.), London. Bold by all Chemists and Medicino Vendors.

Bovril is Strength.

In these days of increased commercial activity strength and perfect health are needed more than ever. Bovril taken regularly is most strengthening and sustaining. It keeps the system in the very pink of condition.

YOKOHAMA: SATURDAY, APRIL 16TH, 1904.

BIRTH.

On April 11, in Yamada, Ise, the wife of Rev. H. L. LATHAM, a Missionary from America, of a Daughter.

MARRIAGE.

On the 8th April, 1904, at the Grand Hotel, Yokohama, Mr. J. H. Rosenthal, of Yokohama, to Miss GERTRUDE M. STERN, of New York, U.S.A.

DEATH.

At his residence 694, Halsey Street, Brooklyn, New York, on March 5th, 1904, Doctor George Stanley Clarke, brother of Mrs. Davidson MacDonald and Mrs. Petry, Tsukiji, Tokyo.

SUMMARY OF NEWS.

THE railway station at Kamada, between Shinagawa and Omori, was opened on April 11th.

Funds collected in Yokohama towards expenses aggregated on April 11th about yen 75,591.72.

of the patients died.

two feet. One house collapsed and two persons were injured.

THE Emperor and Empress have decided to hold a Cherry-Blossom Party on April 20th at the Hama Detached Palace.

"THE GEISHA," which was being played at St. Petersburg, has had to be withdrawn owing to the anti-Japanese feeling there.

A cow belonging to K. Iida, a dairy keeper at Sarui-cho, Fukagawa, Tokyo, died on April 9th from a virulent form of rinderpest.

MR. FURUICHI, President of the Seoul-Fusan Railway Company, left Fusan on April 11th by the steamer Kosho Maru for Kobe.

MR. ISOBE SHIRO was on April 12th elected for Tokyo as a parliamentary representative to take the place of Mr. Akiyama, resigned.

THREE of the Russians who were treated in the Matsuyama Hospital, being recovered, left there on April 8th for Kobe on their way home

PRINCESSES FUMI and Yasu (daughters of the Emperor) who have been in Kamakura during the winter, returned to the capital on April 11th

GENERAL TERAUCHI, Minister for the Army, entertained on the evening of April 8th high officers of the Head-quarters, at his official resi-

A man was crushed on April 11th by a train at the Yotsukaido station of the Sohn railway, his feet being severely injured. He was removed to the Chiba Hospital.

A TELEGRAM from Takeshiki states that according to an officer who had arrived from Chemulpo, the work of floating the Variag is almost brought to a successful result.

JAPANESE gold coins amounting to yen 2,600,000 were exported on April 8th by the steamer Empress of China to Vancouver and yen 20,000 by the Salazie to Hongkong.

Mr. H. Matsumura, a director of the Naigai Fire Insurance Company Ltd., Kanda, Tokyo, has been arrested on a charge of embezzlement and of forging bank cheques.

Li Mang-on, a Chinese passenger by the steamer Empress of China, which arrived on April 7th at Yokohann, committed suicide on the night before arrival by jumping into the sea. Insanity is reported to the cause.

WADA, a farmer in the district of Gunjo Gifu prefecture, murdered his two children on April oth with an axe, and attempted to commit suicide, when he was arrested. The cause is reported to be poverty.

THE Asahi states that the sailing vessel Kwanon Maru was sunk on April 6th at the entrance of Niigata during a gale. The captain and seven men were drowned. She carried dried fish from Kumaishi, Hokkaido.

EARLY on the morning of April 9th, two men armed with swords entered the dwelling of K. Mizutani, a charcoal merchant in Shin-emon cho, Nihonbashi, Tokyo, and stole several articles valued at about eighty yen.

On the night of April 9th a man about forty A Shimonoseki telegram states that eight cases years old, was killed on the railway near Kanaof small-pox were reported on April 12th. One gawa station. The following morning another
of the patients died. railway near Uyeno station, Tokyo.

Yinkow, thirty-one Japanese spies and two Koreans employed by Japan have been arrested by the Russians at Port Arthur since the opening of the war. They were all transported to Siberia

It is reported by a telegram from Aomorî that owing to the breaking of the river bank at a point near the Ashaka tunnel, a section of the O-u railway line was damaged on April 9th, traffic being suspended. Repairs will be completed in a few hours.

will of Mr. Edward Brook, the sewingthread manufacturer, has been proved. The estate was sworn at £2,155,752, exclusive of heritable properties in Scotland, and of several settlements; and the amount paid for estate duty is no less than £170,580.

UNDER instructions from the Emperor, Viscount Tanaka, Minister of the Imperial Household, entertained Lieut.-Generals Sir William Nicholson and Sir Ian Hamilton on April 13th at 3 p.m. at the Shiba Detached Palace, together with several foreign war correspondents now in Tokyo.

THE steam-launch Tsunu Maru was damaged on April 9th in the Watarase river near Nagareyama, Gumma prefecture, and went ashore in order to avoid sinking. A hundred and four passengers were rescued by the steamer Furukawa Maru which was passing. The cargo was all damaged.

SEVERAL articles from the Russian destroyer Steregustchi, sunk by the Japanese on March toth at Port Arthur, were brought to the Naval Department on April 12th. Among them are a coat worn by warrant officers, two life-jackets and metelescope. They will shortly be exhibited in the Yushu-kwan (Military Museum).

LORD FRANCIS HOPE, whose marriage with the American actress May Yohe provided so many topics of interest until divorce brought it to an end, was married again, very quietly, at a country registry office, on the last Saturday in February. The new Lady Francis Hope is a daughter of Mr. George Thompson, an Australian banker.

Mr. H. Goto, the proprietor of a well-known weaving factory in the district of O-ra, near Utsunomiya, seems to have been involved in the pecuniary embarassment which at present characterises the Ashikaga market. On April 10th he suspended payment on a claim of twenty thousand yen. The Jiji adds that there are others who are in such difficulties that they are on the verge of bankruptcy.

THE Emperor presented fifteen hundred yen on April 12th to Marquis Tokudaiji, Grand Chamberlain, who has been at Kamakura for some time on account of health. It is added by the Jiji that the Marquis has slightly recovered and intends to remove to another place more suitable to the state of his health. His Majesty also presented five hundred yen on the same day to Count Higashikuze, Vice President of the Privy Council, who is now undergoing medical treat-

THE London Standard insists that the present Mission in Thibet must not turn back until Lhassa has been reached, and a British Agent established has been reached, and a british Agent established there. It has become almost peremptory that an Agency should be, formed. The Daily Telegraph says that if the Thibetans refuse to enter into negotiations with the British at Gyangste, then the Mission would undoubtedly have to continue its advance. The Morning Post urges that the advance of the Mission must be continued Snow fell on April 5th in the district of Sannohe, Awomori prefecture, the depth being over According to a Chinese paper published at until its object has been fully accomplished.

PORT ARTHUR

Saturday, April 9.

The German newspaper of Shanghai publishes statements obtained from officers of the Russians, we are told, being deluded merchant ships to the effect that Port Arthur into thinking that a Japanese squadron was is in a splendid state of preparation; that it is absolutely impregnable: that a landing could not possibly be effected any where in its vicinity; and that its garrison have ample provisions. The same journal repre-sents the Russians as having fully completed the defences of Newchwang and amply garrisoned the place.

Monday, April 11. There appears to be no longer any doubt that the Boyarin has gone to the bottom. The only question is, what happened to her. First of all she was supposed to have been sunk by a Japanese destroyer on the occasion of the second Japanese attack—13th of February. Then came news that she had struck one of the mines laid by the Japanese in connexion with the fourth attack—10th March. This intelligence effect that the Japanese squadron approach arrived viá a German channel, its source ed Port Arthur at 8 a.n. on the 13th and being St. Petersburg. And now, finally, it bombarded the place for 4 hours continuousis alleged that according to Viceroy Alexieff ly. the cruiser, when returning to Port Arthur as Rashing. As yet (Thursday morning) from a secret mission, struck a Russian mine no official intelligence of this event has and went down, 9 of her crew and all her reached Tokyo. stokers and engineers being drowned. What is certain is that the Boyarin has never been heard of in connexion with the defense.

she exists she is doing nothing. It appears probable that Commander Hirose's corpse was picked up by the Russians at Port Arthur and interred with all the honours on the 1st of April. From the description of the body and the articles found on it, there can be little doubt as to its identity. The Russians evidently treated the corpse as though it had been that of one of their own officers, for which act all praise is due to them.

Tuesday, April 12.
The Hochi Shimbun and the Yomiuri allege good authority for saying that the Russian garrisons of Port Arthur and Vladivostock are as follows:—

TORI BRIBUR.	
Infantry, 2 Brigades	16.000
Cavalry, I Company	150
Field Artillery, 2 Batteries	6ou
Garrison Artiflery, t Brigade	2,400
Engineers, 2 Battalions and 2 Companies.	1,300
Torpedo Corps, a Company	200
Total	20,650
VLADIVOSTOCK.	_

The numbers given for Port Arthur are not unlikely to be correct. Such a force would

be ample to defend the place and a larger garrison would be superfluous.

Thursday, April 14. A British steamer, the Shanking, which the Muscovite. We should think that the entered Cheso on the 12th instant, reports world's feeling will be one of regret to see a that she was examined by a Russian cruiser great nation having fecourse to such paltry by the Japanese. When turning and making on the 11th at a point some 10 miles from antics. The Japanese do not use lyddite in for home at full speed, she may have gone Liautishan, and that she observed seven Russian vessels in the offing. There is also a monopoly of that explosive, just as France a rumour that on the morning of the 12th as of melinite. If they have discovered eight torpedo-craft left Port Arthur for something equally effective, then all that can palling, however much it makes for Japan's Cause. There have been acts of Admiral distance of succour. dicate clearly that the blocking of Port French do. But how did the noxious gas Makaroff's which were difficult to re-

telegraphed to Port Arthur that she was in danger of capture, and an English warship put out. That much seems pretty clear. But the rest is tinctured with romance. in the vicinity, hastily desisted from their occupation of examining the Haimun's papers and effected their escape. But it is to be observed that the Haimun is a British steamer chartered by British subjects for the legitimate uses of a British newspaper. There should not be any danger of her capture by the Russians.

Friday, April 15. There appears to have been another at-tack of some kind upon Port Arthur. A British steamer, the *Pokusan* (?), reports that when passing in the neighbourhood of Liautishan on the morning of the 13th instant, she heard a violent cannonade which lasted for three hours from 5 a.m. to 8 a.m. Another statement is wired from Chefoo, its original source not being indicated, to the ed Port Arthur at 8 a.m. on the 13th and The Asahi gives the name of the ship

The Russian Admiral, according to the Novy Krai, reports that the steamers sunk by the Japanese at the last blocking attempt contained some poisonous gas. Such at least is the purport of the report as it comes to us from Chefoo. He also reports that a Japanese torpedo was charged with this gas and that the noxious vapour pervaded the whole harbour, but how it escaped from the torpedo and entered the harbour there is no explanation. The Admiral further states that the sunken steamers are found not to be such old vessels after all, and that the guns with which they were armed have been raised and mounted in the forts. Finally he says that he has raised one of the steamers, namely, the one that it was necessary to raise.

How much of the perplexing character of this story is due to defective transmission, we can not tell. So far as concerns the small triumphs recorded by the Admiral, namely, that he has taken possession of and utilized 4 guns which were deliberately left to him by the Japanese, and that really the Port Arthur and opened a bombardment steamers sunk had more value than was at on the morning of the 13th, though first supposed and consequently entailed a accounts vary as to the hour, and it is greater sacrifice on their sinkers, no one will conceivable that Admiral Makaroff went be disposed to grudge the gallant officer's satisfaction. But the noxious gas is another though he had never previously made any question. That kind of statement has been serious already made by the Russians and it is of a range. If he did, and if a batch of torpedopiece evidently with their general attempt to persuade the world that the Japanese do not the rest is easily conceived. If, again, pelsy the game and should be classed the Admiral, true to his usual tactics, went with a lower type of humanity than our so soon as the Japanese ships were hull the Muscovite. We should think that the world's feeling will be one of regret to see a come into contact with a floating mine left

In other words, it is dated on the very day when the steamers were sunk. Apparently, then, the Russians possess some contrivance for picking up a vessel of two or three thousand tons from her place at the bottom of the sea and carrying her to any convenient position. Any ordinary mortals equipped with ordinary apparatus might have been sufficiently occupied in raising the four guns from the steamers during the forenoon of the day when they sank, but the Russians at Port Arthur supplemented that already remarkable achievement by snatching up one of the steamers bodily.

The Admiral's report further says that although the Silm's boiler was burst by the enemy's shell and although she was run ashore, she was subsequently floated off by the exertions of her crew and taken into the

harbour.

A telegram received in Tokyo from St. Petersburg confirms Reuter's intelligence. It says that, according to a semi-official announcement, the *Petropavlovsk* has been sunk outside Port Arthur, only four officers escaping. Among the four was Prince Cyril, who, however, is wounded. It is a strange piece of intelligence. The Petropavlovsk is a line-of-battle ship, only nine years old, her displacement 10,050 tons. Such ships are not easily sunk. Even supposing that she were torpedoed forty miles from Port Arthur, she could still steam in, covering the distance in less than three hours, and secured against sinking by her water-tight compartments. Moreover, if she sank at sea, and if Japanese ships were any where in her vicinity, it would have been their duty to save the crew, and we can affirm from experience that they would have discharged that duty with the utmost assiduity. If, however, the ship, after being torpedoed - it is in the last degree improbable that she was sunk by gun-fire-if after being torpedoed, she made with all speed for Port Arthur, no Japanese ship would have thought of following her to a point within range of the forts, and she may have gone down within 6 or 7 miles of her bourne. As to whether she received her death wound in action, it is not yet possible to say. There appears to be little doubt that a Japanese squadron approached out of harbour to engage the Japanese. craft made a rush for the Petropaulovsk, by the Japanese. When turning and making Arthur has been a partial failure, at all events. Succeed in permeating the harbour? Are we about the adventures of the Haimun. On the 1st into the harbour and discharged themselves being a highly competent and even brilliant the 5th instant as the vessel was passing within thirty miles of Port Arthur, she was within thirty miles of Port Arthur, she was the Russians were approaching, the Haimun. Makaroff's report is dated the 27th of March. Fortunes of his country in the Far East,

OFFICIAL REPORT (Latest).

An official report received by the Naval Department from Admiral Uriu by means of the Third Destroyer Division and published on the night of the 14th, says that on the 13th instant the Japan Squadron attacked Port Arthur and sunk a Russian line-of-battle ship, the *Petropaulovsk*, together with a destroyer. The Japanese vessels did not suffer any damage.

It will be seen from the above that the mine when she was returning to Port Arthur. Whichever report be correct, the Petropavlovsk was sent to the bottom by Japanese agency, but if she received her death-blow from a destroyer or a torpedo-boat, the exploit will be much more remarkable.

THE COSSACKS.

It is interesting to read the first Japanese appreciation of the Cossacks. An officer of rank is reported as saying that in their habits these men differ from any people he has ever met. They live more like savages than human beings. Their dress is simply a sheep's skin, and not being accompanied infantry. by any commissariat they eat whatever they find, a raw chicken being a delicacy in their opinion. Moreover, they prefer bivou-acking in the open to sleeping under the shelter of a roof, and their power of covering long distances is remarkable, though in point of actual celerity they do not exceed other cavalry. It is with regard to intelligence and courage that this officer denies them any praise. He speaks as though their love of life rendered them almost comtemptible for military purposes, and as though their want of quick perception constituted a thorough disability. His judgment is based upon repeated observation of their conduct as scouts. At Chonju they had all the advantages of position, but they made no attempt to utilize them, and wasted two hours practically doing nothing. During that time Lieute-nant Yoshigami with twenty Japanese troopers held his ground against 70 or 80 Cossacks on the right wing of the Japanese, and the Russians, having wasted all their temporary superiority of numbers and position, retired at once so soon as they found themselves under infantry fire.

The Shogyo Shimpo's correspondent sends an outline description of the Chonju fight. The fact that Chonju was occupied by the Russians having become known, reconnaissance in force was sent out. Its advanced guard consisted of 16 troopers under Second Lieutenant Minoda. Upon these the a position on an eminence, where they dis- that the Russians are taking no risks. mounted and manœuvred as infantry, shoot- The above account was given out by the now go on quicker, though only 3 hours ing from under cover of a temple. Lieuten- Naval Authorities. But subsequently the daily are available.

the man perishes with some six hundred of the second. But when he was loading were seen attempting to land some 1500 his officers and men, with one of the best for a third shot he received a bullet in his metres on the south-west of Yong Am-pho. Ships remaining to Russia in this quarter of left ear. One of the men ran out to bring A Japanese cavalry patrol in Yong Am-pho the world. Such catastrophes make us forget him in, but the Russian fire became so hot and a naval boat attempted to capture them, for a moment the issues at stake in the war. We remember only its horrors.

When dragged fired upon and two or three were hit. They under cover he was found to be dead. A ultimately joined a detachment of twenty or sergeant-major was shot almost at the same time, as was also a corporal who attempted river. to examine the Russian position with a glass. Three officers also were wounded. Immediately afterwards the Japanese infantry who had moved up rapidly in support, opened fire from the left flank, and the Cossacks evacuated the town. At 1.15 p.m. a body of Japanese cavalry gallopped up to the south gate and raised the Rising-sun ensign. The fight had Japanese claim to have sunk the battle-ship lasted 2½ hours, but unfortunately this in their attack, whereas Reuter's news, correspondent tells us nothing about the coming of course from a Russian source, range at which the main engagement was represents the vessel as having struck a fought.

The engagement at Chonju was not the first meeting. A trooper named Inouye, now in hospital at Kokura, describes the Pakchong skirmish on the 22nd of March when a squadron of 13 Japanese troopers under Second Lieutenant Muto was drawn into a struggle with about 130 Cossacks. Inouye alleges that he and his comrades received a volley at about 30 metres, but that is scarcely credible, seeing that only one or two casualties resulted. What is one or two casualties resulted. What is interesting, however, is the evidence afforded by these various incidents that Japanese cavalry when on scouting duty is always within supporting distance of body of

A SKIRMISH.

appears that on the 11th instant Lieutenant Yamaguchi with 5 men was sent from the gun-boat Kaimon to reconnoitre the estuary of the Yalu. The party of six embarked in a small boat and proceeded to Turyu-plo, which is on the left bank of the estuary, below Yong Am-pho. While there they saw a Chinese boat approach with 7 Russians on board. There was already a cavalry patrol at Turyu-pho, and the troopers joined the sailors in opening fire upon this boat. Presently another detachment of 15 or 16 Russians approached in a larger boat, and joined the engagement. Apparently the enemy retired very quickly. They were pursued by the Japanese boat but they effected their escape and landed on the opposite bank. The fight lasted an hour and twenty minutes, and the Russians had one man killed and two wounded. The Japanese did not suffer at all. In the fishing boat which the Rus-sians had occupied, there were found ten loaded cartridges and 400 cartridge-shells, the Varyag has not proceeded as far as was These Russians are supposed to have been troopers who were on guard. It seems taken out of the vessel—presumably 6-inch strange that two Russian boats should have pieces, of which she carries twelve—, and Russians should have fired 400 shots withvanced guard consisted of 16 troopers under Second Lieutenant Minoda. Upon these the Russians should have fired 400 shots with above the surface, at full tide her deck is Russians opened fire at a distance of 6,000(?) Russians opened fire at a distance of 6,000(?) Flug and Dessino will have their own version owing to the want of maps showing her of this affair. We shall probably hear that structural arrangements. Application was body of the latter's cavalry—that is to say, the Japanese boat was sent to the bottom made to her builders, Messrs. Cramp of the cavalry forming the reconnoitering party—then gallopped up, and having advanced with all its occupants, otherwise there would Philadelphia, but they declined to supply a position on an eminence where they die.

Never, perhaps, did events bear quicker or more unequivocal testimony to the ability of a commanding officer. And now, just as he and his squadron began to venture to sea, shots at him, bringing him down with the man perishes with some six hundred of the second. But when he was loading were seen attempting to land some 1500 metres on the south-west of Yong Am-pho. thirty Russians who were on an island in the

> It appears further, that Russians, disguised as Koreans or Chinese, have made several attempts to cross the river between Wiju and Yong Am-pho, but have been driven back on each occasion. On the morning of the 12th a party of Russian infantry numbering from 30 to 40 essayed to cross the most northerly of the three streams into which the river is divided by islands. A company of Japanese infantry opened fire on them, and the Russians fled, leaving one officer and twenty-one men killed. These Russians belonged to the Twelfth Regiment of Russian Rifles. The Japanese had no casualties.

MR. POWNALL ON THE WAR.

Old residents in Japan are finding ready access to English newspapers, magazines and periodicals these days. We notice that Mr. C. A. W. Pownall writes for the *Nine*thenth Century and After an article on "Russia, Japan, and Ourselves." The Spectator fastens on two points of Mr. Pownall's article. The first is his insistence on the falsity of the view, based on the im-pressions of globe-trotting tourists, that the Japanese are a light-hearted, superficial race, easy of access, and ready to take the Western man at his own valuation. Noth-A skirmish is reported from the Yalu. It from the truth:—

"A very able man, a missionary who had lived twenty years among them, and thoroughly knew their language, a very difficult one, and so a great impediment to interchange of thought, when he was asked what he thought of the Japanese character, replied: 'Between our minds and those of the Japanese there is always a curtain, which they take care is never lifted.' They are an intensely secretive, astute, and self-contained race, very difficult to understand, because of the ineradicable racial difference between them and ourselves." between them and ourselves."

Mr. Pownall's other point is that in the present contest Britons are not the stake-holders but the stake-finders; and whichever of the combatants wins, Britons lose. In conclusion, he appeals to his countrymen "to avoid undue jubilation at the first tricks in the game being scored by the player with whom, in consequence of the provocation received, we have naturally the greater sympathy."

THE " VARYAG."

It appears that the operation of raising retreated before one Japanese, and that the though at low water two-thirds of her show above the surface, at full tide her deck is found on board the cruiser, and work will

MANCHURIA.

Saturday, April 9. Viceroy Alexieff paid a visit to Port Arthur on the 31st ultimo, and after inspecting the on the 31st ultimo, and after inspecting the place and holding lengthy conferences with those in command, returned to Mukden on the 2nd instant. Apparently the Viceroy retains some portion of his military seniority. Russian troops are said to be massing at Tashikiao, and considerable re-inforcements

latter troops belong to the Warsaw Moscow Divisions.

It is reported that virtually all the Russian store-keepers and merchants of Port Arthur have either left the place or are making pre-parations to do so. That is likely enough.

The lift Shimpo reports on the authority of a message from Shanghai that on the 6th instant the Russian cruiser Bayan stopped The Times despatch boat Haimun at a point 30 miles from Port Arthur, and released her after having searched for Japanese sub-jects on board. It is evident from this fact cruisers are concerned.

It is now denied that the Russians released the two Japanese subjects who accompanied ship were seized at Newchwang. probable, we should think.

reached Shanghai on the 6th. Its officers are Japan war an immense host of baggage-reported as saying that up to the 3rd all was coolies were used, but it appears that such quiet at Newchwang, but preparations had a system did not commend itself as the best been made for the departure of the women possible, though it would doubtless be the and children at a moment's notice. The Rusbest the Russians could adopt in their and children at a moment's notice. The standard position.

The standard position is a position of position.

about this intelligence is that it shows Alexieff still in command. Apparently Kuro-patkin is to act under his orders. Upon Upon Alexieff rests the chief responsibility of bringing about the war and it is right that upon him also should rest the responsibility of conducting it. But we can not conceive are reported to have reached Liaoyang. The that he will have any direction of active latter troops belong to the Warsaw and operations in the field. That is to belong

to Kuropatkin undoubtedly.
Chinese subjects lately returned from Manchuria repeat previous information, namely, that the Russians in Mukden, failing to obtain the cooperation of the Chinese authorities for the purpose of collecting transport vehicles, have requisitioned them by force, thus securing over three hundred. It is probable that vehicles of this nature are a serious desideratum to the Russians. To convey a sufficient number from home would greatly tax the already that the harbour is not sealed, so far as strained capacities of the Trans-Asian line, and yet without a fully organized transport service it is impossible for the troops to operate at any distance from the railway. the correspondents of the Chicago Daily What would serve the Russians best would News when the latter together with their be to organise a corps of a hundred thousand The Chinese baggage-carriers, if the Chinese Americans and the steamer appear to have could be induced to serve, which appears been set free, but the Japanese were sent on problematical in view of the fact that we to Mukden, where it is thought that they hear nothing of any attempt to take such an will be executed as spies. That is hardly obvious step. The Japanese, who know probable, we should think. The latest statement from Newchwang is transport facilities are best suited to that the blocking of the river has not yet been effected. Seventeen junks are being have provided hundreds of light four-prepared for the purpose. The American gunboat which wintered at capable of passing over the roughest roads Newchwang, left that port on the 3rd and should prove very handy. In the China-

What is chiefly interesting cause grossly opposed to all the spirit of the cause grossly opposed to all the spirit of the Christian cult.

> Wednesday, April 13. According to the Asahi's correspondent, the Russian forces at Liaoyang now com-prise 7 regiments of infantry and 3 batteries of artillery, the infantry numbering ten thousand and the artillery 750. This estimate assigns very inferior strength to the regiments, and, for the rest, is difficult to reconcile with the accounts we have lately been hearing of the concentration of troops at Liaoyang.
>
> The same correspondent says that, accord-

> ing to report, the Russian forces at the Yalu, Haicheng, Tashikiao and Liaoyang total seventy or eighty thousand. This excludes the troops at Port Arthur and Newchwang, as well as those at Mukden and various minor points.

Whatever reliance may be placed on the arithmetic of these statements, they certainly go to show that the Russian forces are much scattered, which is a disadvantage that has been apparent from the outset.

It is stated that on the day of General

Kuropatkin's coming to Liaoyang, a brigade of the Guards Riflemen arrived at the s place and were despatched thence to Port Arthur by train during 3 days at the rate of 1,600 daily, namely, 2 trains of 40 carriages, each carriage carrying 20 men.

There is said to be me tolerable supply of forage for horses, but of inferior quality. The troops, however, are living mainly on

red sorghum.

It would seem that some twenty thousand bandits are in the employment of the Russians near Liaoyang and that they wear Russian uniforms. They receive 15 roubles monthly, and find their own horses as well as food and forage. That is poor remunera-

The Russians requisition horses, large and small, at a uniform rate of 3 roubles weekly. They pay 3 roubles daily for horse-waggons, but the inhabitants do everything possible to avoid supplying this demand.

The railway guards are posted at intervals of 10 miles. They have erected posts surrounded with inflammable materials all along the line, the idea being to fire these in the event of bandits' attacks at night. But the device is said to have proved defective.

From the same authority (Asahi's correspondence) we learn that the number of Russians who crossed the Yalu into Korea was about ten thousand, and that they were guided by three Koreans, who possess guided by three Koreans, who possess Russian decorations. The number does not appear to be greatly over-stated, but in view of the very paltry results achieved by these invaders it is difficult to suppose that they mustered so strong. Ten thousand men, all mounted, operating in a country such as that between Pyongyang and the Yalu, should have proved a very serious

obstacle to the advance of any army.

We hear of seven or eight Japanese carried to Liaoyang under arrest, and charged with being spies or with endeavouring to incite the bandits to wreck the railway. Among them were two Japanese women of about 20 years of age, who wore Chinese costume.

ly ridiculous that Russia should make appeals to international law. International law and international engagements receive no manner of respect at her hands unless her own convenience is consulted by respecting them.

It appears not improbable that many of the Tokyo residents have either failed to become cognizant of the organization for collecting this fund, or have hitherto postponed the pleasant duty of contributing because it is among the numerous things that can be done at any moment. But while people hesitate the objects of their tardy benevolence suffer, and as it does not often fall within the power of the foreign residents to give succour where succour is so greatly needed and where a little aid can afford so children of the Evil One, writes very bitterly vast majority of cases they have remained

public recollection. Hundreds of families have that section of the community which is been reduced to almost complete destitution by the sudden removal of their breadwinners, and thus to the sorrow of parting with fathers and husbands is added the pain of grinding penury. The Japanese themselves are giving with both hands; giving much more than their resources warrant, and the privilege of helping them, much or little, is not to be neglected.

THE INCREASED COST OF LIVING.

Japan is not the only place where the increased cost of living is causing a radical overhauling of the household economy of the middle classes. From the United States of North America there comes a bitter cry which finds expression in the public press. We find *Public Opinion* writing:—

We find Public Opinion writing:

The increased cost of living is something about which there can not be any dispute. The war has affected many lines of goods and speculation has had an even more potent influence in raising the price of wheat and cotton. Flour has advanced from 25 to 50 cents a barrel in sympathy with wheat, and in some places the cost of loaf bread has been increased to six cents. Dun's index number reflects the general advance in food stuffs. This number is obtained by multiplying the prices of all necessaries of life by the country's per capital consumption. No one commodity can influence the general result because relative importance is taken into consideration in the computation of the index number. This, on March I, was \$103.61, as compared with \$101.06 on the same date last year and \$97.38 six months ago. This means a much greater advance in prices than the actual variation in the index number would indicate."

much relief, we venture to recall the charity to on this question, taking up the parable for absolutely stationary.

known in England as the lower middle class.

420

While the pampered spoilsman of that organized conspiracy against American manhood, the modern labour union, is waxing sleek and fat on his \$25 to \$30 per week, of only 44 working hours, the countless thousands of clerks, stenographers, managers, solicitors, bookeepers, salaried employees and young professional and business men in Manhattan ruefully scan each week the ever-growing budget of living expenses presented by their devoted but tearful wives and wonder where the money is to come from to meet next month's rent.

and wonder where the money is to come from to meet next month's rent.

In order that the plasterer may receive 68% cents an hour in New York for precisely the same class of work for which he cheerfully accepts 33 % cents an hour in Erie, Pa., in order that the bricklayer may be glutted in this union-ridden metropolis with his ultimate pound of flesh, his 65 cents per hour; the carpenter his 56% cents and the other bloaded monopolists of labour in the building trades corresponding or greater wages, the rent of small flats and apartments has increased fully 30 per cent. in the last three years. It is impossible for the man with a small salary, hunt prayerfully as his good wife may, to find even in the remoter parts of the city, in a respectable neighbourhood, the most modest flat or apartment that does not command from \$28 to \$35 per month.

But our contemporary grows gloomier as we proceed:-

we proceed:

In vain the young housewife scrimps and pares: in vain after 14 hours of labour among the pots and pans in the small stuffy kitchen, or attending to the multitudinous needs of her little brood, or—for it has come to this—in communion with the scrubbing brush, the wash tub and the ironing board, she bends her poor aching head tearfully in the far comer where her husband cannot see her over one-year-before-last hat, smoothing the bedraggled plume and frayed velvet, wondering how it can possibly be rearranged so as to do service at the coming Eastertide.

As for that husband, broodingly he enjoys as he may the sole indulgence left him—his one post-prandial pipe—while the murky waters of the slough of despond lap his slippered feet and the blue devils of penury, and dependence gibe and grimace about him. Down the street, the thumping of a piano calk attention to a more pretentious flat, up the steps of which presently reels a coarse, red-faced brute, redolent of whisky and smoking a very bad cigar. The curious who take the trouble to inquire will readily learn that this important personage is one of the brethren of the trowel and bludgeon—a member of the consolidated, international order of plasterers, or the like—returning from his Saturday half-holiday, spent in "study and self improvement" in the back room of a low groggery in the company of the same murderous, grafting crew that hailed the convict Parks as chief.

A fancy portrait? Not a bit of it. Visit the streets of Harlem any Saturday hight and you, good sir

Parks as chief.

A fancy portrait? Not a bit of it, Visit the streets of Harlem any Saturday night and you, good sir or madam, may see the same. Better yet, ask the visitor of your church, or a Salvation Army lassie or one of that heroic band of cultured men and women who live in the social settlements and with a self-sacrificing devoltion which is Christ-like, have dedicated their lives to the too-often thankless task of cheering and caring for those whom the tyranny of the unions have deprived of work and driven to the ragged edge of destitution.

The same phenomenon is being seen in England. The man on a fixed salary is finding it harder and harder to keep pace with the ever-increasing cost of living: little by little luxuries are being dropped and, as we know personally, many families of gently nurtured folk who have belonged for generations to what is known as the professional classes, live on much simpler fare and spend less on clothing that do the families of the workingman per se. In Japan, too, among the foreign communities, a very much simpler style of life has become the rule during the past few years. Steadily and surely the cost of food-stuffs have risen, the price of domestic service has risen also, until at last it has become a necessary part of the foreign resi-dent's life to study economy as carefully as he or she would have to do in the home 430

CHINA'S NEUTRALITY.

Monday, April 11.

It appears that although the Chinese Government is understood to have denied any intention of placing bean-cake on the list of contraband of war, the Russian Consul at Chefoo has succeeded in inducing the Taotal to interfere with the export of a quantity of this staple which the Mitsui Bussan Company was about to ship. Inbean-cake is used for feeding horses in Japan-a use which we now learn for the first time-and that, consequently, it must be vetoed. We suspect that there is some exaggeration in all this. The Russians can scarcely be so unreasonable or the Chinese so inconsiderate. At all events the question—if there be really any question—can not be settled too quickly, for the Japanese farmer wants the fertilizer at once.

Thursday, April 14

The Nichi Nichi Shimbun's correspondent has just returned to Peking from making a direct inspection of the West-Liao district. He reports that China is able to preserve neutrality from Shanhaikwan to Kinchow; that is to say, in the region on the west coast of the Gulf of Pechili. But thenceforth eastward to the Liao River the Russians are in actual possession. In other words, the Taling River which falls into the north-west corner of the Gulf constitutes the northern boundary of China's sphere of sovereignty, all the district between that sovereignty, all the district between that river and the Liao being treated by Russia as belligerent territory, and stripped of everything available in the shape of supplies. About 1250 Cossacks patrol the region in parties of 50, riding hither and thither and treating the country as Russian territory. At Yingkow only m small force of Russians is posted. Niukia-tung has 3,000, Anshan-tien has 2,000. Tashikiao has 8,000. Anshan-tien has 2,000, Tashikiao has 8,000, and in the fort on the bank of the Liao there are about 200. Torpedoes have been placed at the mouth of the Liao and only small exit is available. The Russian gun-boat Sivoutch seems to be watching for an oppor-tunity to escape to Port Arthur. Russia appears to have changed her strategical programme. She is sending her troops from Fenhwang to Liaoyang, and is assembling the newly arrived forces at Tashikiao. (This would mean the abandonment of any attempt to check the Japanese advance from the Yalu and the concentration of Russia's main strength at Liaoyang, while a secondary concentration took place at the junction of the Newchwang-Mukden lines. But such an estimate must be received with reserve.—Ed. J. M.) It is said that the enemy is not in great strength at Harbin and in its neighbourhood.

The Asahi's correspondent also has just visited the same region. He reports that the whole district is closely watched by the Russians, so much so that the fugitive Chinese, who are very numerous, can not escape by the Newchwang railway, and have to go round by the Shinning road. The greatly increasing number of these fugitives is said to be causing much embarrassment to General Ma. This correspondent says that the Taotai at Shanhaikwan is a very enlightened man and that he is exercising the strictest surveillance to prevent the supply of necessaries to the Russians. Several Russian officers are staying at the

attention they pay to all movements of the Jiji's correspondent. Japanese subjects is remarkable. Westward and southward of the Taling River the troops of General Ma and Viceroy Yuan are maintaining a state of the strictest neutrality, but as to the neutrality of the rest of the district, it is a farce: the whole region is over-run by the Russians. From this correspondent also we learn that Russia seems quantity of this staple which the values of the stable which the line of railway, namely, at Liaoyang the Russians are said to be insisting that bean-cake is used for feeding horses in respondent also we learn that Russia scenies of the line of concentrate her troops along the line of railway, namely, at Liaoyang and Tashikao, not making any resolute bean-cake is used for feeding horses in resistance to the advance of the Japanese until these points are reached. A new fort has been built and armed at a place called Anshan-tien, which is on the line of railway about mid-way between Haitien and Liaoyang. The British Consul at Newchwang, who happened to be the correspondent's travelling companion on the railway, and who had left Newchwang on the 11th instant, stated that although torpedoes had been placed in the river at Newchwang, the passage of merchant steamers was still possible, but what would be the case after the break up of the ice and after further defensive measures had been taken by the Russians, he could not predict. The Consul saw no sign of the departure of the Russian gunboat Sivouteh, but he thought that the English gunboat would soon leave the river. correspondent agrees with his conferre that there are very few Russians in Yinkow. About 3,000 made their appearance at the place when Viceroy Alexieff recently visited it, but they withdrew immediately. Some twenty newspaper correspondents are assembled there, but they can not procure any news and are complaining bitterly.

> A Chinese subject who has just returned to Peking from Yingkow, informs the Jiji Shimpo's correspondent that he could not observe any signs of activity on the part of the Russian troops. There were occasionally manœuvres on a small scale, but the principal occupation of the soldiers was stealing. There was no denying that great scarcity of provisions prevailed. The inhabitants paid no attention to Russian requisitions, because nothing in the shape of money came to them in return for their goods. Many were leaving the district, and those that could afford it were employing Indians (sic.) to guard their premises. All were longing for the approach of the Japanese. Even the children hate the Russians. Viceroy Alexieff had issued produce with all reserve. numerous proclamations calling on the people to remember how Russia had guarded them (!) for four years and urging them to respond to her requisitions with entire confidence that all payments would be duly made. But no one paid any attention to these documents. The Bandits were lying perdu in many places, awaiting their op-portunity. Sometimes they might be seen at Vinkow in broad daylight. Great efforts were being to finish the forts, but they were still far from completion. Since the opening of the river some 17 steamers had come to Yingkow, but owing to the prohibition on the export of bean-cake no business could be transacted. It was said that some twenty Russian officers, disguised as merchants, were closely watching the movements of the troops of Ma and Yuan.

Railway Hotel and are evidently discharging the situation may be forced in spite of the in contact with them, arrested 20 of their some duties in connexion with the war. Two Chinese Government's efforts to observe number. There does not appear to have missionaries and several Chinese are sus- neutrality. No evidences whatever, of any been any conflict. The Tonghaks had a

pected of acting as Russian spies. The such danger are discernible, according to

Friday, April 15.

[April 16, 1904.

Japanese public opinion, if we may judge from the utterances of the press, is much dissatisfied with the invertebrate conduct of China in the matter of neutrality. does not show the smallest scintilla of spirit. It would have been quite incredible without practical demonstration that any great nation should exhibit such hopeless pusillanimity. Japan is fighting for China. The issue at stake is whether China shall retain or lose three big provinces of her empire, the provinces from which her dynasty sprang. Under such circumstances any State possessing the most rudimentary instincts of manhood, would burn with shame to sit with crossed arms, and were it condemned to that paltry role, would at least be careful to avoid every act calculated to assist the enemy. China's neutrality is benevolent towards Russia. There is no conceivable excuse for Russia's conduct in the West Liao district. It is the most flagrant, the most unwarrantable breach of neutrality ever witnessed. Russia explicitly evacuated the region in 1902 and she now possesses no more title to it than she does to the county of Kent or the island of Sheppey. Yet China tamely suffers her to over-run the whole district, to employ it as a source of sup-plies, and to utilize it for strategical purposes against Japan. This empire, says the Jiji Slumpo, does not ask for the smallest favour at China's hands; all that it seeks is fair play. But it does not understand, and it can not but resent, the idea of her giving help to the country which aims at despoiling her against the country which is giving blood and treasure to preserve her.

CHINA.

Monday, April 11. Chefoo, on the authority of a Chinese subect who has just reached that place from Harbin, says that on the 6th instant an engagement took place at a place called Bakaro, some 13 miles from Harbin, between a thousand mounted bandits and a Russian force. The bandits had wrecked the railway in two places. This informant does not relate how the engagement ended, but he affirms that the Russians had 400 casualties, the bandits 200, which numbers we re-

Wednesday, April 13. Mr. Davidson, who recently passed through Japan en route for Antung, where he is to take up the duties of United States Consul, seems to be now in Peking. His original intention, as we understood, was to travel vià Shanghai to Chefoo and thence by gun-boat to Antung, but he has apparently changed his programme after consultation with the United States Minister in Peking. and will now return to Shanghai, remaining there until the war has entered another stage of development.

KOREA.

Saturday, April 9.

The Tonghaks have made a species of abortive essay. On the 28th of March news The Jiji Shimpo's Peking correspondent reached Pyong-yang that a party of them emplatically denies the sensational telegram had taken the field at a place some 12 miles sent by the London Morning Post's corressouth of Pyong-yang, Lieutenant Mayeda sent by the London Morning Post's corressouth of Pyong-yang, Lieutenant Mayeda pondent from Chefoo to the effect that anti-with 8 men were sent from Pyong-yang foreign feeling is growing in China and that against the insurgents and having come

were distributing. They may be regarded, perhaps, as Pavlow relics. It was evidently easy to deal with them.

Chunghwa is near the English gold-mines at Eunsan. It is now stated that the British and American Representatives have applied to the Japanese to afford protection at the two places, Eunsan and Unsan, and that the Japanese have adopted measures entirely satisfactory to the Representatives.

Monday, April 11. It appears that the Korean employees of the Russian Legation in Seoul are still at their posts and still conducting diplomatic business. Possibly that curious procedure is connected with the announcement recently made, or said to have been made, at St. Petersburg to the effect that although Korea is granting to Japan facilities inconsistent with any theory of neutrality, Russia does not hold the little empire responsible, being persuaded that it has yielded to force majeure, and Russia will therefore continue to conduct diplomatic relations with it. But, it is evidently unpermissible that Russia should invent a new variety of diplomatic relations to suit her own convenience. She can not withdraw her diplomatic and consular staff from Korea, and substitute for them Korean subjects. Under the distant manipulation of M. Pavlow such an arrangement would open the door to endless intrigues and embarrassments. Mr. Hayashi, Japan's Representative in Seoul, has therefore formally asked the Korean Government whether the business of the Russian Legation is still carried on by its quondam Korean employes. Nominally Russian interests are in French charge, and Mr. Hayashi naturally insists that there shall be practical recognition of one system or the other, not a mixture of both, which would involve many complications while obliterating all distinct traces of responsibility.

It really does seem strange that there should be this talk on Russia's side about Korea's neutrality. Has she not violated that neutrality herself just as flagrantly as the Japanese, much more flagrantly indeed. Her troops crossed the Yalu into Korean territory before the first Japanese regiment landed at Chemulpo, and her Cossacks have only now been driven across the Yalu. Any how no one ever yet heard of neutrality being claimed for a country which is the

main object of a war.

Another question raised by Mr. Hayashi is that, according to information from Sonching, a Japanese subject was arrested at Kyong-heun, the Russians having indicated him to the Korean local officials as a spy. There are no Russians now at Kyong-heun -near the Tumen-but the man seems to be still in custody and his immediate release is demanded.

Mr. Hayashi has further asked that instructions be given to the local officials along the line of the Seoul-Fusan road, so that accommodation may be obtainable by the largely increased number of workmen now about to be employed on the railway.

The occupation of Wiju by Japanese troops and the final expulsion of all Russian forces from Korean soil has been announced

on the horse rather than on the man, for certainly the Japanese trooper on his diminutive, ill-shaped, shaggy pony is any-thing but an imposing spectacle. There was nothing like a cavalry charge, so far as we can gather. An engagement with carbines and some manœuvring had taken place before a body of Japanese infantry-probably a company-came up at the double and opened fire at 2,000 metres. Of course, as the *Jiji Shimpo* justly remarks, if infantry can get within 600 or 700 metres of cavalry, the latter's late is sealed. But 2.000 metres is a somewhat long range. However, the Cossacks found it too short to be endurable. They retired, but not in any confusion. Japanese accounts say that they showed fine discipline and coolness, picking up their dead and wounded with only two exceptions, and moving away in good order. They made a halt at the Tongnai river, which is about 17 miles beyond Chonju, and there re-united their force which had retreated by two roads. The affair would have been more interesting had some Russian infantry also been engaged, but it is at any rate instructive as showing that the Japanese foot-soldier has nothing to fear from the Cossacks.

It is stated that three Japanese companies, the Kajima, the Shiki, and the Kume, have contracted to assist in building the Seoul-Wiju Railway. On this subject the Jiji Shimpo has an article strongly advocating the rapid construction of the line, which our contemporary deems more important than the Seoul-Fusan road. Evidently there can be no comparison between the importance of the two lines from a military point. The distance from Seoul to Wiju, according to the Jiji, is 260 or 270 miles. According to our calculation it is 279 miles. The Jiji's argument, in part, is that the war must be expected to last over the winter, and that as the Tadong and the Yalu become useless after ice begins to form, this railway will be most essential.

It was very natural that many Japanese tradesmen should hasten to Pyong-yang and Chinnampo with supplies of all kinds of goods for the Japanese troops, but the thing seems to have been over-done, and these speculators are now said to be re-turning to Seoul with rueful countenances. Prices at the front appear to have ruled for some time at the same figures as prices in Seoul, so that no margin offered for profit. Moreover the bulk of the forces have now left Pyong-yang and Chinnampo far behind, and it is very improbable that the bad Korean roads will be again used for the passage of an army so long as the sea-route is available.

The Americans at Unsan are said to have shown the greatest satisfaction at the arrival of Japanese soldiers to guard the valuable mining property at the place. Much apprehension had been felt about Unsan. It was feared that as the Cossacks had actually penetrated southward of the town, their arrival there might be expected to precede

quantity of Russophil literature which they deported themselves with great valour the occupation of Unsan by the Cossacks, and competence, fully refuting the some-what low estimate hitherto formed of some triumph as having anticipated the them by foreign observers—an estimate Japanese. But apparently the Cossacks which we suspect to have been based never got to Unsan at all. They do not seem to have ventured so far eastward.

Tuesday, April 12.

In conformity it would seem, with Marquis Ito's advice that the Court and the administration should be separated, the Koreaus are talking of remodelling the Cabinet, and are talking of remodering the Capinet, and placing at its head a Prime Minister. But apparently the prospect of securing that high office has the effect of invigorating the rivalries of the political parties, and we read that one side is vehemently agitating on behalf of Chhini Son-heun, who represents the Lady Om section, while the adherents of the Prince Imperial are in favour of Pak Chon-yong.

It is stated that the Korean local officials who have deserted their posts in the northern regions of the empire, are very unwilling to resume their duties, first because the country has been devastated by the Russians, and secondly because they want to see the result of the battle on the Yalu before venturing

into the zone of danger.

Takeshiki reports that the Varyag has been floated and will very soon be towed into the Japanese dock-yard.

Wednesday, April 13. The *fiji Shimpo* says that the southern section of the Seoul-Wiju Railway, that is, the section as far as Kaisong, will be completed in the course of next month.

Stories continue to arrive about the brutal conduct of the Cossacks towards the Koreans. The chief local official of Pakchhon, who refused to give them the assistance they desired, had his ears, his feet and his hands cut off before death was granted. So it is said, at any rate. A great deal of this kind of thing will probably be heard of and must be largely discounted.

Prince Li, Korea's Ambassador to Japan, is to leave Seoul for this country on the 15th instant. He carries various gifts from the Emperor of Korea for the Emperor of

Japan.

The war correspondents of Japanese newspapers have been allowed to go to the front. They left Pyongyang on the 29th of March, and reached Sukchong on the 30th, whence their letters are now beginning to reach Tokyo. They are all agreed in stating that the condition of the roads is something terrible. One might as well be walking in paddy fields. In many cases it is better to leave the regular road and make one's way by sidepaths. These correspondents seem to have gone by the old road to Sunan (16 miles) and thence to Sukchhon (16 miles), this representing 2 days' journey. While the Russians were in the neighbourhood all the Korean population fled to the hills, but are now beginning to return. It is still rare, however, to see a young woman. The treatment this class of humanity received at the hands of the Cossacks had made them prefer any kind of misery.

Thursday, April 14. Accounts from Seoul directly contradict the estimates made by the correspondents by Mr. Hayashi to the Korean Government that of the Japanese, and though the Russians mightpossibly have respected American property, they would have been pretty carriant to take with regard to the numerous Japanese employees such steps as must have incidents of the fight are not described, but it would seem that the Japanese cavalry of Russia's first great stand; that a whole corps d'Armie, presumably thirty thousand men at least, has been concentrated at Antung; that there is also a strong force at Kiulien; that all the Chinese houses along the river and on the central island have been cleared away; that forts have been built, and that the defenses have been in every way made as strong as possible. Both sides, there-fore, are looking at each other across the river much as they did in the war of 1894.

Friday, April 15.

It is stated that the Koreans have at length ceased to be doubtful as to the direction their practical sympathies ought to Some of them retained until quite recently a lingering belief that though the Russians had fared badly at sea, they would more than redress the balance on shore. But now, seeing that Korea has been completely cleared of Russian troops and that the Japanese are masters of the country up to the banks of the Yalu, even these Russophils are said to have changed their minds and to be entirely in favour of clasping hands with Japan. It really does not matter very much what their mood is, but such are the reported facts.

The Koreans are said to be resting on their oars, as they generally do, in the expectation that some tide of reform will set towards their country from Japan. What-ever of active interest they display in matters of progress is limited to intrigues and dis-putes as to what persons shall benefit by the changes. Marquis Ito's advice about edu-cational reform is bearing feeble fruit in the form of a project to place all the schools under the jurisdiction of the School o Foreign Languages. The Japanese journals say that Korea is not yet ripe for reform. Truly it seems that she will be eaten before

The railway from Seoul to Wiju is expected to cost 2,800,000 yen. Its total length is 280 miles, namely, 170 miles from Seoul to Pyongyang and 110 miles from Pyongyang to Wiju. The first section, 50 miles, from Seoul to Kaisong, has been under construction for some time and will probable. construction for some time and will probably be completed by August. Moreover, the surveying of the remaining section of 120 miles, to Pyongyang, has been finished, and the present intention is to build the line to the latter town by the close of this year. If that project holds, there will be through communication by rail from Fusan to Pyongyang before next spring. It is stated that the road from Pyongyang to Wiju will not present many engineering difficulties. gage is the standard.
Mr. Lefebre and another engineer have

arrived in Seoul, with the intention, it is said, of protesting against the construction of the Seoul-Wiju Railway by the Japanese, but it is not expected that the protest will have much weight. The new protocol between Japan and Korea puts an altered com-plexion on the situation, and we are by no means sure that M. Lesebre would have had grounds for a valid protest under any

circumstances.

THE NIPPON YUSEN KAISHA'S PURCHASES.

the Margan (3,781 tons) and the Afridi mediatrix nature that waited to repair the (3,808 tons) recently purchased by it. They breach in the poet's self-esteem. Some are to be called the *Jinsen Maru* and the Kitsuri Maru. Another large steamer, the influence to achieve its work. It did achieve Willowdene (4,300 tons) has been purchased it, however. As time went by the true by the same Company, but is not yet outlines of the incident grew fainter and

MEMORY THE ROMANCIST.

On a certain evening of a day in a year which need not be specified, a distinguished English poet and journalist then sojourning in Japan, called upon the writer of this note and begged him to perform a service of international importance. The service was to accompany the poet and journalist to the Imperial Hotel, in the immediate neighbourhood of which Marquis Ito happened to be staying, and to procure for the poet and journalist an interview with the statesman, inasmuch as the former had matter of vital moment to communicate to the latter. This request having been complied with, Marquis Ito was induced to repair to the Hotel, and there the poet and journalist, after due preliminaries, propounded his intelli-gence. It was that, according to information in his possession, the Government of Lisbon, finding itself in very straitened financial circumstances, would probably, nay almost certainly, be willing and pleased to part with Macao for a substantial consideration. Thus a unique opportunity presented itself. Japan, profiting by this timely news, of which she thus obtained a monopoly, might come into possession of an invaluable pied à terre in southern China, and might soon establish there a tradal entrepot which would rival, if not surpass, Hongkong. Marquis Ito listen-ed quietly. Beyond occupying himself rather busily with his beard, he betrayed no sign of suppressed emotion. But when the poet and journalist had fully expounded his epoch-making programme there flitted across the statesmen's countenance just the reflection of a smile. His courtesy, illimitable as Japanese courtesy is, barely sufficed to control his amusement. So much gratitude was due, so much appreciation felt, for the thought and the trouble of the distinguished visitor, but unfortunately an ob-stacle stood in the way: Portugal was solemnly bound by treaty with China not to alienate Macao under any circumstances. The Japanese statesman gave no hint as to his own mental attitude towards the illu-minating project. But neither did he hesitate for one instant to expose its utter impracticability. The career of every great man includes chequered experiences. It need not be doubted that during his arduous climb to the elevation on which he then stood, the poet and journalist had tasted much of the bitter as well as of the sweet. Nevertheless his experiences had not endowed him with induration of integument sufficient to hide every trace of suffering in the pre-sence of a great disappointment. His selfesteem was wounded even more, perhaps, than his hopes were dashed. For had he not taken all these steps, had he not, by very exceptional contrivance, secured an interview with Japan's leading statesman at a very exceptional hour to submit a proposition which rested on his own very exceptional ignorance and to see it tumble into shattered ruins at one touch of the statesman's superior intelligence. Ito saw the pain and did what he could to alleviate it. He diverted the subject. He talked of this and of that: of the weather; of the poet's approaching departure and so on. But it may be doubted whether even The Nippon Yusen Kaisha has re-named the Marquis gauged the potency of the vis the Marquis gauged the potency of the vis mediatrix naturae that waited to repair the breach in the poet's self-esteem. Some years were needed indeed for the healing influence to achieve its work. It did achieve it, however. As time went by the true outlines of the incident grew fainter and fainter in the poet's mind, until at last there

arose in their irksome place a bright image of what might have been, and this image became so comfortably real that at last he had the courage to dress it in the perilous raiment of the litera scripta and to submit it for public inspection. Here is the form it took :-

took:—

That night again in Tokyo I had the honour of listening to him upon whom so much still depended, and was glad to find his first and last thought was to render Japan powerful enough to save herself, whatever might befall. I should not, of course, dream of repeating here any of the weighty things he uttered, since they were all heard in private conversation: yet I may be allowed to mention an instance of his alert habit of mind and swiftness of action. I had spoken of a group of islands eligible to possess, and as I had gathered not by any means out of reach of Japan's ownership if she wanted them. Without directly replying he took a swift note in Japanese, despatched a messenger to the telephone, and returned quietly to the little pipe. I saw the message afterwards; the sense of it was, "Send immediately full particulars with map and latest commercial particular report of—" well. No Man's Land. Not long afterwards I had occasion to find that he knew more about the spot in question than anythody and the white and red flag with and red the white and red flag with and red flag with and red the white and red flag with and red flag and Land. Not long afterwards I had occasion to find that he knew more about the spot in question than anybody, and the white and red flag of Japan floats over it now.

SIR ROBERT HART'S PROGRAMME OF FINANCIAL REFORM.

Sir Robert Hart's programme of financial reform, to which we have already alluded, is given as follows in our Chinese exchanges:

I.—A reformed system of tax collection should be inaugurated in one district only in one province, and if found workable extended by degrees to the neighbouring districts and provinces, as if an attempt be made to start it in all the pro-vinces simultaneously a lack of uniformity and some confusion means early. some confusion must result.

vinces simultaneously a lack of uniformity and some confusion must result.

—When a district has been selected for experiment the Government should appoint 10 intelligent and reliable officials to assist the Magistrate of the said district, and these officials can then be drafted to other districts later on so as to carry on the work with uniformity.

—The Magistrate of the selected district must issue proclamations requiring all land owners to send in full particulars of their properties and plans of the same for registration within a certain period, each property being divided into 4 equal sections for convenience of inspection.

—The Magistrate in order to save the people annoyance need not make an official survey of these properties, but he should caution land owners that any attempt to misrepresent the measurement or value of the same will be severely punished.

—When all properties are duly registered the Magistrate should grant a certificate to the owners, and require the taxes to be duly paid on the 1st of the 4th Moon every year, at the rate of 200 cash per mu, a complete record being kept of all certificates so issued.

the 1st of the 4th Moon every year, at the rate of 200 cash per mu, a complete record being kept of all certificates so issued.

The issue of these notifications and the registration of the lands above referred to should take place within 3 months of the new system being inaugurated, and when this is completed the 10 officials who have been engaged on the work should be drafted to other districts in the same Prefecture to perform similar duties in new districts, and 10 other officials be taken on to serve their apprenticeship in their turn.

districts, and to other officials be taken on to serve their apprenticeship in their turn.—At the end of the second 3 months these other 10 officials will, in their turn be drafted out, and so at the end of nine months all the districts in one province should be in working order.—When all the returns are duly obtained each Magistrate should prepare a complete list of the lands taxable in each district and the amount due on same for the information of the Prefects who should in turn present them to the Viceroys and Governors to forward to the Board of Revenue.

and Governors to forward to the Board of Revenue.

In the event of any owners desiring to sell their registered lands the vendors and purchasers should both apply to the Magistrate in person and have their certificates altered and the land registered afresh.

might attempt a squeeze when the landowners go to pay the required tax of 200 cash per mu, the Magistrate should be on his guard against this and punish all such proceedings with the tunnest rigour of the law.

At the end of the first year when the reformation of one province has been completed the officials familiar with the work can be drafted to the neighbouring provinces, the same system repeated throughout the Empire, and by the end of three years it should in this way be possible to have the system operating in all eighteen provinces.

These regulations are only provisional and further details require to be drawn up to suit boal conditions in each province.

These regulations are only provisional and further details require to be drawn up to suit boal conditions in each province.

These regulations are only provisional and further details require to be drawn up to suit boal conditions in each province.

These regulations are only provisional and further details require to be drawn up to suit boal conditions in each province.

The easiest and surest method of carrying the system out is to hold the various Viceroys and Governors responsible to the Board of Revenue. and every year certain reliable officials should be dispatched to certain districts to inspect the papers, certificates and accounts, and if this is done properly Tis. 400,000,000 annually should be collected.

WAR NOTES.

Saturday, April 9.

It is noted by Japanese journals that all the sons of the late Marquis Saigo are serving at the front, two in the Army and two in the Navy

Professor Holland, of Oxford Univer-sity, has addressed to Professor Takahashi of the Imperial University, a letter strongly eulogising Japan's diplomatic procedure in all the preliminary stages of the present crisis, and expressing much applause with regard to the initial operations of the war.

Wednesday, April 13.

A wealthy Chinese contractor undertook, at the beginning of the year-old style, that things. Whatever successes the Russians is to say February-to build a branch line achieved, they did not succeed in holding from Liaoyaug to Fenghwang. He has already completed the bed of the line through a distance of 35 Chinese li (12 miles, approximately).

It is alleged that the Russians at New-

chwang have issued a proclamation promising a reward of 100 roubles to any one

capturing a Japanese subject.

The Russian Government has ordered two flat-bottomed tugs from the yards of John Cockerill (Ltd.), near Liége, for service on the Shilka, a tributary of the Amur. There are now 41 river steamers and 29 barges, constructed by this firm, on the Amur and cemetery other Siberian rivers. The latest order, Genera other Siberian rivers. The latest order, though of secondary importance, is considered significant of Russia's future inten-

The St. Petersburg correspondent of the misappropriate a part of the funds passing through their hands. The correspondent declares that the corruption has been responsible for the succession of defeats Russia has suffered. He asserts the official assurances that there were coal and provisions enough at Port Arthur to enable that place to withstand a two years' siege were untrue.

Les peries de l'ennemi sont enormes; on a pu voir un grand nombre de cavaliers et de chevaux tomber sous notre feu.

Nous avons eu quatre officiers et douze cosaques Nous avons ett quarre omness et come and blesses et trois cosaques tués.
(Signé) Major-général FLOUG général quartermeister.

The conflict between this account and that of the Japanese is very striking. · According to the latter it was the Russians that occu-pied Chonju whence they were driven by the Japanese. Moreover, the Japanese losses were 3 killed and 10 wounded. If such numbers justify the adjective "enormous" we want a new dictionary. In fact the Japanese suffered less than the Russians, for the latter, even according to General Floug's account, had 3 killed and 16 wounded. In the matter of horses the Japanese casualties were I killed and 7 wounded, but we have no record of the number of animals lost by the Cossacks. General Floug and General Dessino are certainly distinguishing themselves as purveyors of news. But facts are stubborn He has any part of Korea.

> Thursday, April 14.
> The funeral of Commander Hirose took place on Wednesday. At 2 p.m. the cortege left the Naval Club in Tsukiji. There was guard of honour consisting of 450 bluejackets with 12 officers, and altogether the dimensions of the ceremony approximated very closely to those of a state funeral. The Emperor conferred on the deceased the Fourth Class Order of the Rising Sun, the day before the burial. Aoyama was the

General Dessino now professes to have received a letter from Mukden dated 11 a.m. on the 29th of March, to the effect that the Russian boats succeeded in sinking the four Japanese blocking steamers at a London Express mails a long story of official long distance from their intended berths, corruption in Russia. He instances distance from their intended berths, honesty at dockyards, and says money tions, they were all new steamers, constructallowed for military and naval stores has ed for the purpose, each over 2,000 tons. been pocketed. The officials all around The dictionary will soon have to include a Dessino " among current terms.

Tokyo newspapers say that the officers commanding the various sections of the Russian forces are:

At Yingkow (Newchwang), Lieut.-General Saharow. At Fenghwan-teng, Lieut-General Stoessel, At Lianyang, Lieut-General Linevitch. At Port Arthur, Lieut.-General Sumilnow

sights, which is the first recorded instance of such a performance. But we may pre-sume something else, namely, that the story is a Pflug-Dessino canard. Neverstory is a ring-Dessino canard. Nevertheless it may have some truth. The statements officially published in Tokyo on the 13th instant concerning two minor affairs on the Yalu, related to the 10th and the 12th, whereas the Pflug-Dessino story refers to the 7th. Perhaps the Cossacks did open fire on Japanese boats, but had they effected any slaughter such as they claim, or indeed any slaughter at all, the Japanese Authorities would certainly not conceal the

—and it is evident that if this source of supply as well as the usual imports of bean-cake from Newchwang be interrupted, Japanese farmers must be greatly inconvenienced. The Japanese have now 99 fishing stations against 78 Russian, and the Japanese companies are 30, giving employment to 3,931 men, whereas the Russian companies are only 22, employing 3,25t hands. pressure is being brought on the Government by the fisher-folk of Hokkaido to do one of two things; namely, either to take military possession of the island and throw it open to Japanese fishing enterprise, or to allow the Hokkaido men to organise such arrangements as shall insure them against Russian interruption-to organise armed fisheries, in short.

CANCER: A MEDICAL MYSTERY.

If one-half of the so-called "cures" for cancer reported in the last twelve months were at all efficacious, mankind would soon be rid of one of the most fatal ills that flesh is heir to. Unfortunately no such belief can be entertained in view of the remarkable statement made by Dr. Herbert Snow, senior surgeon at the Cancer Hospital, Bromptonroad, before the council of the hospital. Dr. Snow claimed that in the Cancer Hospital the disease has been studied as it has never been elsewhere in the world :-

I would point to a pathological discovery of some significance, the fruit of long and elaborate research—namely, routine infection of the bone-marrow by manmary carcinoma. If not of the first order, it may not unreasonably be claimed as the most important of the last fifty years in regard to cancer. Then, again, numerous surgical operations for the cure or relief of malignant disease have either originated or have been mainly perfected here. Lastly, the particular drug-treatment, whereby we commonly succeed in arresting the course of cancer. commonly succeed in arresting the course of cancer, often in a material degree, has been here formulated

By every means in their power they had sought to establish a genuine and precise cancer science as a sure foundation for all anxiety to fortify the bay. future research, but

In this attempt we have failed utterly and miserably. And now on all hands we find schemes of cancer research, including one under most august patronage, and our own, in the able hands of Mr. Primmer, not the least promising.

Dr. Snow held, indeed, that no real success could be chronicled till "some step is taken to clear away all the traditional lumber of past centuries":—

Iumber of past centuries":—

On the very threshold of the subject we have to note that "cancer" is not one but many diseases, including as it does ten general and thirteen species. Each variety is established by a different cause, or chain of causes, all of which have been formulated in our published works. Each probably requires a separate line of research. Each shows some important clinical phenomenon widely differing from those presented by the rest. I have long thought that proper scientific investigation of the physiological reasons for these remarkable diversities would assuredly far advance our practical knowledge of cancer, and might even lead up eventually to the ideal non-surgical cure. But I hear no rumour of any such contemplated investigation, and feel far from sufe that the attention of those gentlemen who are specially engaged in the work has even been directed to these peculiar phenomena. At present all are groping in the dark—or little more. Until this preliminary step is taken, and each cancer variety is clearly differentiated from the rest, there can be no real progress. All will continue to revolve, as heretofore, in my vicious circle.

Dr. Snow holds that a world's congress

Dr. Snow holds that a world's congress on cancer—or some equivalent measure for ing that whereas the law of siege was in on its enterprise and commend the "Supple-procuring a universally recognised classification force at the place, and whereas, consequently." procuring a universally recognised classifica- force at the place, and whereas, consequently.

VLADIVOSTOCK.

Monday, April 11. It is expected that the ice at Vladivostock will break up about the 26th or 27th of this month. We can not wonder that such a port fails to satisfy Russian ambition. It seems hard that some pacific arrangement can not be made affording to the Russians the maritime outlet they naturally crave for. But the truth is that Russia has never conneighbour.

It is now evident that our conjecture was right as to the point from which the Japansquadron bombarded Vladivostock on the 6th of March. A little to the north of Cape Basarghin there is a small bight call-ed Soboru Bay, from which the town and harbour can be reached by high-angle fire at a range of from 3 to 4 miles. This bay is completely masked from all the batteries on the northern shore of the Bosporus strait, but it should not by any means be masked from those on the southern shore. It was in Soboru Bay that Admiral Kamimura placed his vessels, probably at a distance of nearly two miles from the shore, for we know that the whole coast had a frame of thick ice extending to about that distance seaward. Why the batteries on the south of the strait failed to make, or refrained from making, any reply to the Japanese fire, there is still no satisfactory explanation. But the Vladivostock journal now states that to guard against the recurrence of such incidents a powerfully armed battery has been built and armed on the shore of Soboru Bay. Our contemporary speaks of the work as though it had engrossed the attention of the garrison, and adds that even the women showed their patriotism by toiling to manufacture bags to form the revetments. A collateral reflection suggested by this story is that the strenuous denials which were made at the time as to the injury wrought by the bombardment can scarcely be reconciled with all this eagerness and

The Novoe Krai of the 26th of March says that much distress has been caused at Vladivostock in connexion with sales of property under judicial decisions. A great part of the mercantile population having taken its departure, there can be no purchasers of such property and it is bought in by speculators at merely nominal figures. In these circumstances the authorities have been asked to suspend the enforcement of such sales so long as the law of siege is in operation, and their decision is said to be anxiously

Possiet Bay has acquired special importance in Russian eyes as a point of concentration for forces destined to oppose any advance by a Japanese army across the Tumen towards Vladivostock. The troops said (Asahi Shimbun) to be assembled there at present total 6,450 of all arms, namely :-Two regiments of the East Siberia Rifles 4,000

Two batteries of field artillery
One battery of mountain artillery
One battery of gatrison artillery One detachment of torpedo troops......

Thursday, April 14.
The Government of Vladivostock issued on the 2nd of March a proclamation declartion and tabulation of facts—is the one thing the presence of any Japanese subjects could needful. Till then the best efforts must not be permitted, it appeared that certain come to naught, and "cancer will remain Japanese subjects were still residing secretly the Darkest Africa in the map of Medicine." in the town, being disguised as Chinese

subjects and harboured by the latter. Any Chinese who failed to gave information of such doings or to apprehend any Japanese thus concealed, were informed by the Governor that they would be handed over to a court martial, to be dealt with according to the utmost rigour of the law.

Statistics just published give the popula-tion in Russia's Maritime Province at the close of 1901. There were, it appears, 240,000 Russians and 420,000 foreigners of fined herself to using an opportunity: she all nationals. Of pure Russians the total always abuses it. No one wants her for a was 185,500, and of natives there were 38,000. The naturalized Koreans totalled 16,500, and the Chinese aggregated 25,000, constituting the great bulk of the foreign population. The Koreans stood next on the list, 12,000, and the Japanese were represented by 3,300. There were only 700 foreigners of European or American blood.

> THE "KOBE HERALD'S" "ILLUSTRATED WAR SUPPLEMENT."

It is a distinguishing feature of the Russo-Japanese war that although the struggle is still in its early stages, quite a mass of comparatively permanent literature has already been published with reference to its progress. By comparatively permanent literature we mean magazines and periodical devoted solely to recording the events of the conflict and compiled from maturer sources of information that those accessible to the daily newspaper. Among these publications we note one which, to much attractiveness of form, adds the advantage of being prepared with judgment and care. It is from the office of the Kobe Herald, and apparently the editor of that journal interested himself specially in the compilation as he writes the preface and evidently accepts responsibility for the matter. The typo-graphy and general get-up are attractive and there are several photographs of much interest. As for the contents they make a very long list. Among them is nearly all the official correspondence relating to the war—which in itself, when thus assembled, constitutes a valuable historical asset—and we need scarcely say that accounts are added of the various belligerent operations; accounts which, with the exception of that referring to the Chemulpo fight, necessarily leave a great deal to be desired inasmuch as the acts of war up to the present time have taken place outside the observation of expert correspondents. Criticism is therefore silenced, and we can only say that this "Supplement" of the Kobe journal seems to embody the best available reports. Were it permit-ted, however, to discuss the "Supplement's" estimate of the number of Japanese troops landed in Korea up to March 3rd, we should dissent emphatically from that estimate, and we most distinctly that Russia, at the same date, had between 60,000 and 75,000 men in Korea, "50,000 of them being on the north-east coast with orders to move southward in two separate columns." It is doubtful, we think, whether Russia has had as many as even one tenth of that number in the regions south of the Tunien, and if she put ten thousand across the Yalu it was probably the outside. But these are minor matters. Future information will furnish corrections. Meanwhile we congratulate the Kobe Herald

M. MOURAWIEFF ON THE WAR.

The Japanese public have only just now seen any verbatim reproduction of the remarks made by M. Mourawieff, President of for it assiduously with conviction and fer-the Permanent Court of Arbitration of the vour"; a blind admirer of his country, he Hague, when delivering judgment in the Vene-zuela case; namely, the remarks animadvert-surdity of pretending that Russia "had been ing on Japan's conduct in opening the present These are the President's words:-

ing on Japan's conduct in opening the present war. These are the President's words:—

Obviously, it is neither the time nor the place for oblitics and we will not treat of politics, but may I say only a few words before closing this grand manifestation of the conciliatory spirit of nations, and give expression to a few personal considerations on the subject of recent events, which have alsa so unfavourably changed the circumstances under which we first met within these hospitable walls. We began our labours in the midst of a more or less peaceful situation; we finish our task to the sinister sound of arms. Thus it is willed by the implacable law of history, or rather by the flagrant imperfection of the conditions which confine human nature, too often hindered in its laborious progress towards light and right. We aspire to peace with all the strength of our soul and labour for it assiduously with conviction and fervour—and, nevertheless, we are not safe from a hostile challenge, from an unexpected attack. We sincerely desire the maintenance of peace—and we are forced to accept courageously a war of legitimate self-defence." Men are permitted to divest themselves of all discernment where is no excuse for M. Mourawieff as President of the Permanent Court of Arbitrasion. Neither the passion nor the prejudice of patriotism can extenuate the breach of the Permanent Court of Arbitrasion. Neither the passion nor the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the breach of the Permanent Court of Arbitrasion. Neither the passion nor the prejudice of patriotism can extenuate the breach of the Permanent Court of Arbitrasion. Neither the passion nor the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the breach of the prejudice of patriotism can extenuate the brea

It is not possible to form a very high estimate of the ideas of "light and right" that animate a jurisconsult who flagrantly abuses a position of trust as M. Mourawieff did 'on the above occasion. He can not have laboured under the least misconception as to the gross impropriety of which he was on the west opened fire and discharged some guilty when, from his place as chief judge of twenty 8-inch and 6-inch shell, but the a tribunal empanelled to consider the Vene-report does not state what damage, if any, zuela claims, he unjustly and unrighteously these projectlies inflicted. At the same time went far out of his way to drag in the questime hundred Russian troops opened fire tion of his own country and Japan; a question having not the remotest concern for the river, and killed 2 of them, wounding 5. the tribunal; and when, being entrusted with the immeasurably responsible duty of presiding over a Court supposed to offer for the admiring inspection of the whole world an example of the calmest and most unbiassed administration of justice, he dishonestly utilized the occasion in the selfish interests of a belligerent State. There can never again be the slightest confidence in the decisions of the Hague Permanent Court so long as M. Mourawieff presides over it. He has deliberately disgraced and discredited a tribunal which, with the consciousness of his own injustice, untruth and unreason staring him in the face, he had nevertheless the sublime in the race, he had nevertheless the subline assurance to describe as "a rampart of justice, of truth and of reason." We charge M. Mourawieff of "untruth" with full deliberation, for having set out with an avowal that, it being "neither the time nor the place for politics," he "would not treat of politics," he then at once proceeded to

nations-that he could honestly describe this Russia as "laboriously progressing towards light and right," as "aspiring to peace with all the strength of her soul and labouring forced to accept courageously a war of legi-timate self-defence." Men are permitted to

with a panic on the night of the 10th. rumour spread at mid-night that the Japanese were coming. It seems to have been caused by the sight of certain lights which a pilot-boat was showing to indicate the route for two steamers leaving the port. The forts on a boat full of Chinamen that was crossing

MURAVIEFF'S STATEMENTS IN THE HAGUE TRIBUNAL: JAPAN PROTESTS.

The following State paper has been published by the Imperial Japanese Foreign Office:

ed by the Imperial Japanese Foreign Office:
The case relating to the settlement of the claims of Great Britain, Germany, Italy and other Powers; against Venezuala, was by agreement of Great Britain, Germany and Italy submitted to the arbitration of the Hague International Arbitration Tribunal.
The Russian Emperor in compliance with the request of those three Powers, named as Arbitrators Mr. N. V. Mourawieff, Secretary of State and Minister for Justice of Russia: M. H. Lanmasch, member of the Upper House of the Austrian Parliament and Professor of Criminal and International Law at the University of Vienna; and Dr. F. De Martens, Permanent Member of the Council of the Russian Ministry of Foreign Affairs.

of our Country. In this painful conflict of heart and duty there remains one supreme consolation; warm and absolute faith in the just Providence of peoples and of battles who will know how to distinguish between valid rights and ambitious pretensions, between calm resolution and immoveable constancy on the one hand and warlike zeal and passionate ardour on the other. But when the tempest, which throws the two currents, European and Asiatic, into such violent collision, shall at last have passed—and every thing passes in this world—then, we religiously believe the thick clouds which have darkened our horizon will be scattered and a beneficent calm will appear again; and make the blessings, for a moment forgotten, of peaceful development shine more brightly than ever."

In view of the well known fact that the International Tribunal of Arbitration at the Hague is a sacred Court where cases of international disputo receive just and impartial examination without the indulgence in any personal feeling, the action of its President who abused his official position for the purpose of giving vent to his personal feelings cannot be too severely deprecated.

Consequently, on Feb. 26th the Imperial Government instructed the Japanese Minister to the Court of the Netherlands to lodge a protest in the following sense:—

"The undersigned, Envoy Extraordinary and of our Country. In this painful conflict of heart and

"The undersigned, Envoy Extraordinary and Minister Plenipotentiary of His Majesty the Emperor of Japan, has the honour, in pursuance of instructions from his Government, to address to His Excellency the Minister for Foreign Affairs of Her Majesty the Queen of the Netherlands, in his capacity as President of the Administrative Council of the Permanent Court of Arbitration, the following com-

munication: —

"Heing convinced that the Permanent Court of Arbitration cannot properly be made use of, for the Arbitration cannot properly be made use of, for the purpose of attacking the actions, motive or good name of any Power signatory of the Hague Convention of the 29th July, 1899, the Imperial Government of Japan, in defence of their honour and dignity and to prevent the wrongful and unseemly use of that high Coart, formally and seriously protest against the disparaging remarks concerning Japan, which were made by the President of the Tribunal, organized under the Protocols of Washington of May 7th, 1903, at the meeting of the 22nd instant.

"The Imperial Government request that their protest may be placed on the records of the Permanent Court of Arbitration and that it may be given the same range of publicity as the utterances which have called it forth."

THE FIRST WAR CORRESPONDENT.

Probably, says the Westminster, the first war correspondent was Henry Crabb Robinson, who in January 1807 received a pro-posal from Mr. Walter that he should take up his residence at Altona and become the Times correspondent as long as the Napoleonic campaign in that neighbourhood had any interest to English politicians. He was to receive from the editor of the Hamburger Correspondentum all the public documents at his disposal and was to have also the benefit of a mass of information of which the restraints of the German press did not permit the editor to avail himself. The engagement made of Robinson " for the first time a man of business." " How I executed my task," he remarks in his well-known Diary, "may be seen by a file of the *Times.*" His reports "from the banks of the Elbe," of which the first was dated in March and the last in the August, had reference to the "hopes and fears and reports which ended in the fall of Dantzic, the battle of Friedland, and the Treaty of Tilsit." The naval coalition against England which rendered it necessary to send Lord Cathcart to M: Mourawieff of "untruth" with full deliberation, for having set out with an avowal that, it being "neither the time nor the place for politics," he "would not treat of politics," he then at once proceeded to treat of politics in the most unblushing manner. A fervid patriot, passion and prejudice may have so completely obscured his intelligence that he could honestly describe Russia—Russia the monster aggressor of the age, the deliberate violator of international covenants, the wholesale ignorer of the rights of other Copenhagen to secure the Danish fleet was

prising editors" to bribe clerks in the foreign department of the Post Office to supply them in advance with the principal contents of the Continental newspapers translated into the English language for a weekly or annual

SIR JOHN TENNIEL.

Sir John Tenniel, the great cartoonist, has just celebrated his eighty-fourth birthday. It is curious to read in a London journal that he was by no means enamoured of the prospect of being a Punch artist when Mark Lemon first made overtures to him. He was rather indignant than otherwise, as his line was "High Art." "Do they suppose," he once asked a friend, "that there is anything funny about me?" Little did he realise at the time against what a kindly destiny he was struggling. In the beginning, of course, Tenniel had only small things to do-initials, tailpieces, and the like. Then in time he took over from Leech—who was by no means loth to relinquish it, by the way—the "big cut" of the week, and thenceforward it was entrusted on the rarest occasions only to any other hand. Tenniel's record in this respect, indeed, is certainly unique. Altogether, he designed over 2,000 full-page cartoons for *Punch*. It may not be generally known that one of Tenniel's admirers was John Ruskin. He compared him even to Tintoret, which was praise indeed from Ruskin. "Tenniel," he said, "has much of the largeness and symbolic mystery of imagination which belonged to the great leaders of classic art; in the shadowy masses and sweep of line of his great compositions there are tendencies which might have won his adoption into the school of Tintoret." Personally Tenniel is the most genial and lovable of men with a host of interests outside his art. In his day he was an excellent boxer and an expert swordsman, likewise a capital shot and no mean oarsman, while the splendid health which he has enjoyed throughout his life he often ascribed to his love of saddle-back exercise, which in earlier days took him not unfrequently to the hunting field. In addition, he used to be a capital after-dinner speaker and took part in private theatricals with Dickens.

NOTES ON CURRENT EVENTS.

His Excellency Sir Claude MacDonald, G.C.M.G., K.C.B., entertained the following distinguished guests to dinner at the British Legation on the 6th instant: -His Excellency Marquis Sir Hirobumi Ito, His Excellency Marshal Marquis Oyama, His Excellency Count Katsura, His Excellency Count Sir Masayoshi Matsugata, His Excellency Major-General Viscount Tanaka, His Excellency Baron Komura, His Excellency Lt.-General Terauchi, His Excellency Count Inouye, Admiral Viscount Ito, Lt.-General Kodama, Baron Sannomiya, Rear Admiral Saito, Major General Ishimoto, Rear Admiral Sir G. Ijuin, Major General Sir Y. Fukushima,

friends into my confidence." Before that time the details are published in Tokyo. The most esteemed residents, Mr. and Mrs. it appears to have been the practice of enter- total sum obtainable under the Budget is James Dodds. Mr. Dodds has passed some said to be 134,377,106 roubles, of which 18,000,000 roubles, approximately, represent last year's surplus and 115,498,366 roubles are from reductions effected in this year's expenditures. These reductions are mainly in the items of railway extension and works at Port Arthur and Vladivostock. Ordinary outlays are diminished by 16,000,000 roubles, being 3 per cent. of the total appropriations in this section, and the reductions in ordinary and extraordinary expenditures make 5 per cent. of the whole Budget, which, nevertheless, exceeds the Budget of last year by 26,000,000 roubles. The great economy is in extraordinary expenditures, namely 55,000,000 roubles, or $\frac{26}{100}$ of the total under that heading.

> The Shogyo Shimpo publishes detailed figures showing the number of ships employed as Government transports and their tonnage. We are surprised that our contemporary should insert the figures, the publication of such matter being explicitly opposed to the regulations now in force, and of course it is not possible for us to follow the example. We confine ourselves to noting that great inconvenience is said to be felt by shippers of goods. Cargo which would be transported from Niigata to Hakodate for 57 yen in the beginning of February, called for an expenditure of 90 yen on the 20th of that month, and now costs 100 yen, while in the case of Niigata and Otaru the rate has risen from 57 yen to 120 yen.

> Japanese. The figures for the latter are :

We find the following in the North-China Daily News from its Wei-hai-wei correspondent .-

pondent.—
The establishment of wireless telegraphy here by a newspaper is not unlikely to raise an important question of international law, and the rights of neutral Powers. A British vessel, chartered by a war correspondent, by means of a wireless telegraph station on British territory, is used to inform the whole world of important military and naval movements of one belligerent, which the said belligerent might desire should not be revealed to his enemy. War correspondents, following the movements of an army on land, have their messages rigorously censored. Little control—if any—can be exercised by either belligerent over a correspondent, who transmits news from a neutral vessel via neutral territory. news from a neutral vessel via neutral territory.

This reference is necessarily to The Times that being the only journal which has made arrangements for wireless telegraphy for the purpose of transmitting news from the front. We are in a position to say, therefore, that our Shanghai contemporary's correspondent is misinformed. The British vessel of which he speaks and all messages transmitted by her are as fully subject to Japanese censorship as is the matter sent over ordinary routes by duly accredited correspondents in general. It is, indeed, an absolutely inviolable condition of the employment of this vessel that no communication of any kind shall be made through her instrumentality without previous examination and sauction by Lt.-General Sir W. Nicholson, Lt.-General the regularly appointed censors. We judge Sir Ian Hamilton, Mr. Geo. Barclay, Colonel that the Shanghai journal's Wei-hai-wei cor-Crowder, U.S.A., Colonel Haldane, Lt. respondent is not a British subject since he Colonel Hume, Colonel Wood, Captain plainly seeks to attribute to British action Marsh, Captain Kuhn, Captain Thacker, the licence of which he complains. But Captain Morrison, Mr. Melton Prior, and whatever his nationality his mistake is

30 years in this settlement. He has been in every sense the best type of public man and private friend, and it is with infinite regret that we witness his final departure from our midst. Of Mrs. Dodds we need only say that her sunny presence will be as much missed in social circles as the loss of her untiring ministrations will be felt by every charitable and benevolent cause. is when farewell has to be said to such dear friends that Japan re-assumes its character as a land of exile, and the longing becomes intense to return to a country where life is not wrenched by these painful partings. Ave atque Vale; the words are soon said, but their mournful echo will long be present in our hearts.

The Government has issued an Imperial Ordinance (No. 104), under date of the 8th instant, declaring that from the 10th instant Wakamatsu in Chikuzen (Fukuoka Prefecture) shall be an open port for the export of of coal and iron products, and for the importation of raw iron.

The Naval Department has been for some time in treaty for the acquisition of a coal mine at Minemura in Nagato province. It appears that the product of this mine can be prepared in bricks so as to equal the smokeless coal of Cardiff, and instead of paying 25 yen a ton for the latter, the Navy would have as good a home product for 10 yen delivered at Yokosuka or Kure. The production of the mine is estimated at 100,000 There has been a slight fall—from 95 1/8 tons yearly. At present the place belongs to 94 1/4—in Russian securities, and a rise in to a company with a capital of half a million tons yearly. At present the place belongs yen, 250,000 yen of which is paid up. The company has long been seeking to sell the property to the Naval Department, and seems now likely to accept the latter's offer of 200,000 yen. We learn that the whole transaction has been conducted with the approval of the Cabinet, and that in order to fully utilize the mine, the Sanyo Railway would have to construct a short connecting branch, which work it is willing to undertake under a State guarantee of 6 per cent. on capital involved. Our readers will not be unprepared to learn that this affair has inspired the usual suggestions of jobbery in the columns of Tokyo's scandalmongering journals.

> Speaking at a meeting of the Nippon Club held to welcome his return, Marquis Ito insisted that his mission to Korea had no political significance, being intended merely to convey to the Sovereign of that country an expression of the Japanese Emperor's good-will. So long as the Korean Sovereign did not depart from his present professed reliance on the views of the Emperor of Japan, it would be possible to feel assured as to Korean affairs. His Majesty asked Marquis Ito to remain in Korea for the purpose of giving counsel; and if that were not possible, then to return thither from time to time; or, if that might not be, then at any rate to select trustworthy men and send them in the capacity of advisers. He also asked the Marquis to give some indications of the route that Korean reforms should take, but Marquis Ito replied that he was not prepared with an immediate reply.

Marquis Tokudaiji is said to have submit-Marsh, Captain Kuhn, Captain Thacker, the licence of which he complains. But Captain Morrison, Mr. Melton Prior, and Whatever his nationality his mistake is gregious.

Reuter has forwarded the outlines of the Russian financial plan. Some facts as to good-bye to two of this country's oldest and some months ago, but the Emperor directed

There can be no doubt now that Mr. William Randolph Hearst is seriously attempting to obtain the Democratic nomination at St. Louis. Of course the papers which he controls hail him as the most fit and proper personage to fill the chair now so ably occupied by President Roosevelt. The Observer, of Watertown, N.J., says :-

Mr. Henset is a man who has come into prominence within the last few years, and has become most popular with the masses of the people by the manner in which he, a wealthy man, battles for the rights of the people, not only in his own country, but for those of foreign lands as well. He has proved himse fone of the most progressive young Democrats of the nation, and a man whose faith in the Democratic party can not be tempted or shaken.

The labour leadage are said to be unergo in.

The labour leaders are said to be warm in his support and the Hearst syndicate of papers publish interviews daily in which are given expressions of approval by labour organizers. But the Democratic press outside Hearst's influence is not at all content. The Chronicle of Augusta concludes an outspoken article thus :- "William Randolph spoken article thus:—"William Randolph Hearst for president! In heaven's name, has the Democratic party come to that?" As for jibes at Mr. Hearst's expense, they are in great plenty. The Nashville American (Dem.), for one, has formed his cabinet somewhat after this order: "Secre-American (Dem.), for one, has formed his cabinet somewhat after this order: "Secretary of State, Mr. Hooligan; Secretary of War, Mr. E. Z. Mark; Secretary of the Treasury, Gloomy Gus; Postmastergeneral, Mr. Gaston; Secretary of Agrieulture, Mr. Jack; chief chambermaid at the White House, Mrs. Katzenjammer.

The department of commerce is still open."

States now turned robber; materially, through a grandly extended connerce.

States now turned robber; materially, through a grandly extended connerce.

It is, therefore, manterially, through a grandly extended connerce.

Britain, the United States, and all other nations who would have world-wide peace and world-wide comstant wars, and closed doors, to see to it that Japan and her neighbors are given a fair chance to work out their own salvation in their own way, entirely free from interested meddlers, who are grossly ignorant of their characteristics and their needs. Let us have peace!

The department of commerce is still open." The department of commerce is still open. The Macon Telegraph (Dem.) suggests the Yellow Kid for the vacaut office. The Republican and Independent press are against Hearst, being almost united in the declaration that his candidacy is "an attack upon the integrity of the nation."

Japanese securities have taken an upward movement on the London market. The tals. quotations last received are :

4 per-cents. £63.
5 per-cents. £77 is. 6d.
War-bonds £78 r2s. id.

It has been finally decided that the Government shall buy for 200,000 yen the Minemura Coal Mine, which is the property of the Nagato Sekitan Kabushiki Kaisha, headed by Baron Shibusawa and Mr. Asano. The estimate is that, including the cost price, a total sum of 1,060,000 yen will be required to fully equip the mine and prepare the machinery for manufacturing smokeless coal-bricks. From the beginning of next year the mine will be able to supply fuel, and its output in the first year is expected to be from 30,000 to 40.000 tons. If the saving effected be 7 or 8 yen a ton, as compared with Cardiff coal, there should be a fine promany being taken by minseit. The various races; fit from the very outset, and when the mine of men to be met with in Pondoland, Natal, developes its full estimated capacity of Zuhland and the Transvaal were all touched upon, as were also the different varieties of senery to be met with in South Africa; the marriage custons of some tribes; the high spirits of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with their amazing the different varieties of the Zuhlarickshaw boys, with the different varieties of the Z

him to take abundant leisure for purposes

B. W., seems to recommend, in effect, that if Japan of recuperation.

Now, however, in view of the pressure of duties demanding his services, the Marquis is unwilling to absent himself any longer from his post and he has again solicited permission to retire.

There can be no doubt now that Mr. William Randolph Hearst is seriously at the future of Korea "; but he is wisely doubtful of an "immediate satisfactory arrangement" on these lines.

Apparently, he only suggests this plan from a natural (for an Occidental), but mistaken, belief that Japan must as a matter of course desire, as Russia, Germany; and France do, "to acquire territory upon the mainland," but, instead, Japan has voluntarily in advance explicitly bound herself not to do so, and, in addition, it contributes the interest of the contribute of

advance explicitly bound nerselt not to do so, and, in addition, it is not in her interest so to do.

Her aim is to save her own and her neighbours' lives as independent States by aiding all to advance in material civilization until they become strong enough unitedly to fend off the robber nations and so secure peace and prosperity. To effect this Japan knows it is test that she and her neighbours should, instead of fullting or ourpressing each other, he even secure peace and prosperity. To effect this Japan knows it is best that she and her neighbours should, instead of fighting or oppressing each other, he even more friendly than, for example, the United States and Canada; so that the citizens of the three countries may be free to make each his career in the one where there is most need of him (as our country-men are now pouring across the border into the wheat fields), and collectively do the turnost possible of good for their own nations and to the world. For in an age when the Golden Rule seems to be forgotten, to thus have a great mass of peoples, perhaps a third of the whole human race, devoted as these are to the pursuits of peace and only reluctantly fighting in self-defence, must obviously be an immeasurable benefit to the world. The benefit morally would be through the wholesome rebuke to the robber nations that are trying to despoil China, and generally through the setting of an example of national highmindedness to replace the former emobiling influences of the United States now turned robber; materially, through a grandly extended commerce.

Morristown, N. J., February 29.

The North China Daily News prints the following translation of a telegram placed at its disposal by Major-General Dessino, Russian Military Agent :-

2nd we find the following letter:

Sir: In his interesting letter on "The Future in the Far East" (February 26) your correspondent, G. the close of his lecture, and the President in Communicated.

There are 702 Sunday schools, with 342 leachers and 5786 scholars, and there were raised for at soldiers and sailors of Great Britain are taking purposes, 12,824 yen.

The Ginza Publishing House reported:

Total sales for the year 37,738 yen, an increase of 9,256,—the Far East" (February 26) your correspondent, G. the close of his lecture, and the President in Communicated.

moving the formal vote of thanks, expressed the hope that the lecturer would appear before the Society in the autumn.

The musical programme was short but very enjoyable. Mrs. R. J. Ward played a Gavotte de la Reine by Feyre with her accustomed grace and skill; Mr. B. C. Foster sang * What does it matter," to the graceful accompaniment of Mrs. W. Kirkland Wilson; and Mr. Windett closed

W. Kirkland Wilson; and Mr. Windett closed with Lionel Monckton's breezy "What oh, little girls, ye ho."

At the next meeting of the Society—the last for the present season—Dr. N. Gordon Munro will give a lecture on "Modern Life in relation to Public Health;" while upon the President will fail the pleasing duty of announcing the names of the successful competitors, in the musical comthe successful competitors in the musical competition which was held in Van Schaick Hall on Saturday afternoon. Mrs Poole, Miss Men-delson, Miss Lloyd Thomas and Mr. W. Karl E. Vincent acted as the musical examiners.

THE METHODIST EFISCOPAL CHURCH IN JAPAN.

The General Conference of the Methodist Episcopal Church which meets once in four years and is the law-making body of that Church, will be held next month in the city of Los Angeles, Cal. This Conference is composed of an equal number of Ministerial and Jay delegates, abut yoo in all. The terence is composed of an equal number of Ministerial and hay delegates, abut 700 in all. The Church is made up of about 130 Annual Conferences, each of which is entitled to send a ministerial delegate to the General Conference, and an extra one for every addition of horty-five members. There are also an equal number of tay delegates, selected by a lay-electoral conference which is composed of one layman from each church within the bounds of the conference, and which meets at the same time and place as the annual conference. Probably no other boby in the world requires so many elections—one in each of the (nearly) 20,000 churches, to select the delegates to the lay-electoral conference; and then one in each of the 130 annual conferences, and the same number of lay-electoral conference was organized twenty years ago, and held its twenty-first session Mach 29—April 4, at Aovama, Tokyo. It extends as far south and west as Gifn, and has 63 members and 3 probationers who must complete a four years course of study allied to the course of study in a theological school.

The annual session just closed was memorable for several reasons:

several reasons:

It immediately followed a five days' session of the
Japan Central Conference which was composed of
the Japan Conference, the South Japan Mission
Conference, and the Woman's Conference connected with each of these.

with each of these.

In the second place it marked the close of the four years' work in Eastern Asia, to which the last General Conference had assigned Bishop More. He now returns to report his work to the General Conference, and to he assigned to his place of residence for another four years; and where that may be he can no more tell than can the men tell where they may go whom he will appoint to work in that time.

In the third place, the Conference sent a memorial of the coming General Conference, earnestly requesting that body to permit the Methodist Episcopal Church in Japan, to unite with the other Methodist bodies in forming an independent Japanese Methodist Church. There is great unanimity of feeling in regard to the desirability of such union; and that at longest, in the not far distant future such union will become an accomplished fact.

The Property for the work how the a great deal of

to represent them.

The reports for the year show that a great deal of hard work had been done. There were 528 adults and 79 children baptised. The total enrollement was reported to be: Probationers, 1803, Members 3369—only a small gain over the preceding year, owing to the law of the Church that if a member has been lost sight of for a year, "Removed without letter" shall be written opposite his name on the church register, and he shall no longer be counted among the members until his whereabouts shall have been discovered. One church had to write off fifty names in this way.

There are 102 Sunday schools, with 342 teachers, and 5786 scholars, and there were raised for all

purposes, 12,824 pen.
The Ginza Publishing House reported:
Total sales for the year 37,738 pen, an increase of

THE CAMPAIGN IN KOREA.

ALL accounts agree that the Japanese encountering any resistance, the Russians of February, could not have received any ly can if the Japanese confine themselves having withdrawn even their outposts immediate support and would have found to direct attack. But in spite of the and having evacuated not only that place but itself in the proverbial situation of a column immense difficulties of moving with any exalso Chhang-song, which lies 41 miles in space. It is certain that long before war tended front in a country like north-western higher up the river. There is some talk of broke out, and long before diplomatie rela- Korea, we can not doubt that the Japanese a skirmish having taken place at the latter tions were broken off, the Russians were will be careful not to paralyse their own town, but confirmation is wanting. It is preparing for an advance from Liaoyang to strength by going end on at such an obfurther alleged that north-eastern Korea has the Yalu, and there is apparently conclusive stacle as a big unbridged river commanded been evacuated, the enemy having with-evidence that the Cossacks began to by hostile batteries. The Russians may drawn from Kyong-song, his last point of move south from that river not later have a considerable legion of all arms on the occupation on the north-eastern coast.

VARIETY ENTERTAINMENT IN TOKYO.

This entertainment took place in the examina-tion hall of the High Commercial School of Tokyo at Kanda on the afternoon of the 9th instant. It proved a very beautiful affair and gave infinite pleasure to a large audience of Japanese Many little children took part in and foreigners. the pieces. They had been train ed with boundless care by the kind and accomplished ladies (the Misses von Fallot) to whose initiative and efforts the entertainment was due, and nothing could have been prettier or more finished than their performance. A number of young ladies also lent their services, and at times the stage presented a striking picture of sweet faces, graceful forms and bright costumes. Two numbers on the pro-gramme were glees, executed in faultless and highly pleasant style by male and female voices and vigorously applauded. Adaring novelty was introduced in the shape of a Japanese version of an English farce—the well known "Joint House-hold"—acted in Japanese by Miss Norahand Miss Margot von Fallot. Both the fair performers spoke the Japanese words as though to the manner born, and truly it were difficult to say which scored the greater success, she who frankly looked and played the part of an austere and sour housewife, or she that sustained without in any degree exaggerating the character of a light-hearted sunny young wife not less loveable in her artlessness than in her art. "Mrs. Jarley's Waxworks" kept the house in a ripple of laughter all the time they occupied the stage. One looked for a Little Nell to speak the descriptions, but instead Mrs. Jarley herself appeared in the guise of an American lady, Mrs. Wallace, to whose extraordinarily natural and realistic acting—though not until she left the stage did one remember that she had been acting at all—we should certainly be dis-posed to award one of the palms of the afternoon, and another to the wax-work young lady (Miss Schereshewsky) who could not be wound up sufficiently to get through "The Last Rose of Summer" without trailing off into a series of dismal and discordant squeaks which contrasted most quaintly with the melodi-ous notes that had preceded them. We trust that we do not violate propriety in mentioning names despite the anonymity of the programme, and that we may offer a special tribute of praise to the two ladies, Mrs. Purvis and Miss F. V. quisitely amusing but all too short version of the If Commander Sennes used such language peace of the world. They constitute so in sober truth we have never seen such little mites

much talent. Children's performances on the much talent. Children's performances on the stage are generally things to be tolerated by kindly folks and admired by fond parents only; but the ladies, specially Miss Hilda von Fallot, who organized and prepared last Saturday's pieces—and what a work it must have been though undertaken in the sweet cause of charity!—have the faculty of inspiring tiny lads and lasses to efforts genuinely pleasure-giving. This comment applies notably to the Welsh dance of Miss Stella MacDonald, the castanet dance of Miss Dorothy Barclay and Miss A. Swift, the tambourine dance of Miss Una Gubbins, and the singing and dancing of "Oh Miss, I'll give you a paper of pins" by Miss Miss, I'll give you a paper of pins" by Miss Barclay and Miss Wood. The last number with the exception of Kimi ga Yo-brought upon the stage a party of most dainty and picturesque gypsies, six of whom (the Misses Hilda, Norah gypsics, and of whom fallot, Miss Lloyd and the Misses Squire) performed the "Fan Dance" in a manner that brought down the house. in a manner that brought down the house. We append the programme, with the proviso that the order of the pieces was not observed, and that a passing visitor (Mr. Glossip) whose presence we owe to the war, supplemented the numbers by a very clever personification of a boy with a tooth-ache, John Roberts, and a lady dressing her hair. It should be added that the entertainment was in aid of the destitute families of soldiers and that the recitation which stood of soldiers, and that the recitation which stood second on the programme, and which was charmingly delivered by Miss Ivy MacDonald had been written by the Rev. Arthur Lloyd, and ran as

- I.—I am just a little English maid. As plain as you like, but solid and staid, A blue-eyed, red-cheeked, elf. But I've not come here to praise myself (Though I'm worthy of praise beyond a doubt): I want you to look away, and see The things I am going to talk about Instead of me.
- Look! here's a woman; she's wrinkled and old Her face is furrowed, her hands are cold, She has only one dress, the rest are sold, Her fire is out, she has no food. And there she sits in mournful mood; For her only son has gone, you see, To fight far off for his dear countree, And she's none upon earth to whom to flee, But you and me.
- And there, again, is a wife, alone In her silent home: her husband's gone, The heavy cares of the house oppress Her sad, brave, heart; and at her knee Gather the bairns in much distress, Hung 'ring at least for a loving caress: For husband and father have gone, you see, To fight far off for their dear countree, And they've none upon earth to whom to flee But you and me.
- But you and me.

 You and me and God above,

 Who has put in our minds the idea of love,

 And love means to open the door of the heart

 To our brethren in sorrow, and give them a part

 Of all we have. They have given, you see,

 Their best, as m gift, ungrudging and free,

 To fight to the death for their own countree.

 Now what does God ask from you and me?

The following is the programme:-PROGRAMME.

PROGRAMME.

1.—French Game; 2.—Recitation; 3.—Welsh Dance; 4.—Glees: a. You stole my Love, b. The Maiden of the Fleur de Lys; 5.—Mrs. Jarkey's Waxworks; 6.—Comic Songs; 7.—Rose Dance; 8.—Song and Dance: "Oh! Miss. I'll give you a paper of pins"; 9.—A Joint Household. A farce: in Japanese; 10.—Glees: a. Sweet and Low, b. The Miller's Wooing; 11.—Spanish Gypsies. The Japanese National Anthem.

The directors of the Sanyo Railway Company met on April 13th and passed the accounts for the last half year. The net income was yen 1,103,969 last half year. commented on in a discerning manner by the previous account, was added making a total of yen 1,184,525. The directors decided that out of the foregoing total yen 5,5200 should be set apart as reserve; yen 6,500 as bonus for employees; yen 6,500 as bonus for employees; yen 992,000 as dividend, at the rate of yen 2 per fold share and sen 20 per new slare, these rates being equivalent to four per cent per half-year; and the balance was carried forward to the next account.

PRESS.

In a leading article the Koye (Revue Catho-lique) protests against the methods adopted by Japanese War. They are in the habit of constantly insisting that the war is being fought between a Christian and a non-Christian country in a manner that is calculated to stir up anti-Christian prejudice in the minds of readers. this subject the Koye expresses the following sentiments:—It is possible that certain journalists may have inadvertently described the present war as a war between a Christian and a non-Christian country, but there are others who make it quite plain that in this matter they are actuated by hostility to Christianity. It is true that among foreigners there are people who speak in a boastful manner of the Christianity professed by themselves and their fellow-countrymen. But such people are ignorant, and one hardly expects intelligent journalists to pay any attention to what they say. The fact is that Christianity has no connection with this war and it is quite unfair of journalists to ignore this truth. Not only has journalists to ignore this truth. Christianity no connection with this war, can have no direct and lawful connection with any can have no direct and lawful connection with any appeal to physical force. It is a religion of peace, and gentleness; resignation and love are among the virtues which it seeks to cultivate. If Christianity were universally accepted and followed, strife would cease and soldiers would no longer be needed. But while recognizing that in the present state of the world resort to physical force is at times unavoidable, Christianity condemns in tote a war-loving spirit. Its precepts cannot be quoted as a defence of war in the abstract, nor can they be adduced as favouring the present war. The talk about the Russian troops being Christian shows great ignorance of the fact that most of them are larbarian Cossacks, who are as cruel and unchristian to-day as they were in the middle ages. The cruelty and savagery of these troops are the talk of the whole world. They may be Christian in name, but it is well known that not one single Christian sentiment influences these men. To resort to sophistry for the sake of making capital against a hated creed is surely an unworthy device for Twentieth Century Japanese journalists to follow. The present war is a Russian war with which Russian Christianity has nothing to do. When countries go to war with each other, for the time being religious distinctions are forgotten, and side by side beneath the same flag the members of divers religious sects fight for the rights of their countries. To drag in religion in order to increase the hatred with which the members of one nationality regard the members of another is a proceeding, that calls for the strongest condemnation. If the journalists are hard up for suitable epithets wherewith to describe the nations now at war, we would suggest that the combatants should be described as "bread-eaters and rice-eaters."

This figure however used will do no harm. If the rice-eaters should win, we will not complain though our journalists deduce an argument from the fact in favour of rice as the mainstay of life in preference to bread. It is high time that newspaper wri ers realized that it is one of their duties to endeavour to pour oil on the waters of strife, instead of employing mere claptrap arguments for increasing personal hostility among the combatants.

The Roye aims at keeping its readers well

informed of the trend of contemporary thought among European Roman Catholics. In the March number we find an interesting article translated from a well-known Roman Catholic English journal the Tublet. Two subjects are commented on in a discerning manner by the

acquit themselves so faultlessly and with so MONTRLY SUMMARY OF THE RELIGIOUS done little to spread Christianity among her Asiatic subjects and has invariably forbidden missionaries belonging to other Churches to teach Russian subjects. Our Roman Catholic Mission-Russian subjects. Russian subjects. Our Koman Camoric Missionaries in Manchuria inform us that the spread of Russian power has always meant their expulsion from stations they had occupied. Hence they would far rather see Japan victorious in this war, as she adopts a liberal attitude towards alien faiths. What opposition our teaching has encountered in Japan has its source in sceptical European.literature. Japan has imported a number of anti-Christian books and these are read and esteemed by the Japanese to a greater extent than they are in Europe; and even books that have ceased to attract attention in Europe are accepted as authorities in Japan. Among European writers no man has influenced Japanese thought more than Mr. Herbert Spencer. His books have greatly hindered the progress of Christianity in Japan. His advice to the Japanese given in a letter to Baron Kaneko in 1892, which has recently been made public, was to keep Europeans and Americans at arm's length as much as possible, only making use of them for business and political purposes. Mr. Spencer then quotes the example of India as to the danger of giving Europeans much power and counsels the Japanese Government to forbid mixed marriages, and not to give to foreigners the right of land-ownership or even that of a perpetual lessee.* The Tablet then proceeds to argue that the adoption of the conservative and exclusive policy recommended by Spencer would soon result in Japan's falling to the level of China.
The Kore has commenced to print a Romaji list

of the articles and other contents of each number of the magazine as well as one written in Chinese characters—a practice which might be advantageously followed by other periodicals.

Under the heading, "The Various Theological Colleges of Tökyö," the Fukuin Shimpö in successive numbers of the paper gives the subjoined particulars. (1) *The Meiji Gakuin* (Presbyterian). This institution was founded in 1886 by combining three previously existing schools, the Itchi Yeiwa Gakkō, the Yeiwa Yobi-Kō and the Itchi Shingakkō, into one establishment. The college was divided into a general and a theological de-partment, and was at first situated in Tsukiji, but in September, 1889, it was moved to Shirokane-mura, where in the following year a Theological Hall was erected, which was subsequently greatly injured by lightning, but was at once repaired and improved in various ways. The Meiji Gakuin grounds are over 10,000 tsubo in extent, highly situated and from a sanitary point of view without a fault. The theological students now in the institution number 19, six of whom entered last autumn. There are besides these, 5 students in the Theological Preparatory Class. The theological students are divided into three sections named Honkwa, Bekkwa and Kenkyūkwa. Those belonging to the first of these sections are about 25 about 30 years of age, though there is a grey-haired man in the special class, who was formerly a military man and who though old retains all the energy of his youth. Dr. Ibaka lectures on Christian Doctrine, Ecclesiastical Government, Exegetics and Christian Evidences. Dr. Imbrie takes New Testament Exposition and Old Testament History, and the Rev. S. T. Fulton lectures on the New Testament, on Hermeneutics and teaches Students who wish to be admitted into the Main Section of the college must be as well educated as graduates of a Middle School and must undergo two years of special training before entering the Theological Class. Caudidates for

It seems to us that since the ideas expressed in

education as well as possess special qualifications vidence for the purpose of placing the Japanese

Total number of graduates, 152; 139 of these having graduated in the Main School and 13 in the Special Section. Besides these 12 left the school without graduating in order to fill posts in the Church. 13 of these have died; 12 have joined other bodies; 13 have taken to business:

4 have become Theological Professors and 58 have filled various offices in the Church.

(2) The Aoyama Gakuin (Shingukubu). The grounds belonging to this institution are truly magnificent, covering over 30,000 tsubo. Perhaps no other private school in the country has obtained so good a site. The Methodist buildings erected so good a site. The Methodist buildings erected on the extensive grounds are of a substantial kind. The Theological College which was built in 1884 was slightly injured by lightning in 1893, but repaired without delay. The Methodist Divinity School was first founded at 222 Bluff, Yokohama in 1879, was moved to Tsukiji three years later, where it was carried on for two years prior to its transference to Awoyama. Up to last year, dating from its establishment its graduates numbered 72. 42 of these filled offices in ates numbered 72. 42 of these filled offices in the Church, 9 died, and most of the remaining 21 entered Secular Middle Schools as teachers. There was not a single case of a graduate's joining another Sect. The rules respecting the qualifications of candidates for admission to the Methodist Theological Seminary differ little from those of the Meiji-gaku-in, and so we need not give them here. The chief instructors in this give them here. The chief instructors in this institution are Dr. Julius Soper, Rev. B. Chappell

institution are Ir. Julius Soper, Rev. B. Chappell and the Rev. K. Honda.

(3) The Tsuhiji Rikkyō Shingakkō (Episcopalian). This College dates from 1884. The Buildings connected with it consist of a Lecture Hall, a Library, an Assembly Hall (Kuikwan) and a Student's Dormitory and Boarding Establishment. The buildings were injured by an earthquake that occurred in 1893 so much that reconstruction of some parts of them was deemed. reconstruction of some parts of them was deemed necessary. Like the institutions described above, the Tsukiji College has a main and a branch special department, and it also only accepts candidates whose general education is not below that of Middle School graduates. The course extends over 4 years. Bishop McKim is the President of the College and he lectures on Ecclesiastical Government. The Rev. E. R. Woodman lectures on the Old and New Testaments, the Rev. A. R. Morris on New Testament Exegesis, the Rev. G. Wallace on History and the Old Testament, the Rev. C. T. Sweet on Christian Evidences and Theology, Bishop Awdry on Rites and Ceremonies, Mr. Imai Judō on Pastoral Theology and on Preaching, and Mr. Yamagata on History. Among the 3s² graduates of the main department of the College 10 are serving the Church as pastors. One is doing church work in a foreign country. One has died. Seventeen have become catechists. One has left the church. There are at present 8 students in the College, belonging to the main department. The received department was only department. The special department was only established last September. The course in this department extends over 2 years only. There are now 10 students connected with this section of the College. The subjects studied are general Theology, the Old and New Testaments, the Prayer Book, General Church History, Church Government, Christian Evidences, Pastoral Theology and Preaching. Candidates for admission to the College must be over 20 years of age, must have been baptized at least 2 years before their applications are made, and must possess other qualifications for evangelistic work.

In No. 456 of the Fukuin Shimpo there is an

*The present institution was not founded till the 19th year of Meiji; so the figures given by the Fukuin Shimpö include graduates of the original Itchi Shingakkö mentioned above. The statistics given are poorly edited, and very confusing in parts.—(WRITER OF SUMMARY.)

the Special Section of the school must be over 25 article by Mr. Sakamoto which maintains that years of age and must have received a general, the present war has been brought about by Proreducation as well as possess special qualifications whence for the purpose of placing the Japanese for the work they contemplate undertaking. The in a position to act as religious teachers to the Kenkyūkwa, or Investigating Section, consists of whole of the Far Eastern world. The war is graduates of the Theological College, who take up one or more special subjects. By the Writing is God's instrument for fulfilling Divine purposes. In proof of this Mr. Sakamoto quotes passages from the prophet Isaiab. Upon this war, says the school since the 11th year of Meiji.* this white, depends the future rengious instoly of China and Korea, and the Japanese must realize that they are fighting for the enlightenment of two sister nations. At the present moment this notion of Japan's being destined to act as a light to the whole of the far East has taken the fancy of the nation, and Christian writers naturally interpret events somewhat in the manner resorted to by Mr. Sakamoto.

The Fukuin Shimpo under the heading of The Fukuin Shimpo under the heading of "Contemporary Literature" prints an article from the pen of Dr. Anezaki on "Tolstoi and Russian Sentiment," of which the following is a brief epitome. At the present time nothing is more striking than the contrast presented by Count Tolstoi's teaching and general Russian behaviour. Tolstoi's teaching and general Russian behaviour. Tolstoi is the champion of the virtues which are conspicuously absent from the dealings of the conspictions absent from the dealings of the Russian Government. Tolstoi represents the oppressed Slav and his bête noir is the aristocratic clique which now holds the reins of Government in Russia. The present Government is really of German origin. It utilizes all the sciences of the world for its own selfish purposes, is anticle with the sciences of the world for its own selfish purposes, is entirely without any respect for real religion and incapable of realizing that the oppressed races ruled by them have any inherent rights as human beings or as subjects of the Czar. Their policy is to keep the masses ignorant, in order the better to tyrannize over them. To educate the poor oppressed people whose cause he pleads is beyond Tolstoi's power; so he affords them the only solace left in the world for them—the solace of religion. The barbarism of the present Russian Government affords a striking example of the condition to which high intellectual culture unattended by any real religious or moral development may bring a nation. Tolstoi maintains that the present oligarchy was only made possible by the large influx of Germans into Russia prior to the time of Peter the Great and he adds that the present rulers of Russia are of opinion that no religion and no morality is needed in Government—science and consummate diplomacy will suffice for all purposes. Tolstoi appeals to sentiments which the rulers of Russia do not possess.

In the Tetsugaku Zasshi (No. 204) we find a very long but scholarly and interesting article entitled Kwanshū no Rinriteki Kosatsu (Habits regarded from an Ethical Standpoint) by Mr. Noda Voshio, B.A. The article covers 26 closely printed pages. The writer has a good command of language and has arranged his ideas in a most clear manner. The subject treated has always seemed to us to be one of extreme importance, for as Mr. Noda remarks, there is no such moral force in the world as the force of habit, and the connection of this with religion, morality and law is found to be of an extremely complex nature. Habit has established its authority in the world beyond all manner of doubt. Upon what basis does this authority rest? This is the question that Mr. Noda sets himself to answer. We can do no more than give a bare outline of his arguments, which we will do under the nine headings of the original essay.

(1) What is implied in the term habit. Speaking generally that which is repeatedly practised is life, called a habit. But when we come to inquire vari what are the special properties of a habit, we find that habit is a species of law and a species of morality. It is a species of law because it deter-

individuals or the life of the community of which they form a part. they form a part. Regarding habit from another point of view, all morality and all law may be said to have originated with the habits of com-munities; for it is only after certain ways of acting have been sanctioned by general usage and acting have been sanctioned by general usage and other ways condemned by public opinion that morality and law begin to develop. That habit controls society precisely in the same way as morality and law control it must be evident to every one who has duly considered the subject. To ignore public opinion altogether is found to involve a severer form of punishment in some cases than imprisonment. To sum up under this heading, habit, though in many respects not so powerful a ruler as law, and though by no means so unerring a guide as a high standard of morality, may be defined as incipient law and morality.

(2) The origin of habits and their development.

The history of nations is embodied in their habits and languages. We can hardly imagine people living in communities without languages. But if this were possible, then their ways of acting would give us a clue to their past history. Habits usually originate with the action of some influential individual. They may in the first place be forced on communities in an arbitrary manner and afterwards followed willingly, or they may be adopted from the first voluntarily. But in all cases they possess no great authority until they have been observed for a long period. The founders of habits have frequently no intention of setting a model for the imitation of other people. They may be compared to a man who wanders across a prairie without any notion that his foottracks will be followed by hundreds of other persons till he proves to have been the origi-nator of a new road. Deliberate attempts to found habits have been often found to fail.

Communities will only observe distasteful customs as long as they are compelled to do so. So that as a rule habits are the product of whole communities, that is to say, they owe their position to the attitude of the public mind towards them. In the formation of habits it is doubtless true to say that great religious teachers, moralists, philoso-phers and heroes have figured more prominently than mere statesmen or even monarchs. Habits may be said to have an internal and an external source. The internal source is a certain bend of mind, certain fundamental moral notions, certain deep-seated national or domestic proclivities which incline the minds of the members of communities to one set of actions rather than to another. The external source is environment of another. The external source is environment of every kind, race, climate, geographical position, and also great events and changes. Progress in the development of habits is determined by various factors, intellectual and moral culture, great political events and national upheavings being the principal of them. being the principal of these.

(3) Various kinds of habit and the relation of one kind to another. Omitting habits that are not directly related to morality, we may say that habits are connected either (a) with the lives of individuals; (b) with social intercourse or (c) with the life of a community. (a) Each individual determines the life he or she will lead according to the special objects which each one wishes to realize. In that most of the actions determined on during each day only concern the individual who performs them, there is perhaps little morality attached to them. Most of them little morality attached to them. Most of them affect their author only and their importance is exclusively derived from their connection with the attainment of a special object in life. It is on this account that the greatest variety imaginable is to be observed in the daily lives of individuals. Of course there are certain individual actions that affect others directly or indirectly in many ways, but in the daily mines men's actions, it makes them act in one way reutine of existence these are comparatively few morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality, because as a rule a man's conscience or morality and spoken and numerous small customs which in the training conservation of the conserva that neither concern lawn or morality, but these many cases cannot be omitted without causing need not be discussed here. They consist of the repetition of utterly insignificant acts which have no direct and important bearing on the lives of and regard for their feelings and interests. (c)

The customs or habits that affect the life of a community are of course more important than any others, for the simple reason that the welfare of society generally is of greater moment than the welfare of any unit composing it. The family, the clan or tribe, and the nation constitute bodies which combined go to make up world-wide society, and each of these bodies has its distinctive habits, habits which materially affect the welfare of a special circle of human beings. All these habits are necessarily far more binding than mere individual habits. Their rule may be said to be of a despotic type, not allowing of much diversity of action

期操作不单生具情具侧主和器便物型可

in many particulars.

(4) The nature of habits and the control they exercise. The notions and the will of a community may be said to be embodied in its habits. Though at first sight it might appear as though habits have an accidental origin, it is not really so. They have sprung up in a natural manner as a result of ages of human experience. Circumstances may arise that call for the abolition or modification of certain habits, but this does not affect the fact that communities usually insist on things being done in a fixed way. There are certain habits of communities that no religious teacher and no moralist even, to say nothing of politicians, is sufficiently influential to change. As to the power of habit over our minds, though in many cases we could if we would act contrary to the habits of the communities in activities. habits of the communities in which we live, we inrariably find that the tendency to conformity is far stronger than the inclination to nonconformity. With women, who are guided princi-pally by instinct and feeling, this is the case to a greater extent than with men. The control of habits over the mind is of the nature of fate, it is something from which no one can escape and which even the strongest minds only surmount

occasionally by dint of tremendous resolution.

(5) The standard of habit and the moral standard. Our everyday actions being determined by habit, habit is of the nature of a moral standard. Most people ask what is usual rather than what is right. To act as others act, to act in a than what is fight. To act as utiles act, to act in manner that society generally approves of is the aim of the majority of men and women. It is true to say that the habits of a nation repre-sent its standard of practical morality. A sent its standard of practical morality. A few members of society may have higher moral ideals and may in practice reach me higher level of attainment, but the majority in quite satisfied with its conformity to universal, time-honoured habits. In ancient times there was no distinction between morals and habits, * but modern writers on ethics have shown that men's habitual practices and morality, though in outward form identical by no means cover the same area (Kwanshii to): by no means cover the same area (Kwanshū to dotoku to wa dōyō no keishiki wo yū suredomo, hani wa kesshite dōitsu to iubekarazu).

(6) Habits and Conscience, Habit not only (6) Havits and Considence. Havit not only becomes the standard of morality to most people, but it figures more prominently than any other agency in the development of the individual conscience. Habit is the embodiment of the moral feelings of communities as a whole and what is approved of and condemned by this standard is considered by individuals to be right or wrong. In all times many attempts have been made to educate the conscience, so that it shall appeal to a loftier standard than is! that it shall appeal to a lotter standard than is attained by society generally, but these attempts are only very partially successful. Moral idealists as a rule find that the power of habit is too strong to be overcome. A child comes into the world knowing nothing of those qualities of actions we whose moral notions usually come from the communities in which they live, and so habit moulds the conscience into whatever shape it pleases and other would be moulding account on the conscience of the world be moulding account on the conscience of the world be moulding account on the record with the conscience of the conscience into whatever shape it pleases and other would-be moulding agents are treated with comparative indifference. Habit is the external embodiment of the moral consciousness of communities, the individual conscience is usually no-thing more than a reflection of that consciousness. Habit is not qualified to become an ultimate

* This is shown by the derivation of the word moral, the Latin mas, moris, meaning manner, and so men's manners, as habitual ways of acting, constituted their morals.—(WRITER OF SUMMARY).

moral standard. It must be quite plain to any

the highest attainable moral excellence. When we come to examine the origin of habits we find that many of them were formed hundreds of years ago when the state of the world was entirely years ago when the state of the world was entirely different from what it is now, and that in numerous cases society has gone on blindly following them despite their palpable anachronistic character. To say that in the moral world what exists is best is to say that there is no such thing as progress in morality, ideal and practical, which is contrary to the opinion of the most competent students of this special subject. Because a habit embodied the moral consciousness of a special embodied the moral consciousness of a special era it does not follow that it expresses the moral consciousness of the present generation of men and women. To say that morality makes no progress is to contradict history. If we have added to the wisdom of our forefathers in so many other fields of knowledge and research, surely we can do so also in morality. When we come to inquire into the objects of certain established usages, we find that in many cases they are no moral objects at all, in other cases they are only partially moral, in others though moral once they have long ceased to be so, and in still others circumstances have so altered that habits which were originally designed to aid morality now encourage immorality. Habit has plainly no authentic claim to be constituted an authority from which there is no appeal. The number of habits which considered morally are checked. morally are absolutely objectless is very numerous. The authority of those which have a moral object in view is by no means unimpeachable. Many of them embody the mere whims of former generations; they have come into existence no-body knows how or why and are observed owing to our innate conservatism. There is another reason for our not exalting habit into an ultimate examined of morality. We all have a strong feeling standard of morality. We all have a strong feeling that as a rule we are under no moral obligation to conform to the habits of society. We usually do so because we wish to be popular, or obliging to our fellow-men and to avoid the reproach of favouring bohemianism. Our action is a concession to usage, rather than the performance of a duty. We cannot say of such action "it must or ought to be done," but only that for the sake of comfort and ease "it had better be done." Another objection to making habit a final moral standard is that there are numerous actions on which it has nothing to say. Into no part of the wide field of casuistry can this criterion of con-duct be introduced. In every man's life there are a thousand moral questions to be settled in which established usages can give little aid. To sum up, habit can only be regarded as a standard in a very low state of morals; its authority will certainly be denied by all those who have reached a boundary of moral thought. ed a lofty plane of moral thought.

(8) The conflict of habit and morality. It is frequently said that all habits that do not agree with a lofty moral standard should be suppressed. But where the law does not interfere, the suppres-sion of long established habits is found in practice to be no easy matter. The question of how far moral obligation makes it desirable to go in this matter is a very delicate question. Traditional habits that are manifestly injurious to society will be gradually stamped out by the strength of public opinion, but there are scores of habits concerning whose moral character there is great difference of opinion, some considering them harmful, others harmless, though perhaps useless. To head a raid against such as these is not a course to be recommended. The present age in Japan is marked by a wide departure from old customs, but how far this should be carried in the interests of morality is by no means an easy question to settle; for it must never be forgotten that national habits are to a large extent the result of national history and to take to blot that out would be most unwise.

(9) Conclusion. Habit is the most unwise.

(9) Conclusion. Habit is the moral standard of the majority of human beings, and among poorly developed peoples no other standard is known. Moral idealists the world over do not bow to habit as an authority from which there is no appeal and they lead attacks on such habits as they deem contrary to the highest interests of and injuring four. Incendiarism is reported to human beings. But so great is the influence of be the cause.

one who has given the matter due thought that habits, so numerous are their ramifications, so the established practices of society do not embody sacred are their associations, so mysteriously and pleasingly do they connect the present with the boary ages of antiquity, that no moralist in the world-can afford to treat them lightly. Among the numerous influences that determine human action for far reaching effects habits are unsurpassed.

There are several Christian organs that may be described as ably edited and well-sustained one-man organs. Such are Mr. Matsumura Kaiseki's Keisei, Mr. Ebina Danjō's Shinjin and Mr. Uchimura Kanzō's Seisho no Kenkyū, whose motto is Pro Christo et Patria. The trouble with so many periodicals issued in Japan to-day is that they are badly edited and the writing is most unequal. They publish some good articles, but a great many very twaddly ones, written in many cases by raw students. Many magazines, religious and by raw students. Many magazines, religious and secular, seem to have no standard at all, and their editors do not care what they publish. In the case of the three above-named organs there is always to be found something worth reading. The three men belong to a fine type of modern Japanese. The personality of each writer gives a special flavour to his language and no reader can have the slightest doubt that all three men are earnest and sincere, and, what is more, are men with an ideal and a strong belief in the mission in which in the world of Japanese Christian thought each is engaged. The Seisho no Kenkyū (Biblical Study) is a monthly magazine which has now reached its fiftieth number. It does not confine itself to a mere exposition of the connie useit to a mere exposition of the scriptures, as its title would seem to imply, but discusses a number of current religious, moral and philosophical questions in a concise and decidedly spicy manner. Each short note has its title. Here is a specimen of Mr. Uchimura's style taken from the March number of his magazine: "A Perfect Occupation." "An occupation which pleases others and pleases oneoccupation which pleases others and pleases oneself at the same time may be said to be a perfect
occupation. It is said that poetry and art
approach perfection. But both of these when
compared to the pursuit of the evangelist who is
independent and self-supporting must be recognized as very imperfect. The highest of all
delights is to preach the gospel of Christ. It is a delight from beginning to end. The methods employed are delightful and the end in view in no less so. The sowing is a delight no less than the reaping, and when all is over then the soul enters the joy of living for ever with Christ." In enters the joy of living for ever with Christ." In the same number under the heading of "Church Questions" the following topics are discussed at great length in the form of an imaginary dialogue. "Defence of those Christians who belong to no sect. An appeal to Logic in explaining the Bible. What the Church of Christ is according to Christian experience. Finally, the character of the Japanese Church of the Future." The imaginary inquirer is supposed. Future." The imaginary inquirer is supposed to be a member of one of the existing Churches. This discussion will receive attention in our next Summary.

On April 8th at 1.30 a.m., fire broke out at Inaho-machi, Otaru, destroying ninety-four dwel-

lings.
A telegram from Otaru states that fire occurred in the morning of April 8th at the Otaki forest, burning down about a hundred cho (cho-about

A Hiroshima correspondent reports that incendiarism is prevalent in that city. The inhabitants are on the watch, having established patrois. On the evening of April 8th, fire broke out at the vilage of Kashiwano, near Kanazawa. Twenty-

four buildings were destroyed and twelve damaged.
On the night of April 10th, fire broke out at
the village of Nakazato, Kuji, Chiba prefecture,

YOKOHAMA FOREIGN BOARD OF TRADE.

The annual general meeting of members of the Yokohama Foreign Board of Trade (postponed Yokohama Foreign Board of Trade (postponed from March 31st, in consequence of the lack of a quorum) was held on Friday, April 8th, in the Rooms of the Board, Mr. E. C. Davis presiding in the absence of Mr. R. D. Robison, the Chairman. Among those present were; Messrs. V. R. Bowden, J. Griffin, S. Isaacs, W. T. Payne, E. W. Frazar, A. H. Cole Watson, D. H. Blake, M. Schellenburg, F. G. Sale, M. Kaufmann, J. C. Hartland, Jas. Dodds, J. de Cuers de Cogolin, A. I. McClure, etc. A. J. McClure, etc.

Considerable difficulty was experienced in holding the meeting as in spite of attempts to reach members of the Committee (of whom five had to be present) and to procure the presence of additional members of the Board of Trade (of whom nine should be in attendance) it was impossible to find a quorum up to 4.30 p.m. At that hour Mr. Bickart was brought in by Mr. Isaacs who had gone out for that purpose, and Mr. F. M. Tegner entered at the same time as Mr. Payne who had left the meeting to attend to business engagement.

The CHAIRMAN said before they took the ordinary business he should like to express the regret of the Committee and also of all present at the temporary indisposition which had prevented their Chairman presiding at that meeting. It was hoped that the trip the Cheirman had taken would have entirely restored his health.

On the motion of Mr. Griffin seconded by Mr. Hartland the minutes of last meeting were taken

Mr. Davis then commented on the satisfactory state of the accounts which had enabled them to

place a sum of yen 2,500 on fixed deposit.
On the proposition of Mr. Frazar seconded by
Mr. Tegner the accounts as presented were

approved.

The CHAIRMAN then referred to the report and said no one could consider the year 1903 and said no one could consider the year 1933 to receive the letter and had seen in back.

Mr. Griffin said there seemed to have been, as it were, a sort of caim before the creasing business year by year in tmports of storm which had unfortunately broken out between this country and Russia and when they added to that a very inferior rice harvest of Trade was in communication with the Chamwhich was always a damper on trade in general, he thought there was sufficient to account for the poor trade of the year. Many of the statistics of imports and exports showed a failing off but the most notable feature of the report was the great increase of direct freight by Japanese. In raw silk the increase was from 11,800 in 1897 to 22,000 bales in 1902-03. cording to the report this year would see a further increase. Of course the war would direct a portion of that trade to the hands of foreigners for the time being but the figures showed the progress of the Japanese, their increasing commercial morality and the increasing competition which for-eigners would have to expect in the future, and business of the meeting he wished to refer therefore although the trade actually in the hands to Mr. Dodds who, they knew, and regretted of the foreigners would undoubtedly be larger to know, was leaving them. Mr. Dodds had this year, as against 1903, yet it would probably go back to its former level later on. The chairman also referred to that portion of the report dealing with the gold reserve at the Bank 93 and he had been for many years an inof Japan. It was really very satisfactory, he said, in spite of the balance of trade being appreciably It was really very satisfactory, he said, against the country.

In reply to a member the Chairman said in referring to the rice crop being a failure he was of course alluding to the crop of 1902 the effects of which would be felt in 1903.

The report and statement of accounts having been approved the meeting proceeded to the election of officers Appointments were made as follows: Committee:—Messrs. E. C. Davis, C. V. Sale, V. R. Bowden, M. Surth, D. H. Blake, V. A. Cæsar Hawkins, L. Mottet, W. T. Payne

new order issued from the American Consulate with regard to the filing of original bills at the Consulate. He said he believed some of the American merchants had made a protest against this and he did not know whether it was in the province of the Board of Trade to take the

The CHARMAN said he thought they should represent the matter to the New York Chamber of Commerce and request them to put it before the Government at Washington. He would suggest that the American firms should protest through their Legation.

Mr. Griffin said that had already been done. He wanted to know whether the Board of Trade would endorse that action or in any way add to the force of it. He thought the in-coming committee could take it into their consideration

Mr. FRAZAR said it would help very much if the Board of Trade acted through the New York Chamber of Commerce,

Mr. Sale pointed out in connection with the order that there was no regulation for the gui-dance of the Consulate as to the penalties to be inflicted if the order were not observed.

Reference was also made to the Consumption Tax, the Chairman saying that it remained to be seen whether the Government could enforce it of

Mr. GRIFFIN thought the Consumption Tax was in violation of the Treaty.

Mr. Isaacs said it had been enforced on wool The CHAIRMAN said the first time his firm was called upon to pay it they would pay under protest.

Mr. Isaacs said he thought Sir Claude Mac-Donald had taken the matter up.

The CHAIRMAN said he understood that during the last few days Messrs. Lane, Crawford & Co. had written a letter on the subject of the Con-sumption Tax to the Customs who had declined to receive the letter and had sent it back.

of Trade was in communication with the Cham-bers of Commerce in those ports and did they receive any standards of the season's products. He asked the question because some matters might come up for arbitration when such standards would be needed.

The Chairman said he thought it wery desira-

they were to get into communication with other chambers of commerce and boards of trade in the East and obtain standards.

defatigable worker on successive committees having been a committee member as far back as 1874. They all sincerely regretted his departure but they felt that in leaving them he was taking a well-deserved repose und for that reason they felt it would be selfish to press him to remain. He then proposed the following resolution:—"That the members of this Board desire Mr. Griffin then moved that the report be adopted saying that there seemed to have been a very large trade but very little money in it.

Mr. Cole Watson seconded and the report the unselfish and ungrudging way in which he was approved without further comment.

That the rembers of this Board desire to place on record their keen regret at the departure of Mr. Dodds for home and to thank him for the unselfish and ungrudging way in which he has placed his valuable services at their disposal.

The further units in withing him every receible. They further unite in wishing him every possible happiness, and many years of prosperity and repose in his native country."

Mr. BLAKE seconded the resolution, which was carried unanimously.

Mr. Donos had left the meeting before the reand J. D. Hutchison.

While the scrutineers were carrying out their was instructed to forward and the Secretary was instructed to forward a copy to him.

This concluded the proceedings.

LITERARY GOSSIP.

During the latter part of his illness the late Sir Leslie Stephen received every day a bunch of flowers from his friend Mr. George Meredith, who, though necessarily at a distance, watched the closing scene with touching anxiety

The Russian National Anthem is the only national hymn-which was adopted as such by open competition. Until the time of the Emperor Nicholas the English "God Save the King" had served Russia, but Nicholas determined to institute a genuine and native Russian anthem. He announcegenuine and native Russian anthem. He announced a competition, open to all musicians, for an original national hymn. A musicial committee reduced the thousands of entries to two, and between these, the works of Glinka and Lvoff, the Czar himself decided. The highly martial character with the drums and trumpets of Lvoff's composition won the Imperial verdict, and it was decreed as henceforth the Russian National Anthem.

Under the direction of the Royal Society of Literature, Mr. Henry Frowde is about to publish two interesting works. One is the "Chronicles of Adam of Usk," edited with a translation and notes by Sir E. Maunde Thompson. This contains the complete chronicle from 1377 to 1421. The unique British Museum MSS, from which the same editor prepared an edition in 1876 was imsame editor prepared an edition in 1876 was imperfect, ending with the year 1404, and lacking the concluding quire; and this was recently found among the Duke of Rutland's papers at Belvoir Castle. The other book is "Queen Elizabeth and the Levant Company," the history of a diplomatic and literary episode of the establishment of British trade with Turkey, edited by the Rev. H. G. Rosedale, D.D., with many facsimile illustrations of MSS. and plates.

Mr. J. Pierpont Morgan may be congratulated on his purchase of the original MS. of Byron's "Corsair." It is original in the sense that it is undoubtedly earlier than the MSS. in Mr. Murray's possession from which the poem was printed. From a communication to the Athenaum we learn that Mr. Morgan's treasure was given by Byron to his half-sister, Mrs. Leigh, from whom it descended to Mrs. Cleland, of Hawkhurst, Kent, from whom it has now passed to its present possessor. This manuscript of the "Corsair" is full of interesting corrections and cancellations. It is said that Byron composed the "Corsair" walking up and down Albemarle-street. He wrote and published the poem just ninety years ble thing that the Chamber of Commerce in ago. It was written in ten days, hut the state-Rangson should forward standard samples.

Mr. Griffin said it would be a good thing if Biography" for example, that he hardly touched Biography" for example, that he hardly touched it afterwards, would now seem to require modification. No fewer than fourteen thousand copies of the "Corsair" were sold in a single day. This poem got Byron into very hot water owing to the inclusion of the famous lines: "Weep, daughter of a royal line," Another interesting fact is that Mr. Morgan's manuscript shows the poem to have been dedicated originally, not to Moore, but to a lady.

> Mr. Maarten Maartens, who has a piece running at Wyndham's Theatre in front of "Little Mary," is a warm friend of Mr. Barrie, though he once had a decidedly unpleasant experience while staying as the novelist's guest. One of Mr. Barrie's famous cricket matches, such as Writers v. Painters, or something of that sort, had been arranged, and Mr. Maartens was looking on when he had the misfortune to be bitten ing on when he had the misfortune to be bitten by a fly of some strange breed, which resulted in his being laid up for weeks with quite a serious illness. Mr. Maartens generally spends some time each year with his publisher. Mr. George Bentley, at the country house of the latter, Upton, near Slough. Maarten Maartens is but a nom de guerre, which for a long time was most religiously preserved. Latterly, however, the distinguished novelist has been less careful about preserving his incognito. In real life he is Joost M. W. Poorten Schwartz. Most of his time is spent at his residence near Vevey. In certain spent at his residence near Vevey. In certain respects Mr. Maarten Maartens occupies a wholly unique position in English literature. A foreigner,

a Dutchman, he has kept to faile as a writer of participant of the fiction in English. Many suppose his books to be translations from the Dutch, but this is to be indentified, and who caused him to avoid not the case. They are written in English first, and a translation of them into Dutch is only now being made. Dutch, says Mr. Maartens, is fine for serious prose, but for lighter literature he finds English nimbler.

It is not often the case, says the Academy, that the loss of one man throws a shadow over so wide an area of the intellectual field as did the death of S. Arthur Strong at the early age of forty. Librarian of the House of Lords, as well as to the Dukes of Devonshire and Portland, Professor of Arabic at University College, London, as well as Lecturer in Assyriology there and at Cambridge, his official duties were many and exacting. He had devoted no small amount of work to Oriental studies. He published in 1891, for the Pali Text Society, the editio princeps of the Maha Bodhi Vamsa, a difficult but valuable history written in Pali prose of the so-called Tree of Wisdom. Soon after this important work was finished, Mr. Strong devoted his attention more closely to Arabic and Assyriology. In the "Journal of the Royal Asiatic Society" there appeared, in 1891 and 1892, several articles on Assyrian Texts, in which he showed a mastery of the subject. To the new series of the "Records of the Past," edited by Professor Sayce, he contributed a number of translations. To the "Proceedings of number of translations. To the "Proceedings of the Society of Biblical Archæology" he contributed, in Vol. XVI., 1895, an additional note on the Adapa-Legend, some Assyrian Alliterative Texts. To "Delizsch and Haupt's Beitrazge zur Assyriologie," Vol. II, he sent a valuable article on Some Oracles to Esarhaddon and Assurbanipal, 1894. To the "Assyrian and Babylonian Record" he sent A Prayer of Assurbanipal and Three Curpiforur Texts. in 1892. The "Lournal Turce Curpiforur Texts. in 1892. The "Lournal Curpiforur Texts." Record "he sent A Prayer of Assurbanipal and arrived in Japan, his capital was about fifteen Three Cunciform Texts, in 1892. The Journal thousand yen. He purchased several lots of of the Royal Asiatic Society for 1895 contains merchandise including silk and cotton goods, the Arabic text of a history of Kilwa, with a antimony and lacquered wares, etc., from Japan-critical introduction the Arabic text of the "Futuh ese dealers, but very little of these goods had al Habashah, or Conquest of Abyssinia by Shihab yet been paid for. He applied to another al Din Ahmad," was published in 1894; and for insurance company for policy for eight thousand to be a policy for eight thousand the policy for eight thousand to be a policy for eight thousand the policy for eight thousand some time before his death Mr. Strong is known to have engaged upon an edition of an Arabic history of Jakenak, Sultan of Egypt.

By the death of Canon Ainger another breach is made in the ranks of the brilliant band of writers whom Mr. Morley gathered round him when he was editing the original issue of the English Men of Letters series. Of the thirty writers responsible for the first series, sixteen have now passed away, the late Canon being the only one of these who lived to contribute a volume—the one on Crabbe—to the new series. Two of the most charming characteristics of Canon Ainger were his unfailling modesty and his all-pervading charity. His charity, it will be remembered, found play in a most unclerical apology for all the shortcomings of Elia, extending even to his delight in gin-and-water. Canon Ainger's modesty was never more patent than in regard to subjects wherein his claim to authority was undisputed. If one should praise his Life of Lamb he would invariably depreciate his own shate in it and speak most warmly of those who had assisted him, notably of Mr. his own share in it and speak most warmly of those who had assisted him, notably of Mr. James Crossley, of Manchester. Mr. Crossley knew Lamb personally, and told the Canon that the lodged a claim with the insurance company, but best picture of the essayist extant was Mr. Brook Pulham's etching in copper made in 1825. It plur being kept in the room and not being was Mr. Crossley, too, who described to the Canon Lamb's wonderful discourse on Milton, the court read several statements given by the court of the surface of the application.

The accused further rated that after the fire he lodged a claim with the insurance company, but the plur being kept in the room and not being was Mr. Crossley, too, who described to the declared at the time of the application.

The accused further stated that after the fire he lodged a claim with the insurance company, but object to the declared at the time of the application.

The accused further stated that after the fire he lodged a claim with the insurance company, but object to the company of the sullivation of the sullivation.

The accused further stated that after the fire he lodged a claim with the insurance company, but object to the company of the sullivation of the sullivation of the sullivation.

The accused further stated that after the fire he lodged a claim with the insurance company, but object to the lodged a claim with the insurance company to the sullivation of the delivered "when, in manner, speech, and witnesses in the preliminary trial, after which walk, Lamb was obviously under the incounsel for the defence asked for leave to examine fluence of what he had drunk," but which was memorable in its "fullness of knowledge, and an expert in order to ascertain whether sulcloquence, and profundity of critical power." phur left in a sample room contributed to the eloquence, and profundity of critical power." phur left in a sample room contributed to the Among the Canon's literary friends, of whose accident or could naturally cause a fire. The kindness in the matter of Lamb personation has been count decided to do so on April 15th at 10 a.m. always most sensible, were also Edward Fitz-Gerald and Mr. W. Aldis Wright. Mr. Wright, by the way, is at present hotly engaged in detending FitzGerald against his latest biographer, Mr. Thomas Wright, of Olney, who has apparently suggested that Edward FitzGerald wrote certain and Company, claiming. yen 115.60 for merchanthings which were really from the pen of Edward dise sold to defendants, was resumed on April

a Dutchman, he has leapt to fame as a writer of Marlborough Fitzgerald, "a writer of occasional

THE LAW COURTS.

INCENDIARISM

The trial of the Indian merchant, M. C. Fernando, No. 127, Yokohama, who was charged with incendiarism, began on April 8th in the Yokohama District Court before Judge Matsuyama and Public Procurator Midzutani.

Mr. Matsuda, was employed to defend.

After the provisional examination in regard to name, nationality, age, etc., the Public Procu-rator stated that the accused arrived in Yokohama in the beginning of January, accompanied by his wife and a child. He intended to start business and established an office at No. 127. He at once employed a Portuguese, J. da Silva, two Japanese and a Chinese. The accused received yen 450 each from his Japanese and Chinese employes as their personal guarantees. The accused was in a state of pecuniary difficulty and spent all these guarantees of his employees. Later he insured some goods in an insurance office, of which the agents were Messrs. Jardine Matheson and Company, for a thousand yen and then set fire to a bag of sulphur which was in the sample-room, with the intention of obtaining the insurance money.

In cross-examination the accused stated that he arrived in Yokohama on Jan, 1st this year in order to start business. He rented on Jan, 26th a house at No. 127, Yokohama, and employed J. da Silva, two Japanese and a Chinese. When he amounting to over five thousand yen, but he did not obtain this policy. When he applied to Messrs. Jardine, Matheson and Company for a policy of a thousand yen, he told his Portuguese em-ployee to declare that some samples of sulphur were kept in the sample room, but the latter forgot to do so. A Japanese watchman kept the ten door keys of the building. There were two doors to the Sample room which were locked during the night. On February 18th the accused paid yen 7.50 to the insurance agents as premium and the fire occurred on the night of the 22nd in the sample room where no fire had been left. A Japanese merchant from Tokyo had been smoking in that room the day of the accident while the accused was talking to him on a business affair. The accused did not remember the name or residence of this Japanese. He left the office on the even-ing of the day of the accident, after all the employers had gone.

The Judge-Did you set fire to the sulphur yourself in order to obtain the insurance money? The accused-I never did. I felt quite strange

SNAKE GOURD CASE.

oth in the Yokohama District Court before Judge Danno, when M. Katayama, a commission mer-chant, was examined.

He stated that he sold on July 30th last some bales of snake gourds to Messrs. Winckler and Company and later he also promised on behalf of Mr. Shimidzu, a snake gourd merchant, to supply a hundred and fifty thousand snake gourds which were to be delivered between April and October least. On August the delivered to a price of the state of th last. On Aug. 3rd he delivered 12,350 pieces to the firm as a part of the contract, for which he received a payment of yen 250 from the firm by

This casecame up again in the Yokohama District Court before Judge Danno on April 12th when judgment was delivered rejecting the claim of plaintiff with costs,

TWO MURDERERS EXECUTED.

Y. Kuramochi (50), a dentist and S. Aoshika, 2. Auramochi (56), a dentist and S. Aosanka, (26) a sailor, were executed on April 9th in the Ichigaya Prison, Tokyo. They entered, in November, 1899, the dwelling of Y. Sudzuki, a farmer, in North Soma district, Ibaraki prefecture, and murdered him and stole forty-eight yen. They were sentenced in the Ibaraki District Court to death, from which they appealed to the Tokyo Appeal Court of Cassation. Their appeal was rejected in the latter court, and the decision given in the first Court was confirmed.

BAMBERGER v. SCHROEDER,

The hearing of this case, instituted by Mr. C. Bamberger against Mr. F. Schroeder, claiming yen 50.85 for boarding expenses, etc., for twenty-three days, and a counter-claim by defendant for yen 100 for damage done certain articles by a fire which occured on Jan. 24th this year, was resumed on April 12th in the Yokohama Local Court before Judge Kobayashi.

Mr. Iwano, police inspector of the Kaga-cho station, and Mr. and Mrs. C. Bamberger were examined as witnesses.

The policeman stated that fire broke out on Ine policeman stated that here broke out on Jan. 24th at 2.40 p.m. in the Central Hotel No. 74, Yamashita-cho, then in the occupation of Mr. C. Bamberger. The original place of the accident was a room in the upper story which Mrs. Bamberger occupied and where an oil stove was left burning when she left to take a walk. In less than an lower all the contractions of the contraction of the cont walk. In less than an hour, all the rooms on the upper floor were destroyed. The cause was not exactly known but witness believed that it was attributed to an explosion of the stove.

Mr. Bamberger stated that defendant was lodging at his hotel when the accident occurred. Witness did not know how the fire broke out on Jan. 24th. He also did not know what articles cused Mr. Schroeder was keeping in his room, but after The the accident, witness saw among the debris a cabinet, a box, etc., which were said to belong to his guest.

Mrs. Bamberger stated that she always attended to the rooms of guests. Mr. Schroeder lodged in a room in the upper story, but on the day of the fire he was absent in Tokyo. She was in Mr. Schroeder's room about a week before the fire to clean it, when she saw there a small table with a marble top, a number of chairs, and an old carpet belonging to him. She however, did not know whether Mr. Schroeder had a blanket, a feather pillow, mattress, etc., in his room. She did not know the value of articles which she saw in Mr. Schroeder's room. She left an oil-stove in her room when she went for a walk. The stove was burning in its usual manner. The wick of the stove-lamp was about half an inch and the stove was about three feet in height.

The case was adjourned till April 28th.

BREACH OF CONTRACT.

Judgment was given on April 12th in the Yokohama District Court by Judge Danno, in the case filed by K. Okazaki, bicycle dealer against Messrs Bruhl Freres claiming yen 1,690 from defendants firm with costs. defendants' firm with costs.

It may be remembered that on Oct. 12th, 1901,

plaintiff made a contract with defendants to purchase seventy-five bicycles at the rate of sixty-one yen apiece and these were to be delivered not later than Dec. 31st the same year. Plaintiff paid yen 250 as bargain money to defendants in advance. Bruhl Freres delivered twenty-five bicycles only within the contract time and the remainder were not delivered on April 1892, when the latter urged the delivery of the remaining bicycles. The machines were never delivered, and plaintiff sustained damage in consequence. The amount claimed was the difference between the price plaintiff promised to purchase the fifty bicycles at and the price he promised the third persons to supply the bicycles at.

CLAIM FOR DEPOSIT.

The hearing of a case filed by J. Toki, for-merly employed by the Singer Manufacturing Company, against that firm, claiming the return of three Government loan bonds of the total face value of yen 150, which were deposited with the firm as a guarantee when he entered their service on Feb. 7th last, was resumed on April 14th in the Yokohama District Court before Judge Danno.

As an alteration had been made in the com-position of the Court owing to the presiding Judge having been removed to the Tokyo Appeal Court, Counsel repeated their former statements made on Nov. 26th last. After some further questions between the parties, plaintiff's Counsel asked the Court for leave to examine S. Sakurai, one of the clerks in the Kyoto branch of the defendants' firm, as a witness. The Court decided to instruct the Kyoto Local Court to examine him.

The Court then rose.

HAIM v. BRETSCHNEIDER.

The hearing of this case, in which plaintiff claims yen 1,413.25, was resumed on April 1,4th in the Yokohama District Court before Judge Danno.

The Court announced that Mr. J. D. Hutchison, a member of the Foreign Board of Trade, whom plaintiff's counsel has asked the Court to summon as an expert on the commercial usage of the port, had written saying that he found it im-possible to explain the point raised by plaintiff. Defendant's counsel asked the Court to examine Defendant's counsel asked the Court to examine T. Hayashi, a porcelain dealer, as a witness with regard to the samples of plaintiff and the goods made by defendant. The Court gave consent and declared that it would summon a competent business man, foreign or Japanese, to prove a mercantile custom in this city.

The case was adjourned till May 3rd.

AMERICAN TOPICS.

Mr. David Sears, a wealthy bachelor of Boston, has given Harvard \$250,000 as a testimonial of his regard for President Eliot, who has just arrived at the venerable age of 70 years and com-pleted his thirty-fifth year as President of the that there was a deficit in the current expenses of the university and Mr. Sears, who is a graduate of Harvard, offered to make the shortage good.

Reports are again current that the Rock Island Railroad Company is determined to build ... line of its own to the Pacific Coast. Surveys have been made lately which indicate that it is the intention to start the new extension from either Benson or Douglas, on the line of the El Paso and Northeastern road, and build it through to San Diego, Cal. From San Diego the news comes that the promoters of m local enterprise seeking for a direct outlet to the East from that city are working in the interest of the Rock Island.

New York commercial interests are becoming concerned over the future accommodation for the big new Cunard steamships in that port. The longest docks are 800 feet long and as the construction of the vessels will not allow them to enter the full length, the sterns project into the channel forty feet outside the head. The prob-lem of increasing the length of the slips is made difficult to solve, because the War Department

will not consent to the lengthening of the piers to tooo feet, on the ground that it will impair the value of the channel of the North river. Some rival Eastern ports are offering to build docks 1000 feet long to accommodate the big steamships, and Bruhl this is worrying New Yorkers.

> The Ogden-Lucin cut-off, eliminating 145 miles of the main line of the Southern Pacific over Promontory mountain, and shortening the road by forty-three miles, was opened to regular traffic on March 8th. The first train to cross the great Salt Lake was composed of thirty-five cars of Asiatic freight. This made the run over the new by forty-three miles, was opened to regular traffic on March 8th. The first train to cross the great Salt Lake was composed of thirty-five cars of Asiatic freight. This made the run over the new road, which includes forty-three miles of trestling through the briny waters of the lake, in seven hours less time than would have been required by the Promontory route. The completed cut-off has cost \$6,000,000 and is the most difficult piece. the Promontory route. The completed cut-off has cost \$6,000,000 and is the most difficult piece of railroad engineering of the past twenty years. Several miles of the bridging across the Dead Sea of America required spliced piling 130 feet long.

Labour troubles, as a result of which many thousands of men in New York are idle, again threaten the industrial world of the United States, and the situation is expected to become as serious as the memorable troubles of a year ago. In the building trades it is estimate that 20,000 men are now out of work in New York, and that they will be increased almost daily, In addition, the printing trades are threatened by the attitude of the lithographers, 10,000 of whom are expected to be locked out throughout whom are expected to be locked out diffugition the country. The various unions of the Allied Lithographing Trade organizations decided not to accept the arbitration plan proposed to them by the Employers' Association. The arbitration plan was submitted individually to every workman employed by a member of the association and they were told if they did not accept the plan they would be locked out. If the men refuse to sign the agreements more than 10,000 men will be locked out. The lockout will extend all over the United States and also to Canada.

The Marquise de Merinville, who was Miss lary Gwendolin Caldwell, a Kentucky beauty and heiress, and who gave \$300,000 to found the Catholic University at Washington, is critically ill at the Buckingham Hotel, in New York.

The Marquise, who arrived from Paris, is suffer ing from a complication of diseases, has lost her heaving and is always treatly being. hearing and is almost totally blind. Marquise's mother was a sister of John C. Breckin-ridge, one time Vice-President of the United States. She inherited \$5,000,000 from her father, William Shakespeare Caldwell, and \$500,000 from her mother. She was once engaged to marry Prince Murat, son of the King of Naples, but broke the engagement because of the Prince's but broke the engagement because of the Prince's demands that he be given absolute control of her fortune. She was married to the Marquise de Merinville in 1892, Bishop Spalding performing the ceremony. Five years ago she was given the Laetare medal by the University of Notre Dame for her services to the Catholic church,

Official announcement was made at the Navy Department in Washington on March 21st, by Rear-Admiral Henry C. Taylor, Chief of the Bureau of Navigation, of a number of changes in the ships on the European, Caribbean, South Atlantic and Asiatic squadrons. The European

ping trade between the United States and the Philippine islands, as passed by the Senate, is quite different from the original bill, several amendments having been accepted which changed the effect of the bill in important particulars. The most important, of course, was that extending until July 1, 1905, the date when the coastwise laws shall go into effect between the United States and the Philippines. Another amendment excepts supplies for the Army and Navy from the supplies for the Army and Navy from the inserts section 6 of the Philippine revenue act of March 8, 1902. This section provides that the same tonnage shall be collected on vessels from same romage shall be confedence on vessels from the Philippines coming into the United States as is collected on vessels from foreign countries, ex-tends to July 1, 1905, the date of the application of the coastwise laws, and authorizes the Philippine Commission to issue licenses for lightering.

Rear-Admiral Charles O'Neil, U.S.N., was retir-Rear-Admiral Charles O'Neil, U.S.N., was retur-ed on March 15th on account of age. He was then detached from duty as Chief of the Bureau of Ordnance and assigned to make a personal inspection of the principal ordnance establish-ments in the United States and Europe. He is authorized to extend his researches to China and Japan. Rear-Admiral O'Neil was succeeded by Rear-Admiral George A. Converse of the Bureau Rear-Admiral George A. Converse of the Bureau of Equipment, whose place has been taken by Rear-Admiral Henry N. Manney. Rear-Admiral O'Neil since 1897 has been chief of the Naval Bureau of Ordnance. The Admiral entered the Navy in 1861 as master's mate on the Cumberland, and was present at the capture of Forts Hatteras and Clark in August of that year. He fought in the famous engagement with the Merrimac in 1862, and on that occasion rescu-ed Lieutenant Morris from drowning. He was promoted to the rank of Rear-Admiral in April, 1901. Since assuming charge of the bureau Admiral O'Nell has devoted himself to the improvement of the guns, mounts and various munitions of war essential to naval vessels, and to such parts of the naval establishment as pertain to the Bureau of Ordnance, especially the magazines and navy yards. During the war with Spain the duties of this bureau were very onerous, as it devolved upon it to a keep all the vessels of the Navy, both at home and abroad, fully supplied with ammunition of all kinds, and to rapidly accumulate m reserve supply.

A devil fish has been caught under remarkable circumstances at Port Simpson by George Rudge, the officer in charge of the tide gauge, which was established there in November, 1902, by the tidal and current survey branch of the Department of Marine and Fisheries, Ottawa. The gauge is a small self-registering instrument placed in a sheltered box on a wooden column or tide well made of a plank placed arginst the side of the made of a plank placed against the side of the wharf. This well is about fifteen inches square and extends from about three feet above the top canantic and Asiatic squadrons. The European of the wharf to five or six feet below the level squadron hereafter will comprise the protected cruisers Olympia (flagship), Baltimore, Cleveland and Des Moines. Later, the squadron will be augmented by the new protected cruiser Denver.

The well is made water tight to keep out the wave motion with the exception of a small inlet in one side near the bottom, one-augmented by the new protected cruiser Denver. This squadron will return to European waters also keeps out all foreign matter that might interest accompanied by the new protected cruiser Denver. This squadron will return to European waters also keeps out all foreign matter that might intersome time between April 15th and May 1st, accompanied by the battle-ship division of the North Atlantic fleet. The armoured cruiser New York, protected cruisers Atlanta, Montgomery and Detroit, and the gunboats Bancroft and Nashville and a number of smaller vessels will be added to the Caribbean squadron for the purpose defent in the isthmus, in consequence of the beginning of the isthmus, in consequence of the beginning of the Panama canal. The San Francisco, upon her arrived at Shanghai, will be attached to the cruiser squadron of the Asiatic fleet.

Senator Frye's bill for the regulation of the ship-Senator Frye's bill for the regulation of the ship- trying to climb up the sides. This at once ex-

plained the breaking of the wire, the octopus evidently catching the float and breaking the evidently catching the float and breaking the copper cord. After two hours' hard fighting the octopus was finally fished out on to the wharf by means of spears. Its weight was eighty pounds, and the arms were from eight to nine feet in length. The question is, How did the octopus get there? The only opening was the one-half inch inlet at the bottom of the well. The devilfish must have got in when very small and kept on growing until he became strong enough to do the damage mentioned. The gauge has only been in operation one year, and supposhas only been in operation one year, and suppos-ing the fish to have been washed in when first placed there, its growth at that rate is about eighty pounds a year. Another puzzle is what the devilfish lived on.

NEWS FROM VARIOUS SOURCES.

"First Class Men," a military novel on the pattern of Lieutenant Bilse's book, "A Little Garrison" (which related incidents of the abuse of German soldiers, told alleged actions dis-credible to officers, etc.), was confiscated in the Berlin book stores on March 2nd.

Mr. Charles M. Schwab, former president of the United States Steel Corporation, who is not touring Europe, broke the bank on February 27th while playing at Monte Carlo. His play at the table was watched by m great crowd of men and women. This is not the first time Mr. Schwab has accomplished the feat.

A dispatch to the London Daily Mail from Sydney, New South Wales, announces the sensational discovery of gold at Norseman, Western Australia. Forty ounces were extracted in the course of as many minutes and 400 ounces were taken out in a day. Many nuggets of pure gold have been found. Diggers are rushing into the

An attempt was made on March 18th to blow up the Odessa University. Two bombs were exploded, breaking down an inside wall and shaking the quadrangle. Nine other bombs were discovered, the fuses of which had failed to act. It is believed that an attempt was made to has returned via Shanghai to Nagasaki. revenge the wholesale expulsion and arrests of students. Two students have been arrested on suspicion.

The present year, it is hoped, says a London paper, will witness a revival of the days of chivalry, which formed the most dazzling point in the Middle Ages, and proved one of the bright up to April 9th.

Small-pox is still prevalent in Nagasaki prefecture, the cases having numbered over a hundred in the Middle Ages, and proved one of the bright up to April 9th.

Mr. Kubota Beisen, a well-known artist, left to revive the famous Eglinton Tournament of 1839, for the benefit of the King's College Removal Fund, providing that the thousand and one details which a performance of the kind entails can be satisfactorily arranged. Many influential houses are much interested in the scheme, and both the Duchess of Portland and the Duchess of Sutherland are expected to lend their influence to its promotion. It is impossible to say at present who will be the Queen of Beanty, but it is thought that either Princess Henry of Pless or Lady Castlereagh may consent to hold the proud position.

Radium treatment for cancer has been entirely abandoned at the Cancer Hospital in London. It was never viewed with much hope there, and in the early days of March the last unsuccessful experiment with it took place. According to the experiment with jt took place. According to the Bishi Shipbuilding Yaru, Nagasan, is expected to Daily Mail, the trials were made at the end with a case containing five grains of radium, covered only with mica sheeting, probably the largest morsel in any hospital in Europe, and the who has been suffering from consumption for effect was always the same, though it might some years past, died on April 13th. Mr. James C. McNally, U. S. Consul at Liege, Belgium, writes: "The Company Du Val St. Lambert of Liege is manufacturing a hardened crystal dish which in appearance closely resembles fine translucent china of uniform shape and manufacture. The resisting power of this ware is due to a special hardening process and to the quality and nature of the crystal used. It not only successfully resists the usual wear and tear, but is almost proof against breakage. "A hardened crystal dish can be substituted for a hammer in driving nails into wood, while the same ware can be put into boiling water at high degree, then plunged into ice water repeatedly without the least noticeable damage to the dish or plate. "The writer has seen plates of the usual form of this hardened were hurled to the stone floor of the warehouse and go bounding along the whole length of the building without suffering the least damage. This same firm makes glassware of the same corresponding resistance."

TEA REPORTS.

A small quantity of new tea was brought on April 12th to the Hamamatsu market. The quality proves to be good.

An Asahi's telegram states that the weather is generally favourable to the tea crop. Nothing is to be feared but frost, in the absence of which the crop will show an increase of over ten per cent. as compared with last year.

The output of tea in the district of Izumi is said to be good, but the crop is expected to be smaller than in the previous year.

A telegram from Tsu, Miye prefecture, says that the tea crop is expected to be good as the weather is very favourable.

The Nankai Railway Company intends to amalgamate with the Kinki Railway Company, for which purpose the former will hold a general meeting on April 19th.

Li Chi-yong, Korean Special Envoy to the Japanese Court, and party were expected to arrive on April 21st at Tokyo. They will put up at the Seiyo-ken, Uyeno Park.

We are told that the Committee elected by the American Asiatic Association to carry out the Perry Memorial Pledge, are Messrs. F. Horne, L. H. Abel, and C. F. McWilliams,

The Governor of Nagasaki prefecture reported on April 7th that ten cases of small-pox appeared that day. Since February, the number of patients is calculated at a hundred and twenty

The net profit of the Kwansai Railway Company for the last half year was yen 555,193.75 and an interim dividend is expected of five per A general meeting will be held on April

Eighteen Chinese students from Hupeh, re-commended by Viceroy Chang Chi-tung arrived on April 10th at Yokohama by the steamer Bengloe. They left immediately for Tokyo where they are to attend the Kobun Gaku-in

According to the Official Gazette, Count von Arco Valley, German Minister at Tokyo, on April 5th informed the Japanese Government that Dr. Sallmans arrived on March 30th to take the place of Baron Von Stengel as Vice-Consul at Voko-

A Saseho telegram states that the Russian Government presented twenty-five yen on April 10 through Mons. T. Harmand, French Minister at Tokyo, to the Russians who are in the Saseho Naval Hospital. The day was a Russian national

A burlesque on Mr. Tree's Japanese play has been brought out at the Prince of Wales's Theatre, London, with Arthur Roberts and Edna May as principals. It was called "The Darling of the Guards—a skittle in one throe and seven Japanese screens."

Mr. K. Yokoda, Public Procurator-in-chief of the Tokyo Appeal Court, was on April 7th, appointed Public Procurator General of the Court of Cassation. He is succeeded by Mr. Y. Kuratomi, Public Procurator-in-chief of the Osaka Appeal Court.

At a billiard match which took place recently at the Japanese Club, Ki-yu-ken, in Yokohama, Mr. A. Bosredon, a French amateur, scored 207 points in a break, playing with three balls. Such a performance on the billiard table, is equal if not superior, to that of many a professional player.

The Asahi states that a Norwegian steamer with contraband of war was captured on April 3rd by Japanese in Korean waters and brought to a certain base. A hundred thousand tins of corned beef valued at about a hundred and fifty thousand yen were confiscated and landed on the 6th at Shimonoseki.

The formal opening of the Florence Crittenton Rescue Home will be held on May 14th. Articles for sale, the proceeds to go to the sustenance of the Home, are solicited. Will the ladies send all their articles for sale on that occasion to Mrs. J. K. McCauley 356 Hyakunin Machi, Okubo, Tokyo, on or before May 10th.

Mr. Akidzuki and other members of the former Japanese Legation at St. Petersburg arrived at Nagasaki on April 7th by the German Mail steamer *Prins Heinrich*. Mr. Kurino will arrive by the next steamer. The Nichi Nichi adds that two Norwegian officers and two German officers arrived by the same steamer on their way to the front.

The pretty saloon of the P. & O. steamer

Palawan was turned into a veritable fairy bower on Monday evening, loving friends of Mrs. Dodds, who with her husband and daughter is proceeding to England, sending baskets, bouquets, and clusters of beautiful flowers as parting gifts. A particularly handsome basket was sent by H. E. Governor and Madame Sufu.

The weekly report telegraphed on April 8th by Mr. Uchida, Japanese Consul General at New York says that owing to the fall in prices, transac tion in raw silk have increased while the habutan silk market is still dull, though prices are tending downward. The matting market is also inactive and there is no demand. Cotton is steady, the closing quotations were cents 15 for present delivery, cents 14.76 for May delivery, and cents for August delivery. The stock was 14.45 for At 720,787 bales.

On Friday there took place at the Grand Hotel, the marriage ceremony of Mr. J. H. Rosenthal and Miss Gertrude M. Stern, of New York The bride looked very charming in her wedding dress and was accompanied by several friends, while a number of Mr. Rosenthal's friends were present and the U. S. Consul-General attended as a guest and witness. The ceremony was performed by Acting Rabbi L. Abenheim, the wedding march being played by Mr. W. K. Vincent, and afterwards, a wedding tiffin was given in the private dining room of the Grand Hotel at which about forty guests were present. Later the happy couple departed on their honeymoon.

The performances on Saturday evening at the Public Hall by Professor Grossi and Mme. Roux deserved a far better house than they were accorded. The gallery was only about half filled and there were some fifty people in the body of the hall, by whom the various feats were watched with the dentest interest despite the for their to reasy the deepest interest, despite the fact that to many the language spoken, French, must have been unfamiliar. The general verdict was that the "show" was a rattling good one. The Professor is a first class artist and his novelty illusions were exceedingly clever; Mme. Roux was hardly less successful in her mind reading, and the programme altogether was well worth being seen. Performances will be given this evening and on Tuesaay evening and they certainly will be appreciated by all who attend them.

RICE.

Vernacular papers agree in reporting that owing to the present weather, the new crop of barley and wheat is anticipated to be prolific. This expectation has affected the rice market and caused a fall in prices. The closing quotations in Tokyo on April 12th and 13th were:—

CUSTOMS APPEAL.

Baron Sone, Minister of State for Finance, says the Official Gasette, delivered a decision on April 13th on an appeal filed by Mr. Charles V. Sale, the representative of Messrs. Sale and Com-Sale, the representative of Messrs. Sale and Company, L'td, against a decision of the Yokohama Customs. The firm imported some mild steel bars on Dec. 31st, 1902, and produced the certificate of origin, on which the Yokohama Customs imposed a duty in accordance with No. 241 of the tariff. The importers protested but their petition was rejected. They thereupon lodged an appeal with the Department of Finance contending that the duty should be levied under No. 217 of that the duty should be levied under No. 217 of the tariff. The appeal was sustained.

CORRESPONDENCE.

A PUBLIC NUISANCE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The daily appearance of some half dozen beggars on the Maidabashi is a common nuisance. Some ladies pay them 5 sen whenever they pass the bridge, not liking to be followed by these fellows farther. I request the authorities to sweep the bridge clear of them at once.

Yours, etc., PRO BONO PUBLICO,

Yokohama, 9th April, 1904.

(To the Editor of the "Japan Mail.") SIR:—The following extract from Ice & Cold Storage of Feb. 15th may be of interest to your readers in view of the recent suggestions in your paper that a cold store should be started at Yokohama for the importation of frozen meat from New Zea-land, as it illustrates an interesting development in

COLD STORAGE.

cold storage :--"What one of the builders claimed to be the most up-to-date fruit-carrying steamer that had yet been constructed, viz, Eiders and Fyffe's s. s. Matina, was launched last month. The refrigerating machinery (J. & E. Hall's) and cooling rooms are situated on the upper deck, the engine room being at the after end, and the cooling room at the forward end-of the casing. She is to trade between Manchester and Port Limon, and will go out in ballast and bunkers. Mr. Barker, of Elders and Fyffes, mentioned after the experiment of bringing loose bananas to this country under the cool air system was tried. It had proved a complete success, and when, in addition to their present fleet, the new boats are running, which will carry 48,000 bunches each, his company will maintain a weekly service from Port Limon to Manchester and their importations of bananas from Port Limon and Jamaica will amount to some 2½ million bunches "What one of the builders claimed to be the most and Jamaica will amount to some 2½ million bunches annually, bringing the gross yearly total of importation up to about five million bunches. When it is borne in mind that previous to the adoption of the borne in mind that previous to the adoption of the cool-air system the annual importation amounted to only 1½ million bunches, it will be realised what a tremendous impetus it has given to the trade in this fruit. A sister vessel is on the stocks in the same yard at Newcastle, and she will probably be launched this month; and a third is being built at Glasgow. The four boats at present running into Manchester on this service will be diverted to Bristol."

The importation of bananas, as mentioned above, is effected by the maintenance of some 80.000 cubic feet of space at a perfectly steady, cool temperature, by means of J. & E. Hall's patent carbonic anhydride refrigerating machines.

There are no brine pipes in the holds, but cool, dry air is circulated by steam fans, first over batteries of brine pipes, and afterwards throughout the holds by means of a specially arranged system of air trunks. The volume of air being very large and well distributed, the variation in temperature in the holds is exceedingly small.

is exceedingly small.

The efficiency of this arrangement has amply been attested by the arrival of many cargoes in splendid condition on board the vessels of the Imperial Direct West Indian Mail Service, thus opening np a new trade with the West Indies, the commerce of which has been languishing to the extent of causing serious apprehension to various Colonial Ministers since the sugar trade was practically paralysed by the bounty-supported competition of beet sugar from the continent.

I am, yours, etc., VIVIAN SANGUINETTI.

Tokyo April 8th 1004

Tokyo, April 8th, 1904.

THE CASE OF MR. JOHN COWEN.

(To the Editor of the "Japan Mail.")

(10 THE EDITOR OF THE "JAPAN MAIL.")

SIR,—I enclose a cutting from your valued journal referring to me by name, and stating "Probably the Consul's action has been prompted by some reason quite apart from the general tone of the newspaper," and that "the story as it stands is scarcely credible." I agree that it is scarcely credible, were it not the fact. I enclose a longer statement, the accuracy of which is disputed in no quarter. I wish to demur to your suggestion that some other offence of mine has prompted the consular action. The steps taken against me were taken under a criminal section of the Orders in Council, and your words therefore give the Orders in Council, and your words therefore give rise to the idea that I have committed some crime the nature of which you do not know and which you leave your readers to guess at. Thus you are doing me a grave injustice, though I feel sure that is not your intention. In the latter case, an accurate state-

ment of the case in the Japan Mail would rectify

Yours truly. IOHN COWEN.

Yours truly, JOHN COWEN, [Mr. Cowen encloses copy of the subpoena served on him on Feb. 25, which we reproduced in full in these columns on March 23rd, and a verbatim reprint of the article entitled "Military Authorities v. The Press," which appeared in the China Times on March 7th, and which we reproduced in the Japan Daily Mail on March 23rd.—Ed. J. M.]

DOWN WITH THE RUSSIANS.

TRANSLATED FROM THE JAPANESE FOR THE "INDEPENDENT."

[I have made the following rough translation of a poem written by one of the students of the Higher Commercial College, Tokyo. I venture to hope that it may prove interesting as throwing light on the hopes and fears that are so tumultuously at work in Japanese breasts just at the moment.—A LLOYD.]

anese breasts just at the moment.—A LLOY
Hark! o'er Liaotung's wintry coasts
Hear ye no wail and shriek of ghosts,
Of men who fought 'midst battle's shocks
Those yellow sands and snow-clad rocks,
While every night there comes the roar
Of raging strife the dark waves o'er?
No trace of that just war remains;
But see, o'er Chosen's fertile plains
Dark lowers the sky, and when to rest
The sun behind Chopaku's 'crest
Has sunk, what fate awaits the line
That ruled so long by right divine?

Hark! At the Cossack's hattle cry Hark! At the Cossack's battle cry, Trembles and falls as though to die The ancient king-craft of the East. Say when the love that Heaven's priest, In letters common to us all.⁴ Confucius taught, shall fade and fall, What doom awaits the myriad fold In those wide lands that bear the yoke? Pity your brettern if you can. Pity your brethren, if you can; Rise, rise, and strike the foes of man.

When Amur's stream was dyed with red, Thousands were numbered with the dead; Still murder wrought her deeds of hell, And Kishineff its tale can tell. Of bloodshed. Soldiers of the Czar, They call themselves, but thieves they are; And History, blushing, dreads to pen Crimes that cry out to God and men.

Thou spak'st of peace: is this thy troth And shall the mouth that swore the oath Now have Manchuria for its prey? No. In the East, where the young day First sees the world, there lies a land, Fuso® by name. Her stalwart band, With blood-stained blades, shall never cease To offer to thy God of Peace.

When lovely Peace on Eastern shores Her holy light once more outpours, Then, the wise Trade God's Staff' in hand, We'll build the glories of our land, But now that, on the battlefield, Flashes the steel, to you we yield The post of honour. Strike apace, Brave scions of a martial race.

Brave Scions of a martial race.

**That just new-i.e.*, the sure between China and Japan in which her "ghouss" host their lives. The Japanese took Port Arthur in hat war, and were much annoyed when Russia, Germany, and rance compelled them to give is tup.

Chosen i.e.*, Korea.

**Chospoke—the name of the range of mountains which runs down he middle of Korea, forming a sort of backbone to the peninsula.

**In letters common to us—i.e.* the Chinase acript, which is used qually by Japan, China and Korea. Confuctus is equally vecred in all three contairies.

**America Tracem—the reference is to the massacres at Blagovest-

chensk.

 Fixes—a poetical name for Japan.
 The Trade God's staff—Mercury's staff is the badge of the Higher Commercial College.

ISABELLA II. OF SPAIN.

Isabella II. (Maria Isabella Louisa) ex-Queen of Spain, whose death is anuounced by telegraph, was born at Madrid on Oct, 30th, 1830. Her father, Ferdinand VII., had been induced, by the influence of his wife, to issue the Fragmatic Decree, revoking the Salic law; and at his death, Sept. 29, 1833, his eldest daughter, then a child, was proclaimed Queen, under the regency of her mother, Maria-Christina. This event proved the signal for civil warfare, as the claims of the late king's brother were warmly supported by certain classes of the people. The war of succession lasted seven years, and the country was desolated by the struggle between the contending Carlist and Christina parties, until the Cortes confirmed the claims of Isabella by pronouncing sentence of exile on Don Carlos and his adherents. In 1840 the Queen-regnant, finding it impossible to carry on Isabella II. (Maria Isabella Louisa) ex-Queen of the Queen-regnant, finding it impossible to carry on the Government without making concessions to public feeling for which she was indisposed, retired

France, resigning her power into the hands of Espartero, whom she had been previously compelled to summon to the head of affairs. For the following three years, whilst that constitutional leader was able in great measure to direct her education and training, the young Queen was subjected to purer and better influences than she had before experienced. She was declared by a decree of the Cortes to have attained her majority, Oct, 15, 1842, and took her place among the reigning sovereigns of Europe. Maria-Christina returned to Madrid in 1845, and her restoration to influence was marked by the marriage of Isabella II. to her cousin, Don Francisco d'Assisi, the elder son of her maternal uncle, Don Francisco de Paula, which took place Oct. 10, 1846. Sacrificed to the intrigues of a party whose interests were based on this uncongenial union, Isabella II. never knew the beneficial influence of domestic happiness; estrangements and reconciliations having succeeded each other alternately in her married life. It deserves special mention, however, says Men and Women estrangements and reconstanting starting starting each other alternately in her married life. It deserves special mention, however, says Men and Women of the Time, from which we take the above, that during her reign Spain rose to take rank among the great powers of Europe, while the internal progress of the country advanced with rapid strides. On Sept. 16, 1868, a great revolution broke out in Spain, starting with the fleet off Cadit, and gradually spreading over the whole peninsula. The speedy result was the formation of a Republican Provisional Government under Frim, Serano, and others at Madrid, and the flight of Queen Isabella to France. On November 6 her Majesty took up her residence in Paris, where she remained during her exile, with the exception of an interval spent at Geneva during the Franco-Prussian War. On June 25, 1870, she renounced her claims to the Spanish throne in favor of her eldest son, the Prince of the Asturias. After eight years of exile she returned to Spain, and was received eldest son, the Prince of the Asturias. After eight years of exile she returned to Spain, and was received at Santander by her son, the late King Alfonso XII. (July 29, 1876). Queen Isabella has had five children: 1. Infanta Marié-Isabel-Francoise-d'Assise-Christine-de-Paule-Dominga, born Dec. 20, 1851. 2. Alfonso XII., late King of Spain. 3. Infanta Maria del Pilar, born June 4, 1861. 4. Infanta Maria della Paz, born June 23, 1862; and 5. Infanta Maria Eulalie, born Feb. 12, 1864.

AMERICAN ASIATIC ASSOCIATION.

A General Meeting of the American Asiatic Association was held on Friday afternoon at U. S. Consulate, Yok-hama, to take action upon the pledge given at the recent Perry Memorial service held in I okyo, on which occasion the Association contributed its promise to raise ten thousand yen for the Perry Relief Fund for the families of Japanese soldiers and

sailors at the front.

Mr. N. F. Smith, the President, set forth the object of the meeting in the following address:—Aluttle over a stone's throw from where I am now standing, fifty years ago last Thursday, the 31st of March, Commodore Perry concluded and signed a treaty with Japan, the principal feature of which was to provide a system for the relief and aid of the ship-wrecked and destitute. It was a modest and simple document, bearing upon its face and reflecting from every feature of its expression the noble and Godgiven principles of humanity and charity. To commemorate this event, as most and perhaps all of you are aware, a meeting was held at the Y. M. C. A. Hall, in Tokyo, at which there was a large and enthusiastic gathering composed of prominent American and Japanese citizens who vied with each other not only in recording in eulogistic terms expressions of affectionate respect to the memory of America's pioneer sailor—out own Perry, whose ashes we revere; but there was also strongly in evidence an interchange of sympathy and feeling both in speech and song, culminating in an inspiration to make the occasion one never to be forgotten, and striking the keynote that appeals to the most noble and humanitarian sympathies; and which, if curried out effectually, will make the name of Commodore Perry a household word belowed and revered by the hundreds of thousands of sailors and soldiers of Japan who have been called from their homes in the service of their country, and whose families will receive succour and help from the large assistance we hope to give in this direction through the Perry Relief Fund. This meeting was convened sailors at the front.

Mr. N. F. Smith, the President, set forth the object families will receive succour and help from the large assistance we hope to give in this direction through the Perty Relief Fund. This meeting was convered by the American and Japanese citizens in Tokyo, and when notice reached Yokohama that such a gathering was in contemplation, it was too late to call a special meeting of our people in Yokohama for the purpose of making plans by which we might participate as a body in the general programme of this Memorial function. Circumstances over which I had no control prevented my attending personally, but we were, not-withstanding, well represented by several members of our Executive Committee, to whom we should feel greatly indebted for the graceful and liberal programme in which they supported the initiatory motion so unanimously endorsed for the relief of those who have been deprived of the support and

protection of husbands, fathers and sons object of calling a special meeting of our Association this afternoon, is to submit our report as a Committee, of the proceedings which took place at Committee, or the proceedings which took place at the Memorial meeting, and to place before you the position that all American chizens occupy in relation to it. Pledges to the extent of over yen 65,000, were spontaneously contributed toward the support of this grand and praiseworthy object, and I feel sure that we, as an Association, are prepared to endorse the guarantee made by our able representative on the contribution with the sum of well 10,000. I would the guarantee made by our able representative on the occasion, to wit, the sum of yen 10,000. I would say that some 8,000, have already been subscribed towards this amount by members of our Association, so that we are still sponsors for about yen 2,000 more to make the balance of our guarantee good. And as your President, I do not feel warranted nor do I think it necesary to appeal to you to support the integrity of an institution such as I am proud to say ours is, so representative a type of united American interest and national brotherhood. At last Thursday's meeting, a committee was appointed and designated the Perry Memorial Relief Fund Committee, and as the humble president of that committee, I beg to ask that you memoral Relief rund Committee, and as the numble president of that committee, I beg to ask that you will bear with me while I give you an outline of what, perhaps, will constitute the text of our appeal to all American citizens, both in Japan and in our own country. First; that it is not the purpose of our Committee to compete or interfere with any other similar projects that have been already started, but a supplement them, and endeavor to reach purpose. Committee to compete or interfere with any other similar projects that have been already started, but to supplement them and endeavour to reach sources that would not otherwise be touched. Second: In appealing to the American public for subscriptions to the fund, the Committee wish it to be clearly and explicitly understood that this charity is beyond the pale of politics and that its object is solely and purely humanitarian. Our aim and endeavour will be to give assistance to the needy and suffering families of the soldiers of Japan who have been called to the front fighting for their country. In order that subscribers may be assured that the funds committed to our care will be honestly and intelligently disbursed, we add the assurance that the administration and distribution of all moneys (hat come into the hands of our Honorary Treasurers, Mr. B. C. Howard, of Yokohama and Mr. J. Soeda, President of the Industrial Bank, Tokyo, will be under the authority and direction of His Imperial Majesty, the Emperor of Japan. It is not at the instigation of the Japanese people who have given it their enthusiastic and generous support that this movement was started, but by American citizens, who have long been resident in Japan and who have learned to love the country and in many to respects admire its zendle people. The Committee who have learned to love the country and in many to respects admire its gentle people. The Committee feel justified, therefore, in calling upon their countryneer justined, therefore, in calling upon their country-men to aid a cause, which must appeal with equal force to all clases and conditions, and to all sections. We appeal to our soldiers and sailors, because they have had the experience and know the destitution and misery that must necessarily come to families suddenly deprived of the bread winner. We appeal to the business man, Chambers of Commerce, Boards suddenly deprived of the bread winner. We appeal to the business man, Chambers of Commerce, Boards of Trade and similar organizations, on account of their interests which are largely staked on the result of the present war; To the churches and religious organizations of all descriptions, since from them we have m right to look for assistance in a cause which is so manifestly deserving. To the labouring man, because he has perhaps already known distress and will be ready to give aid that on occasions has been so grateful to himself; to the newspapers because they are exponents of the American public, and are able and willing to give; and finally, we appeal to every American citizen on the broad ground of humanity. This is the cause of the widows and the fatheriess, and as such, should demand the sympathy and assistance of all who can realize or have ever known suffering or sorrow. The generosity of the American people is proverbial, and as a more deserving object then the present one has never been presented for their consideration, it is hoped that we shall receive an overwhelmingly generous response. America is Japan's nearest. Western neighbour; we were closely identified with her advent into the sphere of national life, and we have always been on terms of the most cordial friendship. It seems most natural, therefore, that American interest and sympathy should be especially enlisted in this cause. The Japanese have welcomed our advice and cherished our friendship, and we cannot now, without shame, turn a deaf ear to the cry of their fatherless children."

At the close of the address, it was aunounced that

Gibbens, and F. W. Horne were appointed a Committee for this object.

After a hearty vote of thanks to the Chairman the seeting was adjourned.—Advertiser.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

RUSSIAN NAVAL REINFORCE-MENTS.

London, April 8.

From St. Petersburg it is reported that Admiral the Grand-Duke Alexis, in the yacht Svetliana, which is being converted into a cruiser, her woodwork being replaced by iron, will join the squadron starting for the Pacific in June. The squadron will consist of the Dimitri Donskoi, the Oslyabia, the Aurora, four new ironclads of the Csarewitch type, two old and three new cruisers, two old and two new transports, two destroyers, and five torpedo-boats, the squadron also carrying nine submarine boats.

ATTACK ON THE KING OF SPAIN.

A bomb was thrown at King Alfonso while he was visiting Barcelona. He escaped unhurt

THE ANGLO-FRENCH NEGOTIA-TIONS.

Reuter telegraphs that the Anglo-French negotiations have reached their closing stage. Lord Lansdowne and M. Cambon are concluding their conferences to-day. Final reference will subsequently be made to Paris.

THE PRESIDENTIAL CAMPAIGN IN THE U.S.

An excited presidential campaign has begun in the United States. The Republicans will certainly nominate Roosevelt. At present there are two Democratic candidates in the field: namely Chief Justice Parker, and the great newspaper proprietor Mr. Hearst. They are supported by Mr. Bryan and Mr. Cleveland respectively.

TURKEY MOBILIZING

London, April 8. It is reported from Salonika that eighty battalions of Redifs have been mobilized, ostensibly to suppress the revolt of the Armenians, but really destined for Macedonia. It is expected that the Hamidies cavalry will also be mobilized.

GERMAN SOUTH-WEST AFRICA.

Four hundred more German troops have left Hamburg for South-west Africa

THE ANGLO-FRENCH ENTENTE.

London, April 9. The Anglo-French agreement has been signed

MOBILIZATION OF RUSSIAN NAVAL RESERVES.

The naval reserves at Sebastopol have been mobilized, partly to reinforce the crews at Port Arthur and Vladivostock and partly for the Baltic vessels.

SUBSTANTIAL FRIENDSHIP.

The Japanese Consul-General at London has forwarded £11,000, the first instalment of the London fund for the relief of Japanese widows and orphans.

TURKEY AND BULGARIA.

London, April 10.

An agreement between Turkey and Bularia has been signed after prolonged negotiations which at one time threatened to result in a rupture of relations.

THE ANGLO-FRENCH AGREEMENT. In the Anglo-French agreement as regards

emphasizes French recognition of the pre-

Siam the two Powers recognize their respective spheres of influence as established by the treaty of 1896, but they explicitly guarantee the integrity of Siam and the maintenance of the status quo.

EX-QUEEN OF SPAIN DEAD. Isabella, former Queen of Spain, is dead. ENGLAND AND FRANCE.

The Anglo-French agreement is very generally approved in Britain and France. The London press, except the Morning Post, congratulates the Government on what the Daily Telegraph describes as the most satisfactory diplomatic incident recorded for centuries.

PROMOTION FOR THE "CESARE-VITCH'S " COMMANDER.

London, April 11. Captain Gregchrovich, commander of the battleship Cesarevitch, has been promoted to be rear-admiral for his gallantry in the pre-sence of the enemy. He has also been appointed Commander of Port Arthur.

AUSTRIA AND ITALY.

The Austrian and Italian foreign ministers conferred for several hours at Abbazia (in Austria) on Saturday.

THE KAISER.

The Kaiser has landed at Malta.

THE ANGLO-FRENCH AGREEMENT.

The German press regards the Anglo-French Agreement with unfriendly eyes. The Italian press rejoices at its conclusion.

AUSTRIA AND ITALY.

London, April 12. The London Standard's Vienna correspondent says it is anticipated that the result &c., is imminent. It formulates the reciproof the meeting between the Austrian and cal engagements of France and Great Britain Italian foreign ministers at Abbazia will in Siam. be that the agreement between the two countries relating to Albania will be extended to the whole of the Balkans.

CHINA'S NEUTRALITY.

The Morning Post's Chefoo correspondent says that the increase in the anti-foreign policy at present permeating Peking presents grave possibility of China's neutrality being broken soon, despite official assurances to the contrary, by a general upheaval of the people.

GERMAN TROUBLES IN SOUTH-WEST AFRICA.

There has been renewed fighting in Southwest Africa, and the Germans have dispersed 3,000 Hereros after eight hours' fighting. The Germans had three officers and twelve men killed and wounded. The loss of the Hereros was heavy.

THE ANGLO-FRENCH AGREEMENT.

London, April 12. The official text of the agreement between England and France with reference to Siam says that the two contracting parties claim all ideas of annexation of territory and resolve to abstain from anything opthat their actions shall be exercised freely in each sphere of influence east and west of the river Menam.

ADMIRAL MAKAROFF AND STAFF DROWNED.

London, April 13, 4.40 p.m. Admiral Makaroff has been drowned along with the whole of his staff, through the sinking of the battleship *Petropavlovsk*. THE EGYPTIAN QUESTION.

London, April 13. A despatch from Lord Lansdowne to Sir E. Monson, British Ambassador to Paris,

dominant position which Great Britain holds in Egypt. A new Kedival decree, annexed to the de-

claration accepted by France, will, if accepted by the other Powers, give Egypt a free hand

in the disposal of her own resources.

Lord Cromer considers the time unripe for modifying the legislative and judicial systems, but when the time comes Great Britain will have grounds for counting on French cooperation in effecting the necessary changes

THE THIBET EXPEDITION.

London, April 14 The Thibet expedition reached its destiat Gyantsze without losing a single life.

THE "PETROPAULOVSK" AFFAIR.

The battleship Petropaulovsk, returning to Port Arthur, struck a mine which exploded and the ship capsized, Admiral Makaroff and his whole staff being drowned. The Captain, five other officers and 32 men were saved but mostly wounded.

(RECEIVED AT THE LEGATION OF FRANCE.) MOVEMENTS IN KOREA.

Saigon, April 8. According to news from Seoul several Japanese transports carrying provisions have entered the estuary of the Yalu without incident and have landed their cargoes at several points on the Korean side of the Yalu.

THE FRANCO-ENGLISH ARRANGE-MENT.

Saigon, April 9. The signature of the Franco-English arrangement concerning Morocco, Egypt,

FRENCH NEWS.

Saigon, April 11.

Queen Isabella of Spain is dead. A decree institutes a committee of in-

quiry into the state of the Navy.

The arrangement between France and

England is signed. It comprises Newfoundland, West Africa, Madagascar, the New Hebrides and Siam.

England recognises France's right to watch over the tranquillity of Morocco; and France will not interfere with England's action in Egypt.

The arrangement explicitly guarantees the territorial integrity of Siam, recognising entire liberty of economical action by France and England in the Siamese provinces situated respectively to the East and the West of the basin of the River Menam.

Almost all the newspapers of France and England express entire satisfaction with the Agreement.

(FROM THE "JIJI SHIMPO.")
SIBERIAN TRANSPORTATION,

London, April 12. As the ice on Lake Baikal is about to melt, transportation by the Siberian railway is for the time suspended. The construction of the line round the lake will not be completed till August.

ATTEMPTED ASSASSINATION IN SPAIN. A plot has been discovered at Barcelona to assassi nate the Premier.

ADDRESS OF THE CASE OF THE CAS	

And Other Itching, Burning, Scaly Eruptions with Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soap, to anse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to alky itching, irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply humours, eczemas, rashes, irritations, and chafings, with loss of hair, when all else fails.

The agonizing itching and burning of the skin, as in eczems; the frightful scaling, as in psorlasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the navial suffering of infants and the anxiety of worn-out parents, as in milk crust, tetter, and salt rheum, —all demand a remedy of simost superhuman viriues to successfully cope with them. Such are the CUTICURA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by Cuttoura Ointment for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruff, and the stopping of failing hair, for softening, whitening, and soothing red, rough, and sore hands, for beby rashes and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many, sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, instelloss, brated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cares. Fut up in screw-cap pocket viate, containing 60 dores.

CUTIOURA REMEDIES are cold throughout the world. Assiralisa Depot: E. Towns & Co., Sydney. Erikkin Depot: 7-99. Charterbouse Sc., London. French Depot: 5 Bus de la Falz, Furts. Furtzez Barca And Creat. Coler., Soile Frops., Scotton, U.B. A.

WASTE SILK.

There has been rather more doing this week in medium and low grades at quotations. Prices are nominally reduced but good quality is very scarce.

DEATH.

On board the P. & O. steamer Formosa, at Moji, on Monday evening, April 18th, JAMES JOHNSTONE, of Yokohama, aged 60 years.

SUMMARY OF NEWS.

BARONS IWASAKI and Mitsui were decorated on April 18th with the Sacred Treasure of the Third Class.

THE Minister of State for Finance and Baroness Sone proceeded on April 17th to their villa at

CONTINENTAL telegrams report an improvement in Russian feeling towards Great Britain, due to French influence.

THE issue of £5,000,000 worth of bonds on account of the Irish Land Act has been subscribed seven times over.

THE Nippon Fire Insurance Company, Osaka, held a general meeting on April 16th and declared an interim dividend of 7% per cent.

England heat Scotland in the last Association International of the season on April 9th, the score being:—England 1, Scotland nil.

MR. T. HIGUCHI, President of the 2nd Bank, Yokohama, died on the night of April 13th. He had been suffering from brain-troubles since the 454 4th.

figi's Nagasaki telegram reports that the Government intends to purchase a smokeless coal mine, at Amakusa, Kumamoto, belonging to Prince Mori.

R. Takada, a policeman of the Kotobuki-cho station, Yokohama, was arrested on April 15th on a charge of having received a bribe of yen 5.20 from a gambler.

A woman of about twenty years old was found on the night of April 74th killed on the railway near Yokohama station. The police believe that she committed suicide.

JAPANESE gold coins amounting to yen 4,300,000. British gold coins valued at yen 35,146 and French gold coins at yen 3,126 were exported on April 16th by the *China* tor America.

CR KOBAVASHI (78), mother of a merchant in Koishikawa, Tokyo, committed suicide on the morning of April 16th by hanging herself with a cord. Poverty is reported to the cause.

THE condition of Lieut.-General Baron T. Nagayama, who has been suffering from consumption is reported to be very serious. He has been promoted to the Junior Class of Second Rank.

TRLEGRAMS dated April 16th from Maebashi, Fukushima and Karuizawa report that snow fell since the previous night. The tea and mulberry leaves are reported to have been damaged

THE small steamer Tosa Maru, which went ashore off the district of Kuka, Yamaguchi prefecture, was floated on the morning of April 14th. She was brought to Komatsu for repairs.

SINCE the opening of the war Japanese shipowing firms have purchased sixteen foreign ships of 44,060 tons in all. Besides these, four ships representing 9,127 tons, are now under negotia-

THE Nichi Nichi states that on April 14th two trains on the Kyushu railway collided on the section between Doda-gawa and Gotoji. Several persons were killed and injured. Details are still

THE Russian crew of the Ekaterinoslav and seven others captured by the Japanese, who were released at the Saseho Naval station, arrived on April 14th at Nagasaki by the steamer Nagalo Maru. They will leave there for Shanghai.

THE Jiji states that the steamer Yalsuna Maru Insurance Company for thirty thousand yen.

THE kerosene works at Nagaoka, Niigata prefecture, seem to be most productive. The interim dividend of the Takarada Kerosene Oil Company for the last half-year has been declared at twenty per cent, the net profit being four hundred and ninety thousand yen.

The net income of the Nankai Railway Com | Tokyo Appeal Court, this tribunal confirming the Costs were given against both parties, two-thirds pany for the last half year was yen 161,608 and original sentence. The proprietor of the paper against appellants and one-third against the the interim devidend declared is four per cent. will appeal to the Court of Cassation.

THE Osaka Shosen Kaisha's new steamer Tairei Maru (1,300 tons) built at the Mitsu Bishi Ship-building Yard, Nagasaki, performed a trial trip on April 19th, in which she ran at a speed of 12.74 knots. The ship will be delivered this month to the owners.

It is reported by the Official Gazette that Baron Sone, Minister of Finance, has been pro-moted to the Junior Class of the Second Rank, General Baron Yamaguchi, to the Senior Class of the Third Rank; and General Terauchi, Minister for War, to the Junior Class of the Third Rank.

THE residence of the Chief Surgeon of the British Naval Hospital, No. 115 Bluff, was entered on the night of April 15th by a burglar during the absence of the inmates. Twenty-two articles valued at about yen 540, including a lady's neck-lace of pearls to the value of yen 120, were

In connexion with the present state of affairs, prefectural assemblies throughout the Empire have all reduced the expenditures of the local governments for this year. The proposed expenses were yen 48,684,259, from which yen 8,003,731 was cut leaving a balance of yen 40,680,528.

MR. Y. KAMINISHI, Councillor of the Fukui prefectural office, was sentenced on April 15th in the Urawa District Court to two months' im-prisonment with hard labour and a fine of eight yen. The charge against him was that he had received a bribe of yen 405 from a timber mer-chant when he was in service at the Saitama Forestry Bureau.

According to investigations by the Union Guild of Cotton Spinning Companies in Osaka, cotton stocks throughout the Empire at the end of February were 214,099 bales and the import in March was 37,120 bales, making a total of 251,219 bales. During March the factories throughout the Empire consumed 61,274 bales leaving a balance of 189,855 bales in stock.

T. Sakai, the nominal editor of the Heimin Shimbun, was sentenced on April 16th in the Tokyo Appeal Court to two months' minor imprisonment. He had been sentenced in the Tokyo District Court to four months' minor imprisonment and the paper had been suppressed. The charge was that the paper had agitated against the opening of war. The paper is an organ of the socialists.

REAR-ADNIRAL SAIRO, Vice-Minister, and several other officers of the Navy, and editors of the leading papers in Tokyo held a social meeting on the evening of April 14th at the Naval Club, Suiko-sha, when Commander Inouchi and two went ashore on the night of April 15th off other officers gave speeches with regard to mili-Tsurusaki, Oita prefecture. Details are not yet tary affairs and alluded to points which the papers known. She is insured by the Teikoku Marine must pay careful attention to during the present

THE Kobe Herald on Saturday published the Appeal Court in the appeal in the Hiogo Interna-tional Hospital case. Judgment was in favour of appellants (the Japanese landlords) and the hos-pital trustees were ordered to remove all the buildings from No. 34, Yamamoto dori, Ichome, Kobe, within three months of the date of the The appeal of the Niroku Shinubun, which was judgment. The appellants were authorized to ordered to suppend publication by the Tokyo undertake the removal themselves at the expense District Court, was rejected on April 10th by the of respondents in case the latter fail to do so.

PORT ARTHUR.

Saturday, April 16. The Foreign Office in Tokyo publishes a Reuter telegram of which St. Petersburg is laid by the Russian in Talien Bay broke the source. It is a message sent by Admiral adrift in a sform, and a bunch of some thirty Uftomsky from St. Petersburg on the night of the 15th instant. The Admiral says that during the fight in the forenoon, the destroyer Bestraschni or Blestyaschtchi-we can not clearly distinguish which is meant-got separated from her consorts owing to bad weather, was surrounded by the Japanese vessels and sunk. He further reports that during the manœuvres of the line-of-battle ships, by which form of expression he may be understood to mean "during the fight," the Pobieda came into contact with a It exploded amidships on her portside but she succeeded in reaching the harbour without any casualties to her crew.

The Pobieda is a new ship of 12,674 tons a finer vessel than even the Petropavlovsk.

The Retvisan and the Tsarevich are-or were—the two most powerful ships in Russia's Far-Eastern Squadron. Their displacement is 12,700 tons: their armour is from 10 inches to 6 inches, and each carries as main armament four 12-inch guns and twelve 6-inch. These two were disposed of in the first night attack on February 9th. Then follow, in order of strength, the Peresviet and the Pobieda—displacement 12.674 tons; armour from 9-inches to 6inches; and main armament four 10-inch and ten 6-inch guns. Of these the Pobieda is now put effectually hors de combat. Finally we have the three ships Poltava, Petropavlovsk and Sevastopol. Their displacement is 10.950 tons; armour from 10 inches to 5 inches, and armament, four 12-inch and twelve 6-inch guns. Of these the Petropavlovsk has been sunk, the Pobieda has been torpedoed and the Pollava was struck below the water-line in the fight on the 9th February. Of the seven fine battle-ships on the Far-Eastern station two months ago, there now remain, therefore, only three fit to fight, namely:

The Peresviet 12,674 tons
The Sevaslopol 10,950 ,
The Pottava 10,950 ,

managed to lay a field of mines in the area where he expected the Russian ships to performed in Tokyo. The facts of the tale manceuvre; or that what really happened are far more eloquent than any words that was plain straight-forward torpedoing by Japanese craft. The public will not be left

A still later telegram than the above says that, according to Admiral Uftomsky only 5 men were saved from the Russian destroyer sunk by the Japanese.

The same message adds that immediately on arriving at the scene of combat the and received some damage.

Pobieda was struck on the port side by a This expression, "some days previously,"

that a Chinese vessel reports having heard vessels were making for the harbour after they had to deal with this fort. Admiral

search lights during the night. It is therefore conjectured that Admiral Togo is continning his attack.

of these missiles, all connected by chains were cast ashore on one of the Chanshan islands. Picked up by fishermen, they were sold for four dollars each to the natives, but when the latter were breaking them up, one of the torpedoes exploded and killed four

Monday, April 18.

From the Miao Islands comes confirmation of the statement that the action at Port Arthur continued throughout the 14th, and did not cease at 8 a.m. as originally reported.

Shanghai, not to be out-done in the newsmanufacturing line, sends a story that several Japanese; a wonderful tale

The Port Arthur journal publishes a statement from which it would seem that the body of Chief Warrant-officer Sugino was buried at the same time with that of Commander Hirose. Both corpses were taken from the water in the vicinity of the Fukui Maru, and both were interred at the same time, the Russians paying them all honour, and making for their interment the same arrangements as they would have made for their own dead of similar rank.

The Novy Krai observes that it may be some comfort to the families of these brave men to learn how their remains were treated even by their enemies. That is a fine spirit. and our Port Arthur contemporary may be assured that by no people could it be more appreciated than by the Japanese.

What an extraordinarily dramatic story the whole incident makes! The long and close friendship between Hirose and Sugino. The intervention of Hirose to obtain permission for Sugino to take part in the second blocking expedition. The protracted search made by Hirose for his comrade in the hold And it is very problematical whether the Poltava could go into action. The Port Arthur squadron is thus completely deprived of capacity to meet the Iapanese flash Arthur squadron is thus completely deprived mediately afterwards, a death due, in all of capacity to meet the Japanese fleet.

It will be observed that the Russian account attributes the disaster of the Pobieda also to a torpedo-mine. We are driven then to one of two conclusions, namely, that Admiral Arthur with all due honours. And finally Togo, with extraordinary foresight and skill, the death of Admiral Makaroff at the very time when Hirose's obsequies were being might be employed in telling it.

A telegram from Paris dated the 15th

Japanese craft. The public will not be left much larger in uncertainty, but it must be instant confirms the previously received statement of Russian losses, namely, that most perplexing. Nothing is certain except that the Russians have sustained a disaster that the Russians have sustained a disaster that the Russians have sustained a disaster of february.

A telegram from rans dated the 15th instant confirms the previously received the destroyer Bestraschni, becoming separated from her consorts in a fog, was sunk by more crushing than even the affair of the Japanese, only 5 of her crew being rescued, and that the Pobida, to repeded amid-ships on the starboard side, was seriously injured but succeeded in reaching the port. She had no casualties among her crew. Some days previously the Sevastopol and the Poltava had collided at the entrance to the harbour

happened "some days previously," it is inconceivable that it should not have been announced until other losses had to be re-ported. There is no difficulty in imagining the confusion into which the Russian squadron was thrown by the sinking of the Petropavlovsk and the torpedoing of the Pobieda, which doubtless occurred simultaneously or immediately afterwards. A collision when half a dozen ships are hastening to pass the narrow entrance of a harbour is not strange. Besides, Admiral Togo states that the *Poltava* was among the vessels which issued from Port Arthur on the morning of the 13th, and had she been in collision with the Sevastopol some days pre-viously, she would probably have been under repair on the 13th inst.

Tuesday, April 19.

The Asahi publishes a Chefoo telegram, ascribed to a thoroughly trustworthy source, Russian cruisers, caught between two fires ascribed to a thoroughly trustworthy source,—this seems to be a replica of General in the sense that from 8 a.u. to 10 a.m. on Pflug's cross-fire at Chonju—and unable to the 16th instant the sound of cannonading enter the harbour, were captured by the was heard in the direction of Port Arthur. Our contemporary conjectures that this was due to some false alarm such as that which recently perturbed Newchwang, and led to firing from the land batteries on some pilot junks; but there is difficulty in imagining that Port Arthur should be seized by a panic on a bright spring morning long after sun-rise.

Viceroy Alexieff reports with reference to the bombardment by the Nisshin and the Kasuga on the 15th instant that no damage whatever was done to the town or the shipping; that the enemy fired 185 shells; that the forts and the *Pobieda* replied; and that several Russian soldiers and some Chinese were wounded. The Viceroy further states that 14 ships took part in the bombardment whereas we know that there were only two cruisers. His Excellency's reference to the *Pobicda* is significant. Does he intend to convey an indirect intimation that her fighting strength, or is he preparing the public to hear of her conversion into a stationary battery of the Retvisan type, one foot on sea and one on shore?

Incidentally it may be observed that the Plancon-Dessino, or Pflug-Dessino, factory has a hard problem. It has been declaring lately that the Japanese squadron would not face the Russians, and with regard to the affair on the 13th it has told us that the Russians retreated in the face of an overwhelming superiority on the Japanese side. Was the superiority so overwhelming? The Japanese had 6 battle-ships, 2 first-class cruisers and four second-class cruisers. Russians had five battle-ships, 3 first-class cruisers (the Bayan, the Pallada and the Askold) and I second-class cruiser (the Novik). Nine fighting ships on one side and 12 on the other. If a battle was to be postponed until greater equality of force could be assured, postponement was likely to be indefinite.

Wednesday, April 20. The Nisshin and the Kasuga seem to have won golden opinions in their first fight. It will be remembered that after the Japanese ships had several times bombarded Arthur with high-angle fire from the shelter of Liautishan promontory, the Russians were reported to have built and armed a fort on a site chosen so as to command this part of the coast. Hence, when the Nisshin and A telegram to the Nichi Nichi Shimbun dated at Cheso on the 15th at mid-day says occurred at the time when the Russian repeat the experiment of high-angle fire, the sound of cannonading in the forenoon and the Petropavlovsk disaster. That seems Togo's report shows that they silenced it afternoon of the 14th, and having seen much more probable. Had the collision by way of preliminary to bombarding the

said to have been most effective, and Japanese naval officers speak with enthusiasm of the sighting apparatus with which the guns are furnished. They say that it is superior to anything in the navy. These same officers also combat strongly the depreciatory view entertained in some quarters about high-angle fire. They claim that such fire is of unquestionable value, first because the enemy has virtually no protection against it, and, secondly, because the damage wrought is much greater than the opponents of this kind of gunnery are disposed to admit. It was by high angle fire that Wei-hai-wei was reduced in 1895, and the Russians at Port Arthur have suffered so much by it that they at least must appreciate its value.

The truth is that the Japanese are repeating at Port Arthur the tactics they followed cealed her for some minutes at Wei-hai-wei nine years ago. Torpedo cleared away, she had ceased at Wei-hai-wei nine years ago. Torpedo cleared away, she had ceased to be a ship attacks and high-angle fire were the weapons on the sea and was represented by her they used then and they are using the same

weapons now.

Thursday, April 21.

Chefoo telegraphs (Jiji Slumpo correspondent) that at ■ a.m. on the 19th searchlights were observed in active use in the direction of Port Arthur and the sound of cannonading was heard. It is presumed that another Japanese attack has taken place.

It appears that the Russians have increased their apparatus of search-lights. Originally they had only four light-stations but on the occasion of the recent attack there were six. Accounts differ, how-ever, as to the effect of these lights. One statement is that the Koriu Maria and her consorts found themselves full in the field of the lights and were compelled to stop their engines. For a moment it seemed that they must abandon the enterprise but fortunately a few shots aimed at the most troublesome of the lights resulted in its extinction. That is one account. But another and more credible is that the Russian search-lights did not prove any impediment. On the contrary, they served as beacons. It was a wet foggy night; so thick that the units of the little squadron lost touch of each other en route for the place of operations. But happily they came together again on the ground, and it may be observed en passant that this faculty of Japanese seamen to reach their objective point without accident even under the most adverse conditions shows excellent management. Arrived at the place where, or whereabouts, the mines were to be laid, the destroyers and the Koriu Maru derived much aid from the Russian search-lights and accomplished their purpose without difficulty. officers of the destroyers say that they had never gone so close to the port previously, and that, considering all the circumstances as well as the denonement of escape with no serious casualty, they have reason to be thankful to heaven.

The Russian destroyer, Beztraschni, which was sunk on the morning of the 13th in the neighbourhood of the promontory called 15th, the Japanese squadron was fired on by Sien-sang, which lies to the south-east of the forts but sustained no damage. Golden Hill Fort, appears to have been on guard duty for the night. She was on her the Nisshin appears to have been quite a way back to the harbour when she fell in spectacle. It began at 10 a.m. and lasted with the Japanese. It will be remembered until noon. The two vessels steamed round that Admiral Togo describes the action as of ten minutes' duration. Admiral Togo's by engaging the fort that the Russians had despatches, however, always err markedly energy to guard against a renewed on the side of reserve. The officers of the attack from this quarter. The fort is said the Japanese ships manage to destroy Russians had on the side of reserve. The officers of the attack from this quarter. town. The fire of the two new cruisers is fate of the unfortunate Bestraschni. The it. very first shower of shells discharged at her struck her boiler and machinery, and a terrible explosion followed, in the midst of which she went to the bottom.

The dramatic incident of the sudden apparition of a strong Japanese fleet emerging from the mist, whereas the Russians had imagined themselves in pursuit of a squadron of four weak cruisers, only, is mentioned in the Japanese narratives, as well it may be. Much praise is given to this cruiser squadron for maneuvering so successfully as to draw the Russians out of port. When the latter apprehended that they had fallen into something like a trap, they retreated with all speed and in some disorder. As for the unfortunate flag-ship, when she struck the mine she immediately became enveloped in a cloud of smoke and steam, which conmasts only. Such extraordinary celerity of doom and such indications would seem to imply that the mine called into activity some agents of destruction within the ship herself. The explosion of her boilers would scarcely account for it, but it is conceivable that some of her own torpedoes were ignited. She had six torpedo tubes, four of them being above water behind 5-inch armour. Possibly she carried a number of loaded torpedoes, and if one or two of these were exploded by the mine the result is easy to conceive. In the battle of the Yalu the Japanese flag-ship Matsushima was hulled by a 10.2-inch shell which killed four men at the port torpedo-tube and passed very close to a loaded Whitehead torpedo which, had it exploded, would have destroyed the ship. On the Chinese side when their ships went into action they had torpedoes in their tubes and others charged, ready on deck to reload. We know that the Chen Yuen and the Ching Yuen, at all events, got rid of all their torpedoes when they came under the fire of the Japanese, and that the former vessel did not adopt this precaution a moment too soon for she had hardly discharged her dangerous cargo when her stern tube was struck by a shell. It is quite conceivable that the torpedoes carried by the Petropavlovsk herself contributed materially to her destruction.

As to the remaining Russian ships, they evidently imagined themselves entangled in a field of their own mines. That is shown by their resort to showering a hail of quickfired projectiles into the surrounding sea as they retreated. Some Japanese officers think that the forts assisted in this matter, but we doubt it.

The distance was too great to allow any accurate observation of the second Russian ship, which seemed to be disabled. She looked like the Pobicda, and there can be little doubt that she too struck a Japanese mine. That is all the Japanese say, but of course the Russian report makes the matter clear.

On the occasion of the second mine-laying operation, namely the night of the 14th and

destroyer squadron are understood to say to have been very soon silenced, the heavy sian mines instead of being destroyed by that five or six minutes sufficed to seal the Japanese shells taking conspicuous effect on them.

Meanwhile the ships of the Japanese main squadron were lying off the harbour just out of effective range of the forts, The officers had chairs on deck and were seated there watching the results of the high-angle fire, just as though they high-angle fire, just were part of the audience at a wrestling match. Whenever a shell from the Kasuga or the Nisshin went home and worked manifest damage, these onlooking officers and the men of their ships would raise a cheer and clap hands. A veritable circus in short. To what are the Russians reduced when they have no choice but to thus afford sport for their enemies!

It was the Yashima that espied the triplet of buoyant torpedo-mines on the morning of the 15th, and exploded then harmlessly with a shell from her Hotchkiss 3-pounders. The supposition is that this bunch of mines had broken adrift from its moorings during the heavy wind and sea of the preceding five

Chefoo insists that the Askold and another Russian cruiser were badly hurt in an enment? We know of none.

Friday, April 22.

An officer of the Japanese torpedo squadrons that were engaged at Port Arthur on the 13th instant, is represented by the Asahi Shimbun as alleging that in addition to the Petropavlovsk two or three of the Russian vessels struck the Japanese mines and suffered grave injuries. As to the rapid sinking of the flag-ship, this officer thinks that the mine fired her forward magazine, and that the ship was practically torn across.

The principal newspapers of Germany and Austria are reported to have criticized Admiral Makaroff very severely for want of perception and forethought. It certainly does appear strange in the eyes of even the least expert observer that the Russian Admiral should have conceived the serious idea of annihilating the four Japanese cruisers sent to challenge him. They were all vessels of nearly 24 knots speed, and if there was to be anything like getting to close range, the Russian cruisers Bayan, Askold, and Novik alone could have had any hope of accomplishing the feat. The fourth Russian cruiser, Pallada, is a 20-knot boat and as for the battle-ships Peresviet, Pobieda, Poltava, Petropavlovsk and Sevastopol, the best of them can not exceed 18 knots. It seems, therefore, that Makaroff must have known the hopelessness of carrying any overwhelming force to an effective position against such vessels as the Japanese cruisers, the slowest of which was the Yoshino (23.8 knots). What then did he go out for? If he did not recognise a decoy, he ought to have recognised it.

The Neue Freie Press alleges that Admiral Togo had his base at the Miao Islands, and that the fact had been stated in British newspapers, so that it should have been well known to Makaroff. The question is, how-ever, was it a fact. The Miao Islands are Chinese territory. A Japanese squadron could not make them its base without distinctly violating Chinese neutrality, as Makaroff himself seems to have done when he sank the Hanyei Maru.

The Berlin Tageblatt, which has hitherto been very Russophil, now admits that the

THE " PETROPAVLOVSK" DISASTER.

Saturday, April 16.

According to information received in Japan the loss of life on the Petropavlovsk was as follows:

The Admiral and his Chief of Staff.

Three Staff Officers.

Six Officers of the Staff.

Four non-Combatant Officers of the Staff.

One Colonel of the Staff. Seven Combatant Officers

Three Non-combatant Officers.

596 combatant warrant, and petty officers

and men.

Profound emotion has been caused in St. Petersburg by the news of the destruction of the *Petropalousk*, with 800 victims. Five officers and two bluejackets were saved. Admiral Alexieff has taken the naval

The Captain and and the chief medical offier were severely wounded. Prince Cyril nexion with the heavy loss of life, that a was slightly wounded. Five officers and 32 vessel does not carry her boats into action. men were more or less injured.

It may be noted that in 1902 the late Admiral Makaroff received the First Class Order of the Rising Sun. He was in his 56th year at the time of his death.

In the absence of official intelligence, which may be expected at any moment, various versions of the loss of the Petropavlovsk are circulated. The director of the East Chinese Railway at Port Arthur telegraphs-or is said to have telegraphed-to Chefoo that the Russian squadron having gone out on the morning of the 13th to engage the Japanese, was on its way back to the harbour when the flag-ship struck one of the Russian mines and went down. But if that version be accepted, how are we to account for the fact that only 38 officers and men were saved out of a crew of some seven hundred? The flag-ship sinking in broad daylight, at the mouth of her own harbour, within bowshot of the Russian forts and within arm's length of her consorts, and yet carrying down with her nearly the whole of her crew, is an almost inconceivable spec-We are not surprised, therefore, to learn that the same official sent a later telegram to Chefoo denying that the ship was stood in the next day to entice the Russians out, with the result that after a sharp engagement, in which the enemy suffered heavily, the Petropaulovsk, on her way home, struck out to meet the Japanese. The rest is was sighted coming round Liautishan product to meet the Japanese. one of the mines. This, too, is difficult of known. credence, since the ship should have struck on her way out of the harbour if the mines were laid as suggested. On the whole the most reasonable conjecture is that she was struck fairly by a Japanese torpedo while in action, that the incident led to a precipitate retreat on the part of the whole squadron and that the *Petropaulovsk* sunk before and the port. Even that hypothesis, ports seek to attribute the however, leaves us marvelling how a destroyer or torpedo-boat could approach a line-of-battle ship in daylight, and how so few of the latter's crew were saved.

Shanghai telegraphs a story of its own. Stanghal telegraphs a story of its own, but we entertain not the least doubt as to fire on our vessels which replied leisurely It says that on the morning of the 13th at 7 the opinion Makaroff himself would have en- and drove her off. Immediately afterwards o'clock five Japanese ships approached Port Arthur and finding the Bayan outside, attacked her. The Askold and another cruiser (three-funnelled) came to the Bayan's assistance. The engagement lasted 15 minutes, So then he entered the harbour in a leisurely attack. Our Third Squadron, while replying and the Bayan, severely injured, escaped to the shelter of the forts. In this account we without any reason for hurry or confusion, to the south-east, drawing the enemy

hear nothing whatever of the Fetropavlovsk nor yet of the destroyer which the Japanese claim to have sunk. Of course it is possible that Shanghai's report refers to a cruiser engagement independent of the operations of the main squadron.

One fact emerges quite clearly, namely, that the harbour is not blocked. The Russian ships seem to experience no serious difficulty in making their ingress and egress. is, however, a statement attributed to the officers of the British ship Espiegle, which was apparently on her way from Newchwang at the time of the engagement. They are reported to have said that the cruisers found outside when the Japanese squadron approached were unable to get in and suffered severely. It may be that although the severely. blocking operation was not entirely successful, it impeded the entrance sufficiently to render ingress difficult at a moment of crisis.

Of course it is to be remembered in con-The Petropavlovsk had little means of saving

the lives of her own people.

The Hochi Shimbun recalls the fact that Admiral Makaroff was in command of the Russian Far-Eastern Squadron in 1895 when the Powers of the Triple Alliance compelled Japan to surrender Liaotung. Admiral Ting perished by his own hand in the sequel of his unsuccessful attempt to defend Wei-hai-wei against Japan's attacks. Admiral Makaroff has now perished in his attempt to defend Port Arthur.

It will be everywhere recalled that the Admiral was a strenuous advocate of the potentialities of the torpedo. And now, so far as we can see, he has perished by a torpedo.

The Japanese note that just as the people of Tokyo were following Commander Hirose to his grave, Admiral Makaroff was perishing in the Liaotung Sea. Superstitious folks would be disposed to draw strange inferences.

Monday, April 18. Meanwhile the Plancon-Dessino intelli-gence department has been at work. On the 13th General Dessino published in Shanghai a statement from M. Plancon in Mukden to sunk by a Russian mine and explaining that the effect that on the morning of the 13th she was torpedoed by a Japanese craft a Japanese squadron appeared off Port Takeshiki's story is that during the night of Arthur, and Admiral Makaroff went out the 12th the Japanese laid some thirty mines to encounter it. But on seeing the Russian funelled destroyer of the enemy coming up near the entrance to the harbour, and then ships the Japanese retired to a long distance, and Makaroff returned to harbour. This The squadron intercepted this destroyer and story has several grains of truth. Admiral after a fight of about 10 minutes, sunk her. out to meet the Japanese. The rest is

It is noteworthy that all the Russian re-ports seek to attribute the sinking of the At 8 a.m. the Third Principal Squadron ship to a Russian torpedo. Their view approached the port for the double purpose evidently is that less disgrace is involved in of protecting the Second Destroyer squadron blundering fatally than in falling by the and reconnoitering. At 9 a.m. the enemy's enemy's hand. That is matter of opinion, cruiser Bayan steamed out boldly and opened but we entertain not the least doubt as to fire on our vessels which replied leisurely

Under such circumstances how did the Petropavlovsk manage to run on a mine laid the Russians themselves? cruelly inglorious death these people assign to their own hero!

It appears that the Japanese ships employed in the operations at Port Arthur on the 12th and the 13th were the six line-of-battle ships, Mikasa, Hatsuse, Asahi, Shikishima, Yashima and Fuji; the two first-class cruisers, Nisshim and Kasuga, and the four second-class cruisers, Kasagi, Chitose, Takasago and Yoshino. The three Destroyer Divisions consisted of the Ikasuchi the Inazuma the Akebono, the Oboro, the Harusame, the Murasame, the Hayatori, the Asagiri, the Murakumo, the Yugiri, the Shiranui and the Kagero. Finally there was Torpedo-boat Squadron, namely, the Hayabusa, the Kasasagi, the Manazuru and the Chidori.

There were twenty-eight vessels in all, and the Koriu Maru made a twenty-ninth. The Koriu is a merchant steamer. Her part was limited to transporting the torpedoes which were laid so successfully. We pre-sume that Chief Engineer Taneda Migiha-chiro, and Captain Oda Kiyozo were on board, as these two officers are specially trained in the business of laying torpedomines, and great skill must have been employed to lay mines in such # position without attracting the attention of the Russians.

Admiral Togo's Report.

The Admiral's report has at last reached the Naval Department in Tokyo. It came at 5 p.m. on the 16th, and it says:

The united squadron, as previously arranged, commenced operations on the 11th instant and proceeded to make an eighth attack upon Port Arthur. The Fourth and Fifth Destroyer Squadrons and the Fourteenth Torpedo-boat Squadron, accompanying the transport Koryo Maru, advanced during the night of the 12th instant towards the harbour, and passing through the field of the enemy's search-lights to the immediate vicinity of the port, laid torpedo-mines at various places by a rapid process.

At dawn on the 13th the Second Destroyer Squadron, to which a special duty had been entrusted, steamed to the promontory of Sien-sang, and while steering thence in a south-easterly direction observed a fourfrom the east and heading for the port was sighted coming round Liautishan proknown.

On the following day, however, M. Plancon attack her, but the range being long, she ceased to conceal the facts. He telegraphed succeeded in effecting her escape. The squato General Dessino that the Petropavlovsk, dron sustained little injury in this encounter, when returning to port, struck a Russian the total casuallies being two men of the mine and went down, taking with her *Inasuma* slightly wounded. With regard to Admiral Makaroff and all the crew with the the crew of the enemy's destroyer that was sunk, there was no time to save them as the

distance of some thirty nautical miles under cover of a fog. This Squadron immediately advanced at full speed, and the enemy sighting its approach, put about and made for the harbour, our ships following in hot pursuit. In the haste of attempting to escape, the leading vessel of the enemy's squadron, a ship resembling the *Petropavlovsk*, was seen to strike one of the mines laid by us during the night, and shortly afterwards she went to the bottom. This incident seemed to throw the enemy into much confusion, and it appeared that another of their vessels was disabled, but owing to the disorder that reigned in these squadrons it was difficult to distinguish anything This was at half-past ten in oon. Thereafter the remaining the forenoon. ships of the enemy, keeping up a perpetual fire over the sea in their immediate vicinity, retired into the harbour. By noon no vestige of them remained outside. In the encounter between the enemy's ships and our Third Squadron, the latter did not suffer at all, and it is probable that the enemy's losses also were small. Our First Squadron did not get within range of the Russian ships.

On the same day at 1 p.m. the squadron left the neighbourhood of Port Arthur and repaired to a previously appointed ren-dezvous where the night was passed. On the next day, the 14th instant, at 1 p.m. we again advanced towards Port Arthur and on the following morning, at 3 a.m., the Second, Fourth, and Fifth Destroyer Squadrons and the Ninth Torpedo-boat Squadron went to the mouth of the harbour and discharged a certain duty entrusted to them. At 7 a.m. on the same day our Third Principal Squadron proceeded to the vicinity of the port to reconnoitre. None of the enemy's vessels was observed, and everything seemed quiet in the harbour. At 9 a.m. the First Principal Squadron, when steaming towards the place, observed three floating mines of the enemy which had broken loose from their moorings. These we destroyed. At 10 a.m. the Nisshin and the Kasuga were sent round to the west of Liautishan whence, for about 2 hours, they bombarded the place with high-angle fire. The enemy's forts and the ships in the harbour replied from time to time, but our vessels did not suffer any injury. This was the first occasion on which the above two vessels were engaged. Their fire seems to have been very successful, and they were able to silence the newly constructed Russian battery on the west of Liautishan. At I p.m. the squadron returned to their base. Our squadrons did not lose a single man in these combined operations. They achieved some success, and this together with the immunity they enjoyed is attributa-ble to His Majesty's virtues. Our men displayed much valour and resolution. It is matter for special thankfulness and congratulation that our torpedo-craft and other ships, though steaming again and again in seas dotted with the enemy's mines, have never met with a single disaster. We owe this to the protection of heaven.

by any chance reports an incident unless he by accident.

after it to a point about 15 nautical miles is quite certain of it. He does not even from the port. The Third Squadron then claim to have recognised the *Petropavlovsk*, signalled by wireless telegraphy to the First but speaks merely of a ship resembling her. Principal Squadron, which was waiting at a He says nothing of the torpedoing of the Pobieda, which evidently happened when the squadrons were from ten to fifteen miles apart. His statement is only that one of the enemy's vessels seemed to be disabled.

It is also noticeable that the deadly potentialities of the destroyer react upon the fate of its crew. Admiral Togo explains that owing to the approach of the Bayan his Second Destroyer Squadron could do nothing to save the crew of the Bestraschni. And the Bayan saved only 5 out of the destroyer's crew of some 50, the . Bayan herself being evidently afraid of lingering in the neighbourhood of the Japanese torpedo-craft. A destroyer is a terrible instrument of war; terrible to the enemy and terrible to

The mystery of the enormous loss resulting from the sinking of the *Petropavlovsk* remains to be solved. She was accompanied by a number of ships. The evidence is that she was leading them home to the harbour. Yet only a mere handful of her people were rescued. Men-of-war do not carry all their boats when they go into action, but they are not entirely denuded of them, and it is hard to understand how the gallant Admiral and his officers and men perished in such a wholesale manner.

As for Admiral Togo's strategy, it is now quite plain. During the night he laid a field of mines outside Port Arthur. In the morning he sent in a weak squadron of cruisers. The Russians, seeing, as they supposed, an retreated, drawing the enemy after them.
Then at a given signal Admiral Togo with a powerful squadron emerged from the fog. The Russians naturally put about and made all speed for the harbour, crossing the field of newly laid mines. We know the result. They claim that the mines were their own. That is an insult to the memory of Admiral Makaroff. It is a thousand times better to be unfortunate than incompetent.

Tuesday, April 19.
The Times' correspondent wires from the Haimun that he believes Port Arthur to be now sealed. That is an important opinion and it may prove correct in view of Admiral Togo's latest doings. The Japanese commander has evidently ceased his attempts to seal the place by sinking ships and has had recourse to mines. After the sinking of the Petropaviousk and after the remainder of the Russian squadron had taken refuge in port with the Pobieda also disabled, Admiral Togo's report shows that he again sent in his torpedocraft to discharge "a certain duty "and that they discharged it successfully. That can only mean that they laid mines in the avenue or avenues of exit, and it is probable that the Russians will be very chary of venturing out. One incident of the affair on the 13th is very significant. Admiral Togo tells us that after the torpedoing of the Petropavlovsk and after the apparent disablement of the Pobieda, the Russian ships were thrown into confusion, and steamed towards Port Stockholm reports that the news of the latest reverses at Port Arthur has produced a feeling of the profoundest depression in St. plainly a manceuvre intended to blow up

A Japanese officer of the naval staff is represented as saying that the place where the Petropavlovsk sank was about a nautical mile from the entrance to Port Arthur, on the south-east of Hwangkin-shan fort, near a rock called Luchin.

It is stated that Captain Oda Kiyozo, who with Chief Engineer Taneda superintended the laying of the mechanical mines which blew up the *Petropavlovsk* and disabled the *Pobieda*, is the inventor of an important process which ensures the mooring of the mine in an effective position under all conditions of tide or depth of water. For this invention Captain Oda received the Fifth Class Order of the Rising Sun, but his first opportunity of utilizing the invention was on the 12th instant. Presumably the mines subsequently laid were also under the directions of Captain Oda and Chief Captain tion of Captain Oda and Chief Engineer Taneda. Roughly speaking these mechanical mines have to be laid at a distance from each other equal in feet to the number of pounds of explosive with which they are charged: otherwise the explosion of one would fire the others. Therefore there is always a danger of a ship passing innocuously through a line of mines, and therefore they are generally laid in two complemen-tary lines. The naval staff officer quoted above indicates a place within a mile of the harbour's mouth as the field of the mines, but even there it must have been very difficult to select a site with any degree of assurance that the Russian ships would pass over it. Captain Oda had command of torpedo-boat No. 23 which sank the Laiyuen in Weihaiwei harbour in 1895. The Koriu Maru from which the mines were laid is a easy prey and naturally longing for some Maru from which the mines were laid is a success after their long record of disasters torpedo transport vessel of 2,700 tons and moved out to attack. The Japanese cruisers 15 knots, recently constructed.

> Wednesday, April 20. Very great regret is expressed by Japanese naval officers at their inability to save the lives of Admiral Makaroff and at least a large number of the crew of the Petropavlovsk. It was their duty to save them, they say, and it would have been their sincere pleasure. But in that region there generally pre-vails throughout the whole spring a strong valis throughout the whole spring a strong southerly wind, and it happened that such a wind was blowing with great violence on the day of the disaster. Had boats put off to the scene of the catastrophe they could not have rejoined the ships but would inevitably have been blown towards the harbour. Thus the Japanese had to look on idly. Nothing is said by these officers about the failure of the Russian ships to save the Admiral and his comrades, but so far as the people on shore were concerned it is plain that they too must have been paralysed by the difficulties which deterred the Japanese. If boats could not have rowed back to the Japanese squadron in the teeth of the wind, neither could they have rowed out from the harbour to the Petropavlovsk.

> > Thursday, April 21.

There is a suspicion in Japan that Prince Cyril was really lost and that the report as to his having been wounded was put abroad by the Russians to soften the shock of the greater disaster. We sincerely trust that the suspicion is ill-founded.

Shanghai alleges, on the authority of Major-General Dessino, that Commander a feeling of the profoundest depression in St. Plainly a manceuvre intended to blow up Crown of the Mandjur was among those lost Petersburg, and that even in military circles any mines that might have been adjacent to with the Petropavlovsk. But the captain of the situation is regarded with the utmost gloominess.

It is noticeable that Admiral Togo never this plainly a manceuvre intended to blow up Crown of the Mandjur was unong those lost them, and in the face of such fact it sounds the Mandjur was under parole not to take strange to be told that the unfortunate flag-any further part in the war. Very strong this pand her consort ran on their own mines evidence will be needed to prove thathe violated his promise.

THE RUSSIAN DISPOSITIONS.

Monday, April 18.

It is difficult to make out exactly what force the Russians have on the right bank of the Yalu or whether they intend to make of the Yalu or whether they intend to make a resolute stand there. Below Wiju, at a place called Sanhatsu, where the Yalu is divided by islands into three streams, a force of 3,000 infantry with 10 guns is said to be posted, but at Tatung-kou, near the mouth of the river, we hear of only 50 troopers and 100 foot-soldiers. Above Wiju there is a been sailed Sukuschin where the river is place called Suku-chin where the river is fordable. It was here that the Japanese crossed in 1894, and the Russians are said infantry 500 strong. They have also placed bodies of 20 or 30 sharp-shooters on the islands in the stream to watch the Japanese and harrass them. In Kiulien they are said to have 2,000 cavalry and infantry with 30 guns; in Takushan they have 300 infantry; in Fenhwang 3,000 infantry, and in Antung it is reported that twenty thousand are concentrated. All these details we gather from the Asahi and the Kokumin, whose correspondents have collected them at the They may, however, essay the passage front. They make an intelligible ensemble, along a very extended front; that is to say, for they show the Russians disposed so as to render the passage of the river as difficult as possible and prepared to strike a heavy blow from Antung at whatever point the Japanese choose for their advance. The total force detailed above is from twenty to thirty thousand, which figure we take to be a close approximation to the truth. It would not however, indicate any intention of making a very stubborn stand at the Yalu. Rather the strategy would seem to aim at delaying the Japanese advance as much as possible in order to gain time to effect a heavy concentration in the neighbourhood of Fenhwang, or perhaps, at a point nearer to Liaoyang.

In other quarters the reports show 2,000 Russians at Yingkow (Newchwang) and 2,000 between that place and Kaiping, with 22 guns mounted in the Yingkow forts. That disposition may be summed up by saying that 4,000 men are guarding the north-eastern littoral of the Gulf of Pechili, to prevent a landing at Newchwang or between Newchwang and the Liaotung Peninsula. Connected with this precaution is the massing of 10,000 men at Tashikiao, where the rail-ways from Newchwang to Port Arthur and from Mukden to Port Arthur join. These ten thousand men could be despatched at a moment's notice-presumably-to any point on the west coast of Liaotung menaced by the Japanese.

It may be assumed that there are twenty thousand men at least in Port Arthur, but as to the force at Dalny we have no information. Yet it is evident that Dalny must be the basis of operations for guarding the east coast of Liaotung and the north-western littoral of the Yellow Sea. If we assume ten thousand men assigned to the latter duty, then the four forces hitherto enumerated-namely, those having their bases at Tashikiao, Port Arthur, Dalny and Antung — represent an aggregate of from seventy to eighty thousand men. There must also be a large force at Vladivostock, and in the districts adjacent. Then at Mukden and Liaoyang are concentrated perhaps as many more as all the above put serves to convey some general idea of the field of operations, and to suggest how greatly the Russian forces have to be scattered. They would find immense diffi-

culty in putting a hundred thousand comba-tives into the fighting line at any point.

Thursday, April 21.

There appears to be no doubt that the Russians are about to make a determined stand at the Yalu. They have fortified the line from Kiulien to Antung and probably southward as far as Tatung-kou, and they are said to have massed fifty thousand men of all arms at this position. Frequent skirmishes are said to be taking place in the neighbourhood of the island of Fusan, which Frequent is in mid-stream at Sukchin above Wiju. The Russians make essays to cross the river, and are driven back by the fire of the Japanese, who, in turn cross over and carry off to be guarding the spot with a battalion of the bodies of any that have fallen on the infantry 500 strong. They have also placed enemy's side. It is stated that the Russians offer resolute resistance to any movements on the part of Japanese cavalry, but that they show great caution about getting within range of the infantry. A big battle is expected before many days have passed, but there is nothing said about the strategy which is to culminate in fighting. Nothing is less likely than that the Japanese will attempt to cross in the face of the enemy's entrenchments. cross at several points simultaneously. What seems more probable, however, is that a strong turning movement has been in progress for some time and that it will culminate in a few days.

Men who have just returned from the front describe the Russian cavalry as very The horses seem to thrive on a efficient. diet of rice and straw, which is by no means ideal fodder. When a trooper wants to use his carbine he makes his horse lie down and digs a shelter trench to protect the animal, which remains perfectly quiet until its master puts his hand on the bridle when the animal leaps up at once and gallops off.

The Russians that have crossed the Tumen and pushed south as far as Sonchin are supposed to be intended as a diversion; in other words, to draw off a portion of the Japanese forces from the Yalu. They threaten to advance to the neighbourhood of Pyong-yang, but it is a very long ride from Kilju to Pyong-yang.

RUSSIA'S CONFIDENCE.

The confidence of the Russians is magnificent. We have already reproduced some of the utterances of St. Petersburg journals utterances that sound strangely discordant with recent events-and now we find in the Paris correspondence of The Times an account of an interview granted by General Sakharoff to a representative of the Figure. General Sakharoff was then Chief of the Russian General Staff and Acting Minister of War. He speaks of 400,000 men as the minimum of the army Russia will send to Manchuria, and of 200,000 men as the approximate maximum of Japan's force. As to the duration of the war, he opines that it will last until it has reached "its lo-gical and necessary conclusion" for he thinks that "Russia will not be in a humour to give it up before she has quite finished." He does not know the name of the Japanese General commanding in Korea, and he affects to be quite indifferent on the subject. "They have marquises," he says, "barons, generalissimos and marshals. All that is together. It is guess work at best, but it very fine and makes an effect, but is it really

she could not credit the notion of any Oriental nation defying her. General Sakharoff spoke at the end of February. He is now in Manchuria, where he commands the First Army Corps. If one of the graces of Russian gallantry is to publicly insult a foe, then General Sakharoff is grace-ful and gallant. We think with pleasure ful and gallant. that Anglo-Saxon ideals are different. And for the Japanese there is this to be said, that just as they entered upon the present terrible struggle quietly and resolutely, so their successes have not provoked them to the smallest display of boastfulness or assurance. They are going on steadily and coolly, and not once has a responsible officer, politician or publicist in this country attempted to ridicule or insult Russia. She is left to blow her own trumpet without awakening any echoes.

" L'ECHO DE CHINE."

We are constrained to express our assent with the protest that the Echo de Cliine makes against accusations of having sold itself to Russia for the manufacture of misleading telegrams. No journnl published in the Far East can claim to have completely avoided the publication of erroneous intelligence since this war broke out. We certainly. make no such claim on our own account. It is virtually impossible to avoid all mistakes, and it is virtually impossible to guarantee our judgment against being coloured, more or less, by our sympathies. The sympathy of England is with Japan. The sympathy of France is with Russia. There is no legitimate fault to be found with either sentiment. The French, who are an eminently generous people, would surely approve and applaud Japan, just as they have always ap-proved and applauded the weaker of two combatants, were they not bound to Russia by the ties of an alliance which they consider essential to their national well-being. are persuaded that their position is fully appreciated in Japan and that no one resents If events present themselves to Russia's friends in an aspect different from that worn by them in the eyes of Japan's friends, why should either side upbraid or attribute evil motives to the other? The truth probably lies between the two, and each is brought a little nearer to it by union of efforts.

MARQUIS ITO AND THE PERRY MEMORIAL RELIEF FUND.

Marquis Ito has subscribed yen 1,500 to the Perry Memorial Relief Fund, and has addressed the following letter to the Committee :-

Tokyo, April 20, 1904.
GENTLEMEN,—Having upon my return from Korea
heard of the admirable endeavour on the part of
the American citizens here to raise a fund in commemothe American citizens here to raise a fund in commemoration of Commodore Perry. I hasten to request you to accept yen 1,500 as my contribution to the Fund. Permit me at the same time to express my warmest sympathy with the work, which will not only perpetuate the memory of your great Commodore, already so revered and beloved here, but will also carry home to every one of us, even to the poorest families, the traditional friendly feeling of Americans towards our countrymen.

It is an enterprise which, to a certain extent, may be interpreted as an endeavour on the part of those who first introduced us to Western ideals to lead us farther in the universal comity of humanitarian principles before which national frontiers vanish and

principles before which national frontiers vanish and ought to vanish.

hope sincerely that the work will be crowned with the utmost success.

Yours truly,

HIROBUMI ITO, Marquis,

KOREA.

Saturday, April 16. There is again talk of an appearance of unusual occurrence. Russian troops at Kyong-song, which, as our readers doubtless remember, lies on the north-eastern coast of Korean. A squadron of 40 cavalry have arrived at the place and are said to be the advanced guard of a force is no evidence that the Russians have any of five thousand. It is not easy to see what appreciable force in that region. Neverthethis move means. Apparently it has no less the fact that the telegraph station special meaning, for there is nothing to be at Kyong-song has been seized by Rusachieved by Russian troops in that quarter unless they are designed to oppose an

anticipated advance against Vladivostock.
Prince Li Chi-yong left Seoul on the 14th instant en route for Japan. His departure is well timed, since it falls at the time when

north-western Korea. A telegram to the Foreign Office in Tokyo announces that a conflagration broke out in the Hamyong Palace in Seoul on the night of the 15th instant, and that, with the exception of the foreign-style wing, nearly the whole edifice was destroyed. The Emwhole edifice was destroyed. peror has removed to the Imperial House hold Department building near the United States Legation. It is supposed that the fire had its origin in some accident connected with the repair of the heating apparatus of

Monday, April 18. There is a story from Seoul that the Russo-phil Li Hakkeun, before leaving Korea for Shanghai,—as previously reported—made an agreement with a French citizen whose The provisions name is not mentioned. were that all building of forts or construction of harbours should be entrusted to the French: that all essential surveys, of a military or other nature, should be performed by Frenchmen, and that if military or other experts were needed, they should be engaged from France. This agreement is said to have received the sanction of the Court, and but they contemplated remaining until the there is much trouble now between the latter and the Foreign Office in Seoul.

It is stated that when Li Yong-ik left Korea recently for Japan, a sum of 226,900 yen of public money was lodged with the First Bank in his name; and that he has now been required to make it payable to another official, from which fact the improbability of his speedy return to Korea is

inferred.

the Palace.

The Korean Government is said to have agreed that Japanese fishermen shall be free to ply their trade on the west coast of Korea as they do on the east. Formal consent has

not yet been given, however.

of February, the number of Japanese subjects then in Masampo was 16,082; the number in Chemulpo 6,991; and the number in Seoul 5,137. These numbers have since increased on the arrival of every steamer. Many are said to have been disappointed in their purpose, and to be now in considerable distress.

The Shogyo Shimpo recommends that Japan should assist the Korean Sovereign to re-build his palace, or should even undertake the work in toto. Korea has done much to aid the Japanese troops and some return

ought to be made if possible.

There are many rumours about the burning of the Korean palace, but the view now prevailing in Seoul is that it was incendiarism. All the records of the dynasty and all the heir-looms of the Imperial family are said to have been destroyed, so that the loss is very great. The material loss alone is put at four million and Takushan there are 180 Cossacks and public used to be about Yong Ampo. What build-hand the Russians done there? What build-hand the Russians done there? What build-hand the Russians done there? Were there any some 20,000 of all arms.

For the benefit of those unfamiliar with

The recently reported re-appearance of Russian troops in north-eastern Korea, especially at Kyong-song, is considered to have been an unsubstantial menace. There sian soldiers seems indisputable, and it other across the river is further reported that the Tonghaks in the island in mid-stream. vicinity are again making themselves trouble-some. A body of some 30 Russians pushed southward as far at Kilju on the 15th inst. is well timed, since it falls at the time when and the intelligence of their presence there the Russians have completely evacuated has induced the Japanese residents of Sonchin to withdraw by the steamer Haginoura Maru. There is still nearly a foot of snow in the districts where these movements are said to be taking place.

The Russians are said to have placed mines in the Tumen, and to have interdicted all Korean craft from entering Possiet Bay.

Tuesday, April 19.

The party of Cossacks, 33 in number, who rode into Kilju on the 15th instant, remained there. there one night and pushed on the following day, to Sonchin, where they took possession of the telegraph office. All the Japanese residents of Sonchin had withdrawn by the steamer Haginoura Maru on the evening (or morning) of the very day when the Russians entered the place. Indeed it is alleged that the Cossacks came into view just as the steamer was leaving the harbour. The number that withdrew was 58 and there remained a Mr. Kanada, a missionary, and Messrs. Grierson and Drop (?). The fugitives had been in full possession of information as to the arrival Russians in the district northward of Kilju, and had telegraphed to Yuensan for a steamer, 18th at Sonchin for the purpose of completing their arrangements. On the 16th, how-ever, a Korean scout rode in at top speed to report that the Cossacks were in sight, and the Japanese, after assembling at the Consulate and giving vent to a loud bansai, went on board the steamer without any confusion or perturbation.

What this movement of the Cossacks means it is hard to say. It seems to be merely an attempted diversion. If the Russians were in great strength it is not difficult to see that they might threaten a line of communications, which we conjecture to be of some importance. "Conjecture" According to statistics compiled at the end is the only word to use, for whether the Japanese are engaged in any turning movement, and, if so, what the locality of the movement is, we can not tell. Probably the

likely to be heard of soon.

Wednesday, April 20.

The latest reports (Nichi Nichi's correspondence) indicate that the disposition of the Russian forces on the northern bank of the Yalu is 4,500 at Kiulien; 1,000 at a place which we do not identify but which is said to be four miles north-west of Kiulien. At Antung there are 4,000, and from thence to Tatung-kou at the mouth of the river there are small detachments posted at intervals of less than 2 miles. Between Tatung-kou and Takushan there are 180 Cossacks and between Antung and Fenghwang there are

yen. Naturally the incident has caused these geographical names, we may explain great consternation among the Koreans, that the above detail is simply a disposition who attach a superstitious import to every Kiulien and the mouth of the river. is the base of the defending force. From Antung it would concentrate on any threatened point, and by the Antung-Fenghwang road it would retreat in case of defeat, gathering accessions of strength as it retired. Kiulien is opposite to Wiju and the distance between the two places is something less than three miles. They look at each other across the river and across an A little lower down six islands lie in the bed of the river, which is divided by them into 3 channels, the aggregate width of the three being 2 miles. There is a ford near Wiju, and at Changsong, 42 miles above Wiju, the river narrows to from 1,000 yards to 600 but has a depth of from 12 feet to 30. In fact, the Yalu is a most formidable obstacle. No army could cross it in the face of magazine rifles held tolerably straight.

The Jiji Shimpo's correspondent writes from Yuensan that the people of Hamyongdo, which is the north-eastern province of Korea, though nominally favourable to the Japanese, are at heart friends of Russia. The local officials are all nominees or creatures of the prominent Russophil Li Yong-Thus, though the posts and telegraphs are under Japanese control, every movement of the Japanese troops, whether in the north-east of Korea or along the Pyongyang-Yalu line, is reported from village to village and communicated to the Russians. It is for that reason that the latter are able to essay such raids as the one just now made against Kilju and Sonchin. The correspondent believes that until Japan makes her hand felt heavily right up to the Tumen and even beyond it, the Koreans in Hamyong-do will never be cured of their hereditary habits of clinging to the big Northern Power.

There appears to be a sharp dispute be-There appears to be a snarp dispute between the two political parties in Seoul. The Prince Imperial's party, namely, the Min, condemn the idea of rebuilding the palace on its old site as the expense will be very great. They suggest that the former Palace he restored which can be Eastern Palace be restored, which can be done at an outlay of half a million yen, and the Min offer to find all the money themselves. It appears, however, that this programme does not at all please the Emperor, When Min Yong-hwan urged the adoption of the programme, His Majesty cried out that the Eastern Palace is frequented by a demon. On the other hand, the imperial inclinations turn towards the suggestion of the Lady Om's partizans, who advise the rebuilding of the palace just destroyed by fire, and advocate the expenditure of five ment, and, it so, what the locality of the movement is, we can not tell. Probably the purpose of the Cossacks is merely to harrass and plunder. Their retreat to the Tumen is that these figures are not confirmed. Other purveyors of intelligence aver that the utmost economy will be exercised and the work will be done in 60 days.

The German Representative in Seoul is reported to be busily utilizing the present opportunity to obtain for his countrymen some mining concessions in Korea. The time is not very opportunely chosen, but probably that consideration is not efficient.

Thursday, April 21.

Every one remembers how bewildered the public used to be about Yong Ampo. What had the Russians done there? What bildings had they erected? Were there any

-

Gov

repl ed

uali lar

ĶU

jja

pri chi

questions were asked, but never did they receive any thoroughly satisfactory answer. A valuable bit of evidence is furnished by a missionary, Mr. Kearns, who speaks as an eye-witness. In an article appearing in the Korea Review he says:—"The writer visited Yong Ampo in December (last December) and was courteously received by the Russian officer in charge, who was interested in hearing of his American neighthe Russian officer in charge, who was interested in hearing of his American neighbours forty-five miles away and asked a great many questions about the people and the surrounding country. He stated, what was apparent, that their building operations had storted for the minter but apparent, that their building opera-tions had stopped for the winter, but that they expected to do greater things the following summer and would employ a great many labourers. He also said frankly that, while there were only a hundred or so of his countrymen in Yong Ampo for the winter, he hoped in the coming summer to see many more. The communications were poor from Yong Ampo to the railway (at Liaoyang) but Chinese carts made fairly good time and mail was reasonably quick. A walk about the place showed seven or eight neat brick dwellings, large barracks and stables and a substantial break-water, a very creditable performance for one summer's work. No fortifications of any kind were apparent, though they might easily have been concealed in the surrounding hills. The Russians with one or two exceptions were all military men." In short, Yong Ampo was nothing more or less than a military station. Wiju and Yong Ampo of the Krope Parisms writes at 11 to many the control of the Krope Parisms writes at 11 to many the state of the Krope Parisms writes at 11 to many the state of the Krope Parisms writes at 11 to many the state of the Krope Parisms writes at 11 to many the state of the Krope Parisms writes at 11 to many the state of the Krope Parisms writes at 11 to many the state of the of the Korea Review writes:—"It was only the stress of war that brought this The Russian Minister succeeded, so long as he was here (Scoul), in blinding the Government to its own best interests, but now the thing has been accomplished, and with the opening of these ports of course the Timber Concession falls to the ground. How many millions this will save to the Korean Government it is hard to say, but the Korean people are to be congratulated on having escaped so easily." We may on having escaped so easily." We may add that the barracks at Yong Ampo is

to-day occupied by Japanese soldiers.

It is stated that the Korean Representative at the Russian court, who recently withdrew to Paris, has returned to St. Petersburg and is engaged in some negotiations with the Russian Government.

In the face of the evidence furnished by the Korea Review it will be necessary, apparently, to modify the generally received hypothesis that the Korean is a craven and weakling whom any Occidental can in-midate. The following extracts deserve attention :-

News came from the north lately that a hundred or more Russians entered the far northern town of Kan-ge and took people's grain and other food and offered insults to the women of the town. The prefect called together a strong force of tiger-hunters, who form a regular guild throughout the north, and set upon the Russians and inflicted severe injuries. We do not yet know which side suffered the more, but it seems that the Koreans drove the obnoxious intruders across the Yalu. News of such things enrages the Koreans all over the country and the officers in the army are asking that they be sent to aid the Japanese. aid the Japanese.

Since the above was written we learn that the Korean tiger-hunters in the north are taking things into their own hands. Most foreigners imagine that the Koreans are a mild people who have no fight in them, but if so they have never heard or have forgotten how these hunters stood their ground against the French on the island of Kang-wha in 1866, and against the Americans in 1872. They fought with conspicuous bravery, and in the fight with the Americans they stood their ground until every one of them was killed. The reports that are coming from the north at the present time show that these hunters have lost none of their cid-time prowess, and though

poorly armed and without anything that could be called proper military training they are attacking the Russians whenever they can get at them on Korean scit.

soil. In the town of Yang-hyun a band of Russian cavalry attacked and seized the Korean telegraph office, but the Korean hunters rallied and surrounded the Russians, and in the fight that followed they drove the Russians out, although the Koreans suffered heavier losses than the Russians. This was doubtless due to the fact that the Russians are much better armed than the Koreans.

Friday, April 22.

There appears to be much dispute about the building of a new palace in Seoul. The Emperor will have nothing to say to the old palace which he formerly occupied. His Majesty has superstitious objections to it. Therefore a new palace must be erected and the question is how to get money for the purpose. There are four projects, a domestic loan, the sale of ranks, an increase of the land tax and a foreign loan. To increase the land tax seems to be the most feasible plan, but no decision has been come to, and it must occur to every one that any increase of taxation would be very difficult at a time when a large part of the empire is over-run with foreign troops.
Meanwhile Li Ha-yong has been appointed
Minister of Foreign Affairs.

It is stated that the Koreans in the northwest of the country are now thoroughly friendly to the Japanese, and that traffic between Pyong-yang and Wiju is as secure as it was before the outbreak of war.

The Cossacks who recently rode into Sonchin have cut the telegraph between that place and Yuensan. News from that quarter is therefore difficult to obtain, but it is alleged that the two British subjects residing in Sonchin and the four American citizens in Kilju are safe. These thirtythree Cossacks are reported to have pushed southward as far as Puk-Chhon, which is 70 miles south of Sonchin. They do not seem to be supported by any force. Indeed the state of the country and the roads is such, owing to the spring thaw, that there would be almost unsuperable difficulty in moving any large body of men in that region. Apparently, therefore, these Cossacks are merely a raiding party, or a reconnaissance in the air. They are said to have burned the Japanese settlement at Sonchin, and their retreat northward is expected at an early date. It is reported that the Korean officials of Sonchin went out to meet them and give them welcome when they arrived.

It is believed that a general engagement is imminent at the Yalu. The Russians have fortified Kiulien and Antung, and have connected the two places by entrenchments which render communication secure. They have also posted troops and built a fort on the island of Fusan, which is in midstream between Wiju and Kiulien, and they have laid mines in the river. These mines are said to be occasionally carried away by the current and dashed against the rocks where they explode harmlessly. Frequent interchanges of shots take place between the outposts of the two armies.

THE BRITISH PRESS.

English newspapers are said to be very outspoken in their praise of Japanese naval strategy. It is seldom, they write, that the manœuvres of a fleet can be fully adjusted to a strategical plan of such difficulty, and still more seldom that such signal results are achieved. These papers further think that whatever hope Russia may have entertained of recovering her naval position in the Far

CHINA.

Saturday, April 16. The Manchurian Hunghutzes are said to be very active along the littoral of the Yellow Sea. They are heard of at Pitzwo-where the Japanese landed in 1894-, at Takushan and at Chuan-ho, and it is said that they give the Russians much trouble, constantly assailing and harrassing them. In the event of a Japanese landing at any point along this littoral, the Hunghutzes might be very useful auxiliaries.

There was a rumour recently that Japanese troops had debarked at Pitzwo, but probably it had its origin in the fact that a Japanese destroyer called there last month

in search of water and fresheggs.

Monday, April 18. Viceroy Chang Chih-tung is reported to be lying seriously ill at Hankow.

It is stated that the British and American Consuls at Newchwang have received orders to withdraw and that the exodus of large numbers of Chinese is causing much con-

Chefoo telegraphs that the Russian gunboat Sivoutch left Newchwarfg on the night

of the 15th.

The Russians, in proportion as the difficulty of provisioning their troops increases, are extending their field of foraging. They are extending their neld of foraging. They are now requisitioning supplies not only from the whole of the West-Liao region but also from Mongolia. The lowest orders of the population, finding it impossible to subsist in view of the heavy rise of prices, are flying in great numbers beyond the field of operations

operations.

The Manchurian railway is now used for nillitary purposes only, and the greatest precautions are adopted to guard it. Rumour says that the Russians are buying up the Hunghutze—a doubtful purchase.

The Chinese Governor-General of Manchuria is exist to be living a life of rational and the control of the cont

churia is said to be living a life of retirement, disregarding the constant demands and menaces addressed to him by the Russians, but lamenting that he is not with the Governor of Kirin who, in similar circumstances, committed suicide.

The Russians are now said to be spending money freely in Manchuria. A private in the ranks of the Hunghutze receives from 15 to 20 roubles monthly, an officer 60 or

70 roubles, and a chief 500 roubles.

General Kuropatkin is expected to start oon for Fenghwang.

The families of the Chinese subjects who were shot in the false alarm at Newchwang on the night of the 11th have been paid 500

dollars each by the Russian Consul.

In the interval between Yingkow via Liaoyang to Fenghwang bodies of from 200 to 500 Russian troops are posted at points 20 miles apart, and there is one commissariat station in every length of 40 miles.

Tuesday, April 19. The news of Viceroy Chang's condition is of the most alarming character. He is said to be in the greatest danger, and we judge from the tone of the telegram that no hopes whatever are entertained of his recovery.

Wednesday, April 20. M. Lessar has been pressing his objec-tions to the employment of Japanese officers for the purpose of drilling Chinese omcers for the purpose of drilling Chinese troops in the metropolitan province. He claims that China is under agreement to engage Russians if she have any need of foreign military instructors. This protest having been forwarded by the Chinese unfounded. That ought to settle the matter duously in these troubled waters, which is not move over a distance of 135 miles in for the present at all events. Probably likely enough. Russia's objection is based on the conviction that should the Chinese be drawn into the present struggle, the presence of Japanese officers with their troops might add appreciably to the latter's competence.

It is believed that the Russian Government has admitted the justice of Japan's protest against the veto on the export of bean-cake from Newchwang. The Chinese Authorities forwarded the protest, endorsing it fully, and Mr. Lessar transmitted it to St. Petersburg, with the result that instructions were given to remove the veto in consideration of a guarantee given by an exporter that the commodity is to be used for manure, not for horse-food. All this is only a rumour; it has no official authority. We have never heard of bean-cake being fed to horses in Japan, nor can we see what value would attach to the alleged guarantee, seeing that Russia would not have any means of enforc-

ing it.
Since the above was written, the Tokyo Foreign Office has issued a statement in the sense that an agreement on the subject of the export of bean-cake from Chefoo has been made between the Japanese Consul and the Customs Taotai. Its gist is that a merchant exporting this staple to Japan must furnish security either in money, or in a bank's note, or in a reputable Chinese

Government to Viceroy Yuan, he made Lee Tien-lin, Na Tung and Ku Tun-ki are what was its point of origin? Its point of reply that the story about the project-all said to be on the worst possible terms, origin was Liaoyang, 135 miles distant, ed engagement of Japanese officers was M. Lessar also is depicted as fishing assi-No one need be told that troops do

There is no news of Chang Chih-tung's condition.

RUSSIA'S RESPECT FOR KOREAN NEUTRALITY.

Some time ago we noted a statement in a report sent from the chief local official in Wiju to the Seoul Government. The statement was that on the 2nd of February a detachment of Russian soldiers passed southward into Korean territory. It often happens that such incidental remarks are of the highest historical value, for since they are made without any arrière pensée, without the least idea of establishing or refuting any controversial question, their good faith can not be doubted. Now if Russian troops, few or many, crossed the Yalu and passed through Wiju moving southward on the 2nd of February, then it follows that Russia of diplomatic relations in Tokyo, and 6 days before the first Japanese soldier landed at Chemulpo.

But it will be said, and said with justice, that the testimony of a solitary Korean An interesting official has little weight. confirmation now presents itself. On the

a week or ten days, especially when the season is mid-winter and a Manchurian winter at that. These troops massed on the north bank of the Yalu before the middle of February, and sending mounted patrols across the river into Korean territory as early as the 7th of February, if not as early as the 2nd, must have moved over from Liaoyang in January at latest, and in point of fact we have collateral evidence that the concentration towards the Yalu began in December. Under these circumstances can anything be more extravagant or unjust than Russia's attempt to set up the neutrality of Korea against the Japanese when she herself had already violated it with the most complete indifference?

THE TORPEDO.

American journals have had a great deal to say about the potentialities of the torpedo, invaded Korea four days before the rupture their deductions being drawn from the events of diplomatic relations in Tokyo, and 6 days of the present war. But we can not see that they have said anything new. All the experiences now garnered by the Russians at such heavy cost have been foreseen and discussed. For example, here is an extract from the fascinating work "The Story of the Sea," published nine years ago:

been made between the Japanese Consol and the Customs Total. Its gain is that as the testimony of a solitary Korean in the Customs Total. Its gain to Japan must familia security either in money, or in a bank's note, or in a reputable Chinese that the commodity, on arrival in Japan, will be used shelf as a second to the commodity of the stayle is to be beard of the place of landing will be communicated with by the importer, and when he has been statisfied that the staple is to be sold for a string the commodity of the stayle is to be sold for a string the common that the staple is to be sold for a string the common that the staple is to be sold for a string that the staple is to be sold for a string the string that the staple is to be sold for a string the string that the staple is to be sold for a string that the staple is to be sold for a string that the staple is to be sold for a string that the staple is to be sold for a string that the staple is to be sold for a string that the staple is to be sold for a string that the string that th

clearly seen, if it be stationary, if its range be ascertained, then, if the gun be properly laid the shot will, as matter of absolute certainty, strike the object ten times out of ten. But what are the circumstances here? The object dimity seen through the night is approaching on a diagonal line at the rate of 800 yards in every minute. Every second it changes both its position and direction in relation to the gun. Nor is this all; the same heave of the sea which is making the torpedo-boat lift her fore-foot out of the water at every rise is making the big ship roll slowly through an arc of 20 degrees, and the roll passed on to the nine or sixteen feet barrels of the quick-firing guns is causing the muzzle of the gun to describe great circles in the air, now dipping far below, now rising high above the flying form of the torpedo boat.

also, that the dazzling ray may confuse and mislead the crew of the torpedo-boat. But, after all, a man who is trying to find the Eddystone Light-house has a good chance of not missing his way, and a 20,000 candle-power lamp is as fine a guide as may be to the big ship's whereabouts. Still where there is a single torpedo-boat, the electric light may serve a single ship. But suppose there be two, three, or four boats; and the chances—nay, it may be said the certainties—are that nowadays the torpedo-boats will hout in groups, what then will be the protection afforded by the electric beam? Where the great white wharply-defined edges of the beam on either side; there there is no "penumbra," no half-light; the transition from light to darkness, from white to black, from day to night, is intense and complete. A boat within this dark area is hidden as effectually as fit with the first place, it is easen from the sunshine; but go one foot outside the sharply-defined edges of the beam on either side; the water or explodes and shows the exact error of the tansition from light to darkness, from white to black, from day to night, is intense and complete. A boat within the first place, it is seen from the mast-lead as single torpedo-boat, the electric light may serve a single ship. But suppose there be two, three, or four boats; and the chances—nay, it may be said the first place, it is seen from the mast-lead as some facts with regard to the Oda mine. It is called a "special mine" in the Japanese name. In the second place, the quick-firing gun in daylight assert is four land remarked as some facts with regard to the Oda mine. It is called a "special mine" in the Japanese name. In the second place, the quick-firing gun in daylight assert is four land and tremendous power; no and ship ship to the water sterre, indeed, is day as at noon in the sunshine; but go one foot outside the sharply-defined edges of the beam on either side, which must needs lie between the two ranges tried for the experimental shots. Then, as each shell there there is no "penumbra," no half-light; the transition from light to darkness, from white to black, from day to night, is intense and complete. A boat within this dark area is hidden as effectually as if she were the other side of the world. The eyes of those on the ship, dazzled by looking into the bright ray, will not pierce the thick blackness which contrasts so sharply with it, and a hoat may come altinost along side without being detected by the keenest look-out as long as it keeps out side the pathway of light through which its less fortunate companion is making its way. Probably, therefore, in most cases where a single ship is attacked at night by a group of torpedo-boats, the truest safety will be found in keeping under way and maintaining a bright look-out through the darkness, and using the quick-firing guns as a sportsman uses his gun. Ask a first-rate shot whether, when he stands behind a bank and brings down right and left the whirring grouse that are driven over his head, he aligns, back-sight and fore-sight, and goes through the routine of a volunteer recruit at a rifle-butt. Assuredly he will tell you that long practice has brought hand, eye, and brain to work togelber by an unerring instinct, that direction, elevation, allowance for flight, are all included in one operation which follows the impulse of the will, as surely as the foot is guided to its place in running or walking, or the hand to the mouth when eating. That is how a sportman hits a moving object, and that is how the best value will be got out of the quick-firing guns, especially at might. The when eating. That is how a sportman hits a moving object, and that is how the best value will be got out of the quick-faring guns, especially at night. The gun, it must be remembered, pivots and swings as gun, it must be remembered, pivots and swings as easily upon its stand as a shot-gun in the hand of a sportsman. The aim is taken from the shoulder by means of the long wooden crutch lined with indiarubber, which is attached to the gun, and the firing is instantaneous at the will of the man who takes the aim. Practice will undoubtedly do for the seaman gunner what it does for sportsman on shore, and the direct and most effective shooting with the quickfiring gun will be made by the man who has learnt to know his weapon, and to make aiming and pointing a matter of institut, rather than a matter of drill. ing a matter of instinct, rather than a matter of drill.

the quick-firing guns is causing the muzzle of the quick-firing guns is causing the muzzle of the gunt to describe great circles in the air, now dipping far below, now rising high above the flying form of the torpedo boat.

No; laying by the sights on a dark night may be tried, but the chances against its success are infinitely great. But it will be said, "Why not make use of the artificial daylight which lies stored within your dynamos?" Why not flood the sea with the bright beam of the electric light, and show up the enemy, black and sharp, upon an illuminated sea?" Such an aid may be sought, and probably will often be sought; but to those who have studied the effect of the electric light used from a ship it must seem more than doubtful whether the danger will not be aggravated rather than diminished. It is true that a projector placed low down on the ship's side may succeed in showing up the enemy, and such practice as can be made in its deceiving glamour may possibly, within the short interval allowed, bring the boat to a standstill. True, also, that the dazligr ary may confuse and mislead the crew of the torpedo-boat. But, after all, a man who is trying to find the Eddystone Light-house has a good chance of not missing his way, and a 20,000 candle-power lamp is as fine a guide as may be to

namely, that the projectiles used now are much more effective than they were then; that they are in the hands of men exceptionally qualified for using them successfully; But be the vigilance of the look-out and the skill of the gunners what it may, there can be little doubt that the risk to a single ship attacked at night by a group of torpedo-boats will be very grave indeed. He will be an unwise officer who runs a risk. It has already fallen to the lot of one British officer to have to protect himself against just such an attack as that described. Hobart Pasha, when commanding the Turkish Fleet in the Black Sea in 1877, was for many nights exposed to attack by groups of boats aumed both with the spar and Whitehead torpedo. Neither stack nor defence had at that time reached

its present pitch of perfection in the matter of appliances, nor can it be said that the skill and discipline of either Turkish or Russian sailors were in exact correspondence with what might be expected from the carefully-trained crews of the Western Bowers. But the main conditions of the problem were then what they would be now, and it is therefore interesting to note how Hobart Pasha met them. He recognised at once that the difficulty of repelling a combined attack made in the darkness must be very great. Night after night, therefore, he gave strict orders that all lights should be extinguished, that the ship should steam away into the darkness under the shadow of the coast, and there, using all possible vigilance in the event of discovery, lie of it as epoch-making, would have larger grounds to be perturbed. When naval experts come to examine the matter carefully their verdict will be that against a squadron lying inert for week after week at a fixed point the potentialities of the torpedo have always been fully recognised, and have not now proved more formidable than would have been predicted by any one competent to predict.

TORPEDO MINES.

It was a mistake to say that Chief Con-structor Taneda was on board the Koriu Maru when she laid the mines which proved destructive to the Petropavlovsk. He is now the aim, that aim can be corrected with certainty, and crash goes the 6-or 12-pound shell through the thin scantling of the boat; or, better still, pierces the shell of the high-pressure hoiler. Scotched or killed, the boat is at the mercy of the ship, and the danger is over. Moreover, it must not be forgotten that the torpedo-boat which runs her twenty or twenty-five knots on the measured mile in smooth water is a very different performer when the sea rises and checks and buffets her with every wave. Her crew see the big ship suddenly bearing down, and they checks and buffers her with every wave. Her crew see the big ship suddenly bearing down, and they realise that, from being the hunter, they have become the hunted. Full speed ahead is the become the hunted. Full speed ahead is the onto accomplish more than the flooding of only chance. A stern chase is a long chase, and engines and boilers will doubtless be pressed to their fullest capacity. But lucky will be the torpedo-boat crew if before long they are not aware that the big ship astern of them is gradually showing up larger and larger against the horizon; lucky if they are not made aware of her powing the proximity by seeing the flash from one of her bowguns, followed by the springing of a great fountain of water high into the air beside them, as a shell from a 6-inch gun comes hurtling through the air notable features of the Oda mine is that it guns, followed by the springing of a great fountain of water high into the air beside them, as a shell from a 6-inch gun comes burtling through the air from the steady platform of the cruiser. Then all will depend upon good engines, good stoking, the number of hours of daylight, the proximity of a friendly port, and the shooting of the enemy—and luck. Given daylight, a tumble of sea, and a fair. Such facility is plainly of the highest importance of the course chase, the odds on the cruiser are very long ones tance where the laying of mines has to be indeed.

undertaken within the field of an enemy's The Russians in Port Arthur are situated searchlights and within effective range of his pretty much as Hobart Pasha was situated guns. A moment's thought is needed to in 1877, with some material differences; appreciate the perils of such an enterprise, for whereas the worst that a vessel has to fear usually from hostile fire is the bursting of a shell on board, the crew of a torpedo-transport know that should a shell find them, it will proand above all that the Russian squadron can bably explode the whole of their own cargo not seek security by stealing away under of projectiles, blowing into small fragments cover of darkness to the shelter of some the ship and all the souls she carries. To get

tunate ship struck two or even three mines. We have already explained that mines have to be separated by an interval in feet equal, approximately, to the number of pounds of explosive with which they are charged. Were they placed closer, the firing of one would probably explode the others. Consequently where 300lbs., say, of explosive are used, the mines must be 100 yards apart, and thus there is evident possibility of a ship passing scatheless through a line of mines. Hence the custom is to lay them in two lines so that the mines of one line shall occupy the intervals between the mines in the other line. It is conceivable that immediately on being struck by the first mine the Petropaylovsk changed her course so as to come into contact with a mine in the second line, or possibly she may have been steering diagonally across the two lines. Only the most terrible, injuries can account for her sinking within a short distance of harbour. She should have been able to make Port Arthur without difficulty.

THE REJOINDER OF " THE TIMES."

We quote without any preface the following portion of a leading article from The Times:—

It is an instructive and also an amusing coincidence that at a moment when the whole of the Russian nand pro-Russian Press machinery is being employed in a concerted effort to deter us from displaying our legitimate sympathies with our Japanese allies, and in warning us of the danger of provoking Russia to declare war upon us, if we are misguided enough to show that we do not wish her to annihilate the most civilized and cultivated people in Asia, M. de Plehve has been publicly expressing his profound satisfaction and delight "to find that Germany sympathizes with Russia." It is a mere confusion of ideas to pretend, as Frince Mestchersky pretended a few days ago, and as some people in this country seem to imagine, that because it is our duty as a State to observe the legal obligations of neutrality, it is also our duty as a people to affect indifference between our allies and their adversaries. We have as much right to cherish and to avow our sympathies with Japan as France, our friend and neighbour, has to cherish and to avow our sympathies with Russia, or as Germany, who is not an ally of Russia, has to proclaim her good wishes for the success of that "bulwark against all revolutionary forces."

good wishes for the success of that " bulwark against all revolutionary forces."

Russia has no just or reasonable ground of complaint against English newspapers so long as they report fairly all facts which are in her favour, and do not distort them to her prejudice in their comments. She has no right to claim that they shall assume a judicialimpartiality between her and Japan; just as we had no right to claim, that the Russian Press should pretend to wish equally wellto us and to our enemies in the Boer war. Did responsible English papers invent and propagate malignant falsehoods to the injury of Russia and of her soldiers, or indulge in the insulting and provocative language with which we were but too familiar in many Continental journals at that time, there might be some ground for the complaints which are re-echoed with such sudden unanimity from one end of Europe to the other, and which even some English papers have been duped into reflecting. But no such accusation is, or can be, made with truth against the chief organs of the English Press. The accusers themselves admit as much, and take refuge in vague generalities. If Russia were so intent upon going to war with us as she is represented in some quarters to be, she would hardly be dissuaded by any amount of newspaper articles, however sympathetic and respectful to her, and however unfair to the nation whom she has compelled to defend herself by arms. We do not, however, believe that Russia is at all so rash or in so excited a mood as it is the eve of her champions to represent her. They will find some reasons for our doubts in the very candid and instructive statements which M. de Lanessan, the former French Minister of Marine, is reported to have made to a representative of the Figuro. We shall continue to "back our friends," as is our English way, but always without injustice to their enemies. If that course gives offence, the blame is not ours.

A pound of new green tea from Formosa was received on April 20th in Kobe. The quality proves to be very good.

WAR NOTES.

Saturday, April 16. The St. Petersburg Viedomosti considers, according to translations in the Literary Digest, that "before Russia's eyes a prospect opens which is without a parallel in majesty, wonder and significance," and also observes that "The English may rejoice all they like at the spectacle presented by their allies, whom they have educated in the school of hypocrisy and hate. The demons have shown the stuff they are made of. But there is no doubt that the punishment toward which they are hastening will long serve as a fearful lesson to those who dream of compromising the proud might of Russia." The Russ thinks that the Port Arthur fleet's answer to the attacks made upon it will be prompt, but nevertheless wonders somewhat that it does not assume the offensive and thinks that it may be "suffering from the ebb and flow of the tides." But the Russ concludes that :-- " Our illustrious naval heroes will show the insolent enemy the meaning of Russian capacity. The mighty shades of the heroes of Tachesme, of Navarino, of Sinope, consecrate their successors. to triumph on the field of battle. And when the turn of the land forces has come, when once the Russian soldier faces the Japanese he will prove to them how senselessly the troops of the Mikado behaved when they undertook to confront such an antagonist in war."

It is stated that nothing is yet known as to the fate of the Japanese subjects captured by the Russians from the steamer Hangei Maru, nor as to the fate of the two Japanese taken out of the despatch-boat of the Chicago Daily News. On what pretext Russia holds these men prisoners it is hard to Rumour alleged that the two understand. men taken from the despatch-boat had been sent to Mukden for execution. course no thinking person credited such a story. The men were simply acting as interpreters to the correspondent of the Daily News, and Newchwang being an open port they had an unquestionable right to go there with their employers. According to the most rudimentary rules of civilized warfare they should have been released simultaneously with their ship, and as for the crew of the Hanyei Maru, there was no excuse for holding them prisoners at Port Arthur even for an hour, provided that means of sending them away were available. But although the Hanyei Maru was sunk on the 26th of March, the men are still held at Port

Our readers will have understood, though for the sake of precaution it may be well to mention, that the steamers captured from the Russians have not yet been definitively added to the Japanese mercantile marine. The legal preliminaries have not been fully satisfied, and until they are, no final step will be taken, of course. But in the meanwhile the ships and their appurtenances have been duly valued, and they will be employed by the Japanese, the latter holding themselves responsible in the amount of the valuation should restitution be ultimately decreed by law. The change of the six ships' original names to Japanese terms is a mere matter of conveniences. We say "six ships' because, although five only were catalogued in our recent notice, there is another to be added, namely, a second Manchuria (6,000 tons), the property of the East Asia Steamer Company. In fact, two Manchurias have been captured, one belonging to the East Chinese Railway Company

and having a tonnage of 2,981, the other a large ship owned by the East Asia Steamer Company.

Monday, April 18.

It is stated that an epidemic of smallpox prevails at Liaoyang and that some 300 cases occur daily. This is partly confirmed by the account of a Chinaman who recently returned from Mukden. He says that a train containing 350 sick men from Port Arthur reached Mukden a few days ago en route for Harbin and that 20 or 30 patients are sent to the latter place from Mukden every day. It will greatly hamper the railway facilities if a stream of invalids has to be carried back constantly. But we can easily conceive that to make efficient hospital arrangements at Mukden or Liaoyang would

of the Russian commanders.

The Asala's Peking correspondent telegraphs that a military telephone with six exchanges has been completed between Port Arthur and St. Petersburg. What an achievement! We trust that M. Plaucon or General Pflug will utilize this fine opportunity.

be precisely one of the cruellest difficulties

General Pflug will utilize this fine opportunity.
The Russians are said to be laying a military line between Liaoyang and Fengliwang. Twenty miles have been laid but over a hundred remain. If that be true it points to a determined stand at Fengliwang.

There is talk of an attempt to press into the ranks every Russian of whatever profession at Kirin, the result being that many civilians have adopted the tonsure and the queue and fled in Chinese costume.

Vladivostock's ice has not yet melted though the Tumen is flowing free. Reports coutinue to arrive showing the Russians entering Korea at Kyong-song, seizing the telegraph office and threatening Sonchin. But no one seems to regard these incidents yery seriously.

very seriously.

It will be remembered that a statement was recently made with reference to a skirmish at the Yalu on the morning of the 12th, when an officer and twenty-two Russian soldiers were supposed to have been shot in connexion with an attempt to cross the most northerly branch of the Yalu below Wiju. This is now officially corrected in the sense that the enemy's losses were one officer and a private killed and several wounded.

It is alleged that the Governor of Vladivostock has issued orders that in case of the
town falling into Japanese hands, everything must be burned. The four cruisers
go out of port in the day-time but return
invariably at night. No torpedo-mines
have yet been laid; the garrison relies on
the batteries solely. It would seem that
No. 6 battery received much injury during the Japanese bombardment and that
vigorous steps have been taken to repair it.
The total number of troops in the place is
said to be seven thousand, no steps having
been taken to increase the garrison since the
war begun.

All the above details were obtained by the Asalai's and the Jiji's correspondents from Koreans who lately visited Vladivostock or north-eastern Korea.

amount of the valuation should restitution be ultimately decreed by law. The change of the six ships' original names to Japanese the time of the first Japanese attack on Port the time is a mere matter of conveniences. We say "six ships" because, although five only twere catalogued in our recent notice, there the house of their Admiral. The tale has is another to be added, namely, a second now to be relegated to the limbo of inventions. We find the following in The Times East Asia Steamer Company. In fact, two of March 9th:—"The Peterburgskipa Viedo-Manchurias have been captured, one belonging to the East Chinese Railway Company of Admiral Starck denying the reports

current in St. Petersburg society that she gave a grand ball to the officers of the Russian squadron on the occasion of her name day, thus taking them away from their duty on board their ships at the time of the first Lungese to recede attack at Port Arthur first Japanese torpedo attack at Port Arthur. Mme. Starck states that the officers did no more than offer her their congratulations in the course of the day, and that all were at their posts in the evening, including Admiral Starck himself."

It was claimed in St. Petersburg that up to February 17th the number of Russian troops despatched to Manchuria was 217,000 men. Assuming that there were 150,000 castward of Lake Baikal when war broke out on the 9th of February, we are thus asked to believe that 67,000 were despatch-

asked to believe that 67,000 were despatched in 8 days, or at the rate of over 8,000 daily. That is a little too tall.

The Russians are said to have removed the bridge of boats which they had thrown over the Yalu. This news comes from Chefoo. It sounds rather stale. We imagine that the bridge were destrayed been hefer. that the bridge was destroyed long before the Japanese troops arrived at the river.

Wednesday, April 20.
It is stated that the Russians at Vladivo stock have executed Captain Shimono, of the Japanese Infantry, and his interpreter, Mr. Tsuzuki, on a charge of being spies. These men were arrested in February, and were found guilty in spite of the remonstrances of the Japanese Commercial Agent. appears to be an impression that their exe-

cution was an act of great injustice and cruelty, but the details are not stated.

The Vladivostock journal of the 18th of March says that it has been decided to raise force of volunteers in Harbin to act as railway guards.

The same paper in a later issue speaks of a great rise in the price of provisions throughout the districts along the railway.

By the 23rd of March the ice in the Vladivostock region is said to have virtually disappeared.

Thursday, April 21. It turns out that the Japanese had 5 men

hurt during the last operations at Port Arthur. In every case the injuries are of the most trifling nature.

The press of Europe now considers that Russia's naval power in the Far East is completely shattered, and the newspapers of Great Britain are loud in their praises of the Japanese navy.

Japanese securities are rising on the London market.

Admiral Skrydloff, now in command of the Baltic Squadron, has been appointed to succeed Admiral Makaroff. The nomination of Admiral Alexieff was only temporary.

Friday, April 22. It is reported in Europe that Viceroy Alexieff has been instructed to refrain from any naval operations pending the arrival of Admiral Skrydloff. If that be true, the next thing to be looked for in normal circumstances would be the resignation of Viceroy Alexieff, for such a slight must be unendurable. But Alexieff is in the face of the

enemy. He can not resign. And apparently he is not to have any opportunity of retrieving his fast fading reputation.

Says the North China Daily News:-

The historian of the present war will be interested in the following fact, which is not generally known, but which is very important in its bearing on the charge that the first Japanese torpedo attack on Port Arthur, on the morning of the 9th of February, was a treacherous surprise. On the morning of the 8th of

February, the Admiral in Command at Port Arthur sent for the chief Government pilot and asked if there was any merchant steamer leaving Port Arthur that day. "No," was the reply, "but there is one leaving to-morrow morning." "You must arrange for her to leave this afternoon," said the admiral; and accordingly at 6,30 p.m. on the 8th, when the Japanese fleet was still 60 miles off, the Norwegian steamer Kanor left the port with thirty Russian refugees, including the families of the Admiral and chief pilot. chief pilot.

THE ENDLESS PURSUIT OF WEALTH.

In the United States, says the Banker's Magazine, leaders in every line of activity, in politics and business, have been conspicuously prone to die, as it is said, in harness. The death of Mark Hanna is a case in point. But the list of those distinguished for their successful attainment of wealth and fame, who have continued their activities long after the advance of age and the diminution of physical strength must have warned them of the approaching end, is a very long one. In the older countries of Europe, on whose civilization that of the United States is founded, it seems easier for men who have more or less successfully attained the object they aimed at to retire and enjoy freely the prizes they have gained, although even there the old barbaric struggle is in many cases kept up to the end. Public opinion there, too, is more tolerant of those who lay off the harness before being compelled to do so by the decree of fate. In this country, however, there seems to exist in the mind of the ordinary man a certain contempt for those who give up the strenuous path of labour and ambition before their strength has wasted away. The successful men of the United States who have sprung from the masses are imbued with this opinion. Until within the last twenty-five years the idea of retiring from active life and settling down to a life in which personal tastes and proclivities could be followed, was regarded as at least eccentric. There have always been two necessary steps to be taken before retirement from active life could with safety be accomplished; one was the acquirement of wealth, and the other provision for its safe-keeping. As civilization progresses the second and more important step can be more easily managed. The individual no longer has to depend upon his own efforts to guard the store set aside for his future support. The power of corpora-tions, originally directed simply to the accumulation of wealth, is now to a very great extent applied to its conservation. In Great Britain there has always been a wealthy leisured class, and naturally there has been a systematization of the manners and customs consequent on such an association of wealth tinued appreciation of Japanese securities. and leisure. Public opinion is more tolerant of a man who wishes to do what he likes with his own than it has yet become in the United States. The existence of a leisured class able and willing to enjoy their lives rationally and intelligently, is a check on the wilder exhibitions of leisure on the part of suddenly acquired wealth. It also holds out something beyond mere money-getting as the goal of successful life. It encourages retirement after reasonable fortune has been gained, and discourages to some extent the piling up of exaggerated redundancy. The effect of a more philosophical view of life on the part of our business men will tend to a more even distribution of wealth, and a leveling of the inequalities now so frequently pointed out.

FOREIGN VISITORS TO JAPAN.

The Committee of the Welcome Society held a meeting on the 19th instant to consider the best means of dispelling apprehensions which appear to have interrupted the usual stream of foreign tourists to Japan. It was decided that counsel should be taken with the various municipalities and chambers of commerce throughout the country, for the purpose of making widely known the fact that no inconveniences of any considerable character need be anticipated by persons visiting Japan at present. We observe that in connexion with this question one of the Kobe journals-the Kobe Chronicle-has endeavoured to create an impression unfavourable to travel in Japan, by alleging that foreigners coming here are objects of suspicion to the police and to the local officials. Kobe ap pears to be conspicuously unfortunate in its Foreigners relations with the Japanese. living elsewhere see nothing to indicate that the country is at war.

BANK OF ENGLAND REDUCES DIVIDEND.

The Bank of England, at its semi-annual meeting in March, only declared a dividend of 4½ per cent. for the past six months. This was the first time in seven years that the dividend has been below to per cent. per annum. The Governor of the Bank said the profits for the six months ended February 29 were £663,041, and that after providing for the dividend the amount of the "rest" on that date was £3,018,780. The profits of the bank in the corresponding six months a year ago were £739,815; in 1902, \$\frac{1}{2}\$,896; in 1901, \$\frac{2}{725,596}\$, and in 1909, \$\frac{2}{736,149}\$. Since 1897 the Bank of England has paid annually 10 per cent. In 1896 \$\frac{1}{2}\$ per cent. was paid, \$\frac{3}{2}\$ per cent. in the first half and 5 per cent. in the second. In nrst nail and 5 per cent. In the second. In 1895 8½ per cent. was paid, 4 per cent in the first and 4½ per cent. in the second half of the year. Highest and lowest prices for Bank of England stock in the first two months of 1904 have been, respectively, 316 and 311½. The highest and lowest figures of previous years are as follows:

		HIGH.	LOW.
1903	***************************************	331 1/2	311
1902	*******	336	3231/2
1901		342	320
1900		349	326
1899		361 1/3	325

NOTES ON CURRENT EVENTS.

A telegram to the Specie Bank from London, dated the 15th instant, shows con-The 4 per-cents, are now quoted at £64; the 5 per-cent. war bonds at £79-12s. 6d. and the 5 per-cent. consols at £77-11s. 8d. On the other hand, the Russian 4 per-cents., which had been quoted at £95 on the 11th, fell to £94-10s. on the 13th. It is probable that news from Port Arthur had something to do with this result.

It is not to be believed for one instant that the Russian Government has made the declaration attributed to it by some Washington news-mongers—the declaration that any newspaper correspondent using wireless telegraphy shall be treated as a spy and shot. Such an intimation would be obviously addressed to the correspondents on the Japanese side, and if the Japanese are ready to allow wireless telegraphy, the Russians have nothing whatever to say. Besides it is a monstrously absurd notion on the face of

it that whereas a correspondent is always at will now be deferred until the 28th of Aug. liberty to use the telegraphic wires for transmitting his intelligence, he becomes a spy from the moment that he has recourse to wireless telegraphy. Some correspondent who, being himself without access to a wireless system, experiences horrible jealousy of his more fortunate confreres, has concected this wild canard.

Writing about Kiaochau the Hongkong Daily Press says :-

It is true that Germany is spending money very freely on this possession, and that it is not at present paying any interest on that expenditure; but the German Government look confidently to the time when the capital now being laid out will yield good results, if not directly then indirectly by feeding German trade and shipping. Already the trade of Kiaochau has increased enormously, the returns for 1903 showing that it had doubted as compared with the trade of the preceding year. Meantime six factory buildings and a silk spinning mill have been built, a concession acquired for a steam corn milt, numerous houses and godowns have arisen, a brewery is being established, and a fourth brickfield has been opened. Mining syndicates are also busily engaged in exploring the hinterland of the Colony, and the results of their labours (Shantung being fairly rich in minerals) will no doubt soon be apparent. The work of afforestation is being systematically carried on, as our German friends believe very strongly in the ameliatory influences of forests on the climate, and it is asserted that the young plantations already established have had a beneficial effect on the rainfall and have increased the fruitfulness of It is true that Germany is spending money very

the climate, and it is asserted that the young plantations already established have had a beneficial effect on the rainfall and have increased the fruitfulness of the soil. Altogether the German Government have reason to believe that the money so freely lavished on their Far Eastern dependency has not been wasted, and that an object lesson for the Chinese in North China has been created by their efforts.

It is, however, when we come to regard the work done on the Shantung Railway that we in Hongkong find our object lesson. The concession for making, the railway was acquired in 1899, the same year in which the British-Chinese Corporation obtained their concession to construct a railway from Kowloon to Canton, to join the line to be built by the Belgian-American Syndicate from Wuchang to Canton.

Early in 1903, the first section of the Shantung Railway, namely from Tsingtao to Chon-tsun, a distance of 303 kilometres, was opened to regular traffic. It was espected that the remaining portion, to Tsinan-fu, the capital of Shantung, would be completed by the 1st Jone, 1904, but the contractors have anticipated this date by nearly three months, for the first through train to Tsinan-fu, is therefore now open to traffic, within about five years of the date of securing the concession.

The Asahi Shimbun publishes the following letter, said to have been sent from a number of Polish youths studying in Austria, to the students of the Imperial University in Tokyo:

To the Youth of Japan, VIVAT Japan!

The Youth of Poland send their fervent wishes for a glorious Victory, and a fraternal request that the case of the Poles serving, in the Russian army may receive careful and sympathetic consideration. Their hearts and souls are with you, though they are forced to fight against you.

LEMBERG in Galicia (Austria). February 16th, 1904.

The Emperor, in accordance with the Constitution, has ordered that elections to the House of Peers shall take place for representatives of the three lowest orders of nobility, namely Counts, Viscounts and Barons. The number to be elected is 17 Counts, 70 Viscounts and 61 Barons. These peers hold their seats for a term of seven years, and the present is the third election since the promulgation of the Constitution. Marquises and Princes have a hereditary

in on the 28th of May. Its presentation can not be carried out successfully.

The explanation of the delay is that Japan ese officialdom has been otherwise engaged.

Japanese securities continue to rise rapidly on the London market. Attempts made by Messrs. Illies and Company to purchase are stated by Japanese papers to have elicited a quotation of £87 for five-per-cent. bonds which were selling at £80 a few days ago.

DEATH OF MR. JAMES JOHNSTONE.

An event which will arouse general regret, is the death of Mr. James Johnstone, of Messrs. Johnstone and Cain, No. 7. Yokohama. Mr. Johnstone, who had been suffering from nervous trouble and insomnia, left on a visit home in the Wakasa Maru on her last trip previous to the outbreak of war, and on his arrival in England met one of his daughters who had already spent some months there. They started for Japan in the Kanagawa Maru, but the commencement of hostilities Marn, but the commencement of hostilities detained that vessel at Malta, and Mr. Johnstone decided to sent his daughter out in the P. & O. steamer Palawan, he following in the P. & O. steamer Formosa. His health showed great improvement on the voyage, and from Shanghai especially the report was exceedingly favourable. He was expected to reach Yokohama in a day or two.

The deceased gentleman, who was a native of The deceased gentleman, who was a native of Stirling, came out to Japan some thirty years ago and after engaging in business in Tokyo, entered the employment of the Mitsu Bishi Co., afterwards the Nippon Yusen Kaisha, where he continued for years to occupy the post of head of the Stores Department. He left to enter upon business in his own name. An acute and enterprising man, he had acquired many interests in addition to those centring in his own office. Prior addition to those centring in his own office. Prior to his departure for home he was Chairman of the Yokohama Engine and Ironworks, and of Helm Bros., and he had been Chairman of North and Rae, besides being associated with mining and other projects. A large circle of friends, who knew in some degree of his many but inconspicuous good deeds, and who appreciated his kindly nature and sterling character will think of him nature and sterling character will think of him

Mr. Johnstone was twice married and leaves a son and daughter by his first marriage, and four children of whom two, a son and a daughter, are grown up, by the second marriage. To his widow and her family the sympathy of the com-munity will be respectfully offered.

THE AMERICAN NURSING PARTY.

Mrs. McGee, M.D., and her party, consisting of the following ladies, Nurses Sophia Newell, Ella B. King, Mary E. Gladwin, Elizabeth R. Kratz, Minnie Cooke, Alice Kemmer, Genevieve Russell, Adele Neeb, and Adelaide Mackereth, arrived off Yokohama by the steamer Shawmut, on the evening of the 21st from America, their mission being to assist in the work of the Red Cross Society. The Asahi has an account of Cross Society. The Asahi has an account of Mrs. McGee's career which seems to be worthy of credit. According to this she was born at Washingtonin 1864 and was educated at Cambridge and Geneva. In 1888 she married Professor W. T. McGee, after which she attended medical classes in Columbia university. Having graduated there she engaged in the practice of medicine for five or six years, and when the Hispano-American war broke put she went to the Philipping greaty. broke out she went to the Philippines accompanied by a number of nurses to take part in field hospital work. She held an official position up nospital work. She need an official position up to Dec. 31st, 1900. She is the first lady in the United States who has held an army commission. It is stated that the expenses of these nurses will be defrayed from a fund subscribed in America

THE BOOKSHELF.

"Masterpieces Selected from the Korin School." THE Second volume of this remarkable and beautiful work has been published by the Shimbi Shoin. It contains 28 plates, 15 of them coloured. The whole are reproductions from Korin, no other celebrity of his school being represented. There are many varieties of motive—landscapes and sea-scapes, studies of moving life and still life, flowers and foliage, portraits and historical scenes. All show traits of the artist's genius. One of the most interesting facts demonstrated by the work is that Kôrin could be at once profoundly realistic and thoroughly conventional. At one moment we find him reducing even scenic features to the semblance of an arabesque or a scroll-patterni. at another he shows us a drawing in which every detail is redolent of life; and yet again we find him producing with a minimum of effort broad results which are neither purely conventional nor absolutely realistic, but in which the master seems to have set himself to demonstrate the points where the two styles melt into each other. One does not look for the caricaturist in Korin. Yet that his imagination sometimes took playful his imagination sometimes took playlul flights is shown by his painting—reproduced in the volume before us—of "The Thirty-six Poets." Mr. Tajima, with admirable gravity, tells us that "all these poets were most estimable persons, whose verses have influence sufficient to make heaven and earth tremble, to suppress even devils and to compel mercy from the merciless." They did pel mercy from the merciless." pel mercy from the merciless." They did not have any of those effects upon Kôrin. He depicted them as thirty-six most comical looking persons, their fat faces eloquent of inanity and their poets' frensy breathing burlesque. For Korin there was evidently only one kind of poetry, the poetry of the brush, and what a master he was of that art! This fine volume reveals him faithfully.

Japon, by A. B. DE GUERVILLE; Paris. Alphonse Lemerre.

MR. DE GUERVILLE served as a correspondent for leading American journals during the China-Japan war, and wrote such interesting accounts of the operations in the held that many people must have wondered at his subsequent silence. The reason is now explained. After leaving the East he underwent a terrible experience, barely escaping death from tuberculosis and owing his recovery after years of suffering to the system and the care of Doctor Otto Walther at the sanatorium of Nordrach-Colonie. One of the first uses to which he put his restored faculties was to write a book, "Au Japon," in which he recounts some of his experiences in this country and sets forth his opinions about what he saw and heard. It is not a formidable work. There are only 280 pages of 200 words each, making a volume easily read from cover to cover in two hours. The style is thoroughly French; that is to say, light, clear and graceful, and the matter is always interesting. What strikes us especially is that the author takes much trouble to contradict the gross exaggerations published in 1895 about the Port Arthur affair. Mr. de Guerville, was among the newspaper correspondents who entered the place immediately after the fight and he is right to sit.

Japan has asked for an extension of time by three months in presenting her reply to the foreign case in the matter of the House Tax. The reply should have been handed in on the 28th of May. Its presentation forts, only 120 bodies were found, that

proves very conclusively that there was no butchery and no general massacre." He treats this question at some length and forcibly, but we shall not follow his arguments, because the world long ago arrived at the conclusion that, with the exception, perhaps, of a small fraction, all the talk of atrocities committed by Japanese troops at Port Arthur must be regarded as a newspaper sensation deliberately conceived and created by men who cared much more about advertising themselves than about speaking the truth. This Port Arthur chapter is the last in "Au Japon," and is also one of the very few chapters written quite seriously. The rest are pervaded by a vein of humour often decidedly risque, which, while it adds largely to the attractiveness of the book, suggests that the author relies as much on his imagination as on his memory. Thus he devotes a chapter to " La Vraie Madame Chrysantheme," the gist being that no such fair lady ever existed in the flesh, "Loti" having merely described a type. That is more than probable, and what is certain is that "Loti's" knowledge proved itself signally defective in some most cardinal points. Some of the traits he assigned to "Madame Chrysantheme," the unreservedly mercenary traits above all, are conspicuously absent in the women of Japan, concerning whom no greater libel was ever penned than "Pierre Loti's" libel. But it must be confessed that M. de Guerville also writes some most unblushing slanders. For example, he gives us in one chapter a detailed account of how, being received at the house of a Japanese provincial Governor, he was invited to take his morning bath in the garden—a beautiful garden at that—, the Governor, his wife, his three daughters and their maid-servants all standing by in a state of absolute nudity and waiting to enter the bath in their turn. The whole of this chapter it a pure romance: that is all that can be said of absolute nudity and waiting to enter the bath in their turn. The whole of this chapter it a pure romance: that is all that can be said about it. Nothing of the kind ever happened to M. de Guerville, or could possibly have happened to him, unless his "Governor" and the latter's family happened to be a party of lunatics. But many travellers' tales have been recounted about the methods of the bath in Japan and M. de Guerville may be forgiven, perhaps, for having drawn a bow to which a dozen other romancists had already put their hands. The trouble is that in all his descriptions one detects, if not the same indifference to truth, certainly a magnificent freedom of exaggeration. It is enough for him to have constructed a striking story, be the materials what they may. We can only takes; men so positive invariably do, for in say, therefore, that his book is entertaining, many cases their conclusions must be more many cases their conclusions must be more

"Why was this book written?" From first to last it contains no new information. Every recorded fact is taken from familiar sources and every fact recorded is familiar. Many facts, too, are marshalled merely for padding purposes, and whatever attractiveness they have derived from the manner of their telling by others, we can not recog-nise that Mr. Rittner has much embellished them. Yet we are compelled to acknowledge that his work has a raison d'être. In the first place it is redolent of love for Japan; permeated from preface to finis with Japanese atmosphere. There is no fine Japanese atmosphere. There is no fine writing. We hear nothing about hills with tender contours bathed in opalescent air; about incomparable curves of peerless mountains; about booming songs of sweetvoiced bells on autumn eves, and so on. Yet we taste the flavour of Japan in every chapter. In the second place, Mr. Rittner a novelty to us. Therefore we frankly has a mind to speak and speaks his mind, commend Mr. Rittner's work, with the The courage of his opinions is with him in abundance. He calls a spade a spade, and he conveys the impression that were there to the verge of mania. any possibility of calling it by a still more uncomplimentary name, he would so call it. A few samples of his method are these:-

"How much more beautiful, I say, is all this (Japanese costume) than a European dress, in most cases chosen without a particle of taste and a hat to match—a hat forsooth! I feel almost ashamed to

match—a hat forsooth! I feel almost ashamed to apply such a word to a flower-garden surrounded by enormous ostrich feathers—, few colours harmonizing, everything clashing."

"In no country in the world do a people or a country appeal to ones feeling as they do in the land of the Rising Sun. * Such is Japan—a land not only of flowers, scenery and gardens which in their beauty surpass the imagination of man, but a land also of people with whom few can cope, no matter in what."

"Japan, if she continues to modernise her women."

in what."

"Japan, if she continues to modernise her women as rapidly as she has done, is doomed to have the whole of her society brought down to that point to which the society of Europe has become degraded. It is difficult even to say in which country in Europe it is more!

next scene." If anybody ever saw anything of the kind in a Japanese theatre, his experience differs wholly from ours. It is even stranger, however, to be told that in the East conventionality was unheard of"; that "every man thought, said and did what he liked, dressed as he choose, and went where he wanted, no man to forbid him, or call him eccentric, no formula upon which, if he wished to conform to the rules of Society, he was forced to act." Really we think, on mature consideration, that a more wholesale blunder was never penned about Japan than this assertion of Mr. Rittner's. Yet we say again that his book is redolent of Japan, and that in reading it we seem to recall the impressions produced upon our own minds in the days, now alas! far, far distant, when this delightful country and its loveable people were a novelty to us. Therefore we frankly

" The Nanso Meigwa-yen."

THE Shimbi Shoin (Shitaya Nicho-machi No. 52) are supplementing their beautiful publications by a series of ten volumes called the Nanso Meigwa-yen (garden of celebrated pictures of the Southern Sung). Each volume contains ten plates, so that the series, when completed, will show a hundred specimens of the finest Chinese masterpieces in Japanese collections. The originals cover the Sung, Yuan, Ming and Tsin dynasties down to the Keio epoch of the Japanese calendar; in other words, they represent an era extending from the eleventh century down to the middle of the nineteenth. It need scarcely be said that many collections have been placed under requisition for the purposes of this work. In the two volumes thus far published the collection of Baron Iwasaki (Yanosuke) is very largely represented, and there are pictures from the Imperial Museum, from Viscount Okubo, Mr. Nagai, Prince Sanjo, Viscount Yamanouchi, Count Matsukata, and others. All students of Far-Eastern art have learned the fact that to Japanese collections they must go for really fine and representative examples of Chinese painting. Undoubtedly many These quotations convey a tolerably accu-rate impression of the author's style of they are virtually inaccessible to foreigners, diction and trend of thought. His views and there has resulted an extraordinarily are absolutely final about everything. Need it be said that he commits numerous misconception founded on the gaudy daubs takes; men so positive invariably do, for in purchasable for so many farthings at any say, therefore, that his book is entertaining, and that to take it seriously from cover to cover would be imbecile.

Impressions of Japan. By Geo. H. RITTNER.

London, John Murray.

Thus is a singular book. In outward and the second and the secon This is singular book. In outward appearance it has everything to recommend to the samurai." Where Mr. Rittner ob- and further that upon him the Japanese pearance it has everything to recommend to the samurai." Where Mr. Rittner obland further that upon him the Japanese it—beautiful type, beautiful binding, beautiful paper, and beautiful illustrations. But certainly not beautiful writing. It is as strange as his assert many connoisseurs a moot point whether the proper adjective to apply to the style, and readers must divest themselves of any prejudice against liberties with syntax and grammer mecssairs! What a notion! The netsuke and Chinese painting. On the whole we against liberties with syntax and grammer liberties with synta against liberties with syntax and grammer necessaire! And then he affirms that it do not think that it does apply, yet if they intend to go through the book from depends upon how a guest has behaved are we compelled to admit that in some cover to cover. A great many people will depends upon how a guest has behaved are we compelled to admit that in some whether his innkeeper employs at parting directions the Chinese have never been surdothat, we imagine; and among them those the salutation mata irrasshai (come again) passed. To any one interested in this questions will be at times pleased and at times descended, instead of handclapping, the beauty, it should be matter for thankful-exasperated. We, when we had turned the last page, found ourselves seeking to answer curtain, which they lifted, and watched Shain has taken this direction. In preaquestion which involuntarily framed itself, with huge interest the setting of the vious publications Chinese masterpleces have been produced here and there, but now for the first time are the public to possess a collection of truly representative examples, authenticated, dated and described. It is Japan's pleasant task thus to introduce to the world the teacher at whose feet she reverentially sat in bygone centuries, and it will delight many a foreign student to trace in these volumes the models of styles made illustrious in Japan by such men as Sesshu, Sesson, Motonobu, Tanyu and their successors. All the pictures are in black and white: there are no colours. That is an advantage in some respects, and a loss in others. So far as the first two volumes go, there is not a plate that could have been spared, and we look forward with extreme pleasure to the completion of the series.

" Great Masters": London, Wm. Heine-

WE have received from the publisher, Mr. William Heinemann, London, Parts VIII to X of " Great Masters." Allusion has already been made in our columns to this series. It is to comprise a hundred reproductions of "the finest works of the most famous painters down to the year 1800," and there is added an interesting introduction with descriptive text by Sir Martin Conway. Scarcely an artist of celebrity is omitted, and the reproductions are the most finished work of which the technical competence of the time is capable. Here we make the intimate acquaintance of Reynolds, Van Dyck, Raphael, Watteau, Titian, Murillo, Velasquez and Botticelli, to say nothing of minor lights. Such a series needs no description, but we have to add that if subscribed for en bloc the 25 parts cost only £5, an extra-ordinary low figure, while payment in advance secures a handsome portfolio.

THE TOKYO DRAMATIC AND MUSICAL SOCIETY.

This Society gave a performance at the Shorai-Kwai in Tokyo on the 18th instant, in aid of the families of men at the front. Two pieces were represented, the caste in each consisting of only two persons. The first was Charles Marsham Rae's "A Fair Encounter." A pretty young widow, Lady Clara (Madame la Baronne d'Anethan), is engaged to a youth whose sister, Mrs. Celia Grenville (Miss Bovill), anxious to dis-Celia Grennille (Miss Bovill), anxious to dis-cover the character of her brother's flancée, disguises herself as a lady's maid and enters Lady Clara's service. There are some curious complications which end in an out-burst of mutual affection, but there are no situa-tions and the humour of the dialogue is thin. Of course such incidents occur only in the pages of playwrights; but a farce is never condemned for being unnatural. Its faults in that respect impose a heavier burden on the actors than on the pose a neavier burden on the actors than on the audience. A great deal of acting is needed to carry off Charles Marsham Rae's conception, and a great deal of acting was happily available on the little stage of the Shorei-kai. The fair widow had to show herself at once frivolous and earnest, spiteful and forgiving, jealous and magnanimous; and she exhibited all these moods with entire sincerity, being neither too abrupt in her transitions nor too emphatic in her climaxes. It sounds like a mere platitude to say that she had never been seen to greater advantage, yet no ly gentleness and proud self-assertion, all actruer form of expression suggests itself, and companied by well adjusted gesture and pretty bywe therefore use it deliberately though con play, made not merely a passing impression but a we therefore use it deliberately though conscious that it means much in the case of a permanent memory. Such effects are seldom did good business, so far as we could see. Mrs. lady whose record includes so many successes, lady whose record includes so many successes. But has simply to take off his hat.

Miss Bovill was seen for the first time, and it would be pleasant to hope that she n ay be persuaded to appear frequently hereafter. She has true of the scenes. Each play began and ended many talents—remarkable self-possession, charming elocution, much grace of movement and an to bestow unusual care on apparatus and decorations. In generating the self-possession was a source of the scenes. Each play began and ended the Raffles department, under the direction of Mrs. V. R. Bowden, Mrs. Hubbard and Mrs. Greig did not fall behind its competitors in

unusual power of suggesting emotion without betraying it. To superpose the character of a maid-servant on that of a fine lady, neither wholly concealing the latter nor caricaturing the former is not an easy feat, nor could one have reasonably looked for its thoroughly successful achievement by an amateur. Natural ability must have been supplemented in this case by close study and by discriminating stage direction, which last is understood to have been supplied by Mrs. Wood.

The second piece, "The Highwayman," is from the pen of Mr. Justin McCarthy and it abounds in the graces of diction and delicacies of conception peculiar to the literateurs whose school Justin McCarthy ornaments. Lady Betty school Justin McCarthy ornaments. Lady Betty:
Bassett (Mrs. Barclay) has turned her beautiful face away from Sir Harry Bellairs (Mr. Brady), believing him untrue. She loves him still, however, and he, stung by the injustice she does him and embittered by her slights and his friends' jeers, makes a wager that he will compel her to give him her hand once more in a gavotte. His plan is to masquerade as a highwayman who robs male it rayellers but asks pothing from ladies excent the travellers but asks nothing from ladies except the pleasure of a dance. In that character he enters Lady Betty's boudoir, forces her to dance at the muzzle of a pistol, reveals himself, is forced by her, at the muzzle of the same pistol, to write a confession of his villainy which she then tears up, and the denouement is easily conceived. It all happens in the eighteenth century, a time remote enough to render any-thing conceivable, and dialogue and deed are alike delightfully redolent of an ancient age. But even Justin McCarthy does not avoid the playwright's perpetual solecism of making actors explain by speech things which the march of events alone should elucidate. Where and when except upon an inartistic stage has there ever been found a human being who interrupted the course of momentous incidents to review in monologue the part he has played in them? The fitness of things is shockingly dislocated when Sir Harry Bellairs, seated, a burglar, in Lady Betty's boudoir, is compelled to soliloquise aloud as to how he came there and what he intends to as to how he came there and what he intends to do there. Even Mr. Brady could not make this natural, but for the rest he well satisfied the requirements of a difficult, an exceedingly difficult, part. He is an imposing personality on the stage and among his fine histrionic faculties the first place belongs, perhaps, to the glimpses he affords of latent resource. There seems to be always a reserve of force which appeals to the imagination of the colooker as much what is actually revealed evokes his emotion. Mr. Brady has been seen in many rôles in Yoko-hama and Tokyo, but the part of Harry Bellairs is different from anything previously, attempted by him and he may confidently add it to his triumplis. He has commanded applause hitherto by vividly accentuated displays, whether in farce or in tragedy, but the eighteenth-century nobleman of Justin McCarthy's conception is not a person wearing his heart on his sleeve or proclaiming his passion loudly with either voice or gesture, though he is nevertheless required to reveal both passion and heart. That is where Mr. Brady's success could not have been confidently inferred from his past, and since he succeeded he has a new title to praise. It must be confessed, however, that he had much to inspire There was novelty, doubtless, in finding him self obliged to play up to his vis-à-vis instead of being played up to by the whole caste, and surely he could not choose but climb industriously in order to reach the level of Mrs. Barclay as Lady Betty Bassett. In appearance she seemed to have stepped out of a picture of the time of Justin McCarthy's imagination, and in acting her alternations of tenderness and hauteur, of woman-

tion, for the rooms looked at once congruous and picturesque.

was also music, and music of a quality much to be praised—an orchestra composed, we gather, of the string bands of the Imperial House hold and the Music School, with Professor Junker as conductor and the Misses Koda as leading violins. In the cause of a most worthy charity all gave service which a crowded house rewarded with vehement applause and with a monetary contribution doubtless substantial.

PROGRAMME.

Instructors and Students of Tokyo Academy of Music assisted by the Imperial Band.

"A Fair Encounter," by Chas. Marsham Rae. Lady Clara BARONESS D'ANETHAN.
Celia Grenville Miss Boyille, Three Dances from "Henry VIII." German.

"The Highwayman," an original duologue, by Justin Huntley McCarthy.

"National Anthem."

THE INTERNATIONAL FETE.

The ladies of Yokohama who rallied round Mrs. J. P. Mollison when she sent out her appeal on behalf of the wives and children of Japanese soldiers and sailors called to the front, are to be heartily congratulated upon the unqualified success of the International Fête which was the out-come of their strenuous exertions. Yokohama's foreign community has never turned a deaf ear to the appeals of charity and whenever an opportunity has presented the fairer sex have always vied with the sterner in responding nobly to the call upon their talents, their time, and their large stock of good nature. The object which Mrs. Mollison and her host of friends had at heart was in itself enough to awaken responsive echoes in every bosom, but in a fairly long experience of Yokohama we have seldom seen a finer spirit of harmonious comradeship displayed than that exhibited in everything connected with the International Fête, and as a natural result the hundred and one items as a natural result the hundred and one items which were crowded into the plethoric programme attained one and all the success deserved and striven for. The attendance was enormous, standing room being at a premium early in the evening.

The Public Hall was set out in the form of a millage fair, with booths running all round the

village fair, with booths running all round the sides. These sheltered stalls of many nationalities, as set out in the following list :-

ties, as set out in the following list:—
Flowers (English):—Mrs. Mollison, Mrs. Hawkins, Mrs. C. H. Wilson, Mrs. Abbott, and the Misses Thomas. Tea and Coffee (American):—Mrs. Thorn, Mrs. Poole, Mrs. McIvor, and Mrs. Frazar. German:—Mrs. Kleensang, Mrs. Levedag, and Miss Retz. Scots—Mrs. Drummond and Miss Cameron, Turkish:—Mrs. Holm, Mrs. Kaufmann, and Miss Meier. Danish:—Mrs. Tegner, and Mrs. Blad. Candy (International):—Miss Manley, Miss Abenheim, and Miss Abbey.

In addition to these there was an International.

In addition to these there was an International Post Office, housed in a palatial-looking building, which was under the charge of Mrs. Bengen, Mrs. Surth, Mrs. Strauss, Mrs. Abegg, and Mrs. W. Kirkland Wilson. These ladies, like the other stall-holders, were attired in fancy costumes, and they encouraged business by exhibiting such "Postal Notices" as, "Now's the exhibiting such "Postal Notices" as, "Nows the time to sign a chit," "Step in and write a letter to your honey," etc. The Post Office did a roaring business, and its energetic "clerks" must have netted a good round sum. But every one "raking in the shekels"; while as for the Ascot Race Game, run by Messrs. O. Strome, P. A. Cox and Murray Mollison, it spun along merrily all the evening. Mrs. W. K. Wilson's Fish Pond was another water. merrily all the evening. Mrs. W. K. Wilson's Fish Pond was another great draw. Two other devices for attracting the nimble dollar were The Yokohama American and The British Meteor, newspapers of international amity, issued specially for the occasion. The former was sold by Miss Gigray; while the British journal was energetically hawked around by Master John Mollison and Master Jack Kenderdine attired in the robes and decorated with the jingling bells of the go-gai-hito which have been so much en evidence throughout Japan of late. These papers, by the way, contained much original matter, Mr. J. P. Mollison contributing to the British Meteor, a sporting reminiscence of the early sixties, while an echo of the war was found in the following lyric:—

MUKEEN TARRADIDDLES.

MUKDEN TARRADIDDLES. (With apologies to Dr. Watts.) How doth the Chefoo strategist Improve each censored cable, Converting it by natty twist Into egregious fable? How airily the Mukden lyre Seconds his specious leader, Until the yarn that Europe buys Doth flabbergast the reader. But yellower still it turneth yet As westward it must go, Until at last its pa-ri-ents Their offspring hardly know.

The decorations throughout the Hall were very pretty. National flags of course were the predominating feature, but here and there one chanced upon an appropriate motto. For instance, under the Geneva Cross, hung the legend, "Charity is the scope of all God's command." Over the stage was susmended. legend, "Charity is the scope of all Go mand." Over the stage was suspended,

For since kind heaven with wealth our realm has

Give it to heaven, by aiding the distrest.

While over the Scots stall ran the legend-"Charity begins at hame, but shouldna end there." This last stall, we should mention, was uniquely decorated with the armorial bearings of the famous Scottish clans, the work, we believe, of that patriotic son of old Gaul, Mr. C. Murray Duff.

So much for the material side of the Fête. A long programme of vocal and instrumental music, dances and tableaux was also arranged and passed off to the satisfaction of everybody. Beginning with the "El Capitan March" of Sousa's, spirited ly played by the Bijou Orcnestra—now we notice considerably augmented—the curtain first rose on the spectacular tableau taken from the "Healing Scene" in the last act of "Ben Hur." It is the moment when Christ, passing along the highway, brings health and cleansing to the mother and sister of the Hebrew patriot. The ly played by the Bijou Orchestra-now we notice mother and sister of the Hebrew patriot. The figure of the Divine Healer is not seen, only the two sorrow-laden lepers and a band of Hebrew men and maidens bearing palm-branches. As the curtain rose the chorus of "The Palms" (Faure) was heard, the organ being played by Mr. W. Karl E. Vincent. The grouping was highly effective and the singing delightful, so much so that the audience expressed its pleasure in rounds of applause. Those taking part in this

taoteau were:—
Mrs. E. V. Thorn, Miss E. Baker (the two central figures, mother and sister of "Ben Hur"). Miss M. Sharp, Miss Poole, the Misses Hall (3), the Misses Madge and May Cameron, Miss Edith Mendelson, Miss Waddilove, Miss Gardiner, Miss Parker, the Misses Anna and Molly Tripler, Miss V. Irwine the Misses Anna and Molly Tripler, Miss V. Irwine the Misses Alice and Elsie Blundell, Miss Dora Talbot, Miss Norah Stone, Miss Manley, Miss Wilson, Miss Stone, the Misses Nora and Ray Tipple, Miss Leslie McWilliams, Miss Bertie Cahusac, Miss Gladys Scott, and Mrs. Pearson. Mesere

Balfe's famous, When other lips." Mr. Cooper throng fancy roamed more free, though the was taken from "Carmen." Here we were taken The stall-holders again appeared in their attractive was taken from "Carmen." Here we were taken to the land of sunny Spain and were shown Carmen reading her fate: three times the cards have told her that she will meet with a violent death, and the truth of their tragic message is driven home to her just as the scene is disclosed. The tableaux would have been better for a little more light, but it met with well-deserved and hearty

The players were. The players were given to the propose of the post-office messages while the cardy stall had to send out for fresh supplies errote a ferrooon wore to jits close. tableaux would have been better for a little more light, but it met with well-deserved and hearty applause. The players were:—

Carmen, Mrs. A. Bellamy Brown. Misses Rogers, A. Mendelson and B. Sharp. Messrs. Palmer, Molli-son. Wheeler, Waddilove, White, Goodban, Drum-mond and Brockhurst.

The Scottish ballad, "Caller Herrin," sympathetically sung by Mrs. E. C. Irwine, was followed by "Comin' thro the Rye," a perfect little gem. The third tableaux, "Cleopatra," next claimed attention. Cleopatra, surrounded by her maidens, is slowly sinking under the effects of the asp's fatal kiss. The grouping was highly effective and the full light thrown on the ladies allowed the gorgeous details to be seen to the greatest advantage. participants were :-

Cleopatra, Miss Lloyd Thomas. The Misses Parker, B. Sharp, A. Mendelson, L. Hall, and Wilson. Item No. 7 was a French Gavotte. It took one in fancy back to the gay days of yore when Louis XIV, and his light-hearted court danced away the time in the fairy-glades of beautiful Versailles. The ladies and gentlemen taking part, dressed a la Pompadour, were:—

Mdme. Carrillon, Mdme. Barmont, Mdme. La Croix, Mlle. Eymard, Mons. Lacroix, Mons. Proton, Mons. Carrillon and Mons. Cherfils
"Father O'Flynn," given by Mr. Brady in character, took the house by storm, and the chorus was lustily trolled forth in response to the singer's lead. An encore followed as naturally segments after any.

The Misses E. Baker, M. Sharp, Stone, Waddilove, Rogers, Poole, V. Irwine, E. Mendelson, K. Hall, and M. Thomas. Mr. Alan Bishop, "The Knight."

The great success attending the Tableaux is due in large measure to Mrs. Thos. S. Baker, and Mrs. B. C. Howard, who initiated and arranged them, and to Mr. and Mrs. C. F. McWilliams and Mr. É. Beart who stage-managed and mounted them. The Hall presented a gay appearance when they closed, for the various performers, in their strik-ingly becoming costumes, mingled with the gaily-clothed stall-holders and the audience generally, creating for onlookers a most charming effect.

The Bijon Orchestra brought the first part to a close with a selection, "Navajo," by E van Alstyne.

When our representative left the Second Part had not begun. It included:—

Bijou Waltz, by B. R. Berrick, written specially for and dedicated to the Ladies International Fête.

THE PHOTO ORCHESTRA.

German Volkslied :man yousued:— Miss. Kayser, Mrs. Schmid, Mrs. Orth, Miss Meier, Miss Retz, Baron von Stengel, Mr. Schmid Scharff, Dr. Mattholius, Mr. Steiner, and

Mr. Hosch. Welsh Song, "The Cambrian War Song," (In Character)

MISS LLOYD THOMAS

The Bijou Orchestra.

The International Fete, which opened so auspiciously on Friday evening, was continued auspiciously on Friday evening, was continued on Saturday, and again success attended the Forts of Mrs. J. P. Mollison and her friends. The afternoon was devoted to the little folks and and B. Sharp. Messrs C. Palmer, S. Wheeler, M. Mollison, W. J. Waddilove, B. C. Foster, Gracey, Cooper, P. Walker, and Brockhurst.

Following came a song by a new comer, Mr. Tooper, who gave an exquisite rendering of ers, rikislaumen, etc.—but among the maiden

ere the afternoon wore to its close.

Among the new attractions was a striking scance arranged by Mr. Frederic Villiers, the famous war-correspondent, and Baron Ward, entitled the "Bombardment of Port Arthur" this was realistic to the last degree, and drew a constant stream of visitors.

The Bijou Orchestra again started the ball nerrily rolling, and then Miss E. Burdett Leach's calisthenic class was announced. It consisted of Miss Iris Irwine, Miss Dorcas Surth, Miss Dorothy Miss Iris Irwine, Miss Dorcas Surth, Miss Dorothy Austen, Master F. Booth, Miss Marjorie Brown, Miss Doris Healing, Miss Kathleen Potts, Miss Dorothy Hayes, Miss Madeline Mollison, Miss Joan Hartland, Miss Connie Hall, Master J. Mollison, Master H. Cowan, Miss Janet Jones, Miss Marion Cowan, and Miss Dorothea Blake. The youngest of these was "rising four." The drill began with a waving and weaving of coloured scarves, then some small tots marched on bearing flowers which they gave, after sundry evolutions. flowers which they gave, after sundry evolutions, to the bigger ones in exchange for the scarves and

to the bigger ones in exchange for the scarves and then marched off again. The whole drill was faultlessly carried out and was warmly applauded.

The next item "La Cachuca" was daintily performed by Miss Winnie Sharp, who, at the mature age of 7, made her first appearance on any stage. So charmingly did she go through the graceful steps that she was asked to do it again, and when she had complied was rewarded with a huge hasket of flowers, a bouquet, and something that as sunshine after rain. The last tableaux, entitled basket of flowers, a bouquet, and something that "The Garden of Flowers" was, perhaps, the looked suspiciously like a packet of chocolates, all loveliest of all. The Flowers were:—

[of which she was at first far too shy to annex. Mr.] of which she was at first far too shy to annex. Mr. Brady having sung Chevalier's French chanson "Tink-a-tink," the curtain rose on a pretty childish tahleaux, "Snow-white and the Seven Dwarfs." This took immensely and one small mannikin discussing the events of the afternoon at breakfast next morning gave it as his opinion that he liked this item the best of all. The next that he liked this item the best of all. The next number in which little ones took part was a Fan Drill, arranged we believe by Mrs. N. W. McIvor. The maidens taking part were dressed in "powder and patches" and presented the daintiest picture possible. They had to repeat their dance before the andience would let them go. The players were:—Miss A. Walter, Miss Sybil Howard, Miss Iris Irwine, Miss Helen McIvor, Miss H. McIvor, Miss L. McWillians, Miss H. Payne, and Miss Mariorie Abel.

Marjorie Abel.

The Tableaux, "The Garden of Flowers" and "Cleopatra," were repeated, and again received hearty recognition. The "Flowers" by the way, were Miss Baker (Lily of the Valley, "Thomas (Chrysonthemum). Miss Rogers. by the way, were Miss Baker (Lily of the Valley), Miss M. Thomas (Chrysanthemum), Miss Rogers, (Christmas Rose), Miss E. Mendelson (Poppy), Miss Stone (Marguerite), Miss Kathleen Hall (Wistaria), Miss Mabel Sharp (Poinsettia), Miss Waddilove (Tiger Lily), Miss Lily Hall (Convolvulus), Miss Vera Irwine (Carnation) and Miss Eleanor Poole (Sunflower.) The Frencht Gavotte was repeated with infinite success; while the concluding piece the Plantation scene, evoked concluding piece, the Plantation scene, evoked heartier roars of laughter, perhaps, than on the

previous evening.

After dinner the Hall was again the scene of great festivity. The prizes in the raffles, the missing word competition, etc., were announced, dancing was indulged in, the children's dances were The Bijou Orchestra.

The International Fête, which opened so auspiciously on Friday evening, was continued on Saturday, and again success attended the efforts of Mrs. J. P. Mollison and her friends. The afternoon was devoted to the little folks and despite the rain the Hall was crowded, many of the tiny lads and lassies coming in fancy costumes. Preference, among the laddies, seem

DUNDAS OF DUNDAS.

Capt. Adam Alexander Duncan Dundas, R.N., of Dundas, of Inchgarvie House, South Queensferry, died on Sunday, March 6, at Inchgarvie, at the age of 82. The eldest surviving son of the late Mr. James Dundas, of Dundas, Linlithgowshire, and a grandson of Admiral the first Viscount Duncan, the eminent naval commander and victor of Camperdown, he was born in 1822, and obtained a commission in the Navy, in which he served for 27 years, in August, 1843, being placed on the commanders Retired List in April 1870. Capt. Dundas, who succeeded his father as Chief of Dundas in 1881, and who was a magistrate for Linlithgowshire, married in 1856 Charlotte Maria, youngest daughter of the Rear-Admiral Charles Hope. Capt, Dundas was well known in Japan and the news of his death will be received with deep regret by his many friends here. He figures in many of Wirgman's cartoons in the older issues of the Japan Punch—Communicated.

LITERARY GOSSIP.

The only way to kill the Baconian craze, according to a recent reviewer of Mr. Churton Collins's "Studies in Shakespeare," is by the way of kindness. "The truth is (he says) that an adde fixe, like the Baconian craze, will never yield to the methods of the bludgeon; it needs a calmer and more pressurative style more conscious. calmer and more persuasive style, more consciousness of the stronger points, few as they are, of the craze—in a word, more good temper and less excitement."

Dramatic critics seem doomed to be a per-secuted race. Scarcely have the thunders of the Jones-Bourchier-Walkley explosion died away, when a still more terrible insult to the tribe of when a stul more terrible insult to the tribe of critics occurs at Cambridge. "We regret," says the current number of the *Granta*, "that no criticism of 'My Lady Virtue' can appear this week, as our dramatic critic was progged last Tuesday night on Parket's Piece, and has been maded for the terry." gated for the rest of the term."

There are some good stories of the great Duchess of Mariborough in Mrs. Arthur Colville's newly-published book. On one occasion she was entertaining all her relations at a gigantic family dinner. "What a glorious sight," she said, "it is to see such a number of branches flourishing from the same root." A male cousin, sitting at a safe distance, commented on this in a whisper. "Alas!" he said, "the branches would flourish far better if the root were underground." flourish far better if the root were underground."

Sir William Anson, who takes the late Mr. Lecky's place as Trustee of the National Portrait Gallery, is a quite bewilderingly versatile man. A Counsel very learned in the Law, on some branches of which he has written standard treatises; an M.P. and Minister of the Crown; Chancellor of a diocese and Warden of an Oxford college; and an ex-Alderman and Chairman of Quarter Sessions, he has as many characters as might serve to equip half a dozen ordinary men.

The latest musical play produced in London is called "The Cingalese" and we note that one of the characters has a song to sing about Japan One verse runs :-

e verse runs:

There's a land where the morning ever
Comes new from the Eastern deep,
And the light is red upon Fuji's head
When the West is all asleep.
And in spite of the hills that sever,
And spite of the waves that run,
I long to be by the Inland Sea,
In the Land of the Rising Sun!

In his " Diplomatic Reminiscences." which he wrote twelve years ago, Lord Augustus Loftus, whose death is announced, gives many interesting stories connected with his long and distinguished career as a representative of the Court of St. James. His first appointment in diplomacy James. His first appointment in diplomacy walls are covered with paintings, some in a persynchronised to a day with the beginning of the fect state of preservation, and in strong contrast, Victorian era, for it was dated on the June zoth by their strong, correct drawing, and artistic which saw the death of William IV. The mother of Lord Augustus was Lady of the Bedchamber to Queen Adelaide, and he has told how, when other catacombs. Whereas, too, other catacombs is merchandise, with money which he expected to receive from the insurance office after the fire? Witness—I don't know what his intention was. Witness further stated that some pieces of matting valued at about 1911 250 were sent from to Queen Adelaide, and he has told how, when other catacombs. Whereas, too, other catacombs

be dined at the Pavilion at Brighton, the King asked him what profession he intended to adopt. He hoped, he said, to serve His Majesty in the Diplomatic Service, to which the King replied good-naturedly, "And so you shall, my boy, and I will look after you."

THE JAPAN WEEKLY MAIL.

"Marlowe's mighty line" has been venerated by poets for three and a half centuries, but of Marlowe himself comparatively little is familiar. There should be a welcome, therefore, for Mr. John H. Ingram's work on "Christopher Marlowe and His Associates," which will be published shortly by Mr. Grant Richards. The book will contain many new facts about the poet's ancestry, his life in London, and his connection with Shakespeare. A copious bibliography and many illustrations from photographs of original docu-ments will also form part of the book.

Mr. Thomas Verrinder, of the Grosvenor Gallery Library, gives in an interview in the March Book Monthly some interesting particulars concerning the tastes of readers in the West End of London. Many of the leaders in the world of law are great readers of novels. The End of London. Many of the leaders in the world of law are great readers of novels. The same is also said of prominent military men. One famous scientific man whom Mr. Verrinder mentions reads regularly six novels although "bishops do so occasionally." But the most industrious novel-reader Mr. Verrinder has ever known was "a lady who averaged eleven hundred with the set of feetiers was " volumes of fiction a year.

Mr. Henry Harland, the author of "My Friend Prospero," published by Messrs. McClure, Phillips & Company, was not born in St. Peters-burg, Russia, as has been stated and as is to be burg, Russia, as has been stated and as is to be found recorded in "Who's Who." Authorities differ on this subject. Mr. Harland himself has taken issue with the legal records which declare that he was born in Brooklyn, and says that he prefers to have been born in Norwich, Connec-ticut, because he likes the place. The public, in return for the pleasure it has received from his books, will probably let him have his own way. So let it be recorded that Henry Harland was born in Norwich, Conn., 1861.

Macaulay on Croker's Boswell is matched, in severity at all events, by Mr. J. Hall Griffin's examination, in the current Athenaum, of Mr. G. K. Chesterton's recent monograph on Browning. After a long array of accusing instances, Mr. Griffin concludes:—"With some knowledge of what has been written on Browning's life and works, I must honestly say that I know of no volume so carelessly inaccurate and so unconsciously misleading as that of Mr. Chesterton. I can but endorse the words of one who is in all respects qualified to speak: 'I have never dipped into it without drawing up bucketsful of blunders. The fundamental facts being often wrongly stated, the conclusions based upon them are even gro-

Few people, in all probability, are aware how great is the number of words in the English him a chauffeur in much the same spirit as that of the cricket professional in speaking of the "yorker." It seems the only suitable name.

A most interesting new catacomb and subteroffice, having lodged a claim with the insurance office, having lodged a claim with the insurance office, having lodged a claim with the insurance office, and with this in view spoke of employing Rome, near the cemetery of Comodilla. The allower to press the matter, etc.

The Court—Did the accused intend to some the properties of the court and the properties of the court and so great that it almost marks an epoch. All its Japanese dealers, whom he owed for various walls are covered with paintings, some in a permerchandise, with money which he expected to fect state of preservation, and in strong contrast, receive from the insurance office after the fire?

have all been rifled, this one, which is of the fifth and sixth centuries, as attested by the monumental inscriptions, is intact, even to the nails on which the funeral wreaths were hung. Some skeletons found on the ground indicated that there had been a landslip, and that the worshippers had been entombed—the disaster, perhaps, preserving the catacomb from the Goths.

Most English people remember the singer of We don't want to fight, but by Jingo if we do." It was the late George MacDermott. Few. how ever, could name the writer of the song, G. W. Hunt, the veteran lyrist of the music-hall stage, Hunt, the veteran lyrist of the music-hall stage, who has just passed away. "Poor Uncle Sam," written at the time of the American Civil War, was one of the best-known of his earlier efforts, and "The German Band," sung by Arthur Lloyd, was another, while "Up in a Balloon" is still remembered. It was at the London Pavilion that the "Jingo" song was first heard; very soon it was in everybody's mouth. To this day "Jingo" serves as a catchword.

THE LAW COURTS.

INCENDIARISM.

The trial of M. C. Fernando, who is charged with incendiarism, was resumed on April 15th in the criminal section of the Yokohama District Court before Judge Matsuyama and Public Procurator Midzutani, when three Japanese were examined as witnesses.

Yukawa, a jinrikisha coolie, stated that he was employed by the accused. On Feb. 22nd, at about 6.30 p.m., he carried the accused to a place near No. 127, after which he returned to his room and went to bed. Meanwhile he was awakened by an alarm of fire which seemed to have broken out in the office of the accused. He did not know anything about the cause of the accident but he struggled to put out the fire, assisting the firemen from the police

station.

Mr. Iwata was examined as an expert. He stated that he is a civil engineer of the Kanagawa Kencho. The Court, having showed witness a quantity of sulphur found in the sample room of the accused, and which is alleged to have been the origin of the accident, asked the civil engineer (1) Whether the sulphur could cause fire of itself; (2) How long it would take to cause such a fire so that flames could extend through a room providing thirteen or fourteen knamme. such a fire so that names could extend through a room, providing thirteen or fourteen kwamme (kwamme=3.75 kilos.) were kept in a closed room; and (3) What effect would be caused if the sulphur was stirred up by a stick as such like cane. The expert replied that he had first to analyse the sulphur and he could then present his

opinion in writing within a week.

M. Kanaya stated that he was employed on Jan. 26th by accused as a cashier under condition that witness should pay the petty office expenses on behalf of the accused until March 16th, when the vocabulary of sport which have been grafted from other languages. Attention has been called to the matter by the proposal of the Automobile Club that the words "chauffeur" and "garage" should henceforward be known as "motorman" and "motorhouse." It is very patriotic of the Automobile Club to try to eliminate alien words from the language, but their task will not be an easy one. It is difficult to think of the guardian spirit of the car as a "motorman." One calls him a chauffeur in much the same spirit as that of the cricket professional in the English two hundred and five hundred yen, should be refunded. The witness paid about two hundred yen, from Jan. 26th to Feb. 22nd, when the fire occurred. The accused did not refund the money and even his salary was left unpaid, despete repeated applications. The witness did not know of the fire which broke out in the office until the following morning because he was living at a distance from the place; and he did not hear the fire alarm. Before the accident many Japanese merchants came to the office and urged the of the cricket professional in the English two hundred and five hundred yen, should be refunded. The witness paid about two hundred yen, from Jan. 26th to Feb. 22nd, when the fire occurred. The accused did not refund the money and even his salary was left unpaid, despete repeated applications. The witness did not know of the fire which broke out in the office until the following morning because he was living at a distance from the place; and he did not hear the fire alarm. Before the accident many Japanese merchants came to the office and urged the money, which was expected to amount to between two hundred and five hundred yen, should be reof the fire which broke out in the office until the following morning because he was living at a distance from the place; and he did not hear the fire alarm. Before the accident many Japanese merchants came to the office and urged the accused to pay for goods supplied, but the accused asked them to wait a little longer. After the fire, the accused was very busy, it seems, for he expected to receive money from an insurance office having lodged a claim with the insurance

sulphur from Tokyo; this arrived after the accident. The latter goods were now stored in the Customs compound. The accused was often in trouble with K. Ishii, one of his employees, but witness did not know the cause

The case was adjourned till April 27th.

CLAIM ON WOOLLEN YARN.

The Yokohama Agent of the Etablishments The Yokofama Agent of the Etablishments Orosdi-Back has initiated a case in the Tokyo District Court through Mr. S. Sawa, a lawyer, against Mr. A. Saito, proprietor of a woollen yarn factory in the village of Osaki near Shinagawa claiming six thousand yen for woollen yarn which plaintiff supplied to defendant.

LIBEL CASE.

The trial of the nominal editor and the publisher of the Chuo Shimbun will take place on April 20th in the Tokyo District Court before Judge Ishii. The charge is that they published in their paper of February 22nd a statement that Mr. Ikariyama, Chief of the Kaga-cho police, had a private connection with M. Takahashi who as convicted in the Yokohame District Court of having been in the service of Russia as a spy.

CAMPHOR MONOPOLY CASE

The hearing of the appeal in the camphor onopoly case—instituted by Messrs. Samuel, monopoly case—instituted by Messrs. Samuel, Samuel and Co. against a judgment give in favour of Mr. Hioki, liquidator of the bankrupt estate of Messrs. Mourilyan, Heimann and Co.-which was adjourned on September 29th last and which was to have been resumed on April 19th in the Tokyo Appeal Court, before Judge K. Sudzuki was again postponed sine die to suit the convenience of the Court,

ALLEGED INFRINGEMENT OF THE COMMERCIAL LAW

Mr. R. Kondo, President and other directors of the Nippon Yusen Kaisha, who had been sentenced in the District Court to a fine of five yen each on a charge of an alleged contravention of the Commercial Law, and who appealed to the Tokyo Appeal Court against the decision, were acquitted on April 19th, the original sentence being convended. being quashed.

MODERN LIFE IN RELATION TO HEALTH.

Read before the Yokohama Literary Society on Friday, April 22nd, by N. Gordon Munro, M.B. and C.M., Edin.]

When we bear people talk of blue blood and ancient descent, we are apt to forget that Man has been a creature of some importance for at least 100,000 years and that no one can trace his lineage for more than a fraction of one per cent. of this interval. It is impossible to say how long the human race has existed or to hazard more than the merest guess as to the time that has elapsed since its pioneers left the arboreal stage and took to footing it as erect animals. We know, however, that Man was virtually the conqueror of the animal world before the glacial period. We know that he was then sufficiently cultured to draw fairly exact likenesses, on ivory and horn, of animals and other objects at a time when he was the contemporary of the European rhino-cerous, the lion whose effigy survives in the British coat of arms, and the woolly mammoth.

I think that the white races of Europe owe their superior physique and stamina to the long probation which their ancestors endured throughout the wintry glacial epoch. I believe that our hamper the activities of the body by injudicious fair skins gradually evolved from the filtered light drugging. In these fevers, plenty of fresh air of the cloudy skies and the garments of skin and water, with but little food will usually effect which covered the bodies and probably also the acure without medicine. I am not pleading for faces of those early ancestors. The thousands of abstention from medicine in all cases. We know faces of those early ancestors. The thousands of years of hardihood, the outdoor life which had to be faced in order to secure the scanty food supply, of that barren period and the ingenuity, and skill needed to ward off starvation, the attacks of enemies and the biting cold, have combined to make our race what it is, the highest on this planet. When we consider what the conditions of life were during those ages, we must monder that the human race survived at all. We can look back with pride on those remote ancestors

whose pictures none of us can hang in the family laboratory for the production of special medicines whose pictures none of us can hang in the admly gallery. Perhaps it in just as well that we cannot shew their photographs to our children and friends, but we can admire them in the abstract and can have nothing but praise for the pluck and resourceful energy which carried them through the glacial period and laid the foundation of modern European culture and civilisation.

In common with the rest of the human race, these lives were threatened with premature extinction, not only through starvation, exposure and violence, but also by disease. When sickness befell them there was no doctor to call in, to feel their pulse and to administer those dainty draughts called medicine, which are the joy of the sick and whose memory clings lovingly to the palate after health has been restored. The bete noir of modern times, namely the microbe and its special set, were then unknown to fame, and if our ancestors did not escape their venomous attacks, a sufficient number survived them, for we are here to prove it. Yet, they had no medicines.

I remember that once, shooting up a creek in India, I fired at something which moved amongst the rushes where a small stream joined the creek. I found that I had shot a jackal and the poor thing was entirely skin and bone. Near by was its bed where the shallow water enabled by was its owner where it shallow water benefit it to drink without taxing its strength, and I came to the conclusion that I had interrupted a "rest cure." I felt quite sorry and ashamed that I had done so and was much impressed with the thought that the human race, during at least 99 per cent. of its duration, and probably for a greater pro-portion of its existence, had been treated during its sickness by the simple plan of rest, abstinence from food and that greatest and best medicines and beverages, Aqua Pura, pure water.

It was reported to me not long ago that a certain medicine man took it upon himself to say to a patient that the resources of modern science were such that a physician who could not cure any fever within five days had no right to practice his profession. I do not know whether the gentle-man had ever seen a case of typhoid fever, but I do know that he was talking nonsense and that in this, as in some other fevers, I would prefer to be treated by the method of primitive man rather than by his resources of modern science.

The resources of modern science are indeed great and it would be folly to decry them, though worse than folly to exaggerate them for selfish ends. We know what medical science has done for that dreadful scourge diphtheria. We know what has been done towards the prevention of small-pox. We know that steps are being made in the right direction towards the cure of typhoid, cholera, plague and that fell disease, consumption, in its various forms. We trust that consumption, in its various forms. the day is near at hand when we shall be able to assist nature to throw off these pests by the natural means which are now being tried. Early man, and I may add, the beast of the field, who lies down to rest and starve during sickness, worked out his own salvation in acquiring protection, or immunity against the invading host of microbes whose poison threatened his life. The nature of the living body is such that it acquires in time this immunity to most infectious diseases, and the modern method of treatment by antitoxin aims at imparting this immunising substance to the body before it is too late. When we have succeeded in doing so with certainty, then shall come the crowning triumph of medicine for all ages to come. In the meantime we must be content to assist nature with the means at hand and not try to

for the cure of special diseases

I will go further than this and say that many of the ills which afflict humanity, apart from those infectious disorders which we have been speaking of, can either be prevented by simple means, or cured by the "rest cure" of our distant fore-fathers. That is to say, by leading a more natural life we can either avoid most of the noninfectious diseases, or by calling in the force of gravitation to assist, instead of hampering our organic functions, and by resting also our organs organic functions, and by resting also but organs when sick instead of giving them useless work to do in digesting food that we cannot assimilate, we can gain the victory over many of the ills that flesh is heir to.

flesh is heir to.

In this connection, the prevention and treatment of disease are intimately associated, for the means which are employed to cure a disease also tend to prevent its development. There is a condition of health which resists the attack of infectious disease, just as there is a condition of body which enables one to acquire immunity when the disease has taken hold. If twenty people drink water containing the microbes of cholera, probably not one-half of them will contract the disease. During an epidemic of diphtheria, many persons who remain in good health, go about with the bacilli of this infectious disorder in their mouths. With consumption too, disorder in their mouths. With consumption too, although we have all, or nearly all, been exposed to its infection, yet most of us remain exempt from it. In Yokohama, we all inhale germ-laden dust from time to time, yet we do not all "catch cold" or suffer from influenza. At sunset, I have seen the dust on the Bluff road at the top of Jizo-zaka give quite a rosy hue to the atmosphere for a height of about fifteen feet, just as did the volcanic dust in Europe after the eruption of Krakatoa. There was not a breath of air at the time and I concluded that we would have had to walk about on very high stilts in order to get our heads above this impure at-mosphere. I shall not weary you with instances to show that we have gradually become immune some infectious diseases, not only in the sense of throwing off the disease when it has gained a footbold, but also in warding off its onslaught. This faculty which we have acquired in varying degree during the course of our evolution, is a very important one and must be taken into consideration in formulating a standard of health.

When we see a man with a large and somewhat stout frame, and perhaps rather florid com-plexion, who eats and drinks well, we are apt to picture him in our minds as the embodiment of health. His robust figure and appearance of physical strength impress us with the idea that physical strength impress us with the idea that he can "throw off anything," or that he can easily "get the better" of any invading microbes which may attempt to feast upon his ample tissues. I do not think that this idea is altogether well founded. With regard to longevity at least, I think it may be said that persons below the average degree of robustness, including the gentler sex, have proved their ability to withstand the stress and strains of life as well, if stand the stress and strains of life as well, if not better, than those who seem to have more than the average health and strength. It would seem, indeed, as if the more robust specimens of humanity were less prepared to encounter a sudden attack from those torpedo-like foes called sudden attack from those torpedo-like foes called pathogenic microbes, than those who have less tissue to defend. I do not intend to convey the impression that the nearer one approaches the state of emaciation the better one is capable of resisting infection, or that in order to live it is necessary to look as if one were about to die. But what I do emphatically say, as the result of fifteen years' observation, is that the apparently robust are not a whit more healthy, in the sense of resisting infectious disease, than the apparently frail, if we except those cases where there is loss

We should remember that, just as our ancestors radiant heat of the fire, while universal space of the glacial period laid the foundation of our seems to be concentrating in a chilly stream on stamina and physique, not through foreknowledge but by force of circumstances, so we, who have the foreknowledge that we are responwho have the foreknowledge that we are responsible to posterity for their physical as well as mental endowments should constantly strive to it, realise a higher ideal in both these respects, son There can be no question that the flocking of humanity into cities is tending to undo the task of physical development which has been accomplished through thousands of years of open air, not vicissitude. The contraction of available light Shand air, especially in the poorer quarters, both falli within and without doors, the change of food and, perhaps more than anything else, the specialisation of muscular toil in ill-ventilated buildings sation of muscular toll in ill-ventilated buildings are producing a decided state of physical degeneration. This is accentuated by the increasing indulgence in alcohol, especially amongst the lower classes in Europe, and especially, I regret to say, in Great Britain. Amongst the middle and upper classes, this process of degeneration is not a content to become a trigonic because the conditions. is not so evident, because the conditions of life are favourable to freer contact with light and fresh air. A fair proportion seek exercise in the open air and notwithstanding what has been said about "flannelled fools," these athletes are doing good work for future humanity. I only wish that physical exercise in the open air, or under such conditions of ventilation as would ensure free access to pure air, could be made compulsory for the young of both sexes. Not only the fathers but also the mothers of future generations should contribute their quota of imgenerations should contribute their quota of im-provement to the race and for this purpose the physical education of girls and young women should be made more general and effective. Scientific physical training is now beginning to take the place of those aimless movements which, twenty years ago, used to produce the maximum of strain with the minimum of development. We are not all built alike. In some, the chest is too flat and in others too oval towards the front to nat and in others too ovar towards the front to perfectly fulfit the function of admitting air to every part of the lungs; thus, not only is the in take of oxygen deficient in amount, but the normal expansion of the lungs is hindered and they thus become more prone to disease. There is another point too in this connection which is frequently overlooked, namely the work which is done by both chest and lungs in assisting the heart to circulate the blood through the body. That this is of great importance is seen by the forced respiration which takes place on walking up hill, or putting any other strain on the action of the heart. This forced respiration not only brings more air into the lungs, but it greatly assists the heart by filling and emptying the great veins in the chest, thereby hastening the return of blood to this organ and diminishing the resistance to its outflow. You will understand then, that the delopment of the chest and of the special muscles that move it, is of the highest importance and exercises for this object should be undertaken daily by both young and old. Next, in importance to these exercises, is the

necessity of sleeping in an atmosphere of fresh air. We spend, on the average, about eight hours out of the twenty-four in sleep, or at least in bed, and thus the twenty-four in sleep, or at least in bed, and thus one-third of the life-time of a human being is passed in this stationary manner. Some people do think of opening the window an inch or two during the hours of sleep; a few may allow a foot or more of space for ventilation; the great majority have the bedroom window closely shut. In Japan, the houses are so well constructed that it is fortunately impossible to exclude air entirely by means of a window, or even wall. I would point out, however, which have the day and in any event, that, however well intentioned, this system of ventilation is not sufficiently under control to the feesher than the same air which has received

seems to be concentrating in a chilly stream on our backs. If there is no fire in your bedroom, there is little fear of a draught while the door is shut, even if the window be wide open. If you are afraid of this, a low screen will entirely obviate it. It is better to have the bedroom facing the south, not only to avoid the force of the North wind, but to have the sun in the morning during exercise. It is not, however, an absolute necessity. There is no harm in the North wind, if it does not concentrate too much on your person. As Shakespeare sings, "its sting is not so sharp, although its breath be rude." My advice is to keep your venetians shut and if you have not been accustomed to sleep in fresh air open your window about two inches further each day until you have it opened at least two feet. If the wind is blowing very strongly, the space may be somewhat less. If you prefer to open the window from the top, and fear that the window may blow too strongly upon you, this simple device which I now draw, and which can be hooked on to the now draw, and which can be hooked on to the upper part of the window, will afford ample protection. Personally I prefer to open the lower sash and to use a screen on very windy nights. I have grown quite to like the North wind and to think, with the great poet that "it is not so unkind as Man's ingratitude." I feel sure that wrapped up in warm blankets, with the face well exposed to the air, even if there be a breeze, there will be not the least danger of "catching cold," while short experience will convince you that it is infinitely more healthy than using up all the cubic feet of fresh air which your room contains and trusting to the porosity of your walls for the rest. Your sleep will be of your walls for the rest. Your sleep will be deeper and more refreshing, and you will awake in the morning with a feeling of well being, unless you have been dining out the previous evening, which will go far to reconcile you with the wind, be it North or South. There is a popular superstition that the evening air is unhealthy. In Japan there are occasions when it is not very savoury, but these are momentary and otherwise I am sure that the evening air of Yoko-

hama is quite as healthy as that during the day.
Our Japanese friends, with all the great progress which they have made, have not advanced much in sanitation, and the drains of this city especially, leave much to be desired. Owing to the system, very absurd in an earthquake country, of combining the storm water and domestic drainage; owing to the entire absence of traps and ventilators on our drains, and largely due also to the fact that those of the Bluff system run down at such an angle that no water is left to act as a stopvalve, it may be truly said that the Bluff drains are the main ventilators for the sewers of Motomachi and Kitagata. When the wind moves in certain directions, when the sun heats the air on the Bluff and also after a rainstorm, the effluvia of sewer gas is not to be denied. Some years ago, I wrote to the sanitary authority to explain how easy and inexpensive it would be to have ventilated syphon traps on the drains, but nothing was done. I trust that when the present troubles was done. I trust that when the present troubles have been tided over and prosperity has again set in, the local sanitary authority may see fit to remedy this very dangerous state of affairs. I fear that this may seem too much of a digression from the immediate question of indulging in fresh air during slumber, but as it has a very important bearing upon the health of the Foreign

somewhat overrated in respect to absolute cure in marked cases of this disease, there can be no doubt that it has wrought many a cure in the early stages and that many useful lives have been prolonged even in advanced cases. The expeprolonged even in advanced cases. The experience of the South African war has clearly proved that typhoid fever is accompanied by a very much less mortality when treated in the open air, and I am convinced that pneumonia is a much less deadly affection when the patient has free access to the air even in the coldest weather. I mention these points in order to convince you that fresh air, even when cold, is no enemy, but on the contrary. We beneficent friend of markind that fresh air, even when cold, is no enemy, but on the contrary, the beneficent friend of mankind. When people talk in an aggrieved way about having "caught cold" they are seldom aware that they are suffering from an infection by sundry microbes which have triumphed, it is true, on account of the floodgates of the circulation having temporarily lost their adjustment through loss of heat. This is not having the the set have the set the set. loss of heat. This is not, however, due to the air, which is itself not a good conductor of heat, but to the rapid movement of it which carries away heat from the transpiring surface of the insuffi-cently protected skin. In the Artic regions, where the cold is cold, such a thing as "catching cold" is practically unknown, for the reason that there are not enough microbes "to go round." These gentry don't seem to hanker after the Arctic regions; probably because they are more liable themselves to catch cold there than their wouldbe victims.

While we are speaking about air, let me ask you: what is the rationale of the happy effects so often produced by a "change of air"? In Yokohama we know that a run down to Kama-kura or to Miyanoshita for a few days, or longer if we are lucky, often seems to clear away the cobwebs from our minds, to soothe our nerves and to invigorate our bodies. What brings this about is rather a puzzling question, which some of you may be able to answer better than I can. So far as I can see there are several factors to be considered. This change of feeling is not entirely dependent upon change of place, for even in Yokohama we may have not only depression of spirits and bodily vigour, but we occasionally experience a rebound to a state of joyous elevation, without, I may add, any artificial stimulation.

It seems to me that there are five conditions in relation to the atmosphere that may affect our well-being in Japan. I will presently mention others which are unconnected with the air and which are more under individual control. five conditions act more or less conjointly, like the ingredients of a cocktail, but their physiological action is not so easily ascertained. They are, firstly, temperature. The relation between fluctuations of temperature and bodily health is obvious to all and need not detain us here. The body of man is so constituted that the nerves of the skin over any one part, are connected, through central stations, called ganglia, with the underlying organs, and thus it is that local chilling or heating profoundly modifies the circulation of the parts beneath. We do not need to suppose that the cold or heat actually penetrates to these deeper parts, though it may occasionally do so; the disturbance of the delicately adjusted apparatus for the circulation of blood and lymph, in the case of a "chill," for instance, is quite sufficient to diminish our resistance to local or general infection and render us more liable to "catch" disease. Time does not permit us to dwell on this orbitation of the local control of the control this subject, so I shall only mention in passing, that the temperature of the air affects the proportion of oxygen which it contains and thus may have some influence on our feelings and functions.

Secondly, the degree of moisture in the atmos-phere is not without influence on our bodily condievent, that, however well intentioned, this system of ventilation is not sufficiently under control to be effective. The modern idea of ventilation is not to have the air oozing placidly through the walls of your parlour and cooling your back as you sit at the fire, but to enable one to regulate the supply with the least possible amount of draught. Now, a fire, that is to say in its proper place, is an excellent means of removing foul air, but its warmth has the disadvantage of creating that its warmth has the disadvantage of creating a difference in pressure between the outside atmosphere and the air of the room. Thus it follows that in Japan our faces may be roasting from the tains less oxygen and the water in the air also conducts away too much heat in cool weather, while it tends to prevent radiation of heat during the warm days of summer, by lessening evaporation from the skin.

tion from the skin.

With regard to the third condition, we note that the moisture arising from the soil is accompanied by organic matter in the form of gas and finely divided particles and that the dust which blows from it when dry, is also full of organic matter, both dead and living. The oxygen of the air attacks this matter, especially under the influence of sunlight, and is used up in the process. The air coming from the sca and the uplands contains much ozone and has to cross the rising exhalations from the ground. This active form of oxygen finds employment in oxidising the organic material in the air and probably reaches us in deficient amount. When we go to the seaside, where we get the breeze directly from the Pacific, or to some place above the paddy level, such as Shoji, we experience a feeling of exhilaration which is probably due to the presence of such as Shoji, we experience a feeling of exhilara-tion which is probably due to the presence of ozone and the freer supply of oxygen. At the higher altitudes, though the amount of oxygen is not so great as at the sea level, it is amply compensated for by freer respiration and dimi-nished moisture. We can scarcely doubt that the drainage system in use on the Bluff is partly responsible for a deficiency of oxygen in our local atmosphere. local atmosphere.

The fourth condition relates to the pressure of The fourth condition relates to the pressure of the atmosphere upon the surface of the earth and everything thereon. This has a bearing upon health which is empirically recognised, but I am not aware that it has received the scientific not aware that it has received the scientific attention which its importance demands. The extent of body surface which the average man presents to the atmosphere is about thirteen hundred square inches. If we take fourteen and a half pounds as the normal atmospheric pressure, about the level of Vokobare, this will give a half pounds as the normal atmospheric pressure, about the level of Yokohama, this will give a total pressure on the surface of our bodies of something like nineteen thousand pounds. As the total amount of surface which our lungs expose to the air is stated to be a hundred times as much as that of the body, it will be understood that, between inside and outside pressure, we have to stand a good deal of squeezing. In the case of the lungs, however, the pressure on one side of an air say is usually countergated by one side of an air sac is usually counteracted by that on the other side, so that the total inward pressure on the chest is less than might be supposed. Still, this pressure must tell considerably on the blood vessels which run in the walls of these air sacs, so that variations in the atmospheric pressure must affect the circulation in this manner. The body consists of about sixty-five per cent. of water, which is incompressible, and about five per cent. of ash, so that there is only about thirty per cent. of compressible matter in suspension or solution. This includes the active ingredients of our nerves, muscles and other organs, and these must bear the greater strain when the atmospheric pressure changes. A rise or fall of an inch in the barometer means a difference of nearly half a pound of pressure on each square inch of our bodies, so that without considering the effect thus produced on the lungs, there would be a difference of pressure of about six hundred pounds, or four times the weight of an ordinary man! When we consider also that the amount of evergen varies directly with the pressure of the of oxygen varies directly with the pressure of the atmosphere we can readily understand why the rise and fall of the barometer should correspond with variations in our feelings and health.

Fifthly, the probability that variations in the electrical state of the atmosphere may have a decided influence on our bodily condition is one that should be kept in mind. It has occurred to me that the high backbone of mountains in this long and narrow island with the evaporation from the lower lands, may tend to produce different elec-trical conditions from those that prevail else-where. It cannot be gainsaid that such electrical conditions do modify our physiological activities, but how they do is a subject that admits of considerable discussion, and cannot occupy us here. I would only remark that these five us here. I would only remark that these five conditions of the atmosphere vary, not only rom time to time, but have a different order

of prominence in different localities, so that at the seaside and on the hills, pure air can be enjoyed under different auspices, suitable to different persons, or states of health for the time being. (TO BE CONTINUED.)

FIRES.

Early on the morning of April 15th, fire occur-ed in the Onkata Yarn Factory, Minami-Tamagori, near Tokyo, burning down the whole build-ing. The cause was a lamp which was upset in the room of an engineer in the compound

We have already briefly alluded to the fire which occurred at Hirosaki on the 16th April. A correspondent writes that the flames broke in the upstairs room of a photographer's shortly before noon, when all the men were below at dinner. The fire having got a start, made con-siderable headway and the photographer's shop, together with the Methodist Episcopal Church and parsonage, which adjoined, were completely destroyed, and another building was partially damaged. The loss is put at about yen 7,500, which is partly covered by insurance.

The Nippon Yusen Kaisha's steamer Hitaka Maru took fire on the afternoon of April 12th while lying at Otaru, Hokkaido. The flames were extinguished before serious damage was done, except to about a hundred and fifty pieces of cargo, which were stained. The origin of the accident is believed to be some inflammable materials among The ship left on the 14th for her

Hongkong was treated to the spectacle of an alarming fire on Sunday afternoon, April 10th. The fire broke out in No. 22 Godown, Chaterroad, Kowloon, belonging to the H. and K. Wharf and Godown Company, and it quickly spread to Godown 21. This was apparantly stored with merchandise and goods of the most inflammable character possible—kerosene, crackers, percussioncaps, candles, saltpetre, and opium being among the materials lodged there. Shortly after three o'clock a tremendous explosion occurred. A great sheet of flame was thrown skywards some 300 feet high while voluminous clouds of smoke ascended from the building and enshrouded the locality in blinding mist. Bricks, and charred logs were flung about like so many pebbles, windows were shattered, and in some cases crockery standing on the tables of houses in the neighbour-hood was broken by the shock. In Tsimshatsui Police Station several plates of glass were broken and china-ware was destroyed. All over Kowloon the shock was felt, and in Hongkong even there was distinct appreciation of the disturbance. The Hongkong Daily Press says that the last of the explosions—which occurred every half hour or so—took place about half-past five. The godowns which were destroyed or damaged extend from Chater Road on the west to the Water Police Basin on the east.

NEWS OF THE WEEK

A case of cholera is reported from the district of Higashi-nari near Osaka.

A pipe of the Ujina water works burst on the night of April 17th.

The Italian cruiser Puglia left Kobe on April 18th for Chemulpo.

The Fusan (Korea) branch of the First Bank has issued three denominations of notes -sen 10,

A lantern procession took place on the night of April 18th in Yokohama, starting from the Public Gardens.

The German warship Fuerst Bismarck arrived on April 18th at Shimonoseki, accompanied by a torpedo-destroyer.

We note that, owing to the indisposition of Mr.

emerged successfully from his struggle with the

During the first half of April, 2,826 bales of raw silk were brought from the interior and 2,430 bales were sold and exported abroad.

A Sapporo telegram reports that the fund collected in Hokkaido towards the war expenses aggregated on April 18th yen 198,069.

According to information from Tientsin, states If fift's Nagasaki telegram, five Japanese women are detained by the Russians at Liaoyang.

The total cost of constructing the Jubilee Road at Hongkong was \$115,272.27, including a sum of \$524 25 contributed by the Government. The road is five miles long.

Mr. Li-chi Yong and his party left Shimonoseki on April 19th by the 10 a.m. train for Kobe accompanied by Mr. Watanabe, an official of the Board of Ceremonies.

I. Homma, a student of the Meiji Law College, is reported to have committed suicide by drinking morphine. The cause is stated to be heavy debts contracted by irregularities of conduct.

The Jiji and Asahi agree in reporting that a candal has occurred at the Kure Naval Station in connexion with the supply of provisions, and that several officers, etc., were to be arrested on April 20th.

A torpedo-boat which was under construction at the Kawasaki Shipbuilding Yard, Kobe, was completed in the beginning of this month, and another about ready, is expected to run her trial trip on April 21st.

During March, the export of tea from Yoko-hama to America was as follows: to San Francisco, 79,820 lbs.; to New York, 277,355 lbs.; to Canada, 51,912 lbs.; Chicago, 85,250 lbs.; and to the Pacific coast generally 21,448 lbs.

In the Varsity boat-race Oxford led as far as Hammersmith. Cambridge then, having the better station, gradually overhauled Oxford, was slightly ahead at Thorneycroft's and led by two-and-a-half lengths at Barnes Bridge, winning eventually by four lengths.

According to a telegram received from London on April 18th by the Yokohama Specie Bank, Japanese four-per-cent. bonds rose £2½ making a quotation of £66.5, five-per-cent. bonds rose £2.8.7, making £80.0.3 and war loan bonds, £2.11, making £82.3.6.

An official telegram from Kobe states that a case of small-pox was reported on April 16th among the crew of the British steamer Shimosa which arrived there the previous day from New York via Manila, Shanghai and other ports. The patient was removed to the Quarantine Station.

The Crown Prince proceeded on April 17th at 11 a.m. to the Naval Staff Office accompanied by Lieut.-General Prince Arisugawa, where he gave audience to the Minister of the Navy, the Chief of Staff and other high officers. The Chief of Staff gave details of the gight engagement at Post Staff gave details of the eight engagement at Port

During the latest engagement at Port Arthur, two eagles were caught on one of the masts of the cruiser *Idaumo* and after the fight another was caught on the same ship, then on her way to the base. These birds were named *Ichiro* (first son), *Jiro* (second son), and *Sahuro* (third son). They will be sent to the Imperial Headquarters,

News brought by a British steamer, says the Jiji's Nagasaki correspondent, states that a Chinese war-ship with the arreament of the Russian gun-boat Mandjur has been sunk at Shanghai. A later telegram to the same paper reports that the Chinese warship is probably the Nam Foo. Details are not yet given.

the Second Empire, will lead into Manchuria the cavalry of the Czar. This is one way in which history plays her grim jokes.

The Chugoku Railway Company will issue debentures amounting to yen 360,000 in order to construct a new line. The company has decided to raise a loan of yen 720,000.

T. Nakahira, an engraver, in the village of Urauchi, Takaoka, Kochi prefecture, was arrested on April 20th on a charge of having forged 5-yen notes amounting to fifty thousand yen.

According to the captain of a British steamer which arrived on April 20th from Tientsin, says the Jiji's correspondent, the Russian authorities propose to classify wool as contraband of war.

The U.S. Minister in Tokyo, on April 13th informed the Department of Foreign Affairs, that Mr. George H. Scidmore had been appointed a special adviser to the Legation and would take up the duties of Councillor.

As part of the harbour construction scheme the Osaka City Assembly decided on April 20th to build four godowns each of five hundred 1subo. and four piers for cargo, for which purposes the Assembly decided to spend yen 126,223.

We are informed that the net amount accruing for Bishop Moore's lecture on the "Battle of Chemulpo" was yen 137.34. This was divided be-tween the Funds for the relief of distressed soldiers, &c., and poor children, yen 85.00 being handed to the former and yen 52.34 to the latter.

Plague, according to the Friend of India, is still increasing in the Provinces, the Punjab, Bengal, and Central Provinces. For the week ended 12th March there were 28,919 deaths from plague. Rangoon has been declared free

A telegram from Chiba says that J. Kudzufu, a farmer in the village of Suga, Katori district, murdered his grandmother on the night of April 12th and reported at the police station that the act was perpetrated by a burglar. The police, having, however, ascertained the true facts, arrested the man as well as his mother and wife on the 19th.

The Asahi has an Okayama telegram reporting rude treatment of the girls of the High Female School by their teachers. It appears that the teachers examined the female students in a nude state because a daughter of Mr. Higaki, the Governor, complained of having lost money in the institution. All the parents of the girls have protested at the Kencho against the conduct of the teachers and the educational inspectors are now investigating the affair.

We acknowledge receipt of the list of lighthouses, light-vessels, buoys and beacons on the coast and rivers of China issued by the Imperial Maritime Customs. It is corrected to December 1st, 1903 and therefore includes the Port Arthur lights "under the Russian Government's administration." The work which, with the list of foreign and Chinese staff runs to 60 pages, is marked by the lucidity that always characterises these publications and the coloured charts are almost works of art.

The largest grape vine in the world is growing in the Carpinteria Valley, 12 miles east of Santa Barbara, California, and is called La Para Grande. It was started from a cutting 61 years ago by a young Spanish woman, Dona Ayala. It is 8ft. ain in circumference at its base, and one of the horizontal branches measures more than 3ft. in circumference. The trellis covers about a third of an acre and 60 heavy posts support it. The vine produces as many as 5,000 bunches annually, conservative estimate

A French gentleman who declares himself to be

ed. This year Louis Napoleon, exiled Prince of the foreigner had taken a jinrikisha at the railon his way to his house at Omarudani, Ishikawa,

> Tokyo papers agree in saying that owing to the difference in the price of Japanese 5-per-cent, bonds in London and the price ruling in Japan, a number of these securities valued at about twentyfive thousand yen were placed on the Tokyo stock market a few days since through a foreign firm in Yokohama. The buyer was the Yama-Ichi Shoten, leading sharebrokers. The Nichi Nichi adds that securities valued at three hundred thousand yen will be submitted to the native market in the middle of next month.

The Scottish engineer who is reported to have given the Russians considerable assistance in the repair of the damaged warships in Port Arthur is Mr. John Gilchrist, from Clydeside, says the China Mail. He was formerly an engineer on one of the Empress liners running between Hongsone of the Employed for some years in the Hongkong and Whampoa Dock Company's establishment at Hungbom. For several seasons, Mr. Gilchrist was one of Hongkong's leading amateur vocalists. After leaving Hongkong, he returned to England, and established himself as a consulting engineer, but he returned to the East soon after, and was, we be-lieve, at the Amoy Dock for a short period before establishing himself at Dalny and Port Arthur.

The Mayors of Yokohama, Tokyo, Nagoya, Kyoto, Osaka, Kobe and Nagasaki have circulated a telegram to prominent cities abroad, the purport of the message running as follows: In reply to numerous enquiries and to clear away some mis-understandings which may be prevalent abroad, the Mayors of the leading cities in Japan are willing to guarantee that the conditions at present prevailing throughout the Empire are not different from those noticeable in ordinary years. Despite the serious situation caused by the war the social peace is not disturbed and no inconvenience or damage would be occasioned to any persons who will pay m visit either on business or pleasure to Japan. Transportation by sea or land is securely guaranteed, and there will not be any suspension of communications with this country and sorrounding waters, outside of course the arena of war. Under the protection of the Japanese army and navy there need be no fear that a foreign foe will invade the dominions of the

The war receives a full share of attention from the Sphere and the Graphic. The former in its issue of March 12th has several groups of maps and plans which ought to be of the greatest service to all who are interested in the war and desire to follow the course of events. One is bird's-eye map of the Liau-tung Peninsula accom-panied by two views of Port Arthur, a key map showing the position of the Kwang-tung Penin-sula and a chart of the locality with soundings. There are also maps and views of Vladivostock and Dalny, a bird's eye map of Korea and views of Seoul and Chemulpo, besides a variety of sketches more less connected with the war. The Sphere is very readable and interesting. The Sphere is very readable and interesting. The Graphic similarly devotes a large portion of its space to sketches illustrating the progress of hostilities, one of the most striking of which is a view taken from the Russian steamer Mongelia on her last trip from Shanghai to Dalny, which shows the search-light demonstration that accompanied the first engagement at Port Arthur.

We read that possibly the latest thing in elec-trical development is the talking searchlight. The telephonic quality of the electric light ray will be extensively illustrated at the World's Fair in St. Louis. "A large searchlight will be erected and a far-distant operator may speak into it. It has been discovered that vibrations of the human a correspondent of the *Petit Journal* and the voice are carried by a ray the same as by wire.

Revue de la Mode was injured on April 14th at Experiments in St. Louis have demonstrated that Ishikawa-machi, Yokohama, by a stone which the voice can be heard many feet from the arc was thrown at him. Previous to the accident, light. At present, a concave mirror is necessary

the foreigner had taken a jinrikisha at the rail-way station and at Kame-no-hashi he had trouble with the coolie as to the fare, but matters were settled by a policeman. The correspondent was unnecessary in the searchlight telephone at the World's Fair. One of the searchlights to be erected here is the largest in the world. It has 5,000,000 candle power and may be seen across the entire State of Missouri, a distance of over 250 miles. All that is necessary to speak to one for a distance of a mile or more is to connect the ray with the telephone."

THE WAR TAXES.

Mr. S. Saito, Director of the Revenue Superintending Bureau, Yokohama, hands us the following translation of the special war tax law which will come in force on April 1st :-

LAW No. 3.

(PROMULGATED 31ST MARCH, 1904.) Extraordinary Special Taxes.

Art, 1.—To defray expenditures arising from a special contingency the land tax, business tax, income tax, sake tax, sugar consumption tax, soy tax, registration tax, exchange tax, shorting license tax, mining tax, and various import duties shall be increased, and a consumption tax shall be imposed on woollen textiles and kerosene oil, and the civil suit stamp duty shall also be increased in accordance with this law. Art. 2.—Land tax, business tax, income tax, sake

Art. 2.—Land tax, business tax, income tax, sake tax, sugar consumption tax, soy tax, registration tax, exchange tax, shooting license tax, mining tax, and import duties on beverages and comestibles, clothing-and accessories, kerosene oil, sugar, molasses, syrup, silk tissues, liquors and tobacco shall be increased and levied according to the following rate besides the amounts of the taxes fixed in those laws and regulations respectively :-

Urban building land, 55 of the assessed value of

Rural building land, 3.5 of the assessed value of

Other land, $\frac{1.8}{100}$ of the assessed value of land. Business tax, $\frac{7}{10}$ of the amount of the tax according to the business tax law.

—Income tax.

Income of 1st and 2nd class, 70 of the amount of the tax according to the income tax law.

4. Sake Tax. Sake under the tax law for the manufacture of

sake.

1st, 50 sen per koku.

ner koku.

1st, 50 sen per koku.

2nd, 50 sen per koku.

3rd, 2½ sen for each degree of alcohol.

Beer, 50 sen per koku.

Alcohol and alcoholic liquors (containing quantities of alcohol over 20° in 100 per cent, of the original liquor) 2½ sen for each unit of pure alcohol per koku of original liquor.

Sake export duty of Okinawa Prefecture.

Sake, to be imposed according to clause 1 of Art. 1 in the regulations as to sake export duty in Okinawa Prefecture, 50 sen per koku.

Sake, to be imposed according to Clause 2 of the

Sake, to be imposed according to Clause 2 of the same Article of the same regulations.

2½ sem for each unit of pure alcohol contained in 100 per cent, per koku of the original

liquor.

5. Sugar consumption tax.

Class 1, yen 1.00 per picul

Class 2, yen 3.00 per picul. Class 3, yen 3.30 per picul. Class 4, yen 3.70 per picul.

Soy 1 ax.

At 6.—Consumption tax shall not be imposed ording to the ordinance, in the cases mentioned follows:

as follows: Woollen textiles or kerosene oil to be exported

Woollen textiles or kerosene oil to be consumed by manufacturers.

Art. 7.—When woollen textiles or kerosene oil art to be taken from a manufactory, customs or bonded

warehouse, the consumption tax on them shall be collected from the person taking delivery.

Art. 3.—According to ordinance the Government may postone the collection of consumption tax on woollen textiles or kerosene oil.

Art. 9.—Any person taking delivery of woollen textiles from a manufactory, custom house or bonded warehouse shall make a declaration of its value to the Government.

In case neither the aforesaid declaration nor the value declared is considered proper the Govern-ment shall appraise the value of the goods.

When a person taking delivery of woollen textiles objects to the value so appraised he may send in an application of objection at once.

When an application of objection is sent in, over two appraisers shall be selected and on their opinions the Government shall decide the

When the difference between the value stated by an objector and that appraised according to Clause 2 is greater than the difference between the value appraised according to Clause 2 and that of the foregoing paragraph, the expense of the appraisement shall be borne by the

objector.
Art. 10.—Except in cases corresponding to Art. 6 or Art. 8, woollen textiles and kerosene oil shall not or Art. 8, woollen textiles and kerosene oil shall not

or Art. 8, woollen textiles and kerosene oil shall not be taken from a manufactory, customs or bonded warehouse prior to payment of consumption tax.

Art. 11.—Except in cases corresponding to Art. 6 or Art. 8, manufacturers of woollen textiles or kerosene oil shall not deliver woollen textiles or kerosene oil to others for removal outside the manufactory.

Art. 12.—Persons wishing to manufacture woollen textiles or kerosene oil shall send in an application to the Government, except in cases where it is for

their own use.

Art. 13.—Manufacturers of woollen textiles or kerosene oil are not allowed to sell woollen textiles or kerosene oil at the places of their respective

manufacture.

Art. 14—Manufacturers as well as sellers of woollen textiles or kerosene oil are required to provide account books in which the quantity manufactured, received or delivered, shall be entered in detail.

received or delivered, shall be entered in detail.

Art. 15.—Revenue officers are empowered to enter manufactories or places for the sale of woollen textiles or kerosene oil, the materials, plant, machinery and buildings as well as books and documents. A revenue officer may, if he thinks it necessary for the purpose of supervision, put seals on the things referred to in the foregoing paragraph.

Art. 16.—Revenue officers are empowered to inspect woollen textiles or kerosene oil in transport or to inquire as to the place whence they have been taken or where they are to be taken to.

In cases under the foregoing paragraph, the revenue

In cases under the foregoing paragraph, the reven-nue officers, should they consider it necessary for supervision, may suspend transport or put seals on goods vessels or vehicles. Art. 17.—Offenders against any of the following items shall be liable to a fine corresponding to five times the amount of taxes leviable for consumption and the taxes shall be collected at once.

In no case, however, shall the amount of the fine fall below 10 yen.

When a person manufactures woollen tex

serosene oil without presenting a report to the Government except where these

report to the Government except where these are to be used for one's own consumption.

2. When a person has assigned to others or used woollen textiles or kerosene oil which have, where the collection of the tax has been delayed without the depositing of security with the Government, been taken delivery of or been removed from the manufactory, customs or bonded ware-

manufactory, customs or bonded warehouse.

3. When a person has offended against the
provisions of Art. 10 and Art. 11.

Art. 18.—Offenders against one of the following
ems shall be liable to a fine of from 3 yen to 30 yen.

1. In case any manufacturer or seller of woollen
textiles or keresene oil is known to have made
false entries in his books, or misrepresentations
of facts, or has failed to state particulars with
regard to the manufacture, receipt or delivery of
woollen textiles or keresene oil.

woollen textiles or kerosene oil.

woollen textiles or kerosene oil.

2. In case a person has opposed, evaded or impeded the revenue officers in the discharge of their duties. When provided for in the Criminal Code, the provisions thereof shall be applied.

Art. 19.—With regard to offenders against this law or ordinances issued according to this law, those provisions of the Penal Code which relate to mitigation, aggravation and concurrence of offences shall not be applied.

tion, aggravation and concurrence of offences shall not be applied.

Art. 20.—When manufacturers or sellers of woollen textiles or kerosene oil are minors or persons adjudged incompetent, the penal regulation to be applied to the person conducting the business according to this law or the provisions of ordinances issued in accordance with this law, shall be applied to the legal representative, except in case of a minor who has the same capacity as that of an adult in regard to business matters.

to the legal representative, except in case of a minor who has the same capacity as that of an adult in regard to business matters.

Art. 21.—When the agent of a manufacturer or seller of woollen textiles or kerosene oil, or the head or members of the family of such manufacturer or seller, or any person living with him, or his employee, or any other person engaged in his business shall violate this law or the provisions of ordinances issued in accordance with this law, the manufacturer or the seller shall be punished.

Art. 22.—Hokkaido, (Eso province) Fu, Ken (prefectures) Shi, (cities) Cho, (towns) Son (villages) as well as other public divisions are not allowed to impose taxes on the land except in the case of additional land tax or tanbetswavari tax within limitations as follows:

1. In Hokkaido, Fu, Ken and Ku, (wards) ist or 2nd class Cho, Son, of Hokkaido and Ku (wards) or the Island of Makiri in Okinawa Prefecture.—When imposing the additional tax only, % of the land tax. When imposing tax only, to sen average per tanbu (about a quarter of an acre).

In case of imposing both additional tax and tanbetswavari tax, the whole amount of the tanbetswavari tax, the whole amount of the land tax with the tanbetswavard tax.

2. Other public bodies. When imposing the addi-

the additional tax,

2. Other public bodies. When imposing the additional tax only, 34 of the land tax. When imposing the taxbetsuwari tax only, 40 sen on an

posing the tanuers are at only, 40 ten on an average per fanbu.

1 case of imposing both additional tax and fanbets awar it tax, the whole amount of fanbets awar it tax may not be imposed beyond the difference between 10 of the amount of land tax with fanbets awar and the whole amount of the additional tax.

Public bodies except Hokkaido and Fu and Ken are not allowed to impose additional tax exceeding the amount of $\frac{1}{10}$ of the business tax and

with regard to the increased amount of the land tax, business tax and income tax in accordance with Art. 2, the additional tax may not be

In case it is wished to repay the original amounts or to pay interest on debts incurred prior to the 36th fiscal year of *Meiji* or to defray expenditures on rebuilding works damaged by extraordinary calamity or in case that expenditures have been apportioned, additional tax or *tanbetsuewari* tax

or both exceeding the amount of the restrictions in Clauses 1 and 2 shall be imposed with the permission of the Ministers of Finance and the Home Department.

the Home Department.
With regard to building ground or places for the drying of marine products in Hokkaido additional tax or tanbetsuvari tax or both the additional tax and tanbetsuvari tax exceeding the amount of the restrictions in Clause 1 shall

the amount of the restrictions in Clause 1 shall be imposed with the permission of the Ministers of the Finance and Home Departments.

Should it be desired to defray expenditures for the advantage of using water, additional tax or tanhetstwari tax, or otherwise both the additional tax and tanhetstwari tax exceeding the amount of the limitations of clause 1 shall be imposed with the permission of the Ministers of amount of the limitations of clause I shall be imposed with the permission of the Ministers of Finance and the Home Department. Limita-tions under Clauses I and 2 shall not prevent the application of special ordinances and regula-tions under which rates of tax have been fixed.

ADDITIONAL RULES. Art. 23.—This law shall be enforced on the date of its promulgation. But import duties shall not come into force until six months have elapsed after the promulgation of the law.

with regard to land tax, business tax and income tax this law shall be enforced from the 37th fiscal year of Merji.

The restrictions in the amounts of tax under Art. 22 shall be applied from the 37th fiscal year of Merji. Should the aggregate or the rale of taxation in Hokkaido, Fay, Ken, Shi, Cho, Son, and other public divisions conflict with the provisions of this law, the conflicting part only shall lose its effect.

sions of this law, the conflicting part only shall lose its effect.

Art. 24.—Except for his own use any person manufacturing woollen textiles or kerosene oil prior to the operation of this law and wishing to continue such manufacture must report that fact to the Government within one month in accordance with this law

the Government within one month in accordance with this law.

During the period referred to in the foregoing paragraph such manufacture may be continued. Art. 25—With regard to sugar of the 1st class, molasses or kerosene oil, when six months have elapsed after the operation of this law, the consumption tax shall not be imposed.

With regard to sugar of the 2nd class, when six months have elapsed after the operation of this law, No. 5 of Art. 2 shall not be applied, but the consumption tax shall be increased to 2 yen 30 sen per 100 piculs and imposed.

Art. 26.—With regard to sugar which is under No. 15 Dutch colour standard or molasses, when stored in a bonded warehouse, after the operation of this law the rate of import duties in force at the time when the goods are taken out shall be applied.

Art. 27.—After peace is restored this law shall be abolished at the end of the following year.

REGULATIONS FOR THE ENFORCEMENT OF THE SPECIAL WAR TAX LAW.

IMPERIAL ORDINANCE No. 86.

Art. 1.—Manufacturers or persons intending to manufacture, as mentioned in the present ordinance, do not include those who are engaged in manufac-ture or those who intend to manufacture for their own exclusive uses.

own exclusive uses.

Art. 2.—Persons who intend to carry on the manufacture of woollen textiles or kerosene oil (must) specify their manufactories and products to the Revenue Office under the jurisdiction of which are such works.

such works.

Art. 3.—Whenever that is deemed necessary, the competent Revenue Office shall order the submission of the plans of manufactories of woollen textiles (or kerosene), as well as inventories of machinery and implements required in such works, and such manufacturers must comply with such order.

Art. 4.—When manufacturers of woollen textiles for kerosene) are about to remove their manufacturers.

(or kerosene) are about to remove their manufactories they must notify their new works to the competent Revenue Office.

Art. 5.-If a manufacturer of woollen textiles (or kerosene) wishes to carry on his operations for a fixed period, he must previously state the beginning and end of each period to the competent Revenue

Art. 6.—If any change takes place in connection with the statement submitted under Arts 3 and 5 or the plans or inventories under Art. 3, such change must be reported

the competent Revenue

Office.

Art. 7.—When a person succeeds a manufacturer of woollen (textiles or kerosene), he shall notify the same to the competent Revenue Office.

When a person intends to transfer the business of manufacturing woollen textiles (or kerosene) to others, he shall state the fact to the competent Revenue Office in a document signed by him jointly with the transferee.

Art. 8.—When a manufacturer of woollen textiles (or kerosene) ceases such business he shall state the fact to the competent Revenue Office.

Art. 9.—When a person desires exemption from the tax on woollen textiles (or kerosene) to be exported abroad, he must obtain the consent of the competent Revenue Office by previous application, stating the route of transport, the destination, and the port of entry

Whenever deemed necessary, the competent Re-venue office Offixes its seal on the articles referred to in the above paragraph, or transports the same in its own custody, or requires the deposit of securities proportionate to the amount of the

In exporting woollen textiles (or kerosene) so ex-empted from the tax an export license or other document of similar effect shall be presented to the competent Revenue office.

the competent Revenue office.

If after the withdrawal of woollen textiles (or kerosene) from a manufactory, customs or bonded warehouse, the export license or document of similar effect does not follow within three months, the goods involved shall be considered not to have been exported and the tax shall consequently be collected from the person who took delivery.

sequently be collected from the person who took delivery.

Art. 10.—Should a manufacturer desire exemption from the tax on woollen textiles (or kerosene) for his own use, he must have the previous consent of the competent Revenue Office for the removal of such articles from the manufactory.

Art. 11.—When woollen textiles (or kerosene) come under one of the following cases, the period for the collection of the tax shall be extended:

1, When securities exceeding the amount of the tax are deposited.

2. When woollen textiles (or kerosene) are removed from a manufactory or warehouse for trans-

from a manufactory or warehouse for trans-ference to another manufactory or a ware-

nouse.

In the case of No. 1 of the foregoing article, the prolongation can not exceed three months.

In the case of No. 2 of the foregoing article if woollen textiles (or kerosene) so stored have been

taken out from the warehouse, they are regarded as if they were taken from the manufactory. The provisions of Clauses 1 and 2 of Art. 9, are also applicable to No. 2, Clause 1 of the present article.

are also applicable to No. 2, Clause 1 of the present article.

Art. 12.—If a person desires to remove woollen tesctiles (or kerosene) from a manufactory, he must so notify the competed Revenue Office; with regard to woollen textiles their value must also be stated.

Art. 13.—In districts where there is no Treasury office, revenue officials can collect the taxes. In the above case, revenue officials can notify verbally that payment of the tax is required.

Art. 14.—Securities acceptable as deposits under the present ordinance must either be cash or such papers of value as are deemed proper by the competent Revenue Office. After depositing securities, the relative receipt shall be transmitted to the competent Revenue Office by the depositor.

Art. 15.—In case the papers so deposited fall in value, the competent Revenue Office is authorized to request the deposit of additional securities.

Should any one fail in making such further deposit the competent Revenue Office shall collect the consumption tax at once.

the competent Revenue Office shall collect the consumption tax at once.

Art. 16.—When payment of the consumption tax has been made or exemption from the same has been decided upon after the deposit of securities, the competent Revenue Office shall take the necessary steps to return the deposit to the parties concerned.

Art. 17.—In the collection of the tax, if there are securities deposited such securities shall be appropriated to request of the taxes. In the appropriation of the tax is the same of the same of the tax is the tax is the same of the tax is the

securities deposited such securities shall be appropriated to payment of the taxes. In the appropriation of securities for payment of the tax, papers of value so deposited shall be sold at auction; and the proceeds therefrom shall be used for payment of the tax as well as for defraying expenses caused by the auction. If the proceeds still fail to cover the amount, a further exaction is effected; if there is an excess the same shall be returned to the parties concreted.

concerned.

Art. 18.—Manufacturers of woollen textiles (or kerosene) shall enter at least the following items on their register books:

r register books:

Kind of materials, quantities of the same, dates of receipt, if received from others, addresses, names or firm, names of parties from whom delivery of the said materials was taken.

Kind and quantities of materials used and the day on which the same are put in use.

Kind and quantities manufactured and the date of manufacture.

3. Kind and quantities manufactured and the date of manufacture.
4. Kind quantities, and value of the same, dates of delivery; addresses, names or firm-names of those to whom delivery is made.

Art. 19.—Dealers in woollen textiles (or kerosene) just at least enter on their register books the

following items:--

1. Kind and quantities received and the value of the same, dates of receipt, addresses, names, or

Kind and quantities sold the value of the same, dates of sale, addresses, names and firm-names

In the case of retail-dealers, names and addresses of the purchasers as provided in the preceding paragraph need not be entered.

Art. 20.—If a statement has been made to the competent revenue officials, sent to a manufactory or warehouse on duty, or consent has been asked from such officials, such statement or consent made to or given by the officials is valid as a statement to or consent of the competent Revenue Office.

or consent of the competent Revenue Office.

Art. 21.—Revenue officials shall not disclose to others information connected with manufacturers or sellers of woollen textiles (or kerosene) and the business relating thereto obtained in their official capacity.

Art. 22.—Affairs connected with the Revenue Office under these regulations shall be transacted by the competent Customs authority when woollen textiles (or kerosene) have been removed from customs or bonded warehouses.

SUPPLEMENTARY.

The present ordinance shall come into force from the day of promulgation.

When a statement is required under Art. 24 of the Extraordinary Special Taxation Law, such state ment shall be made to the Competent Revenue Office.

CORRESPONDENCE.

BRITANNIA'S SONS.

TO THE EDITOR OF THE " JAPAN MAIL."

-May I again avail myself of the courtesy o your columns to acquaint those who were interested in this movement, of the manner in which it has de-

veloped. It was suggested last year that the graves of the British Sailors, Soldiers and Marines, in our local cemetery, should have some little attention given to them, beyond the general oversight constantly and faithfully extended by the Cemetery Committee. The British Admiral then in Yokohama supported the movement, and permitted a party of men from the fleet to clean and repaint the head-stones, etc.,—while the British residents showed their appreciation by subscribing for rose-bushes to be planted upon the movement, and permitted a party of men from the feet to clean and repaint the head-stones, etc.,—while the British residents showed their appreciation by subscribing for rose-bushes to be planted upon many of the graves. These rose-bushes have proved successful,—blossoming well, not only in the summer but also in the late autumn, and promising to do even better this year. The subscriptions being more than sufficient for this feature of the work, it was developed to the extent of placing white wooden crosses at the head of several of the un-named mounds, beneath which it was supposed that many of Britannia's sons had been laid to rest. In the late autumn, daffodil bulbs were planted, and these are now in bloom, and although the blossoms are somewhat straggling, they are better than nothing. The price of the 450 rose-bushes, the cost and erection of the 250 crosses, and the purchase and planting of the 800 bulbs have exhausted the sum of pen 159.00 which resulted from the donations, and the matter can now be closed by the fulfilment of the suggestion regarding the planting of prinnrose-roots, which will blossom perennially and thus prove a permanent decoration to the graves.

As the primrose season is now closing, roots which have passed their flowering season can be purchased at a very low price, (about 2-sen each), and it is hoped that we may have at least one thousand,—which will brighten the cemetery and prove of lasting adornment to the graves in question. No money is asked for. Those desiring to help in this movement are requested to send primrose-roots to Mr. C. Holgate, who has kindly consented to take charge of them, and attend to their planting.

A side issue of this movement has been the distribution of bunches of primroses to "Britannia's Sons" who are still above the sod, (and therefore better able to appreciate them),—a little band of lash and lassies, having, for two successive years, visited the ships and hospitals with bright nosegrays of the yellow blossoms. Many a tender heart beneath a rou

Thanking you for the space you have permitted me to use for making this matter public.

Yours faithfully, CLARENCE GRIFFIN.

Yokobama, April 16th, 1904.

firm-names of those from whom delivery is taken.

Why do we wait and coldly stint our praises, And leave our reverent homage un-expressed, Till brave hearts lie beneath a roof of daisies, addresses, names and firm-names of the buyers.

Then beap with flowers each hallowed place of rest."

For every year the veteran ranks are broken And every year new graves await our flowers; Ah! Why not give to living hearts some token Of half the love and pride that throb through ours.

Bring blooms to crown the dead; but, in your giving, Forget not hearts that still can strive and ache, give your richest garlands to the living, Who offered all in youth, for honour's sake."

THE NAGASAKI HOTEL, LIMITED,

An extraordinary general meeting of shareholders of the above company was held at the Nagasaki Hotel on Wednesday, 13th inst, when there were present, Messrs F. Ringer (Chairman), R. I. Bowie, A. L. Jordan (Directors). Mullerbeeck, Buckland, Mansbridge, Carnduff, Measor, Smart, Boeddinghaus, R. H. Powers and Inman (Secretary), representing Jen 46,200 of the issued Capital, yen 130,000.

The Seretary read the Notice calling the Meeting. THE CHAIRMAN—Gentlemen, the object of the meeting has been advertised and you are all aware of the business. Dr Bowie will explain the reason for calling this meeting.

aware of the business. Dr. South Treason for calling this meeting.

Dr. Bowie-Gentlmen, it is with regret that the Directors have had to call this Extraordinary Meeting Chambalders for the purpose of asking you to Directors have had to call this Extraordinary Meeting of Shareholders for the purpose of asking you to vote for the voluntary liquidation of the Company, but I can assure you that we have only done so after very long deliberation on the matter. The Capital of the Company is, as you are aware year 130,000.00 all of which is fully paid up; and in June, 1898, Debentures were issued to the amount of year 170,000.00 at 7 per cent. interest per annum. The holders of these Debentures have first claim on the property of the Company, in fact should the resolution be carried, the face value of these Debentures immediately becomes payable—as to how this is to be effected will be a matter entirely in the hands of the Official Liquidator, and I shall ask you later to recommed to the Court at Hongkong a gentleman to act for the Court and I shall ask you later to recommed to the Court at Hongkong a gentleman to act for the Company in this capacity. There is of course interest due on these Debentures, payable on the 1st of January last, amounting to yen 5,950.00, which we regret to say is still unpaid and which it will be impossible to pay before the 1st of July next—this was our principal reason for calling this Meeting. There is also an amount of yen 7,775 owing to Messrs. Holme Ringer & Co. for cash advanced, for which they have requested payment and declined to negotiate the Company's cheques for any further amounts; the other liabilities of the Company do not amount to yen 3,000 and can be squared by selling amount to yen 3,000 and can be squared by selling a portion of the Stock. So far I have not mentioned the Interest due on the 2nd issue of Debentures (yen 93,000) amounting to yen 6,510, which is a second claim on the Company after the First Issue Debenture Holders have been dealt with, and until that is done the holders of these cannot obtain payment. The done the holders of these cannot obtain payment. The receipts of the Company at present amount to under yen 5,000 per month. You will therefore agree with me that it is impossible to make a profit of yen 18,410 per annum (amount of Interest payable) out of such takings. You may ask why did we not call this meeting before—my answer is that the receipts have hitherto been on an average, yen 8,000 per mouth, in our estimation quite sufficient to pay the above interest. For our present hopeless position we wish you to understand that we do not blame anyone connected with the Company, time has proved to us that our Capital was too large, and having done our best for you all we wish is to be relieved of our duties—nothing further remains for me but to propose the following resolutions: following resolutions :-

(1) That the company go into voluntary liquidation.
(2) That Mr. P. J. Buckland be appointed quidator.

Liquidator.

The danger to us of running our necks into a noose was so great that we think it best that our action, in the selection of a Liquidator, should be approved by the Court at Hongkong.

Mr. Carnduff duly seconded these motions.

The Chairman asked if anybody had any amendments to propose, if not the resolution to the effect that the Company go into voluntary liquidation would be put to the vote first.

A vote was taken and the resolution carried unanimously.

A vote was taken and the resolution carried unanimously.

The Chairman then said "Well, now, Gentlemen, it rests with you as to whom you wish to appoint Liquidator. Dr. Bowie has proposed and Mr. Carnduff seconded that Mr. Buckland be recommended."

This being put to the meeting was unanimously carried.

Mr. Mullerbeeck asked what capital was repre-sented amongst the shareholders at the Meeting.

The Chairman— Ven 46,000—it is only necessary that one tenth of the capital, yen 130,000, should be represented so that it is quite in order.

Dr. Bowie—I think the matter has been extensively

Dr. Bowie—I think the matter has reen extensively discussed and is well known amongst all the shareholders, while the law is certainly being complied with, besides it would be folly to allow this matter to go from bad to worse; as regards the other shareholders I think they would vote for whatever is the best think they had one. best thing to be done.

Mr. Mullerbeeck stated that he did not think there

were sufficient shareholders present to pass such an

important resolution.
The Chairman—The Shareholders could appoint The Chairman—The Shateholders could appoint proxies II unable to attend themselves. The resolution must be confirmed at an Extraordinary Meeting of Shareholders which will be held on the 27th April, so this will give the other shareholders a

Dr. Bowie—I understand that the passing of this esolution releases the Directors from their re-

sponsibility.

The Chairman.—I am afraid we cannot be released.

until the Liquidator is confirmed by the Court.

Dr. Bowie expressed the hope that the Liquidator would not close the Hotel as it would be a great loss, would not close the Hotel as it would be a great loss, not only financially but also as to the prestige of Nagasaki. He also hoped that under the guidance of Mr. Buckland it would be proved that such a step as this would not be necessary.

Mr. Carnduff then proposed a vote of thanks to the Drirectors, which was duly seconded by Mr. Buckland, and the meeting terminated.—Nagasaki

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE THIBET QUESTION.

London, April 15.

In the debate on the Thibet Question, Mr. Brodrick defended Lord Curzon against the allegation that he had been showing a desire for expeditions or for an undue as-sertion of British interests. There had been only three expeditions in Lord Curzon's term of office. This number was greatly exceeded by those undertaken by his predecessors.

A BIG GUN DISASTER.

Later.

A twelve inch gun in one of the turrets of the U.S. battleship Missouri, engaging in gun practice off Pensacola, exploded. officers and twenty-one men were killed,

THE RUSSIAN SQUADRON.

The squadron of Admiral Virenius has re-entered the Baltic.

A NIGHT ACTION.

In the course of a night action off Portsmouth the torpedo boat destroyer Teazer grounded and will probably go to pieces.

ANOTHER ATTACK IN THIBET.

London, April 15

The Thibetans again opposed the British Mission, at the Red Idol Gorge. Three hundred Thibetans were killed, the British loss being ten wounded.

MOURNING FOR MAKAROFF.

The Tsar and Tsaritza attended a memorial service in the Admiralty Church, the Tsaritza weeping throughout the ceremony. In St. Petersburg the city is in mourning, amusements have been cancelled, and the cafés are closed.

"THE TEASER" FLOATED.

The British torpedo-boat-destroyer Teaser has been refloated.

MR. CHAMBERLAIN RETURNS.

London, April 16.

Mr. Chamberlain has returned from Egypt.

RUSSIA AND WIRELESS TELEGRAPHY.

It is stated at Washington that the Russian Government has given notice to the newspapers that correspondents using wireless telegraphy will be treated as spies and

REPORTED RUSSIAN PURCHASES OF GERMAN STEAMERS.

In the Reichstag, Herr Bebel, the Socialist leader, drew attention to the reported sale of German liners to Russia as a breach

of neutrality.

Count von Bülow, the Chancellor, said that such sale was permissible, according to International law, as hitherto understood, but that at any rate the question was doubtful one

GERMAN SOUTH-WEST AFRICA.

London, April 17.

There was another fight between Germans and the Hereros on the 13th of Two German officers and six men were killed; one officer and twelve men wounded.

The total losses hitherto have been fifteen officers and eighty-one men killed; ten officers and fifty-nine men wounded.

ATTACKING A RAILWAY BRIDGE. It is reported from St. Petersburg that two Japanese officers, disguised as lamas, have been brought to Harbin. They were caught endeavouring to destroy the bridge over the river Nonni with gun-cotton.

THE MAD MULLAH.

London April 19

The Mad Mullah has escaped to Italian territory, routed. It has been decided to discontinue the British operations and to reduce the field force.

THE THIBET EXPEDITION.

In the House of Commons, Mr. Lambert asked whether it was proposed to advance to Lhassa in the event of the negotiations at Gyangtze breaking down. Mr. St. John Brodrick replied that it was

not in the public interest to make any statement of the Government's intentions or to discuss such an eventuality.

FATAL CARRIAGE ACCIDENT.

London, April 20.

Major Burt, of the Guards, has been killed through a carriage accident in Piccadilly. PENSION FOR MRS. MAKAROFF.

The widow of Admiral Makaroff has been granted a pension of 20,000 roubles.

LINES DRAWING CLOSE.

600 yards now intervene between the Japanese outposts and the foremost Russian outposts on the islands on the Yalu.

VICE-ADMIRAL SKRYDLOFF.

Vice-Admiral Skrydloff has arrived at St. Petersburg before proceeding to the East. He received a most extraordinary popular ovation and was conjured to save the honour of the Navy.

YORK'S DEMOCRATIC NOMINATION. NEW

The New York Democratic State convention has nominated Judge Parker, of Boston, for President.

THE BRITISH BUDGET DEFICIT.

put at £5,415,000. It is estimated that the perform. revenue for the coming year will be Mr. I £139,006,000; and the expenditure £143,- treaty w 880,000.

Sinking Fund, but proposes to realise at the front for a million's worth of unclaimed stock. He own ambitions. adds a penny to the Income Tax and 2d, a pound on tea.

pound on tea.

Note.—On April 23rd, 1903, the Chancellor of the Exchequer estimated the Revenue for 1903-19 \(\)4 at \(\frac{154}{770},000, \) and Expenditure at \(\frac{144}{144},270,000, \) leaving a nominal surplus of \(\frac{10}{10},500,000 \) he accordingly knocked \(\frac{4}{10},000,000 \) leaving thus a surplus of \(\frac{13}{10},000,000 \) required (\frac{1}{10},000,000) leaving thus a surplus of \(\frac{13}{10},000 \) for contingencies. Unforeseen circumstances have wiped out this entirely and have pilled by its each of the continuous cont out this entirely and have piled up instead a big deficit. The Income Tax in now brought up to a shilling per £. The Sinking Fund is in connection with the paying off of the National Debt. The National Debt. al Debt now totals £759.943,282, or roughly, £17.188.734d. per head of the population of the United Kingdom.

THE BRITISH BUDGET.

London, April 21.

The Chancellor of the Exchequer's tea Commons, after an amendment moved by Mr. Lough in favour of a tax of sixpence per pound had been rejected, by a vote of

Tobacco receives an additional sixpence per pound: cigars a shilling; cigarettes under the new rate pay three shillings; and threepence is imposed upon tobacco stripped before importation. These proposals were adopted by a vote of 200 to 106.

The papers generally receive the Budget with favour, but the Conservative organs simultaneously insist upon the urgent necessity for reducing the national expenditure, especially in view of the increase in the income tax.

The Daily News vehemently denounces the increase in the tea tax.

(RECEIVED AT THE LEGATION OF FRANCE.) ALEXIEFF ASKS LEAVE TO RETIRE.

Saigon, April 21. Admiral Alexieff has asked to be relieved of his functions as Viceroy.

ENGLISH STATESMEN AND RUSSIAN AGREEMENTS.

(RECEIVED AT THE FOREIGN OFFICE.)

During a debate in the House of Commons on the subject of Thibet and the recently concluded Anglo-French convention, Lord George Hamilton and Mr. A. J. Balfour spoke about the possibility of England con-cluding with Russia a convention similar to that just arranged with France, viz., the settling of all points of friction between the two countries, especially those in Asia. It is reported from St. Petersburg that only From the remarks of the two speakers it ap-poop yards now intervene between the Jap-peared that whereas both would desire such a convention, they appreciated the great obstacles which lay in the way of its con-

Lord George Hamilton said that the desire to conclude with Russia an agreement settling the spheres of interest of the two countries in Asia had become weaker in Without attempting to say recent years. that Russian sincerity could not be trusted it had to be confessed that there was difficulty in accepting promises made by her high officials. Many evidences has been furnished that Russian Ministers of the Crown do not recognise any general responsibility, and that what one promised the The Budget deficit of Great Britain is others do not consider themselves obliged to

Mr. Balfour said that in making any treaty with Russia it would be necessary to take into account that even though a certain The Chancellor of the Exchequer, Mr. procedure were not the policy of the central

at the front for reasons suggested by their It was not so easy as some people seemed to imagine to effect a settlement of current questions by means of a signed and sealed document.

The Times, writing on this subject on the 20th inst., said that any person of common sense could see without the exercise of much intelligence that a convention with Russia as to pending questions could not be regarded in the same light as the recently concluded convention with France. A treaty with Russia might not be impossible but it would be extremely difficult.

RUSSIAN SUBMARINES

It is stated from St. Petersburg that one of the five submarines destined for the Far East was packed in sections on the 19th inst, and despatched overland.

(SPECIAL TO THE "JAPAN MAIL")

THE TANSAN CASE AT SINGAPORE.

Kobe, April 18.

In the Tansan case at Singapore—Wilkinson versus MacAlister—the appeal against the Chief Justice's decision has been disallowed. Victory therefore rests with Mr. Wilkinson.

DEATH OF MR. J. JOHNSTONE.

Kobe, April 19.

Mr. Jas. Johnstone died suddenly aboard the P. & O.-steamer Formosa yesterday evening.

(FROM THE "JIJI SHIMPO.")

THE BALTIC SQUADRON.

I.ondon, April 19,
The Tzar being desirous that the Baltic squadron
should leave on July 15th for the Far East, the
Naval authorities are now making the necessary preparations.

THE BRITISH BUDGET.

In the Budget, the Government propose to increase the tax on tea and tobacco.

(From the "Asahi Shimbun,") RUSSIA'S FINANCES,

London, April 19. According to information from a trustworthy source, Russia has defrayed a part of the war expenses from the reserve fund for the redemption of foreign loans, so that there has arisen a deficit in this fund. Consequently, Russia is pressed to raise another loan in order to pay interest on the present loans within a few months.

(From the "N.-C. Daily News.") THE KAISER'S HOLIDAY.

London, April 12. The Kaiser has been staying at Malta since Saturday, sightseeing and participating in a series of most cordial luncheons, receptions and dinners ashore and aboard the *Hokensollern* and British men-of-

BRITISH NORTH BORNEO.

Hongkong, April 11.
It is reported from Singapore:—The natives of Kawang, British Borneo, are rising. They attacked the settlement, between Jesselton and Papar, at night time, and massacred twenty and wounded many.

THE SETTLEMENT OF THE EGYPTIAN QUESTION.

London, April 13,
A dispatch from Lord Lansdowne, British Foreign
Minister, to Sir E. J. Monson, British Ambassador to
France, emphasises the recognition by France of the
predominant position of Great Britain in Egypt.
A new Khedivial decree annexed to the declaration A new Khedivial decree annexed to the declaration and accepted by France will, if accepted by the other Powers, give Egypt a free hand in the disposal of her own resources. The functions of the Cause de la Dette will be strictly limited to receiving the revenues assigned to the service of the public debt of Egypt, and paying the coupons. It will have no right to interfere with the general administration of the country. The surplus funds in the hands of the Cause, which now amount to £5,500,000 sterling, will be handed to the Egyptian Government. There is a reasonable hope that no serious obstacle will be placed in the way of the promulgation of the Khe-Austin Chamberlain, refuses to suspend the government it might be adopted by the men placed in the way of the promulgation of the Khe-

divial decree by other Powers, whose holdings of the Egyptian debt are quite insignificant. Should un-expected obstacles arise, England can count on the expected obstacles arise, England can count on the support of French diplomacy to overcome them. Lord Cromer, the British Agent at Cairo, considers that the time is not yet ripe for modifying the legislative and judicial systems in Egypt, but when the time comes, we have sufficient grounds for counting on French co-operation in effecting the necessary changes. changes.

AH-SIN ON SOUTH AFRICAN MINING.

You wanchee my go Aflic side along that mine? Eyah! can do! Suppose you puttee book, what thing my first mus

And talkee tlue.

That coolie pidgin olo tim' no muchee good, So some You can secure that coolie catchee plenty food, Yes, ebly day?

How long you tiuly wanchee mus' that side man-man?

One-two-three year You savey olo tim' so soon come back no can, Man largee fear.

You wanchee alla coolie, dig too muchee stlong Way down below;
You wanchee he, you savey, work too muchee long
Lit' topside go.

But s'pose that wagee alla plopah Aflic side Have settlee tlue Mus' wanchee savey when from mine can go topside What thing can do

Man talkee alla coolie inside compound stay, No walkee't all How can so fashion? all same plison ebely day Inside four wall.

My welly glad work welly hard downside all day, S'pose talkee so,
Only my nighty tim' too muchee likee play,
All coolie so.

S'pose by am bye my three year pidgin finishee.
All same that book You can secure my Cheena go acloss that sea 'Long flen' Alook

S'pose my die that Aflic side? Eyah! No wancher

Mus' savee tlue. You can secure my Cheena inside coffin go? Dead coolie do.

What thing you talkee? How so muchee can secur For coolie man? That Madalin mus tung-tung tung si make sure S pose he can.

My thinkee p'laps more better Cheena side my stop. Catch chancee small, My father welly sick—can go see he chop-chop
S'pose he call.

My savey Cheena chow-chownicee girlee see, Plaps fan-tan play, Who man can makee muchee bobbely 'long me S'pose Cheena stay

FOR BABY'S SKI

SCALP AND HAIR

Something for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, distiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with CUTICURA ONN-MENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, to be followed in the severer cases by mild doses of CUTICUMA RESOLVENT PILLS (see below), to cool and cleanse the blood, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-ont, worried mothers. A single set is often sufficient to cure when the best physicians fail.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleasing the scalp of crute, scales, and dandruff, and the stopping of falling half, for softening, whitening, and socthing red, rough, and sore hand, for beby rashes, itchings, and change, in the form of battle for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many annative, antisoptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the tollet, beth, and nurvery.

URA RESOLVENT PILLS (Chocolate Coated) are prepared to meet the women, and sensitive children, and are pure, aweet, and tasteless, question the most successful blood purifiers and humour cures yet comp

YOKOHAMA: SATURDAY, APRIL 30TH, 1904

SUMMARY OF NEWS.

A RATHER severe shock of earthquake was felt on April 24th at 8 a.m. at Morioka.

THE Czar, it is stated, has refused to permit Prince Bonaparte to proceed to the Far East.

A CASE of dysentery was reported on April 25th at Tobe-machi, Yokohama, the patient

TEMPORARY loans to the Government from the Bank of Japan aggregated forty-five million yes at the end of last week.

THE radium treatment of cancer in the Cancer Hospital, London, has been abandoned because it has proved a failure.

THE net income for last half-year of the Tobu Railway Company was yen 44,035 and the interim dividend is declared at two per cent.

According to the Official Gazette, Mr. Edward IT is stated by the Jiji that Mr. H. Abe, a well-conveyed the consolation of the Empere Julian King has been appointed Acting-Consul known speculator in Osaka, has purchased Crown Prince to the wounded bluejackets.

of the United States in Hokkaido. Baron Komura, Minister for Foreign Affairs, presented him on April 23rd with his exequatur.

DURING a gale, two junks capsized on April 6th off Miyake island. Four fishermen were drowned and one is missing.

M. RATARD, Consul-General of France Shanghai, has been made by the Czar a Com-mander of the Order of St. Stanislas.

A Marsuyama telegram states that another batch of five Russians left the hospital there on April 21st for Kobe on their way home.

Marquis Iro entertained the Ministers of State and high officers of the Army and Navy on the evening of April 23rd at the Mitsui Club.

THE profit for the last half-year of the Narita Railway Company was yen 52,043 and an interim dividend has been declared of two per cent.

THE Nichi Nichi reports that Mr. S. Hirai acting superintendent of the Railway Industry Bureau, was attacked on April 25th by scarlet

THREE MEN entered the village office of Nasu, near Utsunomiya, on the night of April 21st and stole yen 730 from an iron safe, which they broke

Mr. S. Kurino, formerly Japanese Minister at St. Petersburg is reported to have arrived at Hongkong. He will change steamers at Shanghai for home.

A BULLET broke a window in a train on April 24th at 1 p.m. at a point between Oji and Tabata near Tokyo. No injury was sustained by the passengers.

Owing to heavy rain on the night of April 24th, all the rivers in Yamaguchi prefecture overflowed their banks, causing considerable damage to dwellings and fields.

THE Sado Maru, of the Nippon Yusen Line, with 6,000 tons of coal aboard from Wales, has evaded Russian cruisers and arrived safe at Capetown on her way to Japan.

FIFTY-THREE cases of new tea were put on the Yokohama Market on April 26th. The first business between Japanese and foreign traders opened the previous day.

THE dwelling of Mr. G. Mitsui, a wealthy merchant in Kyoto, was destroyed by a fire which occurred on April 21st. A defective kitchen stove was the cause.

COUNTESS OTANI, wife of the Lord Abbot of the Honganji Temple, paid a visit on April 22nd to the Crown Princess, her younger sister. She will leave Tokyo this morning for Kyoto.

MR. G. YOSHIDA, ex-member of the Lower House, and his mother were arrested on April 26th at Tsuchiura, Mito prefecture. The charge against them has not yet been reported.

MR. Oya, of Osaka, has purchased the British steamer Bendawa, of 2,316 tons, for yen 160,000. She will shortly arrive at Kobe where she will be delivered to her new owner. She was built in 1882 in England.

W. NAKAI, a shoemaker at Shinagawa, attempted to murder his wife on the night of April 24th by hitting her on the head with a club while she was asleep, inflicting severe injuries. The cause is reported to be jealousy.

Japanese loan bonds valued at two hundred thousand yen on the London market through Messrs. Samuel, Samuel and Company.

AFTER an inspection of Gibraltar, the Kaiser is said to have remarked that he was not surprised that it was imprepable. "It surpasses expectations," he added. "It is grand, like everything English."

VISCOUNT YOSHIKAWA, Minister for Home Affairs, gave m permit on April 27th to two Chinamen Ting and Kwan, No. 151 and No. 139, respectively, in Yokohama, who had applied for papers of naturalization.

Mr. M. Fukuchi, who has been instructed by the Minister for Agriculture and Commerce to investigate fine arts and other industries in the United States, left Japan on April 27th by the steamer Doric for San Francisco.

THE London cabman is noted for his up-todate repartee. One of them demolished another of his kind the other day by shouting: "You fit to drive a keb! Why, you ain't fit to command a Russian battle-ship, you ain't."

A TELEGRAM from Moji reports that the Nippon Yusen Kaisha's chartered steamer Babelsburg will confine her present voyage to Chemulpo as there is a fear of her striking some of the torpedo mines floating in the Gulf of Pechili.

THE Russian Minister of Finance has decided to acquire five million roubles of preference shares in the Enzelier-Teheran Railway Company, and 11,875,000 roubles of shares in the Discount and Loan Bank of Persia. Both amounts are nominal.

Being unable to repay a loan, the Kawamura Bank, Gifu, had its property seized on April 25th by the Mitsui Bank, and the former accordingly suspended payment. The depositors, consisting of over seven hundred persons, are panic-stricken.

COMMANDER THOMAS JACKSON, R.N., of H.M.S. Rosario, has been appointed Naval Attaché to H. M. Legation at Tokyo, and Lieut. Gerard W. Vivian, R.N., of H.M. S. Vengeance, succeeds Commander Jackson in the command of the Rosario.

T. Taguchi, a conductor at the Iida-machi rail-way station, Tokyo, was arrested on April 21st on a charge of having stolen several goods transported by train from Yamanashi to Tokyo. The value of the stolen goods is estimated at over six thousand yen.

Fire broke out on April 24th at 1 p.m. at the village of Yoshiwara, Shimo-Nomi, near Kanazawa, Ishikawa prefecture, burning down fifty dwellings, seventeen godowns, and sixty-five sheds. One person was killed. The homeless people are being relieved by the local government.

THE Hechi states that Lieutenant K. Nomi, of the Infantry (retired), committed suicide on the night of April 25th at Hiroshima. He left a letter addressed to the commander of the Fifth Division in which he stated that he was too ashamed to live after being suspected by the police of being a spy of Russia.

A Saseho telegram states that two officers, Aides-de-Camp of the Emperor and the Crown Prince, paid a visit on April 18th to Admiral Togo's United Squadron to convey the compliments of His Majesty and those of His Highness, The Commissioners stayed for four days on board the flag-ship Mikasa, visiting all the vessels in turn, and leaving on the 21st. The officers also paid a visit to Saseho Naval Hospital where they conveyed the consolation of the Emperor and

TORPEDO ATTACK AT YUENSAN.

Wednesday, April 27. It is uncertain whether any lives were lost or any wounds suffered on the occasion of the sinking of the Goyo Maru in Yuensan harbour. The Nichi Nichi Shimbun, which was the first newspaper to publish intelligence of the affair, says that on the appearance of the two Russian torpedo-boats the Japanese Consul ordered the crew of the Goyo Maru to land, but that the Russians sunk the little steamer before there was time for her people to leave her, and that the injuries to life and limb have not yet been ascertained. On the other hand the Hochi Shimbun alleges that the Goyo Maru had been chartered by the representative of a London journal and that her officers and crew were fortunately on shore at the time of the incident. Whichever version be correct, it appears that the Russians did not adopt the precaution of warning the crew to leave the steamer before they opened fire on her. We can not forget, however, that a similar story was circulated with regard to the first steamer sunk by the Russians, the Nagonoura Maru, and that subsequent news acquitted the Russians of the inhumanity ascribed to them. Very likely the case of the Goyo Maru will be a repetition of that experience. Maru will be a repetition of that experience. As to the ship having been chartered by a British subject, the *Jiji Shimpo* does not confirm that theory. It alleges that she was navigating in the service of her owner, Mr. Hori Rikitaro, and that she had left Fusan on the 19th instant with a miscellaneous cargo for Yuensan. She was an old vessel, built in 1884 and her boilers were renewed in 1899 at Osaka. Her gross tonnage was 600 tons; her registered tonnage 378. She was insured for 55,000 yen and she had a crew of 38 all told. It would seem that a torpedo was used to destroy her. We can scarcely conceive that the Russians would have used cannon inside the harbour. But the reports vary. The official statement uses the term *gekichin* (sunk by gun-fire), and certain other versions say kōchin (sunk by a torpedo).

Thursday, April 28. The Goyo Maru was sunk by a torpedo. It now appears that the Russians ordered the crew of the little steamer to leave her and that they removed her log book and charts before sinking her. They allowed two hours for the crew to debark, but they did not trouble themselves at all about any question of contraband of war. The torpedo did its work effectually. It made a breach 24 feet by 12 in the vessel's side and she sank in 4 fathoms of water. Thereafter the torpedo-boats left the port at 5 p.m. They disappeared steering north-east. Four menof-war were seen outside, but they did not enter the port, and it is not stated at what time and in what direction they steamed away. The whole affair seems to have been a hurried raid, and the Russian ships, having sunk the Goyo Maru, appear to have returned to Vladivo-stock. The Japanese inhabitants of the settlement fled to the neighbouring villages. Some of them camped out for the night, suffering considerably as the weather was very inclement. On the following day the male adults returned, but the old people and the women did not venture to do so, the reputation of Russian soldiery being deter-rent. It appears from the accounts that there is a small detachment of Japanese guards in Yuensan.

chant steamer reached Yuensan from Tanchhon, which lies about 160 miles north of Yuensan. She had not seen anything whatever of the Russians.

Japanese officers are said to regard the recent doings of the Russians in northeastern Korea as an attempt to create a diversion. It will have been noted that there has been a combined operation by land and by sea; the Cossacks riding down from the Tumen to Kyongsong, Kilju, and finally Tan-chhon, and the Vladivostock squadron emerging from the shelter of the port and putting in an appearance at Yuensan. Probably the Floug-Dessino factory will represent these incidents as part of a grand strategical undertaking by General Kuropatkin, having for its object the "scissoring" of the Japanese army on the Yalu. But we apprehend that the Japanese themselves will not be greatly disturbed by such efforts. Of course the Yuensan episode has interrupted maritime communication with that place. The Authorities have given warning that the route is temporarily unsafe, and the Osaka Shosen Kaisha has suspended the sailing of its steamers. That state of affairs will not last long, however, and there is good reason to hope that the Japanese will not allow themselves to be even partially diverted from their main purpose by these Russian raids. For they are simply raids. On the one hand we have the Cossacks riding into a Korean town and setting the torch to the dwellings of peaceful civilians; on the other we have the Vladivostock Squad-ron hurrying down to Yuensan, destroying a little merchantman of 370 tons and hurrying away again. It is extremely paltry. The Russians have not ventured even to make a capture. So greatly have they dreaded the risk of falling in with the Japanese at sea that they have made all speed to destroy in succession each of three small steamers which had the misfortune to fall into their hands. Prize courts become wholly superfluous in such warfare. After vessels have been sent to the bottom of the sea, it is too late to ask any questions about the nature of the ship or

Friday, April 29.

An account from Seoul says that at noon on the 25th instant four Russian cruisers and two torpedo-boats arrived off Yuensan. The torpedo-boats entered the harbour and observing that the Goyo Maru had steam up preparatory to departing, one of the torpedoers sent a gig in which there was management Japanese-speaking officer. He warned the crew of the Goyo Maru to leave her immediately, which they had no sooner done than a torpedo was discharged striking the little steamer in the neighbourhood of her engines and raising a column of water 10 feet high. The steamer sunk in 4 hours. The Japanese and Korean inhabitants of the place fled in confusion to the neighbouring country, but they returned subsequently, the Russians having taken their departure, and things are now in a normal condition.

It is estimated that the Goyo Maru, toge-ther with her cargo of dried fish and other

Kaisha, having proceeded on her voyage as usual.

SONCHIN AND THE YALU.

Saturday, April 23. The Cossacks who entered Sonchin on the 16th instant remained there one night and retired to Kilju on the following day, What they effected was to drive out the Japanese residents, and to burn the whole Japanese settlement, with, apparently, the sole exception of the school. Why they spared the latter it is hard to say. They spared the latter it is hard to say. They also destroyed the telegraph office and carried off the telegraphic instruments. Of course such doings are very inconvenient. They inflict loss on the Japanese and they create an uneasy feeling in the minds of the Koreans, who naturally draw their own inferences from the unimpeded success of any Russian raid. Enterprises of the kind are essentially congenial to the Cossack, who rides without any commissariat, and can harry and harrass wherever no serious opposition has to be encountered. Sonchin-written also Songchin and Songjin-is about 120 miles north of Yuensan (or Gensan) on the eastern coast of Korea. It was opened to foreign trade in 1899, and it has a native population of 600 or 700. were about 100 foreign residents before the war broke out. The Japanese element (58 persons) consisted chiefly of small storekeepers and coolies, so that the loss of their property can not have been great.

Monday, April 25.
The latest reports from the Yalu indicate that the Russians occupy the northern bank in force from Tatung-kou to Chhang-song. The latter place is 42 miles above Wiju, and between these two is Sukchin, where the river is fordable. The region from Kiulien to Chhang-song on the northern bank is intersected by four tributaries of the Yalu, all running nearly at right angles to the river and greatly facilitating the work of defense since they strengthen the Russian left wing. On the main island in midstream opposite to Wiju a considerable force of Russian infantry is posted, and with them are a number of boats which have been fitted up so as to assist the defense as well as to aid in the retreet of defense as well as to aid in the retreat of the infantry should that be necessary. We have already explained that below Wiju the river is divided by islands into three streams and it is stated that all the islands in the second stream have been denuded of inhabitants and are occupied by troops. The Cossacks are posted in large force on the bank, where they scout actively to guard against any turning movement. The Russians, it is said, explain their retreat from Korea by saying that the country was not large enough for the extensive operations necessary to give effect to their great force.
The Asahi Shimbun's correspondence from

the front bears out the view already expressed in these columns, namely, that as the Russian forces on the Yalu are not large enough to warrant extension in strength sufficient to oppose the crossing of the river at any point from Tatung-kow to Wiwon, the strategy adopted is meregoods, was worth 100,000 yen.

In consequence of the above incident, steamship service to Yuensan was temporarily suspended, but it has now been resumed, tance from Kiulien to Fenghwang is only the Tetapiageng Marry of the Osaka Shosen 38 miles, and troops could easily be moved up in the event of a serious menace at any place between Tatung and Kiulien. The there is a small detachment of Japanese guards in Yuensan.

On the day following the above incidents, namely, the 26th instant, a Japanese mer
It is reported from Otsu, Shiga prefecture, that in the district of Yasu, the silkworm eggs were as from the front. A Japanese corps can namely, the 26th instant, a Japanese mer
It is reported from Otsu, Shiga prefecture, that can be assailed from both flanks as well hatched on April 24th. This is the earliest cross the river above Kiulien and move

Tatung and Takushan and move against the be significant. That hypothesis, however, right flank or threaten the communications. Is not consistent with the statement that the It does not look as though the Russians Japanese were holding the "southern" shore, were capable of making a very determined and we are obliged to dismiss the incident stand at the Yalu.

The Cossacks appear to have done as much damage as they possibly could at Sonchin, but it is said that they spared a portion of the telegraph at the solicitation of the local officials. Rumour says that there are 150 of these raiders at Ungkwi Bay, 250 of them at Kyongsang and about as many more at Kilju and in its vicinity.

The Russians appear to have destroyed everything that bore the semblance of a foreign residence in Sonchin. They did not attempt to discriminate between foreign property and Japanese property. Had a fight taken place in the town and had this destruction been wrought in the heat and confusion of battle, discrimination would not have been possible. But there was no resistance what-ever. The Russians were in undisturbed possession of the town and their movements were quite deliberate. It appears that they passed from the Japanese settlement to the general foreign quarter and burned anything they could find there. Southin is an open port and foreigners were residing there in strict accord with their treaty rights. Even the Taiping rebels showed more discrimination than the Cossacks.

Tuesday, April 26.
The Jiji Shimpo has intelligence from north-east Korea that although the people secretly favour the Russians. On the occasion of the recent raid by 33 Cossacks to Kilju and Songchin, it is stated that the Korean inhabitants went out to welcome the raiders. Such action, however, does not appears to have any signal significance. The Koreans would be likely to adopt that course merely to save their own persons and property. But it is alleged that the inroad property. But it is alleged that the inroad speaks only of strengthening his outposts, of the Cossacks has produced a marked It can not be imagined that this crossing of effect in stimulating Russophil feeling, and the Yalu is an independent movement. Prothat even the Tonghaks are beginning to bably some flanking operation accompanies raise their heads. There would be little it. But there we enter the realm of condifficulty in sending a small force to Song-chin and Kilju, or even up to the Tunien. That region is still in a scarcely traversable condition, however. A small detachment of Cossacks could move throughout it without serious difficulty, but for infantry, artillery and land-transport corps the roads can scarcely yet have become negotiable.

It appears to be concluded in military

circles that the locality of the skirmish reported by Viceroy Alexieff as having occurred on the 21st—not the 22nd—was about 2½ miles from Yong Am-pho, but whether up-stream or down-stream there is no indication. The Viceroy speaks of a river called "Pomato-ko" and the Asahi of an island called "Masukilii," both of which names are totally unfamiliar. The affair itself being insignificant, would not attract attention except in so far as it might furnish an index to the general movement now in progress. If we accept the Yong-Ampho version, the incident resolves itself into an inexplicable attempt on the part of a Russian detachment to approach the Japanese side of the Yalu. Thirty-two men, commanded by two officers, in three boats, making their way across a wide river to a shore known to be occupied by the enemy, can not possibly be occupied by the enemy, can not possibly be construed as an offensive enterprise and appears to have none of the ordinary features learns, by a felegram dated the 26th instant; 'Yoran'' will be on sale and can be had on of a reconnaissance. But if the unidentified that on a day unnamed a cavalry patrol of application to the Department, but as to river spoken of by the Viceroy were one of the First Battalion of the Nerchinsk Cos- that we have no present knowledge.

as inexplicable without further information.

Wednesday, April 27.
The report that the Cossacks had retired to the Tumen after destroying as much private property as possible at Songchin, appears to have been incorrect. These raiders have pushed on to Tanchon, which is some 15 miles south of Songchin, on the coast. Rumour also says that the Russian troops from Possiet have advanced vià Kyongsong and are now making their way southward, all the inhabitants fleeing before them.

This raid can have no object except to create a feeling of unrest in Korea and to encourage the Tonghaks and other law-breakers to take the field. Russia is now treating Korea openly as a belligerent, and it is time that the Koreans took some measures to protect themselves, if they be at all capable of self-protection. Some time ago an impression prevailed that there were Japanese troops in Yuensan, but apparently such is not the case.

Thursday, April 28. General Kuropatkin's somewhat inexplic-

able telegram indicates that things are not so quiet on the Yalu as would be supposed from other intelligence. The "Siampoussiki" of which the General speaks is a perplexing name. The only place which has an appel-lation at all similar, so far as we know, is Shankiaputsz, which lies a short distance inland from Antung. If this identification be correct, a part of the Japanese army has crossed at a point about 31 miles down-stream from Antung. We should have expected to learn, however, that the crossing had been disputed, whereas General Kuropatkin speaks only of strengthening his outposts. jecture, which it is forbidden to invade

No Japanese news whatever comes from the Yalu district. Whatever may be going on there has been enveloped in an impenetra-

ble mist—an intentional mist, of course.

The inhabitants of Songchin did not escape a moment too soon. It appears that as the Haginoura Manu was leaving the port with the 42 refugees, they observed three

against the left flank of the Antung-Kiulien the affluents of the Yalu between Kiulien and sacks under Captain Kerchakoff rode southward and having taken possession of Kyong-song, sent forward a detachment under Captain Ladachi (?). The latter proceeded to Kilju and subsequently to Songchin and destroyed some Japanese warehouses containing beans and cereals. They also took possession of the Japanese consulate and there found that their coming had been telegraphed to Yuensan and that they reported to be five thousand strong. consul, the chief of the gendarmes, and a staff officer had effected their escape. The Cossacks learned that there were 50 Japanese soldiers at Pakchhong (110 miles south of Songchin), 500 at Hamheung, which is still further south and 2,000 at Yuensan. That night—i.e. the night when the Cossacks occupied Songchin—several Japanese vessels approached the coast using search-lights.

It will be observed that the Cossacks say nothing of having burned private residences, whereas Japanese accounts are very explicit

as to that.

THE KOREAN AMBASSADOR.

Prince Li Chi-yong arrived in Tokyo at 3.14 p.m. on the 22nd instant. He was accompanied by a staff of 12 persons, and was received at the station by a numerous company. He proceeded to the Seiyo-ken in Uyeno, escorted by a guard of honour.

Prince Li Chi-yong, the Korean Ambassador, was received in audience by the Emperor on the 25th instant, and had the honour of lunching with His Majesty.
Among those present at lunch were Marquis Ito, Baron Komura, Viscount Tanaka, Prince Iwakura, Viscount Kagawa, Baron Sannomiya, Mr. Tsuzuki Keiroku and the other members of Marquis Ito's staff on the occasion of his recent visit to Seoul. Prince Li offered to the Emperor and Empress a number of presents sent by the Sovereign of Korea, the Prince Imperial, the Princess Imperial, Lady Om and several Princes of the Blood.

In the evening the Korean Ambassador gave a brilliant party at the Imperial Hotel. About 380 guests attended.

The Korean Ambassador and the members of his suite have received Orders from the First Class to the Sixth.

THE LIGHTHOUSES OF JAPAN.

We have received from the Director of with the 42 refugees, they observed three Cossacks riding into the town. The Haginoura Maru reached Yuensan on the 17th instant, and eight days later the unfortunate refugees had the chagrin of seeing two Russian torpedo-boats enter the harbour of their place of supposed security. Doubtless these refugees swelled the number of those that fled from the settlement to the neighbouring villages on the 25th instant. At Songchin the Cossacks burned the consulate, the customs office and its warehouse, the school, 17 private dwellings and 8 godowns. The total loss inflicted by them was sixty thousand yen. Then they rode as far as Tan-chhon, which is 35 miles further south—not 15 as incorrectly stated in our last notice—, but what has since become of them we have no news.

Friday. April 29.

From the Floug-Dessino factory the world the received from the Lighthouse Office in Yokohama a copy of the 'Todai Yoran,' an abridged description of the Lighthouse which is most than so of Japan. The book is bound in Japanese style, having a handsome brocade cover, and neat silk. We presume that copies of the 'Todai Yoran,' an abridged description of the Lighthouse Office in Yokohama a copy of the 'Todai Yoran,' an abridged description of the Lighthouse which now stud the islands of Japan. The book is bound in Japanese style, having a handsome brocade cover, and neat silk. We presume that copies of the 'Todai Yoran,' an abridged description of the Lighthouse Office in Yokohama a copy of the 'Todai Yoran,' an abridged description of the Lighthouse of the Lighthouse of the Lighthouse which is most than solve, which is most the Lighthouse of the Lighthouse of the Chapter-headings and index, which are given in English. Unfortunately the Lighthouse Office did not see fit to have these headings revised by a competent person, and in consequence we lave such blunders as "Illuminating spparatus etc."; "Kii Channd,"; "Kudako Chanel." The photographs which are bound up in the volume are most interesting and those depicting the lights in the In the Lighthouse Office in Yokohama a copy of the "Todai Yoran," an abridged descrip-

PORT ARTHUR.

Saturday, April 23.

It is confidently stated in France that the cruiser Boyarin struck a mine on the 11th February when returning from Dalny and went to the bottom, all her crew of 334 A person of unmentioned being saved with the exception of 9 or 10 men. The mine she struck was supposed to be one of the 398 torpedoes which were scattered abroad at the time of the less of the *Enissei*. At all events the *Boyarin* has never once been heard of in any of the operations since the beginning of the war. She was a new vessel of 3,200 tons and 221/2 knots.

The Port Arthur journal says that the five men rescued from the destroyer Bestraschni were covered with wounds and that they were picked up by the Bayan. From are said to be still detained on board the same authority we further learn that the *Petropavlovsk* struck two mines and the Pobieda had a hole above the water-line but that she managed to return to harbour. is not easy to understand how a mine striking a ship several feet below the surface of they were not engaged in any act of war the water could make a hole above her and they were within the territorial waters water-line. Evidently if the injury showed of a neutral Power, China. It is a new kind above the water-line it must have extended from beneath. The same journal alleges that Prince Cyril was insensible when pick-

Monday, April 25. A ship which has just entered Saseho denies that any renewed attack has been made on Port Arthur. This vessel appears to have visited the Japanese naval base, wherever that may be, on the 20th instant. She there saw all the ships assembled. Tents were spread on shore, and the men were engaged in wrestling and other sports. Evidently, therefore, the story that another attack took place on the 19th instant is untrue.

A vast number of torpedoes must have been expended in this war. Some 400 went adrift when the Euissei blew up, and probably hundreds more are moored here and there along the coasts of the Yellow Sea and the Gulf of Pechili, while others are lying at the bottom or cruising around. A torpedo fired in practice comes to the surface at the end of its run if it has not struck its object, but a torpedo fired in war sinks under similar circumstances. A torpedo mine, however, if carried away by the tide or the current, may remain buoyant for an indefinite period, and would then constitute a serious menace to ships. The Russian vessels are said to be in great danger if they attempt to enter Talien Bay from Port Arthur, and Tokyo newspapers report that a steamer bound from the P. & O. steamers. Moji to Taku has given up her voyage.

Tuesday, April 26. With reference to the destruction of a steam-launch at Port Arthur by a so-called Russian torpedo-mine, every one has probably put a mental note of interrogation after the adjective "Russian." Viceroy Alexieff says that a number of steamlaunches were engaged laying mines when the accident occurred. "Launch" may be only an approximate description of the vessels engaged, for the laying of torpedomines by little craft like a steam-launch is a very novel operation. Of course the Viceroy credits his own account, but nevertheless it may have been a Japanese mine that did the Clemenceau seems to have been the first to

pears most probable is that the launch collided from criticism, but as to her naval comwith a torpedo which had broken away from travellers said to be cruising about in the neighbourhood of Liaotung. The Russians neighbourhood of Liaotung.

A person of unmentioned nationality probably Chinese-who lately returned to Shanhaikwan from Port Arthur, describes the latter place as the scene of great preparations to resist attack. Several lines of palisades have been erected and numbers of workmen are engaged repairing the forts. He adds that every vessel appearing outside the port, whether large or small, is can-nonaded and destroyed, for which item of intelligence he obviously drew upon his own imagination.

The Japanese taken from the Hangei Maru an unused man-of-war at Port Arthur. With what object or on what pretext the Russians hold these men no one seems to be aware. Their capture in the first instance appears to have been altogether illegal, for of warfare that civilians should be seized in neutral territory when engaged in the pursuit of a peaceful and legitimate object, that they should be carried off to the enemy's territory and there held prisoners.

Friday, April 29.
The United States Consul at Newchwang is said to have reported that the two Japanese subjects recently taken by the Russians from the S.S. Fawan and held prisoners ever since, are now to be released and sent to either Tientsin or Chefoo. In the course of time, presumably, we shall learn on what pretext the Russians seized these men, present the act seems to have been absolutely lawless. The Fawan belonged to a neutral Power, was flying the flag of a neutral State, was chartered by citizens of a neutral republic for legitimate and peaceful purposes, and was riding in a port open by treaty to the ships of all the Treaty Powers. Russians had no manner of right, so far as we can see, to hale Japanese subjects out of the ship. But their conception of right is plainly elastic. They were engaged searching the Haimun for a Japanese subject said to be on board in the capacity of interpreter when a signal from the Bayan induced them to abandon their quest hastily. The *Haimun* is a British vessel. She was navigating the high seas The Haimun is a British and a Japanese subject should have been as safe on board her as he would be on one of

FOREIGN OPINIONS ON THE WAR.

When the news of Russia's recent naval reverse reached Paris, it was half believed and half doubted, but the general feeling seems to have been naturally one of regret for the sake of the country's ally. Telegrams of condolence were sent to St. Petersburg by the President, the Minister of Foreign Affairs, the chief municipal authority in the capital and others. Presently, how-ever, the facts came to be known, and it was clearly seen that the Russian ships had suffered, not by an accident, but by a deliberate design on Japan's part. The main difficulty in accepting the break the silence of stupified surprise. He

manders he declared plainly that the situation its moorings-one of the many dangerous had become ludicrous, and that Russia's plight was that of a jackass leading a tiger. He even went so far as as to say that the Russian officers of to-day might be classed with the French officers of 1870, whereas the Japanese ranked with the Germans. The Soleil of the 14th inst. published a letter from St Petersburg describing the consternation and confusion in that city as extraordinary, and saying that there were symptoms of a mood of superstitious pessimism. Other French journals wrote in the sense that Russia's naval power in the Far East had received a crushing blow, and while all showed an evident and proper desire to avoid saying anything which might hurt the feelings of their ally, there was an obvious conviction that the importance of the event should not be under-rated, The Figaro, while fully admitting Makaroff's defeat, paid a tribute to his bravery, and spoke in the most unqualified terms about the ability and skill shown by the Japanese officers, who seemed not only to have acquired the theory of naval warfare in the fullest degree but also to have learned how to apply its principles in the field of actual warfare.

As to the unfortunate Admiral's bravery, no one will raise a dissentient voice. But w are curious to learn what naval men will say about the flagship having led the retreat into Port Arthur. The place for the battle-ships at such a time would have been in the rear, covering the weaker craft, whereas the Petropavlovsk, at all events, appears to have been in the van.

A German newspaper, referring to the manner in which the present war was com-menced, notes that out of 117 wars which took place between 1700 and 1870 between Western Powers 107 began without any declaration, and 41 were begun by surprises. the 107 wars begun without any declaration only 47 took place before the close of the 18th century, the rest were all between 1800 and 1870. Therefore the procedure adopted by Japan last February was strictly in accord with the law of nations.

American newspapers, according to telegrams received in Tokyo, were prepared at first to accept the Russian statement that the sinking of the Petropavlovsk had been caused by accidental contact with a Russian mine. They consequently had nothing to express except profound sympathy with the illustrious officer who had met his end in such an inglorious manner. But when it became quite clear that the supposed accident was really the result of Admiral Togo's strategy, they spoke with enthusiasm of the skill shown by the Japanese commander, and declared that Russia's sea-power in the Far East must now be held to have been hopelessly shattered. It would seem also that this phase of the war inspired some very eulogistic reviews of the success achieved by Japan in assimilating within a very brief period the best results of Occidental science and experience.

It is scarcely worth referring to the question which Russia attempted to raise at the outset of the war, namely, that Japan had violated international law by attacking Russia without an open declaration of intention to do so. Professor Westlake has addressed a letter to Professor Takahashi on the subject. latter hypothesis is that steam-launches do published a remarkably outspoken article, not draw enough water to come into contact with torpedo-mines, which are generally at least ten feet below the surface. What aptored with torpedo-mines, which are generally at least ten feet below the surface. What aptored with the surface without limit. With regard puerile, not unworthy to rank with her naval least ten feet below the surface. What aptored with surface without limit.

KOREA.

Saturday, April 23. The fiji Shimpo raises its powerful voice in favour of assisting the Emperor of Korea to rebuild his Palace. Our contemporary argues that the Koreans are exceedingly superstitious and that many of them firmly believe in the prediction that the present dynasty will come to an end in 500 years from its elevation to the throne. That period is now approaching its close, and if the people see their sovereign condemned to portion not actually commenced but only take up his abode in a cheap, insignificant surveyed is 117 miles. There is a very diffi-Palace, they will regard it as the beginning of the end. A million or two of yen should not be grudged by Japan in such a case. The pending arrival of a princely ambassador from Korea would be an appropriate occasion for rendering this aid.

It is stated that there are signs of an outbreak of insurgents and bandits in the southern province of Korea, namely, Chollado. They call themselves the "loyal party" (shôgi-to), and are said to number some Requisitions for military assisthousands. tance have been addressed to Seoul.

Monday, April 25.
The United States Minister in Seoul is sending back 70 out of the 100 marines who were landed for the protection of the Legation just before the war commenced.

General Pflug telegraphs to General Dessino in Shanghai that there are skirmishes daily at the Yalu, but that no engage ment of any consequence has taken place.

Six hundred Korean troops have been sent from Pyong-yang to Yuensan for the purpose of guarding the frontiers of Hamg-

yong-do.
The disturbance in Korea's southern province—Chollado—seems to be assuming somewhat large dimensions. The self-styled loyalists are said to be allied with the Tonghaks and also with the Roman Catholic elements of the population. These last, being wholly under the influence of French priests, are hostile to Japan, and are also looked upon with dislike by a large section of the people owing to the special status they have always claimed and enjoyed vis-à-vis the law.

The two senior officers of the Korean troops in the Pakchong district have been deprived of their command at the instance of Mr. Hayashi on a charge of being secretly in collusion with the Russians. Evidence of the fact has been obtained, and the two

officers are to be tried by Court-martial.

It is stated that the Emperor of Korea is disposed to collect funds for re-building his palace by the simple process of ordering the principal families and officials to find it. His Majesty has required the Min family to furnish two million yen, but their complete compliance seems doubtful. The Ministers of the United States and Great Britain are said to have indirectly suggested the repair of the old palace formerly occupied, and in deference to their view the repairs are not unlikely to be undertaken. But that will be only an additional outlay, for the Sovereign is determined not to live there.

Wednesday, April 27 As to the Japanese inhabitants of Yuen

and 138 miles north of Fusan. Work is being carried on vigorously from Yongdong in both directions, and from Fusan and Seoul towards the north and south respectively. The whole will be finished, it is expected, by the end of this year. Already construction trains are running from Fusan to Chhongdo (50 miles) and from Seoul to Phyongthak (50 A section of 38 miles southward from Phyongthak and 13 miles northward from Chhongdo will be finished by June or cult piece of tunnelling at Sanghyon in the 13 mile section beyond Clihongdo. tunnel is 3,060 feet long, and not more than one half has been pierced. It can not be finished speedily, and the intention is to carry a temporary line over the hill so as not to delay the opening of the service. Two bridges of from 1,200 to 1,300 feet, and one of 2,000 feet have to be built.

Thursday, April 28.
A struggle for political power is said to have commenced between Cho Pyong-sik and Li Do-chai. The former is President of the Privy Council, the latter, Minister of Home Affairs.

At length an official has been found willing to proceed to Wiju in the capacity of local headman. Such a person is wanted for the purpose of administering affairs so as to avoid needless inconvenience to the Japanese, but not unnaturally the Koreans, who set a high value on their skins, would prefer to await pending developments on the Yalu before undertaking to discharge duties at Wiju.

The Korean Foreign Office is said to be much perturbed because its conferences and discussions with the Foreign Representatives find their way into the press. Extra guards have been posted and other precautions adopted. It has long been remarked of official secrets seems scarcely attainable there.

The rebuilding of the palace continues to be a subject of much dispute. No probability of success appears to have attended the Emperor's idea of obtaining funds by a system of compulsory contributions, and the view now dominant is that the best and cheapest plan would be to repair the palace at Songdo and to remove the imperial capital thither. We should imagine that such a change must provoke great opposition in Seoul.

Friday, April 29.

It is reported that the three southern provinces of Korea are in a very disturbed condition—that is to say, the provinces of Cholla-do, Kyongsang-do and Chhungchhong-do. Bands of insurgents, 40 or 50 strong, rove hither and thither, committing all kinds of depredations and even venturing in some cases to sack the offices of the local admini-stration and to break open the jails for the purpose of releasing the prisoners. Urgent applications for assistance have been made to the central Government, but the latter does not appear to have yet emerged from the deliberative stage. It is very plain, though indeed the discovery is not novel, that the administration of Korean affairs is about as bad as possible and that the inter-

CHINA.

Saturday, April 23.
The Peking correspondent of the Tokyo Asahi represents Chinese official opinion in a disquieting light. He says that the chief local officials at Mukden and Kirin have repeatedly urged upon their Government the view that the troublesome questions raised by Russia and the unreasonable demands preferred by her are designed to make China commit a breach of neutrality. The same estimate of the situation is attributed to the Shanghai Taotai. The Peking authorities have gradually been brought round to this opinion and have determined that no further concessions of any kind shall be made to Russia, the policy of conciliation and yielding having been carried to its utmost limits. Instruc-tions in that sense have been addressed to Viceroy Yuan, and have elicited from him a long reply by telegram. As for General Ma, he has been ordered to maintain a circumspect demeanour, and not to resort to hostilities without explicit instructions from Peking. The cor-respondent ascribes this stiffening of China's back indirectly to a gradual growth of patriotic feeling among the Chinese people, and directly to the successes achieved by the Japanese navy, which have induced the Chinese Government to conclude that the moment for striking in has come.

All this is very vague. It may be in great part a subjective account, for every one must have foreseen from the outset that in the presence of Japanese successes the Chinese nation would awake to a keener sense of its own pusillanimity, and the Asala's correspondent may now be detecting evidence of a mood which exists less in reality than in his own estimate. Yet there is always a strong possibility that Chinese patience may break down when the main foundation of timidity is struck away. The question of the West-Liao region must have tried her China and Korea that the preservation of self-restraint very severely. Viceroy Alexieff, official secrets seems scarcely attainable there. churian officials and people, spoke openly of Russia having restored the West-Liao region to China, and took much credit for the magnanimous good faith shown by St. Petersburg in so doing. Yet, all the while Russia was deliberately treating the region as beligerent territory, over-run-ning it with her troops, drawing sup-plies from it, and otherwise showing that she did not regard it as any part of China proper though her Viceroy of Far-Eastern Asia claimed to have restored it to the Chin-ese empire. No Western nation with a ese empire. No Western nation with a particle of self-respect would tamely endure such treatment for a moment, and if Russia have any material or military interest in keeping China quiet during the present crisis, the methods adopted by her officials in this part of the world do not seem likely to promote that interest. Nevertheless we confess ourselves very sceptical, extremely sceptical, about China assuming the initiaforced by the Russians. What kind of situation would be created by some Japanese successes on land, however, is another question. Then, indeed, the Chinese might strike in.

Monday, April 25. san, they do not appear to have suffered at about as bad as possible and that the inter-all, but they are said to be now discussing position of a strong and competent hand China having been finished by Miss Carles well arm from the place. We learn from the fig. Slaimpo that the total length of Seoul-Fusan line is 268 miles, Korea, says that the war has inured to the members of the Foreign Corps Diplomatique and that it is divided nearly equally by Yong-benefit of Japanese whale-fishers at all before sending it to its destination, the dong, which lies 130 miles south of Seoul events. They are doing a fine business. wager, hearing of this intention, intimated that she should consider it an insult were her portrait carried by common coolies. Therefore the authorities caused a railway to be constructed from the palace where the picture was painted to the Sungwan Gate, the cost of the whole arrangement being about ten thousand yen. The Asahi's correspondent is responsible for this tale, of which we do not believe a word.

General Ma is said to have thirteen battalions, or 6,500 men, at Chaoyang, and is credited with the intention of advancing his

All steamers bound for Newchwang are required to anchor at a distance of at least a mile from the forts. Otherwise no respon-sibility will be taken for any accident that

may happen to them on account of torpedoes. The Hunghutzes in the neighbourhood of Kirin are said (Jiji Slumpo's Tientsin cor-respondent) to be a formidable body, including in their ranks several Chinese officials who owe their removal from office to Russia's interference and are therefore hitterly hostile to that Power. These people only await an opportunity to make their force felt.

The Russians at Liaoyang are reported to have requisitioned all the horse-fodder in the region, to the great embarrassment of the inhabitants, but as the Russians are now well supplied the people's feelings do not

trouble them much.

All the foreign residents of Newchwang and many of the Chinese are said to have removed to places southward of Shanhai-kwan, where they will remain unless a Japanese force lands at Newchwang. In the latter event they declare their intention of returning at once to their old quarters.

The story sounds a little exaggerated.

There are said (Iji Shimpo) to be 20 foreign correspondents now in Newchwang. The Asahi Shimbun reports that the Russians have allowed the following to proceed to Mukden: -- Two correspondents of Collyer's Weekly, one of the Morning Post, one of the Paris and New York Herald, one of the Lutin, one of an Italian paper, and one of the American Associated Press. Permission has been refused to the correspondents of *The* Times, the Daily Telegraph, the Daily Mail, the New York World, the New York Journal and the San Francisco Examiner.

There would be a pretty outcry did Japan attempt to exercise discrimination that Russia employs unchallenged. It will be observed that only one correspondent of an English journal has been allowed to go

forward.

Tuesday, April 26.

The Asahi's Peking correspondent states that when the corpse of the Governor of Kirin, who had committed suicide to escape Russian exactions, reached Mukden, Gover-nor-General Tseng made three attempts to go out of the gates of Mukden to meet the cortege, but on each occasion he was turned back by Russian soldiers. Tseng showed - signs of extreme exasperation. He withdrew to an inner room of his yamên and shutting the door to all visitors, penned his resignation which was at once sent to Peking. It that supplies are being forwarded from thence has not yet elicited any reply. General Tseng's position is certainly one of the most

says that the Russian troops are making increased inroads into the West Liao region. They are even alleged to be building a fort on the Taling River, which enters the Gulf of Pechili just north of Kinchow. Representations are said to have been made to the Russian Government viā the Chinese Legation in Peking, but they have not elicited any reply. St. Petersburg is scarcely in a position to interfere with measures which the military authorities in Manchuria may deem essential, but it is beyond question that in all this matter Russia head-quarters to Kinchow should the land is deliberately violating China's neutrality. operations of the Japanese extend to the Either the alleged rendition of the West Liao neighbourhood of Yingkow. has now no manner of right to post troops there.

A report from Mukden to a Chinese newspaper quoted by the Nippon says that the Russians have burned or destroyed three sections of the old imperial palace in Mukden. This outrage is not explained, and, if true, will be much resented by the Chinese Government.

Wednesday, April 27.

The Honan Company's steamers, the Genko Maru and the Shoko Maru, made their opening voyages most successfully, reaching Chang-sha and Shantan without difficulty. At both places elaborate ceremonies were held to inaugurate the opening of the service. The people of Hunan being of a warlike disposition, are particularly friendly to Japan, and it is stated that they exhibit the greatest delight whenever news comes of a Japanese success. Several of the men occupying important official positions in the locality were educated in Japan.

Thursday, April 28. Tientsin sends news to the Asahi, under date of the 26th instant, that the Russians have ordered all the Chinese inhabitants of Antung to remove within ten days, and the Governor of the place has advised them to go Kaulimun, which lies near Fenghwang, and is the point where the eastern road from Takushan strikes the Kiulien-Fenghwang This would indicate that the Russians intend to make a stand at Antung.

General Floug announces through Gen-

eral Dessino that there is no news whatever from the Yalu, and that things are quiet at Newchwang, Port Arthur and elsewhere. North-western Mongolia is also tranquil and the people on the border are said to be showing much friendliness towards the Russians. It is interesting to find that northwestern Mongolia is included in the sphere of the Floug-Dessino operations.

Extreme precautions to guard against surprise are reported from Newchwang. No lights are allowed during the night on board steamers or junks in the river, and it is said that orders have been issued to shoot any one violating this veto.

Between Mukden and Kirin the Hung-

hutzes are said to be exceptionally active. Changtu is particularly mentioned as the

scene of their disturbances.

It is stated that the junk traffic at Kiao-chow has become extraordinarily active of late, and strong suspicions are entertained General to the Russians on the Liao.

The Germans are said to be carrying on embarrassing conceivable. He is nominally with a very high hand in railway matters on the subject through their representatives. a high Chinese official with authority to administer affairs in Manchuria, but the their Shantung line from Chinan to nothing by want of prevision. Experience administer affairs in Manchuria, but the Russians do not leave to him a shred of authority unless he employs it so as to suit answered that the question was under their convenience.

A telegram to the Nichi Nichi Shimbun Germans, without waiting for any decision,

despatched experts to survey the proposed route. This action so greatly incensed Viceroy Yuan that he is said to have advised peremptory refusal of the concession.

The Chinese cruiser Haitien is reported to have run on a rock at the Elliot Islands near Woosung on the 25th instant. She had gone out to meet the steamer Shinchi, which was carrying the portrait of the Em-press Dowager for the St. Louis Exhibition. The Haitien is one of China's best cruisers; vessel of 4,300 tons built at Elswick.

M. Lessar is reported (Asahi correspondence) to have been engaged in an interesting discussion with Prince Ching. His Russian Excellency went to the Foreign Office in Peking carrying an extract from a despatch said to have been written by the Chinese Representative in Tokyo to the Prince. This extract, M. Lessar claimed, was a clear proof that the Chinese Government entertained the intention of practically sympathising with Japan in a manner inconsistent with any theory of strict neutrality. Prince Ching asked where M. Lessar had obtained the despatch. The Minister explained that it had been given to him by such and such an official of the Wai-wu-pu. "Then," said Prince Ching, laughing, "the man made an inexcusable attempt to deceive your Excellency's illustrious perspicacity, and we shall at once have him decapitated." Subsequently the Prince seems to have commuted the sentence to one of dismissal in deference to M. Lessar's entreaties.

The Shanghai Customs Inspector is said to have been instructed from Peking that beans and bean-cake, provided they do not come from Newchwang and provided they are certified by a consul to be not destined for the belligerent area, may be exported. That is extraordinary. Why should the Newchwang products be excluded?

Friday, April 29. News comes from Peking that Wang Shau has been arrested and condemned to imprisonment for life. This man was supposed to be one of the leaders of reform and to have had relations with Kang Yu-wei. But he was not in any sense an active agitator. His life was one of quiet scholastic effort. A few days ago he proceeded from the private school over which he presides to the Waiwupu where he had an interview with Na Tung, and immediately afterwards he found himself in the hands of the police. The event is said to have struck terror into the hearts of the reformers who apprehend another official raid against their lives and properties. in these matters the public at large are little qualified to pass judgment. It is known that Wang Shau was a reformer and that in the seclusion of his school he awaited the dawn of a new political situation. fore the conclusion is immediately formed that for that reason and for no other his arrest has been effected. There may, however, be many other reasons.

Viceroy Yuan is said (Asahi's correspondence) to foresee that in the sequel of the Russo-Japanese war a conference of the Powers will be held in Europe, and that if China is not represented, her interests will suffer greatly. His Excellency is therefore adopting active measures to avert any mis-fortune of that kind. He is alleged to have already addressed the Foreign Powers

cruiser Haitien is hopeless. She can not be floated. A rather hasty conclusion, one is disposed to think. China's navy may be said to consist in the main of 5 modern cruisers, two, the Haitien and the Haichi (each 4,300 tons), built at Elswick; and three, the Hai-yung, Haishew and Haishen (each of 2,950 tons), built at Stettin. The loss of the Haities would be a great blow.

The Japanese ladies of Chefoo have held m bazaar which is said to have been a great success. All the foreigners in the settlement attended and the things were sold off in five hours, realizing a total of 1,600 yen, of which 800 yen was net profit. This money is to be divided between the Red Cross Hospital and the Gunjin Kingo-kai.

EXECUTION OF TWO JAPANESE.

Monday, April 25. So far as can be understood from the Russian report attributed to General Kuropatkin, the names of the two Japanese officers said to have been shot at Mukden in the sequel of trial by court-martial were Oki and Fukuoka. But no such persons can be identified, it is said, among the officers whose names are borne on the Japanese roll. At the very outset of the war a rumour was circulated that a party of Japanese officers had been selzed by the Russians at Wiju. They were said to number five, and to have been accompanied by two women, one the wife of an officer, the other an interpreter. The officers had worn their uniform from first to last and could scarcely have been arraigned as spies. They were said to have been so greatly maltreated that their leader—a Major—committed suicide. The rest were all killed. This account was published by one or two Tokyo journals at the time and it now stands in magazine records of the war. But it has never been confirmed, and obviously it needs much confirmation, for though the Russians were smarting under a sense of the Port Arthur surprise on the 9th of February, it is scarcely conceivable that they should thus behave towards officers who were known to be such and who had not attempted any disguise. There is a supposition that the two officers now reported to have been executed at Mukden were those remaining from the five captured in Wiju, but the names—Fukuoka Stewo and Oki Teisuke—can not be

Tuesday, April 26. It is still strenuously insisted that no Japanese officers called Oki and "Fukuoka" could possibly have been seized by the Russians in Manchuria and executed at Mukden. The conjecture is that the men were civilians, and that if they described themselves as officers it was probably in the hope of obtaining gentle treatment. Reuter's agent gives the names as "Yokota" and "Acki," but so far as that is concerned the Russian official report must be accepted as the more trustworthy.

identified, it is said. Neither is it all likely that men captured early in February would

Wednesday, April 27. One of the two unfortunate Japanese whom the Russians fusilladed at Mukden has been His name was not Ōki Teisuke, but Oki Teisuke. He was not an officer at lead in subjecting her to the coercion of all, but an ordinary civilian, 32 years of several states in union. Should Japan's age, who had studied law and engineering forces get the better of the struggle on land, in Tokyo and had gained some repute as a proficient in jujutsu. His lather is a judge hope of ultimate success was evanescent,

It is reported that the condition of the in the Naha Court (Riukiu) and the son had then the signs of foreign interference been travelling in China and Manchuria for two or three years, his chief object was not in Germany's interests that Japan being to teach jujutsu. It is said that should be fully benefited. The best way to he was a man of powerful physique but kind and placable disposition. General and Manchuria as fast as possible to the Kuropatkin's notion that he was an officer of trade, travel and residence of all the nations, and is ridiculad in Japan. Nothing is not best their would prosees material reasons. rank is ridiculed in Japan. Nothing is yet known as to the identity of the other man executed, Fukuoka Sutewo, but the strong probability is that he too had no military status of any kind. What was the charge against these men, we wonder. All that Russian soldiers and Russian ships have hitherto acmerchantmen, destroy private houses and the profits which subsequently added so shoot wandering civilians. Oki and Fukuoka may have represented the profits which subsequently added so oka may have represented themselves as officers for the sake of avoiding an ignominious death, but death in some form must have been assured before they made such an avowal. Of what crime then had they been guilty?

THE PROGRESSISTS AND THE WAR.

The Progressists have appointed a committee to consider the Party's attitude with regard to finances for the war and after the war. They held a meeting for the purpose on the 22nd instant. Count Okuma spoke, He said that although the fighting at sea had been nearly brought to a conclusion, a long struggle onland must still be anticipated. The nation was showing the greatest patriotism in providing funds, but undoubtedly much inconvenience was experienced owing to tradal and manufacturing depression, which would probably affect the people's means of sustenance in the long run. Moreover Japanese banking was still in its infancy. The banks had not more than four hundred or five hundred millions of hard money among them, and the mere prospect of this being disturbed had led to talk about the necessity of devising means for saving. save money was certainly advisable, but nothing could be more unwise than saving which impaired the country's earning capa-A man might dispense with one meal out of three, but if, at the same time, he shrank into his shell and gave up his work or refrained from all enterprise, he would really be squandering not saving, since he would be wasting his productive capadestructive effects. A nation should not be intimidated by it. The duty of the people was to reduce its destructive effects to a have been held prisoners until the middle of minimum and reap a maximum of advantage April without having their cases disposed of. from its recuperative influences. In considering the means to that end, practical considerations were more important than theoretical, and the Count therefore advised that consultation be held with chambers of commerce, commercial companies and

emigration agencies.

Mr. Oishi Masami also spoke at some length. He emphatically denied the probability of the war terminating in a brief period, and he urged the necessity not only of being prepared for a lengthy struggle but also of determining what course should be pursued even in the event of final success. He predicted that whatever might be Japan's achievements in the field she would not be allowed to reap the full fruits of her victories, and he indicated Germany as the Power that would take the

would inevitably show themselves. so that they would possess material reasons for perpetuating the state of affairs introduced by Japan. When England's trade with the continent of Europe was interrupted by the Napoleonic wars, she bestirred herself to find other markets. It was then that she turned her attention suffer appreciably from this war. The only section affected was the trade with North China, which did not represent more than 10 million yen annually. There was no 10 million yen annually. There was no excuse whatever for merchants and manufacturers who lost heart because such a war confronted them. If Japan won she would ensure the integrity of China and would enjoy preferential rights in trade. This, then, was the time to think seriously of the best way to deal with the opportunities that might offer.

A committee of 20 was nominated by Count Okuma, its principal members being Messrs. Oishi, Hatoyama, Seki, Komuchi and Koezuka.

ENGLAND AND AMERICA IN THE TIME OF THE GREAT WAR.

With many Americans, perhaps the great majority, it is still an article of rooted faith that in the time of the great struggle between North and South, the British Government under Lord Palmerston desired to recognise, and sought to bring about the recognition, of the Southern States. The following letter on the subject has just been published in the United States:-

United States:—

26, James Street May 30, 1889.

Dear Sir,—Having expressed my interest in the portions of your work which I read on the day of its arrival. I think it would be less than ingenuous if I did not, after reading what relates to the Cabinet of Lord Palmerston, in page 56 and in the following chapter, make some reference to it.

Allow me to assure you that so far as that Cabinet is concerned you have been entirely misled in regard to matters of fact. As a member of it and now nearly its sole surviving member, I can state that it never at any time dealt with the subject of recognizing the Southern States in your great civil war, excepting when it learned the proposition of the Emperor Napolen III and declined to entertain that proposition without qualification, hesitation, delay or dissent.

In the debate which took place on Mr. Roebuck's

In the debate which took place on Mr. Roebuck's proposal for the negotiation Lord Russell took no part and could take none, as he was a member of the House of Lords. I spoke for the Cabinet.

You will, I am sure, be glad to learn that there is no foundation for a charge which, had it been true, might have aided in keping alive angry sentiments happily gone by. You are, of course, at liberty to publish this letter.

To your reference in page 70, as a record of impressions which I am not entitled to use, I can make no objection, though you are probably aware that

no objection, though you are probably aware that they were many years ago the subject of a detailed explanation from me to the American government, and of a most handsome reply from Mr. Hamilton

I remain, dear sir, your very faithful servant, W. E. GLADSTONE.

HENRY CLEWS, Esq.

I hereby certify that I have compared the above with the original letter written and signed by W. E., Gladstone and that it is a true and accurate copy

W. M. BRADEN Commissioner of Deeds for the City of New York.

WAR NOTES.

Saturday, April 23.

It is stated that some Russian torpedoes which have broken adrift from their moorings at Dalny or Port Arthur have been sighted off the Shantung promontory and that navigation in those waters has become very dangerous.

Twenty thousand Russian troops are reported to have reached Mukden.

Mines have been laid in the Liao River

Monday, April 25.
Peking authorities estimate the total force of Russian troops eastward of Lake Baika at 200,000 of all arms. As for Reuter's St. Petersburg telegram that 300,000 had al-Petersburg telegram that 300,000 had al-ready assembled and that no more are needed, a later telegram from London alleges that General Kuropatkin is waiting for another hundred thousand before he commences military operations.

It is reported from Chefoo that at 4 p.m. on the 22nd instant the despatch-boat Fawan of the Chicago Daily News was stopped by two Russian destroyers at a place 8 miles (nautical) from Port Arthur, and subjected of every hundred residing in Japan have no to strict examination. The Russians carried her to within 3 miles of the port. confined the whole crew in the hold while investigations were in progress and their search seemed to be directed chiefly to finding whether the vessel possessed any apone hand, admitting that it deliberately paratus for wireless telegraphy, but one and grossly perverted our language by imagines that such a quest should not have attributing to us a statement diametrically the demanded much scrutiny. The Favon saw a number of war-ships with steam up near the entrance to the port. (Jiji's correspondence).

A telegram from Shanghai, professing to give a true account of the state of affairs in

Russian troops which passed through Irkutsk from the beginning of the War up to the 26th of March was 46,000. In other words, the re-inforcements sent eastward by Russian troops which passed through machinery." Has our contemporary never to the 26th of March was 46,000. In other words, the re-inforcements sent eastward by Russian troops which the technique of the troops with the re-inforcements sent eastward by provisions, animals, vehicles and other

One of the Japan-The foreign residents, being protected by ese had a bandage round his arm.

Thursday, April 28.

Russian newspapers are reported to have agreed in condemning the Novosti's suggestion that the intervention of a foreign Power should be accepted at this juncture. say that Russia can not hear of mediation until she has been victorious in the field.

London telegraphs that the ice has broken up at Vladivostock and that several Japanese cruisers have been seen in the vicinity of the port. But it is to be observed that Vladi-vostock has two avenues of ingress and egress, one in Amur Bay the other in the Sea of Japan. Unless a very large force were employed by the Japanese they could not watch both places.

Viceroy Alexieff's resignation was apparently real though the question seems to exception of a few, a very few, Japanese have been deferred in deference to the Tsar's wish. If any one deserves to suffer for this war dence has been required to receive Japanese Alexieff is the man. So far as the world soldiers. For this forbearance an expres-knows, he is mainly responsible for it, and sion of grateful recognition would be approthere has been nothing in his conduct of the priate, whereas what the Japanese actually operations to redeem the initial error. His hear is a journalistic complaint that they resignation in the face of the enemy was have violated the treaties.

alone wanting to crown the wretched record. Very different was the spirit shown by General Kelly-Kenny in South Africa. Owing to a peculiar arrangement made by Lord Roberts, Lord Kitchener took the command at Paardeberg although Kelly-Kenny was his senior. General Kelly-Kenny behaved with such self-denying tact under these difficult circumstances that Kitchener did not even suspect his dissatisfaction. a despatch penned subsequently Kelly-Kenny wrote:—"This is not the time to above the forts. We have been hearing of mention personal matters, and until the pre-these mines for a long time. Probably they sent operations are concluded I prefer to have materialized at last. sent operations are concluded I prefer to subject myself to any humiliation rather than raise the question of the command." A little of the same spirit would well have become Alexieff.

THE WAR TAXES.

We observe that the Japan Herald, reply-ing to an article published in these columns with reference to the War Taxes, accuses us of suggesting that foreigners " wish to differrentiate themselves at such a crisis as the present from the people among whom they live." That is exactly what we did not do. Our words were:—"We may fairly assume at the outset that ninety-nine foreigners out desire to raise this question at all, and are entirely unwilling to differentiate themselves at such a crisis as the present from the people among whom they live." The Japan Herald has therefore to choose between on the opposite of our explicit assertion, or, on the other, confessing that the plainest and most

unequivocal English is unintelligible to it.

The Japan Herald further declares itself unable to imagine such a thing as "a conwords, the re-inforcements sent eastward by Russia did not exceed that total. The articles for military uses? Perhaps it does not allegation is important but scarcely credible. In Japan under the eyes of those going on in Japan under the eyes of those sub-base eyes to see. Many Japanese sub-The foreign residents, being protected by treaty against similar "extraordinary contributions," are not compelled to give up their horses and thus it happens we can look

forward to the usual spring races next month.

Occasion may be taken to correct another error made by the Japan Herald. It has alleged that the billeting of soldiers upon foreign residents is forbidden by the treaties. There is no such veto in the treaties. On the contrary, a proposal to insert such a veto had to be set aside because no exemption of the kind is extended by European Powers to foreigners residing within their borders. The Japanese would be strictly warranted in billeting soldiers upon foreign residents precisely as they are billeted upon Japanese subjects. But, in point of fact, the Japanese have most carefully avoided subjecting foreigners to this inconvenience. With the houses rented to foreigners, no foreign resi-

RUSSIAN PRISONERS.

The Russian sailors who have been under treatment at Matsuyama hospital have now recovered completely, and will be allowed to return to their country in a few days. In connexion with this we may mention that among many of the Russians an idea seems to prevail that should they fall into Japanese hands they will meet with the greatest cruelty. The two wounded men taken from the destroyer Steregustchi are said to have been in a state of extreme nervousness at first, as also were their two unwounded comrades, who were rescued from the water. One of the latter was a shoemaker by trade, and when he found that instead of ill-treatment he was to have everything he wished for, his delight expressed itself in an absorbing desire to make a pair of boots for the commander of the ship. It was this extra-vagant belief, doubtless, that led to the terrible fate of two other men on the destroyer. They fled into the forecastle, and barricaded themselves there. Nothing would induce them to come out, and there can be little doubt that they sank with the vessel when she went down some time after being cast loose by the Japanese, who found it impossible to tow her. Possibly these wild notions are encouraged by the officers in order to make the men fight to the death. But they may have another effect.

Rumour says that the Pobieda suffered such injury from the explosion of the mine with which she came in contact as to preclude all possibility of making her fit again for the fighting line with the resources available at Port Arthur. It is further stated that another Russian man-of-war, some days prior to the last affair, came into collision with one of the sunken Japanese steamers and is now in dock undergoing repairs.

MARQUIS 110 ON THE WAR.

The following two letters having been translated into Japanese and published by the Kokumin Shimbun, the originals have been kindly placed at our disposal :-

the Northma Summen, the Originals have been kindly placed at our disposal:

New York, February 17, 1904.

Dear Marquis,—I read with a good deal of interest a statement published in our papers here, which purported to come from you, setting forth your country's position in connection with the present war. Most of us here sympathize with your country in this contest as we consider it has been made absolutely necessary in self-defence on the ground that Russian sovereignty over Manchuria would mean very soon thereafter its extension to Korea, and in that event your country would have the menace of a very bad neighbour and your people be hemmed in for all time from natural expansion. Under such circumstances all your commercial people would surely be driven out of Manchuria and Korea precisely as the Jews have been driven out of Russia; besides which, Russian sovereignty would not likely be confined to Manchuria—it would be very sure to extend further into China, which would soon mean not only the closed door to Japan, but to all other commercial nations. I congratulate you on the brilliant successes already achieved. There is much rejoicing here in consequence of them. consequence of them.

an effort has been made by the representatives of Russia to try and convince our people that Russia during the time of our Civil War was our friend and that we ought to be hers now, as an evidence of which they claim that she sent her fleet to New York, where it was anchored for some time, under sealed orders to give us aid in the event of it becoming necessary. This version is entirely incorrect, as I know of my own knowledge. At this time there was an effort being made by Napoleon III, then Emperor of France, to get England to join him in the recognition of the Southern Confederacy, which Mr. Lincoln and his cabinet were thoroughly aware of, and the South, it was understood, was to give a strong justification for taking that position, hence, their plan was to make a descent on Washington, capture the capital and the archives of the Government, and that being done foreign recognition would be in order. The rebel army had gathered around Washington in great

force and it looked to be a critical period. At this dark moment Mr. Seward, Secretary of State, obtained information that a Russian fleet was in South American waters, and he conceived the idea that if the fleet could be induced to come to New York, it would give the impression to both France and England that an alliance had been effected between Russia and this country, and it would postpone action on their part leading to a recognition of the Southern Confederacy, which at that time would have been potential in serious consequences. He consequently sent a very cordial invitation to the officer in command and his associates to bring the fleet on a visit to New York, which was accepted, and the fleet appeared accordingly, producing the fleet on a visit to New York, which was accepted, and the fleet appeared accordingly, producing the effect intended. Soon, thereafter, however, our army protecting Washington had time to recuperate after the defeat at Bull Run, and the battle of Gettysburg was fought resulting in a great victory to the Union side, which turned the fide, and then one victory after the other followed in rapid succession until the end

The above version differs very materially from the one that has been given out by the friends of Russia—that the fleet came here under sealed orders. In 1871 Duke Alexius visited New York with a similar Russian fleet, of which he was in chief command. A Committee of New York citizens, of which I was an active member, was appointed to meet him on arrival in the bay to extend to him the hospitality of the city and various entertainments that had been arranged for him and his officers. During the Duke's visit here I therefore saw much of him and in one of my talks with him I spoke abut the previous fleet coming to New York, how it happened to come to New York, etc. He seemed to be perfectly familiar with all the circumstances and acquiesced in the statement I made. My information about it was obtained directly from Mr. Seward himself, so that my version of Russia's attitude at that time is certainly the correct one, thus showing it was not the intention of Russia to help us by her fleet, but that it was simply a shrewd device of Secret meet. The above version differs very materially from the

by her fleet, but that it was simply a shrewd device of Secretary of State Seward to make it appear so; in other words, it was a bluff, and worked to perfection, for the idea struck terror to the intrigues of the French Emperor.

French Emperor.

Since your brilliant successes already attained, we are expecting a short, quick and decisive termination of the war, ending in your favour. With best wishes that this may be the result, I remain, very truly

HENRY CLEWS.

Tokyo, April 14th 1904.

Dear Sir,—In answer to your letter of Feb. 17th, let me first of all thank you most sincerely for the constant sympathy you have shown with our country's cause. Your friendly efforts on the occasion of the Sino-Japanese war are still fresh in my memory and in the memory of all those who have heard of them. And in general the sympathetic attitude of public opinion in your country is a great encouragement to us in our faith that in fighting for our own future security and undisturbed enjoyment of the fruits of civilization, we are to a certain extent fighting also for the common cause of all. Just as you say, the supremacy of Russia in Korea would mean not only a constant menace to the very existence of our island empire, but would also mean the wholesale destruction of our commercial and industrial interests already legitimately vested there in the past, not to Tokyo, April 14th 1904. destruction of our commercial and industrial interests already legitimately vested there in the past, not to mention the loss of a natural outlet for our expanding people. The constant policy of Russia in this part of the globe has steadily inclined towards monopolization of the natural resources of any country she conquers and annexes. Her Manchurian policy is an irrefutable evidence of the above statement. So an irrefurable evidence of the above statement. So that in fighting for our own interests, we are at the same time fighting for the principal of "fair competition all round "in these new markets of the world. I am indeed very sorry that the negotiations, conducted on our side with sincere bean files, were not crowned with the success so earnestly desired. If the Russian Government had been a little more aspired by the spirit of moderation, and of toleration or the legitimate interests of others, things would not have come to this pass. As it was, there remained no other way for us but to try to enforce by arms what we could not effect by reason. And we had to do so ere it would have become too late, for Russia was steadily and rapidly augmenting her Russia was seeany and rapiny augmenting har fighting forces available in this part of her empire, so that before long the sheer mass of her fighting power would have made it a folly for us to attempt to power would have made it a folly for us to attempt to resist her inscrupulous march onward. Thus our present enterprise has been nothing but a coolly thought-out step in the cause of state necessity.

And I am much gratified to see that you, as well as the general public opinion of your country have understood our motive in its true light.

Hoping that you are enjoying as robust health as when I saw you last in New York, and also hoping to be able to see you again in no distant future. I remain, Yours sincerely, ITO HIROBUMI.

THE GOTEMBA LEPERS.

We translate Father Bertrand's beautiful and touching appeal on behalf of the un-fortunates for whose sake he may be said to have given his life :-

The year has passed so quickly that last year seems like yesterday, even like to-day. Once more a note dated from Gotemba Japan; "Oh mon Dieu! here he is again with his lepers," then with a not very benevolent sigh, "This good Father would do better to leave us in peace." That is certainly what more than one charitable person will say. I have not the right to complain; it is true that I am troublesome but everything is said to be relative in this world.

Ilius among tuck sufferious am witness to such

Hive among such sufferings, am witness to such pain that I do not hesitate to come and tell you with confidence about sheet things, because I know you would be discontented with me if I doubted your feelings in this respect.

During the year which has just come to a close, twelve of our poor sufferers have been freed from their troubles and passed into a better life; nineteen of them were baptized. Fifteen new patients have just been admitted to the hospital. At present our interesting community consists of 77 pers

and 23 women.

Of happy mood and always content, they gaily struggle "for life" against their terrible enemy. For is it surprising, for the rest, that they find themselves happy? In their peaceful republic, they ignore the graver cares that agitate the society of other men. One has no reason to be envious of the other; nobody possesses anything, and within some slight degrees of unsightliness they all resemble one another. The most able-bodied among them, when they see those more seriously afflicted, do not think of becoming boastful. They say to themselves that of becoming boastful. They say to themselves that their turn is not far off, and this thought fills them in a singular manner with kindness and compassion for one another.

Among the afflicted who entered the hospital this year, there was one man who had been hidden by his family for three years in a press (or closet). They had spread a thick covering at the bottom of the closet and there he slept night and day.

The only moment when he was allowed to "puthis nose out of doors" was in the evening, and even then it was on condition that no visitor was in the house. As soon as somebody came he was obliged to enter his closet and not make a sound or a movement.

In time his poor swollen feet refused to do their work and he could no longer walk. When he went to the leper-house and could see the day-light and breathe at ease in the open air under a bright sun and beautiful blue sky, he seemed to say to himself in his naïve joy: "Is it possible that so many small birds and large beasts freely enjoy these beautiful things and that I have been so long deprived of

things and that I have been so long deprived of them?"

Of all the deaths this year, the most touching and the most innocent was that of a little girl of fourteen. Her mother, also a leper, died here three years ago. In her last moments, she begged, she conjured me to receive her daughter and to take care of her in her stead. I promised to do so. The first time I saw this child was at Kusatsu station where she had been with other lepers, to take the sulphur treatment. Naturally I wished to speak to her of her mother; but when she saw this stranger "this horror of a man," with a long beard, she was filled with such fear that I could not approach her. She was brought to the hospital by her grandmother, soon became accustomed to it, and was no longer afraid of me. She was baptized and received her First Communion with much good will. Suon alter, consumption declared itself and she felt that the end was no far off. From that time the only desire she had was to be confirmed "If she could live until the arrival of Monseigneur: she would die peacefully after that." At last Monseigneur came and lier desire was salisfied. For a week she had not been able to get up and I told her that she could not the hospital "Oh hut will well that the steady of the shears." she would die peacefully after dual." At last Monseigneur came and lier desire was satisfied. For a
week she had not been able to get up and I told her
that she could not go to the chapel. "Oh, but I will go,
I will have enough strength to do that," she said.
In the end she was confirmed. Now that her wish
was gratified and she saw no hope of recovery, she
asked to receive Extreme Unction whileshe could pray
and understand the ceremony. Then she received
the scapular as she wished in order to show when
she appeared before God that she belonged to the
Blessed Virgin.—"That you are a Christian
is a sufficient sign." I said to her.—"Yes, but
I wish a sign that can be seen. When I present
myself at the gate of paradise and they are
tunwelling to open for me I shall ask for the Blessed
Virgin, show her this, and then she will let me in."
This simple little child died some days afterward
and certainty she must have been well received in
heaven. Each time I went to see her she asked me
to pray for her, promising in return that when she
went to heaven she would pray for the others and

for her benefactors "that she might take them all with her."

To console the most abandoned, to save the most unfortunate of men, I have need of your aid; my goodwill is not sufficient. God wishes that each one of us should take his part. . . . You will

one of us should lake his part.

That will be the best of your consolation.

I am, uniting in charity and humanity with you, your most humble and respectful servant.

Joseph Bertrand, Miss Apost.

"VERITAS PREVALEBIT."

In "The German Official Account of the War in South Africa" the following passage appears :-

passage appears:

"In view of the many errors disseminated at the time by a badly informed Press throughout the whole world as to the conduct of the war by the English, it is the duty of a truth-loving account, compiled from a knowledge of the actual circumstances, to lay stress upon the fact that the behaviour of the British was as chivalrous and humane as that of the Boers always was, so long as they were opposed by the regular Boer forces which were distinguishable as such. But, after the occupation of Bloemfontein, the loosely organized and badly disciplined forces of the Boers broke up. Those still in the field were often. loosely organized and badly disciplined forces of the Boers broke up. Those still in the field were often merely irregulars and no longer recognisable externally as combatants. By degrees they adopted guerilla tactics which, by obliterating the distinction between a really combatant force and a hostile population, were bound naturally to arouse a constantly increasing feeling of bitterness among the British troops, which were often menaced, and this not only explains much of their severity but also justifies it. If, therefore, the English authorities subsequently adopted on several occasions increasingly severe reprisals, which often made their conduct of the war appear harsh, yet they did so, in the majority of cases, only in accordance with their duty, and the justifiable protection of the lives of those under their command, Military history teaches, besides, that the bitterness Military history teaches, besides, that the bitterness aroused on both sides during a war increases in proportion to its duration, while humane and chivalrons feeling becomes, of course, blunted."

We wonder how the German nation have received this testimony; whether they regret the cruel injustice they did to the British army throughout the South African War. The verdict of their own Great General Staff ought to be conclusive, but we have not yet heard that the journals which occupied themselves so assiduously in slandering the English soldier have endeavoured to repair the injury by acknowledging their error.

MRS. RICHARDSON AND DR. McGEE.

Japanese papers speak with much grati-tude of Mrs. Richardson, an English lady who has arrived in Japan to take part in the duty of nursing wounded soldiers. applications in that sense were made to the Japanese Legation in London, and it was finally decided that a small number should be endorsed. Mrs. Richardson was the first

an interpreter is an impediment sufficient in itself to militate almost fatally against their usefulness. But when we add that, their mode of life being totally different from that of the Japanese nurses, a special commissariat and special conveniences have to be provided for them, it becomes at once evident, ungracious as the statement must seem, that, on the whole, their absence would be preferable to their presence. Some of these ladies act solely under the impulse of sweet if unreasoning charity when they come to the Far East on such an errand. But some are influenced by an imagination that no proper hospital organization exists in Japan, and that for them it is reserved to be the pioneers and directors of a great reform. That is a fallacy. They can teach nothing to the Japanese in these matters. Need we say that we speak thus with reluctance, and under the pressure of a conviction that the unvarnished truth is best for all parties in the circumstances.

Dr. A. N. McGee and her party of Red Cross nurses landed on Friday at 9.50 a.m. from the Shatomut at the English Hatoba, where the lady members of the Yokohama branches of the Japan Red Cross Society, the Patriotic Ladies Association, the Military Relief Society, and other public bodies, the pupils of the Ferris' Seminary, the Kanagawa High Female School, etc., and the Ranagawa High Telastic Colors, tell the female members of several religious bodies welcomed them most warmly. Governor and Madame Sufu were also present with three carriages from the Kencho, in which the new comers were conveyed to the Union Church-After a very warm welcome there they went to the Grand Hotel where the authorities of the Kencho had made preparations for them. In the afternoon they were entertained at a welcome reception on the Bluff.

Dr. McGee and her party, who stayed over night in the Grand Hotel, left Yokohama on Saturday by the 9.10 a.m. train for Tokyo. Madame Sufu and many Japanese ladies belonging to various bodies saw them off at the railway station. On arrival at Shimbashi, they were welcomed by many ladies of high rank, by nurses of the Japan Red Cross Society, Governor Senke, Mayor Ozaki, Mr. Nagasaki, Chief Secretary of the Imperial Household, and other gentlemen. The American ladies proceeded to the Atago-kan Hotel in carriages sent by the Japan Red Cross Society.

AN INTERESTING DISCOVERY AT THEBES.

An interesting account of the discovery at Thebes of the tonib of Queen Hatshepsu, the builder of the temple of Der-el-Bahari, appears in *The Times*. Like the other Royal sepulchres in the Valley of the Tombs of the Kings at Thebes, we are told, the tomb of "the Great Queen" consists for the most part of a corridor sloping downward at a somewhat sharp angle into the heart most interesting comparison of the rifles of a limestone mountain. The work of carried by the Russian soldier and the clearing out the tomb has just been Japanese. As to the mechanism for loadclearing out the tomb has just been brought to a conclusion, thanks to the liberality of an American gentleman, Mr. Theodore M. Davis, and the engineering skill of Mr. Howard Carter, the Inspector of Egyptian Antiquities. The direction taken by the long corridor of the tomb is most the whole cartridge 26 grams, whereas the remarkable. The entrance is in the axis of Japanese ball, (hard lead with a covering of the temple of Dêr el-Bâhari, which stands on German silver) weighs only 10 grams and the the other side of the cliff, and it was natural cartridge has a weight of 22½ grams. The to suppose that the corridor was intended to meaning of these things is that a soldier who lead to the temple. Instead of doing so, it suddenly curves southward, and, after continuing for more than sixty mètres in a southerly direction, once more turns to the west. At a distance of fifty-six mêtres a chamber is reached—the extreme point attained by Lepsius; then, after anotated to a souther state a solider who do being the sole and only English newspaper in the Far East which under the hypocritical guise of frank friendship neglects few opportunities of injuring Japan.

Speaking at Johnsonville in March, Mr. Seddon said the exports of New Zealand last year amounted to £15,000,000, a wonderful

fellow-nurses except through the medium of ther sixty metres, there is a second chamber, and after thirty-six metres more a third. From sarcophagi are of hard sandstone which has been polished like a copper disc, and are covered with beautifully formed hierogly-phics. From these we learn that one of the sarcophagi contained the mummy of Hatshepsu, the other that of her father Thothmes The lids of the sarcophagi lie on the floor, and by the side of that of Hat-shepsu is a canopic jar of polished sand-stone. The sarcophagi are empty; the

NOTES ON CURRENT EVENTS.

Mr. Kudo Kokan, the prominent politician, died suddenly at about 6 p.m. on the 22nd instant. He was engaged in a game of draughts when he was suddenly seized with a fit of blood-vomiting and expired in five minutes. Mr. Kudo had always been an uncompromising advocate of a strong foreign policy, and his latest appeal to public opinion was as a denouncer of any weak yielding to Russia. He had sat in the Lower House of the Diet from its opening

We are asked to state that the proceeds of the Variety Entertainment in Tokyo on April 9th were 580 yen and the expenses were 150 yen; 200 yen was sent to Marchioness Nabeshima for the Patriotic Fund, and 230 yen to Paymaster General Murakami of the Navy for charitable purposes connected with that branch of the Service.

Japanese journals state that the number of war correspondents who have gone to the front to join the First Army is altogether 38, namely 22 Japanese and 16 foreigners. The number waiting to accompany the Second Army is 151, namely, 83 Japanese and 68 foreigners. As for details, the foreign correspondents already sent are 8 English, 6 American, I French and I German; while those waiting to go are 28 English, 28 American, 7 French, 1 German, 3 Italian and 1

M. Souveroche, writing in I'llustration and translated into Public Opinion, gives a ing, the advantage is conceded to the Arisaka weapon, which, however, has the drawback of being more difficult to clean. striking differences are first that the Russian ball (German silver) weighs 14 grams and

Russian's 100. But of course the lighter bullet is not so accurate in its flight, especithis third chamber a passage curves inward ally in windy weather. The second point is and leads to the burial chamber, in which that whereas the initial velocity of the Rustwo sarcophagi have just been found. The sian bullet is only 620 metres, the velocity of sian bullet is only 620 metres, the velocity of the Japanese is 725 metres; whence it results that while the zone of maximum danger for the Russian weapon does not exceed 500 metres, it is nearly 700 metres for the Japanese, and the penetration also of the latter is much greater. From these facts the French expert concludes that the Japanese arm " will be very dangerous at ordinary combat distances and that the great tension of the trajectory will stone. The sarcophagi are empty; the give the Japanese a superiority which their mummy of Thothmes I., in fact, was one of adversaries will be obliged to consider." In those which were found in the pit at Dêr-el- the case of each alike the magazine contains Bahari, and is now in the Cairo museum. 5 cartridges, and the rapidity of fire is the The mummy of Hatshepsu may still be lying same. So also is the weight of the piece, in one of the unexplored side-chambers of which fact is thought to be in favour of the Russians who are bigger and stronger men

> It is stated that Russia is bringing strong pressure to bear on Turkey to induce the latter to pay up the remaining portion of the indemnity due since the war of 1877.

A British steamer is to be sent to Saghalien at the close of this month to bring off Japanese fishermen who wintered there. There are some 700 of these men and besides these there are some 200 who have already withdrawn to Wakanai, where they are awaiting an opportunity to get home. The steamer, a vessel of 3,775 tons, will take them all to their destination, presumably Hakodate.

The N. C. Herald, at the request of the apanese Consul-General in Shanghai, Japanese Consul-Genera publishes the following:—

"In answer to inquiries too numerous for individual "In answer to inquiries too numerous for individual replies, and in hope of correcting some erroneous impressions that exist abroad, we, mayors of the principal cities of Japan, beg to give our assurance that normal conditions prevail throughout the Empire of Japan in war which is as orderly as Japan in peace. Business men and travellers who contemplate visiting our country will encounter no inconvenience and will be exposed to no danger. The ordinary means of communication by land and sea are not and cannot be interrupted. Japan and its territorial waters are not within the war zone; and the positions and advantages of our fleet and armies

insure Japan against invasion.

"(Signed) Mayors of Tokyo, Yokohama, Osaka,
Nagasaki, Kyoto, Kobe, and Nagoya."

We desire to supplement this by saying that our own experience, the experience of foreign residents in general, and the experience of many tourists with whom we have spoken, emphatically confirm the statement of the Mayors of Tokyo, Yokohama, Nagasaki, Kyoto, Kobe and Nagoya. It has been the wonder and admiration of numerous observers that the Japanese people preserve. at this great crisis of their national destiny, a demeanour extraordinarily calm and selfpossessed, and that a foreigner may travel throughout the length and breadth of the country without being in any way inconveniently aware that Japan is engaged in a life-and-death struggle with a Western Power. One foreign journal alone in Japan has attempted to create an uneasy impression in the minds of tourists, and one foreigner has supported it. The foreigner is a correspondent of the Figaro and the journal is the Kobe Chronicle, which now enjoys the reputation of being the sole and only English news-paper in the Far East which under the hypocritical guise of frank friendship neglects few opportunities of injuring Japan.

record, considering the Colony had only a population equal to the city of Glasgow. On the Government lines of railway there was a net increase in revenue of over Ago,000 for the 11 months of this year, as compared with the corresponding period of last year. The customs had increased £200,000. The total increase of revenue for the financial year, as compared with last year, amounted to over £600,000, and the surplus would be considerably larger than last year.

The Shogyo Shimpo, referring to Mr. Takahashi's visit to England, says that two reports are circulated with reference to a foreign loan. One is that a strong syndicate has been formed with the intention of floating a loan of 15 millions sterling on the security of the Government railways or the customs revenue; the other, that the syndicate contemplates an immediate loan of 5 millions without any material security.

Our contemporary notes, however, that no news in this sense has reached the Bank of Japan, a faot which throws doubt on the whole story.

A report which was current in Kobe on April 22nd, and was referred to by one of the Kobe papers, to the effect that Mr. M. Ginsburg, of the firm of Ginsburg & Co., had been shot by the Russians at Harbin seems to be without foundation, as we learn on the best authority that. Mr. Ginsburg left Harbin about the 18th of last month and should now be in St. Petersburg.

A severe shock of earthquake was experienced in south Formosa on the afternoon of the 25th instant. Telegrams from Tainan announce that 37 houses were overthrown, 130 damaged, 2 persons killed and 13 in-jured. The same earthquake seems to have been felt in Japan but as to that the records have not yet been collected.

Five American citizens who reached Yokohama by sea on the 25th instant, were found in a grove at Yoyogi-mura in the Shinjuku suburb of Tokyo on the following day. It appears that they had been engaged in whale fishing on the coast of Hokkaido when their sehooner was wrecked. Her crew escaped in small parties, and these five men managed to reach Yokohama. had only 4 yen in their possession, and with that sum they thought they could make their way overland to Kobe. But they lacked the essential preliminary of knowing the road, and thus their journey ended in the suburbs of Tokyo, whence they were sent by the police to the U.S. Consulate in Vokohama

Several junior officials of the naval commissariat department at Kure have been arrested on a charge of dishonest practices in connexion with supplying provisions to the ships. It is stated that twelve men are now under detention.

A man who has journeyed two million miles may reasonably claim that he has earn-ed a period of rest. This is the remarkable record of Mr. Robert Maybank, who has just retired after serving the London and South-Western Railway for fifty-two years, and one of whose many memories is that he acted as fireman of the Royal train which

retired a year or two ago after running nearly two million miles without the least approach to an accident. Compared with such feats of travelling the most phenomenal pedestrian records seem poor, even that of Thomas Phipps, who for fifty-eight years carried letters between Kingham and the adjacent villages and Chipping Norton, covering 400,000 miles on foot. But the champion traveller of the world is surely Mrs. Crossley, of Indianapolis, who has crossed the Atlantic eventy times, and is now on her twentyfifth journey round the world.

FIRES.

On the 27th instant at 8 p.m. the jail at Osaka was destroyed by fire. Some of the prisoners who were in for grave crimes, attempted to escape and the wardens were obliged to use their swords. There is also a suspicion that some were burned to death.

On the morning of April 27th, fire broke out in the Konakiyama weaving factory belonging to the Fuji Cotton Spinning Company, Tokyo. The flames immediately spread throughout and The flames immediately spread throughout and destroyed the buildings, which are thirteen hundred tsubo in extent. Four sets of weaving machinery were damaged but over a hundred female workers escaped without injury. The loss is estimated at about a hundred thousand yen. It is said by the Jiji that the factory was insured with the National, Phôenix, Manchester and other fire insurance companies for over a hundred and eleven thousand yen. The cause was the heating of a bearing. was the heating of a bearing.

On the night of April 26th, fire took place in a compound at Meguro, Tokyo, but was put out before serious damage could be done. The cause is not yet known.

YOKOHAMA LITERARY SOCIETY.

The Yokohama Literary Society brought its Schaick Hall was again the scene of much plea-sureable enjoyment. The lecture by Dr. Munro on "Modern Life and Public Health" was in the speaker's happiest vein and the frequent flashes of humour appealed to the fancy of his many hearers. The musical programme comprised the following five numbers, and it may be noted that the pianoforte selections were the two which Miss Blundell interpreted in the recent musical competition, in which she came out at the top of the list:—

1	.—Piano Solos(a) " Au Matin "
	—Piano Solos(a) " Au Matin "
	Miss Elsie Blundell.
:	Songs(a) "Forest's Greeting"} Reiniche
	Mrs. Jas. Walter, with Violin Obligato by Mr. H. A. Poole.
	 Wiolin Solo 'Air Varie' De Beriot Mr. H. A. Poole.
ľ	4.—Song

Mr. A. E. Cooper.

The President, in distributing the prizes and certificates won at the late musical competition, said that the Committee would have liked to have said that the Committee would have liked to have seen a bigger list of entries in both divisions, but of course they must not expect too great things at the start. "Great oaks from little acorns grow," said the adage, and he hoped that now the musical competitions had been successfully inaugurated they would continue a regular feature in the Society's work, while their value would acted as fireman of the Royal train which brought the King from Windsor to Waterloo on that March day in 1863 when he met his beride "from over the sea." As a teat of travelling Mr. Maybank's record will surely be hard to beat. He has, however, or had, a rival in Mr. John Higginbottom, an diverse of the Midland Railway, who

THE LATE MR. JOHNSTONE.

On Saturday afternoon the mortal remains of the late Mr. James Johnstone, whose sudden death on board the P. & O. steamer Formosa at Moji on April 18th we have already chronicled, were conigned to their last resting place in the Yokohama Cemetery. After the arrival of the steamer at Kobe and the holding of an inquiry, the body had been taken ashore and conveyed to Kasugano where, in accordance it is understood with the wishes of the deceased gentleman, it was cremated. The ashes were brought by train to Yokohama on Friday.

The obsequies were, also in conformity with the known desires of the deceased, of the simplest kind; friends were requested to abstain from sending flowers, the only tribute of that nature being the beautiful wreath of his widow.

At 2 p.m. the Masonic body (Star in the East) of which Mr. Johnstone was a member of long standing, opened m Lodge of Sorrow, after which the brethren proceeded to the Bluff, these and members of the other degrees to which the deceased belonged bearing the usual emblematic sprig of evergreen.

In the vicinity of the residence, No. 133 Bluff, there was by three o'clock a large assemblage of mourners of many nationalities. Within the house a short service was conducted by the Rev. W. P. G. Field, and the silver-mounted oaken coffin draped with velvet was then placed in the hearse and so conveyed to the Cemetery followed by a long procession of mourners. Beside the hearse walked the pall-bearers, Dr. Wheeler, and Messrs. A. R. G. Clark, A. R. Weigall, James Walter, H. C. Litchfield, Burnham, B. Gillett, and A. Patterson, and Mr. J. L. Robertson was chief mourner, being followed by Messrs. J. W. Cain, A. Cameron, and J. J. Mahlmann, the executors.

Arrived at the Cemetery, where a considerable number of residents awaited the hearse, the coffin was carried to the grave (on the highest terrace of the grounds) and, as Mr. Field perform-ed the concluding part of the burial service, was lowered to rest. The final tribute to the memory of their departed friend was then paid by those present, the Masonic brethren throwing their sprigs of evergreen upon the coffin.

TEA REPORTS.

The Yokohama Tea Guild held a meeting on April 21st and fixed the quotations for new tea, which is now being put on the market, as follo

OMS	
•	Yen.
Choicest (lenka-ichi)	
Choice (mare-o-gashira)	
First Class (mami-gashira)	44
Common (mami)	40

It may be remarked that the prices are generally 20 per cent. lower than those of last year.

The Japanese tea exporters, Otani Shoten, Hori Shoten, Nakamura Shoten and Sudzuki Shoten in Yokohama intend to send their samples by the Doric, which is to leave on April 27th for San

The Japanese tea traders in Yokohama have informed the manufacturers that the former will charge sen 10 per 60 kin for storage and fire insurance on leaf consigned by the latter.

It is reported by Tokyo papers that the Department of Agriculture and Commerce has decided to give a subsidy of between yen 30,000 and yen 50,000 to the Central Tea Guild, which intends to enlarge its business abroad. The subsidy is believed to be paid to the guild under conditions specially imposed by the authorities conditions specially imposed by the authorities.

FOREIGN RESIDENTS AND TAXATION.

SOME attention has been devoted journalistically to the question whether foreigners residing in Japan under treaty are legally liable for increases of taxation or for new taxes imposed to meet belligerent outlays. discussion hitherto appear to have arrived easily at the conclusion that no such liability exists, and they base their contention on the 3rd Article of the Franco-Japanese Treaty of 1898, which says :---

Japanese in France or French in Japan shall not be required, under any pretext, to undergo charges or pay taxes, imposts, contributions or licenses, under any denomination whatever, other or higher than those which are or shall be imposed on the nationals or dependents of the most favoured nation.

They shall not be required to perform any obliga-tory service either in the army or in the navy, or in the guards or national militia. They shall be exempt from all contributions imposed instead of persona service, from all forced loans and from every other extraordinary contribution whatever.

It is upon the italicised words in the above article that the title to exemption is based. that ninety-nine foreigners out of every will be read, we trust, in that light.

ology. If the Article quoted be carefully the army or the navy; (3) having to pur-military or naval expenditures. That is rivers. But every passing day produced a form ; (4) having to lend money to the State claiming any exemption from payments that possible to drag artillery, and the troops, any other extraordinary contribution. And indeed it is more than doubtful whether themselves to the task of road-making. category of "extraordinary contributions." process of law. An "extraordinary con-tribution whatsoever to the public exchequer, extraordinary exercise of power and col- conscription or forced service of any kind. first, againt fiscal discrimination in every should not contribute, equally with natives, form; secondly, against conscription, and thirdly against compulsory service of any nance of the State's existence. kind or against forced purchase of immunity from such service.

The next consideration suggesting itself is that the article has explicitly reciprocal force. Whatever privileges or exemptions

to Japanese residing in the territories of the without noting the essential points of differ-Treaty Powers. Now suppose that France ence between ships and battalions are surpriswere under the necessity of augmenting a ed that while the navy has done so much, the tax, say, in order to defray the expenses of army should have done so little. But the war. Does any one imagine that Japanese question is, has the army done little? The subjects carrying on business in France and army has transported itself to the Yalu, and subject to taxation there, would be exempted that alone is no small achievement. If we Those that have interested themselves in the from the increased rate? They would refer to the war of 1894, it appears that attempting to assert such a claim. It is a on the 5th of June, the two Divisions that fact familiar to every student of recent marched from Seoul and from Yuensan reshistory that both Great Britain and the pectively, did not come together under the United States of America have actually walls of Pyong-yang until the 15th of Septlevied from foreigners and natives alike ember, on which day the chief land battle designated "war taxes" and were definitely October found these two Divisions on the imposed for belligerent purposes. Assuredly neither the Government of England nor that interval of 133 days was required to carry two of America would admit for a moment that Divisions from Japan to the Yalu. Now on exactions or contributions."

The next consideration, and the only further consideration inviting attention, is Now we may fairly assume at the outset that the foreign residents are already paying war taxes and have been paying them ever hundred residing in Japan have no desire to since the revised treaties went into force. raise this question at all, and are entirely Not taxes for the direct purpose of carrying unwilling to differentiate themselves at such on a war, but certainly taxes necessitated by a crisis as the present from the people among expenditures incurred in war or on account whom they live. The problem is therefore of warlike preparations. A very considervirtually academic and anything here written able part of the fiscal burdens borne by the Japanese people when foreigners passed There is first the consideration of phrase-taxes, or new increments of taxation, necessary for the service of public debts contractread, it will be seen that the italicised words ed on account of military and naval expan-the climatic conditions most favourable for speak merely of every other extraordinary there be any validity in the present plea of in 1904, they found all these things as

THE MILITARY OPERATIONS.

A VERY timely article is published by same exemptions and privileges are secured impatience has been shown by observers, who will then understand the facts.

merely expose themselves to ridicule by whereas the order for mobilization was issued taxation increases which were explicitly of the war was fought there. The 17th of banks of the Yalu. Thus it appears that an such taxes could be described as "military the present occasion the mobilization order was issued on the 7th of February and the van of an army of three Divisions reached the Yalu on the 6th of April, an interval of 58 days. We are not permitted to speak explicitly of numbers, but it will not be a violation of the veto to note that three Divisions of the Japanese army to-day represent a force nearly three times as large as two Divisions represented in 1894. The net result is that 58 days' work has accomplished in 1904 three times as much as 133 days accomplished in 1894. Nor is that the whole Several considerations suggest themselves. under their jurisdiction were newly imposed story. When the troops landed in Korea ten years ago, the time was early summer; the roads were in their best condition and do not contain any reference to war. They sions planned in the sequel of that war. If campaigning. When the troops landed there contribution, whatever be its nature. Ac- exemption from war taxes, then the whole unfavourable as possible. Immense difficurate analysis of the Article shows that it fiscal system of Japan should have been culties have had to be encountered. The guarantees the foreign resident against (1) carefully scrutinized when foreign residents van of the army seems to have moved with having to pay higher taxes than natives; passed under it, with the object of securing comparative ease, there being still sufficient (2) having to serve as a conscript in either them against payments destined to meet frost to consolidate the paths and bridge the chase exemption from forced labour in any the obvious and insuperable difficulty of change for the worse. MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

April 30, 1904.]

As a result of investigations instituted by the As a result of threstigations instituted by the Japanese Foreign Office a very useful book covering some 500 pages has recently been issued by the Kokumin Shimbun printing office entitled Siberia oyohi Manshi, price I yea. The information given in this book was collected for the Foreign Office by a Vladivostock Japanese merchant named Kawakami Toshibiko. The part described principally is that traversed by the rail-way. Much information is given about places way. Much information is given about places situated on the banks of the river Amur, and the province of Kirin is minutely described. Reference is made to no less than 170 volumes which have been written by Russians or Chinese on the parts explored. The work treats of the commerce, industry, communications and local Government of Siberia and Manchuria. The information on Northern Manchuria is very full. It is stated in this book that throughout the vast region described what is most marked is the absence of sanitary arrangements, the paucity of medical men and the very low standard of education. Referring to the latter point, this book says that since 1894 great efforts have been made to provide schools for the inhabitants of Eastern and Western Siberia; the schools in Eastern Siberia having been increased fourfold, those in Western Siberia ninefold, yet taking the whole of these regions into calculation, there are only 227 children out of every 1,000 sent to school. Until quite recently no newspapers or magazines were published, but in 1901 there were 56 such publications in circulation. At the close of this book the following remarks occur. For a very long time the world was entirely ignorant of the real state of Siberia, and as a consequence its barrenness was greatly exaggerated, In most parts of Siberia agriculture flourishes, and as for Western Siberia there are numerous districts where the people are as prosperous as any of the inhabitants of European Russia. Russia has done every-thing possible to encourage people to settle in Eastern Siberia, and agriculture in Amur is rapidly progressing. The prosperity of Western Siberia has been such that at present the one line of railway is quite insufficient for transporting the produce of that region. Though at present Eastern Siberia is comparatively backward, it will one day become as populous and flourishing as Western Siberia is now.

The Kyūchū Gishiki Ryaku (General Account of Court Ceremonies), lately issued by the Min-yusha, was compiled by Mr. Hirata Hisahi, one of the staff of the Kokumin Shimbun. It covers 377 pages and sells at 1 yen a copy. Court ceremonies form a subject that few Japanese and fewer foreigners know much about. This work gives an historical account of their origin, the

manner of performance and their significance.

The Boycki Jijo, published by the Hakubunkan, price 65 sen, is a work on Japanese Commerce compiled by Mr. Henry Satoh. It is founded on the collection of articles of commerce made by the Department of Agriculture and Commerce. It covers 478 pages. Mr. Satoh dwells on the important function filled by public exhibitions in determining wherein national commercial strength lies. In modern national commercial strength lies. times international competition is so great that every nation has to safeguard its own produce against the produce of rival countries as far as possible. Even a free-trading country like England is coming round to the view that preferential tariffs are absolutely necessary to the prosperity of a country situated as England is. Japan's trade has been making rapid strides, reaching 500 million yes in 1901 and 530 million yen in 1902. The interesting fact connected with this is the development of Japanese industry. The Fifth Domestic Exhibition held at Osaka revealed the fact that out of the 324,000 exhibits *She relies for more on diplomacy. She avoids years industry has progressed so rapidly that the home demand for numerous articles is supplied by Japanese factories, and Japan is beginning to send articles to other countries in such quantities that exports have already exceeded imports.

Articles of commerce consist of: (1) Raw ptosupport her.—(Writer of Summary.)

manufactured goods. The bulk of commercial profit is derived from the third class of goods, but it is here that Japan comes into competition with other countries; so that though she can supply China and Korea with her manufactured goods, she cannot compete with Europe and America, where the art of manufacturing goods at a cheap rate is far more developed than it is It is most desirable that we should pay attention to what is being done in the in-dustrial line abroad, says Mr. Satoh, but the prospects of Japan's being able to outsell Occidentals in certain lines of trade are decidedly not bright. Japan will have to keep to her own special line of art-industry and to take steps to open markets in China. Exhibitions in China for Japanese goods should be encouraged, says Mr. Satoh. He also recommends that more students be sent to China to investigate the state of commerce in that country.

Among the war articles published in the April Tuiyō we have only space to notice one or two. Mr. Shimada Saburō furnishes a forecast of the future course of events in the Far East in an article entitled "Twenty Years after the War-a He says that no Western Power but Russia is at all likely to disturb the peace of the Far East. America, England, Germany and France all want peace, and public opinion in these countries would never sanction large expenditures on aggressive warfare in China. Trade in the Far East is what alone these countries are bent on, and for this a long peace is essential. Sup-posing we are victorious, as we expect to be, continues Mr. Shimada, one of the conditions of peace must be the reversion of Saghalien to us, Russia must have no naval or military base in this part of the woold. To keep Russia away from the Far East would lighten the burdens of humanity generally not only in this part of the world but in Europe. Were it not for fear of Russian aggression, England would not need such a fleet as she now has in the Far East. It is about seventy years since Tocqueville predicted that Powers in the world, Russia and America.
Russia, following old world methods, relies solely
on the sword for her expansion * whereas
America, representing the new world, relies on
the plough. These two great Powers ten years the plough. These two great Powers ten years hence will certainly come into conflict in the Pacific Ocean. The opening of the Panama Pacific Ocean. The opening of the ranama canal will give greater prominence to the wide difference that exists between Russian aims and American aims. If America has to largely increase her fleet, that fleet will be certainly used to maintain the peace of the world and to oppose more ambitious aggression and bullying. The mere ambitious aggression and bullying. The whole of the Far Eastern world will be altered by the opening of that canal. West will be brought close enough together to allow of a strong alliance being made between the peace-loving and law-abiding nations against the blustering, law-breaking Powers. If Japan wins all along the line against Russia, the need for her keeping up such expensive armaments as she has now will no longer exist; for most certainly the Far East will be defended against Russian aggression by the combination of other Powers.†

Then Japan will enter on a new struggle, the struggle for preeminence in trade and industry, when her rivals will be England, America, Germany and Erance. China, too, will then become a formidable rival.

Even though as a nation we do well when an appeal is made to the sword, if it is found that we are invariably worsted in tradal and industrial competition our future success is not to be anticipated. Hitherto we have not utilized the benefits which success in arms has given us. Even in Korea we allowed railway construction to be undertaken by others before we became earnest

duce; (2) partly manufactured goods; (3) wholly about it. Success in this war will have its dangers for us. We shall try to educate the Chinese and we may help them to take measures against future aggression and spoliation. Then the notion that there is an actual "yellow peril" will take greater hold of the minds of Occidentals. There will be only one way open to us if we desire to show the groundlessness of the idea that we may one day combine against Western civilisation, and that will consist in living up to the standard of that civilisation through successive years of peace, thus prov-ing to the world that the wars in which we have during the past to years been engaged were not of our seeking but were forced upon us. The feelings with which we shall be regarded will be those with which many Englishmen regarded America when her civil war ended. A nation that is drunk with victory is in a dangerous mood, said the English, and the victorious American armies might be tempted to march against the Canadians. But the Americans gave no cause for any such suspicions. They returned to their wonted peaceful ways and showed that they knew when to sheath the sword as well as when to draw it. Their self-control enlisted the admiration of the English nation. It is my hope that we may follow the example of the Americans and gain the respect of the whole world for our steady pursuit of peaceful aims and occupations.

> Dr. Ariga contributes to the April Taiyo an article on "The Regulations and Usages of Civilised Warfare," of which we furnish a brief epitome. Japan's reputation thoughout the world will be greatly affected by the way in which she conducts this war. Ten years ago when at war with China even, a country which has no respect whatever for Occidental canons or usages, Japan strove hard to conduct hostilities in a manner that should be above reproach and she was eminently successful. When during the Boxer disturbances certain European troops committed atrocities, Japan's protest was joined to that of other Powers. We Japanese are apt to think that the Russian standard of conduct is a very low one. But in this matter these is a vast difference be-tween the standard of the Russian people, who are mostly Slavs, and that of the Russian Court whose members have no Slav blood in their veins, who come from a noble stock. The present House of Romanoff traces its connection with the famous Ruric. From the days of Alexander I, onward the Czars of Russia have constantly sided with the most advanced European countries in the advocacy of the establishment of more humane regulations in time of war. Whatever may be the practices of her troops, it is to the highest standard of civilisation embodied in the articles of the Geneva Convention that Russia will appeal when criticising us, We must resolve to act up to this standard throughout the war. The Russian Government cannot possibly openly sanction conduct of which the Russian Court strongly disapproves. In this country we have taken special care that our Naval and Military officers shall be well acquainted with inter-national law. In both the Naval and Military Academies lectures on this subject are regularly The Japanese Government has done all that lies in its power to acquaint all officers with the usages of civilised warfare. What is to be regretted, however, is the ignorance of the general public of what is right and proper in the attitude of belligerents to each other and to neutral nations. And occasionally the news-papers contain some very ignorant and mischievous papers contain some very ignorant and mischievous remarks on acts whose significance is not properly understood. It was supposed by some that had Russia bombarded a defenceless town in Hokkaidő, she would have been acting contrary to international law. But that is not so. This practice is allowed. As for Russia's stopping and searching ships, for contraband of war, of which searching ships for contraband of war, of which many writers complain, that, too, is within her rights. Hearing that Japanese are expelled from Russian territory, some ask why we allow Russians to remain in Japan? Others ask, why when hostilities commenced we did not at once seize all the Russian merchant ships in our harbours without giving them notice to quit? Others write as though the cutting of the submarine cable between Nagasaki and Shanghai

by the enemy was illegal. Some ask whether no neutral nations can trade in articles that con-stitute contraband of war? Some doubt whether the correspondence of Russians should be for warded by the Japanese postal authorities. On these and a hundred other subjects our Japanese public is quite ill-informed, and it is important that newspapers and magazines should give information on these points; for it is not enough that our Government should respect the canons of civilised warfare, our people must do so also, if the record of this big war is to be kept free from disfiguring blots. To this matter I call the atten-tion of all carnest and serious-minded men*. Among the character sketches published this

month by the Taiyō one is on Count Mutsu and Baron Komura, regarding them in the capacity of Foreign Ministers at critical times in the nation's history. The writer, Mr. Toyabe Shuntei, wields a very powerful pen. When negotiations of a delicate and important kind are proceeding much depends, says Mr. Toyabe on the character and ability of the Foreign Minister. The names of these two men will go down to posterity crowned with glory on account of the part they played ed with glory on account of the part they played in the two big wars which Japan has had to wage. Before the China-Japan war no statesman had a firmer grasp of the real situation than the late Count Mutsu. At such a time a strong-minded and talented Foreign Minister leads the nation. No one can can say that in the early part or even in the summer of last year Japan anticipated that a war with Russia would become inevitable. Not only did the nation not expect war, but the Government of the time did not anticipate it, (Nichi-Shin senyeki wa katsute kokumin no yoki (教祖) sesarishi tokoro naru nomi narazu, oso-raku wa toki no seifu mo mata kore voo yoki sesarishi naran). The official documents con-taining the negotiations prove conclusively that our Foreign Minister stuck to his points through thick and thin without regard to possible con-sequences. There is little doubt that in his own mind Baron Komura foresaw the inevitableness of war a long time ago. Certain it is that the late Prince Konoe was so satisfied that Baron Komura did not mean to succumb to Russian bluff, that he dissolved the anti-Russian Domeikai of which he was President, in perfect confidence that the objects of the Society would be realized by the Japanese Government, and that there was no cause for further agitation on the subject. Prince Konoe trusted Baren Komura implicitly. The Baron was not Prime Minister, nor was he backed by a party. But he had confidence in himself. (Kare wa jiko no hoka nani-bito wo mo, nani none to not tanomasar cha unraint;) In diplomacy he showed rare straightforwardness and rare patience. The negotiations were kept on a high level throughout, and this could only be done by a man who possessed a lofty ideal.

Dr. Katō Hiroyuki has recently published a pamphlet on the present situation entitled Shinkwagaku yori kwansatsu shitaru Nichi-Ro no Uninei (The Destiny of Russia and Japan regarded from an Evolutionary point of view) Dr. Katō believes that the higher types of civilisation are bound to get the better of the lower types when they come into conflict with them. He says that Russia's barbarism is too well known to the world to need lengthy demonstration. In her intercourse with other countries Russia respects neither law nor morality. Her methods in dealing with other nations are those of the highway robber. The two countries are in thought at the opposite poles and that they should go to war was inevitable. Dr. Katô is of opinion that the present union of the Japanese nation is something unparalleled and he attributes it to the feeling of

* Dr. Ariga's earnest article ends thus :- Sore ni

loyalty to the Emperor which exists everywhere. Dr. Katō's es ay covers 88 pages. It contains little that is new. At the close the author It contains thus sums up the position and the ideals of the two countries :

Japan.—Her subjects only desire to serve their Sovereign and their country loyally.

Russia.—Among her subjects not a few have no regard at all for the Czar and concoct plots

against the Royal family.

apan governs constitutionally and makes a point of bowing to public opinion.

Russia governs arbitrarily and despotically in open defiance of public opinion.

Japan makes no distinction between the rights and obligations of different classes of society. High and low are treated alike.

Russia allows her nobility to rule the common people with a rod of iron.

Japan, while consulting her own interests, strives to preserve peace among all civilised countries.

Russia, in the furtherance of her selfish interests, is prepared to turn the world upside down.

pan is keen about education and general enlightenment.

Russia cares nothing for these things, and in this matter ranks low among nations.

Tapan both in diplomacy and in war respects

international law Russia in both diplomacy and war gives no heed

to international law. Tapan's treatment of other countries is marked

by gentlemanly courtesy.

Russia's attitude to other countries is that of

low-class person (惡 漢, Akkan, rascal).

Japan, having that fitness which insures survival, will become more and more prosperous.

Russia, being altogether out of harmony with the present age of civilisation, is doomed to des-

truction.

A few months ago Dr. Takahashi Sakae, the well-known Japanese authority on International Law and Diplomacy, published a book entitled Manshii mondai Kaiketsu (The Solution of the Manchurian Problem), which is dedicated to the late Prince Konoe, who is referred to as a man who hastened his death by his devotion to Japan's interests in the Far East. As might have been anticipated Dr. Takahashi's work is a most clear and scholarly exposition of the cause of the present war. The work is divided into six chapters. Here is the list of contents. Chap. 1. The most important points in the collision between Russia and Japan. (1) Japan's policy.

(2) Russia's policy. (3) Summing up. Chap. II. The solution of the Manchurian Problem. (1) The Solution of this problem is at once one of our rights and one of our duties. (a) Why a right? (b) Why a duty? (2) The Manchurian question is a question intimately connected with Japan's national existence. (a) General statement of this aspect of the subject. (b) Instances of of this aspect of the subject. (b) Instances of steps taken by other countries in self-defence Chap. III. The best way of dealing with Manchuria—the creation of a buffer territory (穀 衛 地) Kwanshōchi. (1) The meaning of "buffer territory." (2) The portion of Manchuria that should constitute such territory. (3) Answers to the arguments of those who object to the that should constitute such territory. (3) Answers to the arguments of those who object to the creation of such a state. Chap. IV. The next best way of dealing with the Manchurian question.—The withdrawal of Russian troops from Manchuria. (1) The reasons for demanding withdrawals. (2) Instances of withdrawals demanded elsewhere. Chap. V. The Time for the Solution of the Manchurian Problem. Chap. VI. Schemes for setting the Manchurian Problem. VI. Schemes for settling the Mancharian Problem.
The circumstances which led to the publication of the views of the Seven Professors. Various essays and newspaper articles bearing on the question. Dr. Takahashi's book sells at 60 sen

to make her forget her traditions and her peculiar ideals. In one sense she is a very old Power. Let her not despise the rôle she has played in her long normal life under the spell of these abnormal months. Rather than Romanticism the Chūō Koron would see the spirit of neo-classicalism holding sway over men's minds.

The Chuo Koron publishes an interesting article written by Mr. Tomita Tadanori, head of one of the sections of the Patents Bureau entitled "The Progress of Industry and Patents," of which the follows is the gist:—It is quite common to hear it said that in the matter of inventions Japan is nowhere. Now, it is perfectly true that a large number of patents issued to our recoils are not for number of patents issued to our people are not for articles which can be put into general everyday use or for methods bearing on practical life. to a certain extent this is the case with all counto a certain extent this is the case with all countries. In every country at the present time the majority of inventions consist of improvements or new adaptations of old methods, instruments or appliances. Watt's steam-engine was a very poor thing compared to a first-class engine to-day. The inventors of to-day are not as a rule the originators of something that in all its parts is absolutely new. They are perhaps not entitled to be called great inventors. But nevertheless it is satisfactory to find that at no period in our national history has the development of this branch of human activity and resourcefulness ceased. The various articles now in use have been gradually improved till they have reached their present form. This is the case with household utensils of all kinds, with foot-gear, clothes, lights, and so on. Had we been in the habit of granting patents for ages, we should have a pretty good record to-day as compared with other countries, though perhaps it is true to say that our inventions have kept more to things ornamental than things useful. But in the matter of inventions every country has its special proclivities, and the class of articles originated is determined by the customs in vogue in each country, and by national standards of civilisation. It is un-reasonable to expect that new inventions should as a rule do more than supply a national want. Inventions that benefit the whole world alike are very few. Since the issue of the Patents Regulavery few. Since the issue of the Patents Regula-tions in July, 1885, down to the end of last year the total number of patents granted by the Patents Bureau was 6,992. Of these 871 were granted to foreigners and 6,121 to Japanese. In recent years they have constantly increased in number as well as in importance. The inventions of recent years have been principally connected with industrial machinery or appliances. They have covered a very wide area, including almost every industry known to our people. Treating every industry known to our people. Treating them in order, inventions connected with in-dustrial machines stand first. Next come chemical inventions and new methods of using electric power. In this country ingenuity has been shown in devising mumber of small hand worked machines of various kinds rather than in the production of huge factory works. Since foreigners have been allowed to take out patents in this country, our industry has been benefited in many ways and there is likely to be much more of this in future. It seems to be a fact that many Japanese engaged in industry are careless about patenting the machines they use or the methods they follow, and it sometimes happens that foreigners step in and obtain patents for things which Japanese have been using for some time.

Comparing our country with America we find that in the United States the total number of patents granted since 1832 down to the end of last year was 748,566. Those for last year only were 31,046. There were of course among these not a few which were for articles or methods that were not of much use to people generally, but American inventions suffice to show that ** The Chāo Koron in an article entitled "New were no less that it some respects Japan is going alead too fast and that between the years 1872 and 1900 there were no less than thou for the higher of students of Japanese.—(Writer of Summary).

ment, as is evinced by the fact that between 1790 and 1895 there were no less than 5,535 women inventors in that country. Our industry is inventors in that country. Our industry is now making rapid progress and everywhere manual labour is being replaced by machines. There is a great call for such thinking mechanics as America possesses in large numbers, for men who are something more than machine working automata. We must aim at contri-buting something to other countries in the way of approved methods, appliances or instruments, in return for all we have borrowed from the West. The following table shows the number of patents

subscription price. It covers 1,300 pages and treats of every important subject connected with the Eastern world, giving short biographies of all noted men, geographical descriptions of countries, accounts of various customs, usages, etc. Though

the type used is small, the printing is clear.

The Kinkodo has published a work written by Mr. Yoshida Kunajirō, B.A., entitled Shakuitki Kyōikugaku Kōgi. (Education discussed from a sociological standpoint). The author maintains that no system of education which is not based on sociological conditions and wants can ever be thoroughly successful. A study of ethnology, sociology, and of evolution generally is absolutely essential to a thorough understanding of the educational question awaiting solution. Mr. Yoshida writes as a specialist, and his work is said to be up to date in every sense of the word. It sells at 1 yen a copy.

The Kokkagaku Zasshi is a monthly semipolitical and semi-business magazine which has now reached its 206th number. The articles published in this periodical are mostly contributed published in this periodical are mostly contributed by University professors and graduates. The magazine is not one of the high and dry type which so many learned institutions the world over produce. It discusses a number of the vital questions of the day. In a recent number we find an article by Mr. Ukita on "Imperial Socialism." As is hinted at in the title, this essay is an attempt to show that Japanese Socialism peed not necessarily become and is not Socialism need not necessarily become and is not likely to become a menace to the authority of the State. At the close of his article on this point he says, Shakai shugi ga okonawareru to kokutai ga abunai, kokka ga kiken de aru to iu kolo wa go mo arubeki hazu ga nai to omou. Koto ni gakumon wo shita hito ni so iu kangat ga arubeki hazu wa nai to omoimasu. Mr. Ukita thinks that the Imperialism of the future will most certainly have to rely largely on the strength of Socialism in order to realize its principal objects.

MODERN LIFE IN RELATION TO HEALTH-

[Read before the Yokohama Literary Society on Friday, April 22nd, by N. Gordon Munro, M.B. and C.M., Edin.]

(CONCLUDED FROM LAST ISSUE.) The beneficial effect of a change to the country is doubtless enhanced by the cessation from work, is doubtless enhanced by the cessation from work, habit of regular meals, is no doubt an ad- a glass of milk or a cup of tea, perhaps with one and particularly from worry, which the holiday too briefly ensures. In this country perhaps that of regular meals, is no doubt an ad- a glass of milk or a cup of tea, perhaps with one and particularly from worry, which the holiday too briefly ensures. In this country perhaps with one and great drawback, namely, biscuit as a sop to the petulant stomach until it that persons are induced to eat at times when they have no A good appetite will then be waiting existence, are not hungry, or rather when they have no A good appetite will then be waiting for dinner, itself throughout the daily task, and sometimes are not hungry, or rather when they have no A good appetite will then be waiting for dinner, itself throughout the daily task, and sometimes are not hungry, or rather when they have no A good appetite will then be waiting for dinner, itself throughout the daily task, and sometimes are not hungry, or rather when they have no A good appetite will then be waiting for followed come the habit of eating at certain hours that we by rest or some pleasant relaxation. Some persons its accompanying irritability do not always arise experience a feeling of depression at stated times, prefer to go without breakfast, but it is a matter from external causes, such as business problems which we call hunger, but which is by no means for individual convenience as long as only two

instance, being the author of no less than 742 and anxieties. Sometimes it arises from overwork, a reliable indication as to the necessity for food inventions. In the United States the inventive but then the gauge of overwork depends more It is to be regarded as a call for a stimulant, in this faculties of women are in a high state of development, as is evinced by the fact that between 1790 the worker. It is not uncommon to find that the rendered periodic. The amount of food consumed amount of work to he undertaken is less than was formerly accomplished with ease, but that the afford it, is greatly in excess, not only of human worker is imbused with a fixed idea that the requirements, but of our capacity of storing it. day's toil in too much for his capacity. He is unusually irritable and has lapses of memory which are trivial but appoying. He has difficulty in concentrating his mind on his work, and, especially in the early part of the afternoon, he has some confusion of thought and feels as if especially in the early part of the afternoon, he has some confusion of thought and feels as if m provender by creating a demand in excess of the weight were pressing on his head. Occasionally he suffers from insomnia and even when he sleeps should be worshipped as patrons of trade, or soundly he awakes unrefreshed. Nowithstanding execrated as spoilers of the poor. Seriously The following table shows the number of patents granted every year since 1885: 1885, 99; 1886, 1887, 109; 1888, 183; 1889, 209; 1886, 240; 1891, 367; 1893, 379; 1893, 318; 1894, 293; 1896, 169; 1897, 188; 1898, 1898, 1898, 1898, 1899, 597; 1900, 586; 1901, 606; 1902, 871; 1903, 1,024. Patents were granted to foreigners from November, 1897, and between that time and the end of 1903 no less than 871 were issued to them as stated above.

The Döbunkan announces the publication at an early date of an Oriental Historical Encyclopædia called the Töyö Rekishi Daijiten, to be even. There is some reason to think that even the physicological process of man are controlled to never seven were fload to the seven of the seven seven some fload to never seven where is each of the long day's labour, the time fliest time flies to long day's labour, the time fliest time flies time fliest mage time from the time fliest mage to the fleet as if he had been a specific of alcoholic, when he week that of alcoholic, of disease, from gout and rheumatism to dyspeper of ois truth, as the result of putting "a square mean of disease, from gout and rheumatism to dyspeper of ois truth, as the result of putting "a square mean of the disappears like magic. Not only the rest is that subtle psychological process, namely, for the disappears like magic into a round stomach." The higher branches of the disappears like magic into a round stomach. The higher branches of the culinary at have for their object the disappears like magic into a round stomach. The higher branches of the culinary at have for their object the disappears like magic into a round stomach. The higher branches of the culinary at have for the by sub-conscious intelligence, the physical degree of mind which takes its cue from the habits of bygone ages. It may be that this change of scene awakens certain sub-conscious impressions in the fundamental strata of the nervous system and thus revives the latent energy inherited from early man. It may be that the result is rather due to the suggestion of serenity and placid strength—the "strength of the hills," and the soothing effect of the greens and gentle greys. Here, in some sheltered bower, his thoughts lose their tumultuous presentation and conform to the quietude of his surroundings; to use the words of a 17th century poet,

"Annihitating all that's made To a green thought, in a green shade."

There is a great temptation to undertake long and tiresome walking excursions, under the stimulus of fresh air and beautiful scenery, but gout, rheumatism, and excessive mental irritabi-in such cases as this it is wiser to limit one's lity. The defective oxidation upon which its self to a modest stroll once or twice daily. his return to work he may prove quite capable of undertaking with ease the labour that previously undertaking with ease the labour that previously needs of the interior economy, either through past seemed so hopelessly beyond his powers and this happy state may continue for some time. It question, is life worth living? and the answer that the pens frequently, however, that the improversion of the condition which I have roughly sketched. It is certain that the amount of food which can be considered which are roughly sketched. As to the cause of this, I have given due credit

We may be sure that our early ancestors did not suffer from "nerves" and such like ills of mental life as afflict modern humanity. Business was conducted on "cash principles" and such a thing as "failure to take delivery" was unknown. thing as "faiture to take delivery" was unknown. The business man had no godown rent and fire insurance to pay, nor did the question of an overdraft trouble him in any way, He had worries of his own, but they were of a more personal kind; the problem as to where the next meal was to come from was not infrequently on His idea was to eat when he was hungry, but there must have been many times, during the glacial period especially, when he was hungry for preferable, if only one does not eat too much.

The question as to when to eat is a value of the preferable of t top. long before he could get a substantial meal. As The question as to when to eat is a very things improved, and especially after man had important one and depends upon the hours of entered upon the agricultural stage of civilization, occupation more than on anything else. I favour

by the well-to-do and even by many who cannot

too much, whose appetites are as those defined by the school-boy, "Appy when you're eating and tight when you're done," when we think that eat, at least many live by tempting others to eat.

I take it that we all know what it is to have eaten too much and that we have all repented of it for a time, but few of us realise that we habitually eat too much and that much mental as well as physical derangement results from it. The majority of us certainly eat too much, and usually too frequently, which is quite as bad. Apart from indigestion, there are two names which have become household words within the last ten years and which testify to the errors of living and especially of diet, in modern times. I refer to "Uric Acid" and "Appendicitis." With regard to the former, I can only say here that it is a product of imperfect oxidation, which has been credited with the causation of nearly every disease under the sun, but which we can safely associate with the production of presence depends has been traced to the liver, whose functions have become insufficient for the be safely taken, depends largely upon the amount As to the cause of this, I have given due credit pe sately taken, depends largely upon the amount to the influences bearing on him from his surroundings. I have omitted to mention something are a few persons who are not benefited by much which, I am pursuaded, has more to do with physical work and there are others who immediate the production of such a condition than anything ly feel below par when they miss their exercise else, that is the question of eating and drinking in relation to work.

Some area of this, I have given due credit persons who are not benefited by much physical work and there are others who immediate else, that is the question of eating and drinking in relation to work. ever you can;" very light dumbbells in the morning before an open window, and from half to an hour's brisk walk later in the day, with a cup of tea or brisk water later in the day, with a cap of con-milk in between if there is much craving for food. Then you can say goodbye to uric acid. If you have inherited this insufficient functioning of the liver, called a gouty constitution, then you must be careful about mixing meat diet with sugar-forming food. In this case it is well to take very little meat. I do not think that a purely vegetarian diet is essential to health, though it can be made quite sufficient. I tried it for a year, but I am inclined to think that mixed diet is

the necessity for concerted labour led to the estable a light breakfast in the early morning, say at lishment of regular meal hours. In itself, this seven, or half past, nothing during the day, except habit of regular meals, is no doubt an ad-a glass of milk or a cup of tea, perhaps with one

meals are partaken of daily. It is most inadvisable to do mental or physical work immediately after a meal. Thinking and moving both imply the increased flow of blood to the active parts and the same applies in even greater degree to the process of digestion. The presence of this blood is present to the prepresence of this blood is necessary to the performance of the function, whether it be of thought, movement or digestion, and this blood cannot be taken from one part during its activity

which I would like to refer, if you do not think that my homely remarks are too obvious. Most of us eat too rapidly, in fact we "bolt" our food, so that it is not properly masticated. Modern life is so full of other interests that we are apt to rush through our meals. This is a fertile source of dyspepsia and has been neatly stated in what I think is an American witticism, "Lightning lunches are followed by thundering pains." It is well to bear in mind that our throughs have no teeth and that when once food "Lightning lunches are followed by thundering pains." It is well to bear in mind that our stomachs have no teeth and that when once food has passed the portals in which nature has placed special apparatus, not only for its discrimination but for its trituration and partial digestion. it is well this is invariable a harmful thing and special apparatus, not only for its discrimination but for its trituration and partial digestion, it has gone beyond recall. The teeth are of the highest importance and if our modern habits of eating are leading to their premature decay, our modern dentists are quite capable of maintaining them for us as efficient organs. On the other hand, the "resources of modern stomachs, and we must be careful not to throw an unnecessary amount of work upon them. The proper trituration of the food does indeed save our other digestive organs a vast amount of work set of conditions which is called "modern life." our other digestive organs a vast amount of work which they are specially adapted to. At the which they are specially adapted to the same time the conversion of starch into grape sugar goes on apace and as this cannot very well go on in the stomach, owing to the acid in the latter, an excess of undigested starch is liable to act as a foreign body and undergo fermentation. It is a toreign body and undergo remembers. It is for this reason that pastry is not easily digested, the starch granules being surrounded by envelopes of fat which prevent contact with the sugar converting ferment of the saliva. I believe that Gladstone had some rule about masticating each mouthful so many times before swallowing it, and this is helpful. If, however, we could only get into the habit of giving ourselves ample leisure to eat and of masticating our food until it is reduced to the fine pulp that is the only state with the fore storned direction, any further subsuitable for stomach digestion, any further rule would be superfluous.

In connection with errors of diet the now familiar trouble, appendicitis, may call for a pas-sing mention. There can be no doubt that any sing mention. There can be no doubt that any impediment to the free return of blood through the liver is a strong favouring cause of those infections which bear this name. The part most liable to this infection is a survival of an intestinal pouch which may have been of use in the very earliest days of humanity, but which has very earliest days of humanity, but which has undergone contraction and degeneration, and which is called the appendix. It has been the fashion for surgeons to hunt and to exterminate this offending member whenever it is out of sorts. We have read and heard of them, some claiming to have removed fifty, some five hundred, and perhaps even five thousand. I contess that this sort of thing suggests the "bag" of a day's snipe shooting, or perhaps even more the tally of scalps which used to be such a source of happiness to the red Indian of yore. I would be the last to deny that the operation for removal is not of the highest value in selected cases and, unfortunately, it is sometimes the only hope in

those fulminating cases where it is of least avail. A more reasonable view of its treatment, however, A more reasonable view of its treatment, however, has now set in and absolute abstinence from everything but water, with absolute rest, will usually effect a cure, or at least such improvement as will enable the patient to be operated on with little risk by an experienced specialist.

I feel it incumbent on me to tell you even at the risk of sgain wearying you with obvious facts, that the alcoholic habits of modern life are cannot be taken from one part during its activity without impairing its function. To attempt to carry on the two important functions of thinking and digestion is the same as if one were to attempt to irrigate two fields simultaneously with water which only suffices for one at a time. I am confident that, if business or professional men, who have to think in the afternoon, will only forego the heavy tiffin which is set up for them to devoir as a sort of pious offering to propitiate the evil spirit within, they will feel infinitely better, be much less irritable, and have a perfectly clear head for the daily task. Of course where actual nerve debility has followed long standing indiscretion in diet and work, a period of rest will also be necessary. also be necessary.

In speaking of diet, there is another point to which I would like to refer, if you do not think because therefore his brain no longer gets its covers because he has reached the ground and because therefore his brain no longer gets its nourishment against the force of gravity. The giving of the alcohol is a purely incidental occurrence, which has no connection with his recovery. It cannot be too widely understood, that alcohol is a narcotic and that its narcotic effects there is within one minute of its recention. It is begin within one minute of its reception. It is true that it quickens the beat of the heart, but it

set of conditions which is called "modern life," it is absolutely essential for health as for happiness, that we regulate our conduct so as to assist and that we regulate our conduct so as to assist and protect each other. To give only one instance in point, there are many infectious disorders, both of a grave and mild type that could be prevented from invading the domiciles of our triends or acquaintances. When our children triends or acquaintances. When our children have measles or whooping cough, or even an influenza cold, let us see that infection is not carried elsewhere to cause distress or annoyance to our neighbours. It is by such small but very potent considerations of mutual help that the fabric of humanity has been reared, and it is by these that it must stand or fall.

AMATEUR THEATRICALS.

Yokohama extended a very warm welcome on Saturday evening to the members of the Tokyo Dramatic and Musical Association. The Public Hall was crowded, extra seating accommodation having to be provided, and as every one arrived with a punctuality that cannot be too highly commended, the proceedings began at the hour named in the advertisements, nine o'clock, with the house all quiet and expectant. It is welcome galore amid the tumultuous plaudits of a delighted house.

house.

The second play, "The Highwayman," for all its artificiality, was capitally given. Mrs. Barclay madea delightful old-world picture in her powder and patches and eighteenth century clothes, while her playing was perfect. As for Mr. Brady, he has seldom pleased us better, and though the house rather thoughtlessly laughed aloud when he first produced his "barker," its mood changed under the compelling power of his dominant personality and the closing speeches were followed with rapt attention. Needless to say, the garotte had to be danced twice before the audience allowed the duologue to proceed; and even then it was inclined to ask for more. Mrs. Barclay was rewarded to ask for more. Mrs. Barclay was rewarded with banks of flowers. A word should be added regarding the setting of the scenes. The first piece, being in the present day, showed a lady's bouldoir typical of the time; the second bore the sustant improves of two continues are bore the austere impress of two centuries ago.

Nothing could have been in sharper contrast. the bewildering litter and over-crowding of the 20th; the chaste simplicity of the eighteenth century.

The music provided by the Bijou Orchestra was of an equally high class with the acting. It included:

١	March " Hands across the sea " Sousa
ì	Selections "The Prince of Pilsen" Liners
ļ	Interlude "The Myriad Dancer" Allen
١	March "Uncle Sammy"Holzmann

THE LAW COURTS.

THE LAST OF THE JOVANSEN—CLUB HOTEL CASE.

Our readers will be interested to learn that the action brought by A. Jovansen against the Club Hotel, Ltd., and known during its slow progress as the Jovansen—Club-Hotel case has at length reached an end. The following exemplication of judgment has been issued in the Tokyo Court lof Appeal. of Appeal :-

In re the matter of an appeal case between In re the matter of an appeal case between the above parties in respect to a claim for damages (Case No. 701 (No) for the year 1903) the Court hereby render judgment as follows:

It is ordered and adjudged:—

1. That portion of the former judgment ordering the defendants to pay to the plaintiff the sum of yen 2,050, together with costs, is rescinded and cancelled; and the claim of the respondent is

dismissed. 2. All costs, both in first and second instance, are to be borne by the respondent.

NAIGAI BOYEKI KAISHA v J. L. O. EYTON.

This case came up again in the Yokohama District Court on April 22nd when judgement was delivered :-

- 1.- Defendant was ordered to pay yen 121 to plaintiffs' firm.
- 2.-The parties to bear the costs, half each.

CLAIM ON SHARES

The hearing of the case instituted by Mr. R. J. Ward against B. Sho, a share-broker, claiming yen 8,515.60, began on April 23rd in the Yokohama District Court before Judge Danno.

Messrs Masujima and Hiraoka represented plaintiff and Messrs Shioiri and Jijichi defendant.

At the outset of the proceedings defendant's counsel asked the Court to dismiss the case on the ground that defendant, the proprietor of Tokumiya, had no domicile in Yokohama, and so the matter could not come within the juris-diction of the Yokohama Court.

The Court did not give a decision upon this objection. Plaintiff's coursel stated that plaintiff ordered defendant to purchase 110 shares and to deliver them in the end of April, and paid the latter yen 2,159,60 on Feb. 2nd last as bargain money. On Feb. 12th last plaintiff sold the 110 shares through defendant for yen 19,833, making a profit of yen 4,411. Having taken off yen 55, due the broker, there remained a balance of yen 4,356. On Aug. 20th last, plaintiff further invested yen 2,000 in shares through the same broker under a promise of being paid back the whole amount at the end of the same month. Payment had not yet been made although plaintiff had often urged defendant to do so. Counsel asked the court to order defendant to produce the stamp used by him and to compare it with the seal impressed on the documents presented as evidence.

Defendant's counsel held that the proprietor of Tokumiya, No. 87, Yokohama was Mr. N. Morito and not B. Sho, though the latter used the same firm name.

The Court gave consent to the application of plaintiff as to the stamp and adjourned the case till May 5th.

CLAIM ON A PROMISSORY NOTE.

On April 21st, in the Kobe Chiho Saibansho. the hearing was resumed of the action in which Kitamura Umekichi, of Kobe, sues Frank Tonnochy for the sum of yen 600, lent on the latter's note of hand in February last and payable a month later. Plaintiff was represented by counsel, but defendant did not appear and judgment was given in default.

OBJECTION TO SEIZURE OF PROPERTY.

The hearing of this case, instituted by Mr. H. V. Gielen against Mr. H. J. Jewett, was resumed on April 26th in the Yokohama District Court before Judge Danno when H. Mita, a representative of the bailiff who seized the business books at the office and godown of plaintiff, was examin-

He stated that on Angust 10th last he seized the business books which were in the custody of the business books which were in the custody of plaintiff. He found six or seven books in the office and several in the third-story of a godown. Some were kept in boxes and others were tied in bundles. He did not know what was in the books. While he was seizing the books, he was told by one of the Japanese in the office that some had been torn-up and put into the fire. But he added that he could not exactly reply to the Court as to the alleged fact of certain books being torn-up.

After hearing Counsel, the Court advised the parties to settle the case out of the Court, urging that it seemed the dispute had arisen from mutual

misunderstanding.

Plaintiff's counsel refused to settle the case out of Court.

The case was again adjourned.

ALLEGED INCENDIARISM.

The trial of M. C. Fernando, who is charged with incendiarism, was resumed on April 27th in the Yokohama District Court before Judge Matsuyama and Public Procurator Midzutani

The Court read the statement given by Mr. Iwata, an official of the Yokohama Hygienic Laboraan official of the Yokohama Hygienic Laboratory, who had been called in to analyze the sulphur found in the sample room of the office where the fire occurred. He found (1) that the sulphur would not of itself cause fire; (2) in consequence of the room in which the sulphur was kept being closed it could not of itself cause the fire; (3) it was due to their negligence, would not cause fire even though it was stirred up with a stick or a cane; and (4) 13 or 14 the proceedings, as defendants were investigating.

K. Ishii, a Japanese employed by the accused, was examined. He stated that he was employed by the defendant on January 26th as a clerk. On Feb. 22nd fire took place in the office of the accused, but witness did not know of the accident until he came to the office the following morning. He did not stir the sulphur in the sample room with a cane the previous day. He was told by the accused that the latter had thirty thousand yen deposited with the Yokohama Specie Bank. The accused seemed to have rejoiced at the fire, but later appeared disappointed when the insurance agent refused to pay the insurance

Counsel employed for the defence presented to the Court a letter from a customer in Colombo which stated that accused was not involved in monetary distress.

The Public Procurator made a brief speech in which he stated that the evidence against accused was sufficient for conviction and that he should be punished under Art. 403 of the Penal Code—"Whosoever shall have willingly set fire Code—"Whosever shall have willingly set fire to buildings or any other structures belonging to another, not serving as dwellings, shall be punished with penal servitude for life."

Mr. Matsuda, defendant's counsel, strongly protested against the Public Procurator's argument,

stating that there was no direct evidence against the accused. He asked that the man be acquitted on the ground of insufficient evidence.

The trial being concluded, the Court declared that sentence would be delivered on April 29th

TRIAL OF A DIRECTOR.

Mr. J. Matano, one of the directors of the Chuo Commercial Bank, who was charged with fraud, was acquitted on April 26th in the Tokyo District Court on the ground that the evidence against him was insufficient.

It may be remembered that the shareholders prosecuted the director on the ground that he appropriated money belonging to the bank by

BAMBERGER v. SCHROEDER.

The hearing of this case, in which plaintiff claims yen 50.85 and defendant counter-claims for yen 99.99 was resumed on April 28th in the Yoko-hama Local Court when defendant's counsel asked

the Court for leave to examine two Japanese, late employees of the Central Hotel, No. 74.

The Court granted the application and adjourned the case till May 10th.

CLAIM ON THE H. & S. BANK

This case, instituted by Mr. D. Nancomal, an Indian merchant, against the Hongkong and Shanghai Banking Corporation, claiming yen 300, came up on April 28th in the Yokohama District Court before Judge Danno.

Mr. R. Ideura appeared for plaintiff and Mr. Masujima for defendants.

Plaintiff's counsel stated that his client received on Nov. 27th last a letter from a customer, Mr. Dhananal Chellam, in Hongkong, in which he said that an order for *habutae* silk valued at five thousand yen was enclosed, and that the money was to and year was enclosed, and that the money was to be remitted by telegraphic transfer through the Hongkong and Shanghai Bank, before Dec. 5th or 7th and that the goods were to be shipped before Jan. 4th or 5th. Plaintiff had thus to await notice from the bank, which often had business with him in similar transactions. ness with mm in similar transactions. The bank received the money from its Hongkong branch by telegram on Dec. 14th but delayed sending notice of its receipt to plaintiff until the 29th of the same month, so that the latter failed to ship the goods on the date fixed by his customer. Consequently plaintiff lost the commission, five

kwamme of sulphur would take six or eight hours to burn and the fire would probably extinguish arrival of the telegraphic transfer. If it was itself before the whole mass was consumed. defendants would of course be glad to pay the damage claimed by plaintiff. Coursel added that at present he could not reply to the points raised in the petition.

The case was adjourned till May 24th when the bank will present the results of its investigations.

tigations.

A SILK TRANSACTION.

The hearing of this case, instituted by Mesers. W. M. Strachan and Company against M. Sarasawa, habutae silk dealer, claiming year 422.30, was resumed in the Yokohama District Court before Judge Danno on April 28th.

S. Kato, a silk broker, was examined as a witness.
He stated that he established a branch office in January, 1902, at Fukui, Echizen province, and kept it till May, 1903. During this period, he was carrying on business with a firm at No. 95, Yokohama. After May, 1903, when he was about to close his branch in consequence of dullness of trade the foreign firm induced him to continue the branch under promise that the firm would assist him at the rate of two hundred yen per month. Witness then removed his branch to the office of defendant, paying a hundred yen yer month as sundry expenses. The witness was engaged in selling habitae silk to several foreign firms in Yokohama, but he did not use his name in the transactions in order to avoid bad feeling with the foreign firm at No. 95, with whom he had a special connection. In August last, he coucluded a contract with Messrs. Strachan and Company to supply habutae silk, on behalf of defendant, but it was really a business deal on the part of witness and did not concern defendant. Before the conclusion of the contract, witness asked Sarasawa, defendant, to supply silk to Mesars. Strachan and Company but the latter refused as there was a difference of sen 10 per 100 momme in price. Witness accepted the order as a speculation, anticipating that some fluctuation would occur in the market. Forty-five days intervened between the date of the contract and the delivery of the goods. Of about twelve hundred pieces of silk promised to Messrs. Strachan and Company, nearly one half was offered by defendant. Witness signed the contract as the representative of defendant.

Defendant's counsel presented some letters addressed to defendant, as evidence, as to which witness gave a brief evolunties.

witness gave a brief explanation.

Plaintiff's counsel asked the Court to consent to Plantit's counsel asked the Court to consent to examine a Japanese who took part in the business, but the Court rejected the application, after which, having summarized the evidence, the parties entered on a brief discussion.

The Court adjourned the case till May 3rd, when Judgment will be delivered.

A ROBBER.

The preliminary examination of Y. Mikami (25) who is charged with having murdered on the night of March 4th, 1903, a woman by strang-lies her to death and then robbed the house of fifteen yen and some articles, has concluded in the Tokyo District Court. The man was committed

A LAWYER CONVICTED.

The appeal of Mr. R. Yuiki, a Tokyo barrister, entenced in the Tokyo District Court to four months' imprisonment with hard labour, a fine of five yen, and six months' police surveillance on a charge of fraud, was rejected by the Court of Cassation. The sentence having been confirmed, he was removed on April 21st to prison.

A MURDERER SENTENCED.

Y. Udagawa (38), a farmer, in the village of Ekita, Minami-Adachi, near Tokyo, who murder-

27th in the Tokyo District Court, which case was 27th in the Tokyo District Court, which case was lodged by Mr. A. Hofmann, of the Kobe branch of Messrs. H. Ahrens and Company, was again called on April 13th in the Tokyo Appeal Court before Judge Miyake and Public Procurator Tanatics. bashi, when a decision was rendered rejecting the

On April 22nd, the trial of M. Irii and N. Tsuchiya, nominal editor and publisher of the Chuo Shimbun, at the instance of Mr. Ikariyama, Chief of the Kaga-cho police, Yokohama, took place in the Tokyo District Court before Judge Ishii and Public Procurator Oba. After the Ishii and Public Procurator Oba. After the examination a lengthy discussion between the Public Procurator and the lawyers employed in defence followed. Counsel then asked the Court for leave to examine Arimatsu, Sakai, Hasegawa and Sekimoto as to the relations between the chief of police and M. Takahashi who was convicted in the Yokohama District Court of having been in Russian service as a spy. The Court rejected the application. The case was adjourned till April a7th at 9 a.m. when judgment will be delivered.

On April 26th the hearing of the case lodged by Mr. S. Isaacs against Mr. Max Isaacs, claiming twelve thousand yen, on the ground that defendant, in the course of the proceedings in another case made a statement which was defamatory to the reputation of plaintiff, was resumed in the Yokohama District Court before Judge Danno.

Mr. M. J. Dayet was called as a witness.

Plaintiff's Counsel asked that the Court be closed to the public on the ground that this case had arisen through another case in which a father and brothers were concerned and that any details given by the witness might be injurious to social

Without giving a decision as to this application, the Court examined Mr. Dayet.

The witness stated that he was manager in Yokohama for the branch of Messrs. R. Isaacs and Bro., whose head office was in New York. During his service with the firm he informed the head office of some suspicious points in the business, but he said nothing regarding the business books.

Cross-examined-He entered their employ in 1899 in the Hongkong branch of the firm; in 1900 he came to Kobe, entering the branch there, and in October, 1901, he was moved to Yokohama, leaving the branch here in April or May, 1903. Before he removed to the Yokohama office, Mr.

S. Isaacs was managing the firm as a partner. Mr. Sawada, defendant's counsel, further crossexamined—"What was the kind of information you supplied to the head office if it was not with regard to the business books as you just stated to the Court? Was it made with regard to any important documents in the business?"

Upon this question being put, Mr. Masujima, plaintiff's counsel, again asked that the Court be closed, and stated that he did not like to have the details of the case published abroard, as they were concerned with the private matters of a

Defendant's counsel said that it were better for plaintiff to withdraw the case if the latter did not

like to have the details published abroad.

The Court then excluded the public and at the close of the examination of Mr. Dayet adjourned the case till April 28th.

On April 28th, the case between Mr. S. Isaacs and Mr. Max Isaacs was resumed in the Yoko-hama District Court before Judge Danno.

At the outset of the proceedings, Mr. Sawada, defendant's counsel, asked the Court not to exclude the public any further as it had decided at the previous hearing, stating that if the Court was again closed sensational rumours would be

Mr. Masujima, Plaintiff's counsel, asked that the public be excluded but the Court rejected his application, declaring that the nature of the present hearing was not likely to prove injurious to public order. Counsel presented several letters as evidence and stated that according to them, defendant attempted willfully to defame the reputation

of plaintiff.

Defendant's counsel refused to accept the evidence and gave a lengthy explanation regard-

ing the letters.

Plaintiff's counsel further stated that in May, 1898, Mr. R. Isaacs and his two sons established a firm at Manila under the name of the Manila Commercial Company with a nominal capital of \$750,000, which was divided into 7,500 shares. Of these shares 2,150 were to be held by the promoters and the rest by others. Mr. Max Isaacs and his elder sister's husband, Mr. Henry Isaacs and his elder sister's husband, Mr. Henry Blum, went to the port without giving notice to Mr. S. Isaacs and they took up the whole of the shares, leaving 216 shares only for Mr. S. Isaacs. Having a great affection for the youngest son, Mr. Max Isaacs, the father, defrayed the money necessary to acquire these shares. Thus came about the first collision between the members of the family, which dispute led subsequently to the institution of a suit to resubsequently to the institution of a suit to re-cover possession of certain business books. Counsel entered on an explanation of the circumstances of the present state of the dispute between the members of the Isaacs family.

Defendant's counsel denied the truth of the statement, contending that it had no necessary

onnection with the present case.

Counsel thereupon entered on a lengthy dis-cussion, after which the case was adjourned till May 3rd when judgment will be rendered.

CUSTOMS APPEALS.

Baron Sone, Minister of Finance, delivered a decision on April 18th on an appeal lodged by M. L. Bobsien, representative of Messis. A. Oestman, No. 47, Kobe, against the Kobe Customs. It appears that the firm imported a hundred cases of methyl-alcohol on which the Customs imposed duty at the rate of sen 42 per litre in accordance with No. 69-A of the specific tariff. The importers contended that the duty should be ten per cent *ad valorem* under No. 69-B. The appeal was rejected.

The Minister gave, on April 19th, another decision on an appeal filed by Messrs. E. H. Hunter and Company, Kobe. The firm imported a bundle of galvanized mild steel wire rope in July last on which the Kobe Customs imposed duty at the rate of yen 2.654 per 100 kin under No. 245 of the specific tariff. The importers held that the duty should be yen 1.28 per 100 kin in accordance with No. 229 of the same tariff. The appeal was not sustained on the ground that the nature of the goods in dispute was not wire rope made with mild steel.

Baron Sone, Minister for Finance, according to Baron Sone, Minister for Finance, according to the Official Gasette, has delivered a decision on an appeal filed by Mr. R. Schuffner, No. 25, Yokohama. The latter imported on Sept. 27th last a case containing ten dozens of tanned sheep leather on which the customs imposed a duty of fifteen per cent. advalorem in accordance with No. 197 of the tariff. The importer contended that the staple should be treated under No. 197-1 with specific duty at the rate of ven 12.706 per 100. specific duty at the rate of yen 12.706 per 100 kin as the leather was coloured and refined. The appeal was rejected on the ground that the leather in dispute was provided for in No. 197 of the tariff.

The Minister rendered another decision on the was again closed sensational rumours would be circulated among the public whereas the present dispute between the brothers was of the slightest. Perhaps Mr. S. Isaacs had no idea of vexing his proceeded against him for stating in the proceeded against him for stating in the proceedings in another case that he had suspicions regarding certain entries in the business regarding certain entries in the business Looks. The doubts of Mr. Max Isaacs seem to have originated from the letter written by Mr. Dayet to the father in New York. same day on an appeal lodged by the Hiromi Shokai, Osaka. This firm imported forty-two

ground that the goods in dispute were tweeds though the material consists of inferior wool and though its original cost is cheaper than other woollen cloth.

AMERICAN TOPICS.

The New York State Board of Mediation and Arbitration announces that there were more strikes and lockouts in that State last year than in any previous year, with the possible exception of 1886.

The Mutual Benefit Life Insurance Co. has announced its intention to erect a \$1,000,000 structure on its present site at Broad and Clinton streets, Newark. The building will be occupied solely for the concern's business.

Toward the building of its 18,714 miles of railway, the Canadian Government has contributed at the average rate of \$9,166 a mile of railway constructed, the provincial governments at the rate of \$1,757, and the municipalities at the rate of \$87,3 a mile.

Tulare Lake, in California, once navigable by steamers, is now perfectly dry. A man on foot can cross it safely at any point, and in some places the ground is hard enough for a team to drive over. The cause of this condition is the draining of Kern and King Rivers.

The much-advertised manuscript of a part "Paradise Lost" has been sold privately of "Paradise Lost" has been sold privately to an American collector, who wishes for the present to remain unknown. The manuscript is now on the way to the United States. The price paid for it is not divulged, but it is assumed that it was more than £5,000, at which it was bought in when offered at auction in January.

Overtures of peace have been made to the suspended members of the American Red Cross by counsel for Miss Clara Barton and other officials of the society. The proposition offered to the remonstrants is in effect to abandon the in-vestigation in progress in exchange for the elecvestigation in progress in exchange for the elec-tion of some prominent man to succeed Miss Barton. Instead of viewing a compromise with favour, the suspended members are preparing to file additional charges.

Mr. J. Pierpont Morgan left New York in April for London, where he will probably remain the rest of his life. Mr. J. Pierpont Morgan, Jr. by this time has been fully initiated into the mysteries of the house at the corner of Wall and Broad streets, and he is now ready to take up his father's work. The man who was master of Wall-street a year ago has so arranged his affairs that he can leave everything in the hands of his

A fossil, says | dispatch from Lacon, III., pronounced by scientists to be that of a great prehis-toric bird, has been brought from Eureka Springs, Mo., where it was discovered in a bed of limestone. The fossil is of a large size and appears to be that of a bird on the alert. The head is turned slightly to one side, while the body is squatted close to the ground, the feet barely showing on the under side of the strange forma-tion. Scientists say the fossil is a relic of the cretaceous period.

Mr. Michael Cudahy, the Omaha packer, is said to be at the back of a project to build a new said to be at the back of a project to build a new process oil refinery at Crawford, one capable, when worked to its full capacity, of refining 1,000 barrels of oil per day. The Standard Oil Co. has, it is said, offered the patentee \$150,000 for the patent, but he wants \$500,000. By this process it is claimed that oil can be refined for 6 cents per barrel cheaper than the means now

declared that Cronk was in want. Cronk is in his 105th year. His health began to fail two years ago and since then he has been an invalid. Until 1900 he received mension from the Government of \$8 month, when it was raised to \$25.

Commander George L. Dyer, commanding the U.S. cruiser Albany, of the Asiatic fleet, has been assigned to duty as Naval Governor of the island of Guam, to fill the vacancy caused by the death of Commander Willam E. Sewell. Commander Dyer was appointed to the Naval Academy from Maine in 1866 and graduated four years later. After serving on various vessels he was assigned to the flagship Charleston in 1890 for duty as flag-lieutenant of the Pacific staff of Rear-Admiral George Brown. He later served on the Pacific Coast in the San Francisco, the Thetis and

Statistics of Methodist Episcopal foreign mis-Statistics of Methodist Episcopal foreign missions show that from 1899 to 1908 there was an increase of membership of 17 per cent, or from 182,104 to 216,476, an increase of 34,372. In Korea the number of converts was nearly doubled in these years, in the Philippines it grew from a mere handful to 7842, and in Bombay from 3443 to 10,985. The gifts of the church to foreign missionary work increased from \$920,680 to \$1.262.571, and the value of the property grew. firstonary work increased from \$920,000 to \$1,262,573, and the value of the property grew from \$5,410,938 to \$6,655,058. Certainly these figures show that there is no lack of enthusiasm in the Methodist church in the work of convert-

The story of a guide, confirmed on March 30 by a party of woodmen, is that Bald mountain, Maine, disappeared on the night of March 21st, the date of the New England earthquake. Bald the date of the New England earthquake. Bald mountain was in Tobique valley, a few miles from the New Brunswick line. At its base were boiling springs, and near by an extensive deposit which an analysis had shown to be composed of melted rock and earth, all indicating the presence of an extinct volcano. Where Bald mountain stood is now only a large shallow lake, and the theory of the woodsmen is that the subsidence of the mountain on March 21st was the cause of the earthquake.

The largest sum ever paid an insurance com-pany by an individual has been deposited with the Mutual Life Insurance Company of New York by Eben Smith of Denver, Col., who has placed by Eben Smith of Denver, Col., who has placed in the company's hands over \$620,000. Under the terms of his contract Mr. Smith receives an annual income for life, and at his death his son and daughter and his six grandchildren, in addition to large cash payments, will receive annual incomes for life. Mr. Smith asked his trust company how he could best make these provisions for himself and for his entire family, and was advised that the Mutual Life contract offered him the best way for carrying out his plans. the best way for carrying out his plans.

The Silk Association of America held its annual meeting on March 22 and elected the following officers: President, Joseph W. Congdon; first vice-president, George L. Montgomery; second vice-president, William Skinner; third vice-president, Jerome C. Read; treasurer, Charles F. Homer. Managers: George C. Andreae, R. Arai, C. L. Auger, Milo M Belding Jr., H. W. Boettger, Frank W. Cheney, John E. Cowdin, W. E. Eaton, Ewald Fleitmann, Jacques Huber, C. H. Hutchins, Albert Gould Jennings, Julius Kaufmann, Julius Kayser, Catholina Lambert, Russell Murray, Arthur Ryle, J. Noble Stearns, H. A. Van Liew and Jacob Weidmann. The Silk Association of America held its annual

Superintendent Tittman of the United States Superintendent Tittman of the United States Coast Survey, in a recent description of his work, stated that he had since its inception made about 30,000 square miles of topographic surveys, sounded minutely nearly 300,000 square miles of water, and made deep-sea soundings over little less than a million square miles. It has completed a first survey of the Atlantic, Gulf and Pacific coasts of the United States, and its triangulations of the United States of the United

of the earth's magnetism (these latter being now investigated through magnetic observatories in co-operation with foreign governments), and its geodetic work is also being carried on with international co-operation.

One of the most extraordinary things to be seen at the World's Fair is the gigantic steel bird cage erected by the National Government. It extends 200 by 180 feet over the tops of large trees, and includes streams of running water and swimming pools, where the aquatic birds may disport themselves. People are allowed to go in the cage and wander about as in a strange forest, inhabited by a marvelous variety of bird life. There is a wonderful collection of tropical birds in the cage, as well as birds from the temperate zone. There is most anything, from the giant condor, the eagle and the albatross, down to the smallest humming bird, which is hardly larger than a grasshopper.

Negotiations are on, says the New York Commercial, between the Merchants' Association and Attorney General Knox, looking to a settlement of the compensation to be allotted W. Wicklam Smith for his services as special prosecutor in the Japanese silk cases. At the time the inquiry into the silk irregularities was reopened in 1902 the Government had no fund to pay Mr. Smith. As it was considered important to carry on the investigation the Merchants' Association agreed to raise a fund and see to it that Mr. Smith received an adequate fee at the conclusion of his services in the event of the Government failing to make the payment. William F. King of the Merchants' Association had a conference with Attorney-General Knox regarding Mr. Smith's compensation. He told Mr. Knox he did not consider \$50,000 an exorbitant fee for Mr. Smith. It is understood that if the Government does not pay Mr. Smith the full \$50,000, the Me chants' Association will make up the difference.

Says the San Francisco Chronicle: -- Minister Allen, of Seoul, has been annoyed recently by hundreds of letters calling for information in hundreds of letters calling for information in regard to ginseng, postage stamps, mining concessions and the chances of Americans securing employment in Korea. Therefore he has prepared a circular letter which he mails to all inquirers who send stamps. In this letter he explains that there is no profit in growing ginseng, although the United States Department of Agriculture will give all needed information on the subject. Korean postage stamps may be secured from Korean postage stamps may be secured from any stamp dealer. The Korean Government is not granting any mining concessions now, nor is it in need of any foreign assistants such as mining engineers, teachers, physicians, or army officers. He adds that the Emperor of Korea did not marry a foreign woman, and that the story of "Emily Brown" is a pure fabrication. Hence there is no demand in the Korean palace for foreign women in any capacity. These direct statements by Minister Allen ought to discourage the American letter writers who have been making his life a burden by their inquiries.

Lieutenant-Commander Edgar Townsend War-burton, chief engineer of the battle-ship Maine, committed suicide in his cabin on board that vessel, while in Pensacola harbour, on April 1st. A bullet from merevolver was sent through his brain and death resulted within forty minutes. The executive officer of the ship was passing the door of Commander Warburton's cabin when he was startled by the report of a revolver within. The bullet, after passing through the brain, came through the door and struck the rail of the ship, barely missing the executive officer. The latter notified the other officers and the door of the Coast Survey, in a recent description of his work, stated that he had since its inception made about 20,000 square miles of topographic surveys, sounded minutely nearly 300,000 square miles of water, and made deep-sea soundings over little less than a million square miles. It has completed a first survey of the Atlantic, Gulf and Pacific coasts of the United States, and its triangulations cover between 300,000 and 400,000 square miles. It has published over 500 charts, besides miles. It has published over 500 charts, besides Pacific coasts, and carefully studied the laws had been chief of engineers of the Maine since dispatches, says the St. Louis Globe-Democrat.

that vessel was in commission. He was formerly on the *Indiana*. The body was shipped to Phila-delphia, where his wife resides.

By the end of next year it is likely that the last horse car will have disappeared from the streets horse car will have disappeared from the streets of New York and that electric cars will be running on the thoroughfares where now the antiquated vehicles still bump and thrash as they rumble along. Omnibuses were the first public vehicles with regular routes in New York. Fifty years ago they ran everywhere; Broadway was full of them. At one time, says a correspondent of the Pittsburg Dispatch, there were 26 lines of stages, all running for some part of their route along Broadburg Dispatch, there were 26 lines of stages, all running for some part of their route along Broadway. But late in the 40s and early in the 50s the horse cars came into use—another modern improvement. In the early 70s there were barely laif a dozen stage lines left. The Fifth, the Madison, the Fourth and the Ninth Avenue lines, and the Bloomingdale line up Broadway from Thirty-third street, were the chief, if from Thirty-third street, were the chief, if not the only, lines. Then came the bobtail cars, in which the passenger had to pay his own fare—when the law required cars to carry conduc-tors as well as drivers the bobtail cars went elsewhere; it did not pay to run them. To prevent the erection of the Sixth avenue elevated road the Sixth avenue surface line put on double-decked cars, with seats on top, but even these could not stand in the way of progress, and the first cross girder in the way of progress, and the first cross girder of the elevated road put them out of action. In 1844 came the Broadway railroad steal and the boodle Aldermen. The stages left Broadway in 1885. There were only three lines left to go. In the same year came the cable road on upper Tenth avenue; then the cable crept down Broadway and Third avenue, and then came the underground trolley, the best form of street traction yet devised. vet devised.

According to the New York State Bureau of abour Statistics, in no other year in the past decade, with the possible exception of 1902, were the workingmen of the State so well remunerated as in 1903. The only unfavourable symptom of last year manifested itself in a restriction of construction work. Owing to tight money, railway companies in many instances deferred the completion of improvements which they had begun in 1902 or early in 1903, and for the same reason the erection of new buildings in the large cities was postponed or abandoned. Labour disputes, which occurred in the building trades of New York, Rochester, Albany, etc., in the summer of 1903, somewhat increased this stagnation, but did not cause it. On the other hand, the construction of small dwelling, and tenement houses, which is on a less speculative basis than that of business structures, was carried forward on a large scale, so that, on the whole, employment in the building trades was nearly as good in 1903 as in 1902. Statistics of employment indicate that among the 400,000 wage earners belonging tolabour organizations (of whom about 30 per cent. are in the various building trades) the relative amount of time lost in 1903 was fourteen days out of each 100, as compared with thirteen days in 1902 and seventeen days in 1901, the best of recent years. The hours of labour were shortened for thousands of workers in 1903. Whereas in 1902 59 per cent. of the factory operatives of New York state worked ten hours a day, in 1903 the percentage fell to 51. The proportion of employees working only nine hours a day correspondingly increased—from 32.6 per cent. in 1902 to 39.6 per cent. in 1903. The eight-hour movement made progress in the building trades and in a few manufacturing

Along till Saturday last all this matter was sent by way of India to London and was repeated from that point for New York. Under the new arrangement, by which the news for Europe goes east by way of the Pacific ocean and the United States instead of, as hitherto, going westward by way of India and the Asiatic continent, the United States, India and the Asiatic continent, the United States, gets the news before it reaches Europe, and will have the first chance to publish it. Hereafter New York instead of London is to be news clearing house for the world for intelligence from the Russo-Japanese war. Nicholas II will be able to get word from Alexieff quicker by way of the United States than he will by way of Siberia or any other Asiatic route. The people of St. Louis, New York, Chicago and San Francisco will learn earlier about the movements of Russian troops in earlier about the movements of Russian troops in Manchuria than the Czar himself.

SUICIDE OF MR. M. J. SACHS.

The dead body of Mr. M. J. Sachs, whom many will remember in Yokohama as a former resident here, was found on the Bund foreshore at Shanghai, shortly after 8 o'clock on April 16.
A native constable discovered the budy, and at once reported the matter at the Central Station, when Police Sergeant Roach was sent to the spot and found the corpse with the mouth badly burnt, lying at about high water-mark. By the side of the deceased was found m broken tumbler which smelt very strongly of carbolic acid; there were also some pieces of blue glass lying near by, which were apparently the remains of a bottle. The Danish Consul subsequently held an en-

quiry.

RAIN AND STORM.

There have been very heavy rains in the southern district of the main island and in the north of Kyushu, resulting in floods that destroyed roads and bridges. At Ujina and in its neighbourhood the downpour was accompanied by strong winds.

Owing to heavy rains since the night of the 24th, the rivers in Fukuoka prefecture overflowed their banks with the result that two hundred houses were flooded, and the railway between Tagawa and Ikejiri was damaged.

Owing to the overflowing of the River Chikugo, near Kurume, a section of the Kyushu Railway was damaged. It was repaired, however, on the morning of the 26th.

A section of the railway between Nagasaki and Kumamoto was damaged and the line between Saigawa and Toyotsu was interrupted by a land-slip caused by the heavy rain. Repairs in both cases were completed on the morning of the 26th.

A heavy gale was experienced at Ujina on the night of the 25th, eighty-five small sheds which were used as shops being broken down.

Rain has fallen for several days at Hiroshima and all the canals overflowed, in consequence of which many bridges were damaged.

Owing to inundations caused by the heavy rains for several days past, the Nakaidzumi-Kaneda and Kaneda-Sachibukuro sections of the Kyushu Railway have been damaged and traffic is suspended.

The River Tenjin, Yamaguchi prefecture, over-flowed during the rains, and seventy-five ken of its banks and three bridges were destroyed. A pupil of the Miyanoura school and an old woman were drowned.

Yokohama experienced a heavy continuous blow from the south-east from Friday afternoon till Wednesday morning, but beyond the uprooting of trees, little damage was done.

A New York correspondent says the steamship piers in that city present a curious spectacle, being about equally crowded with Russians evading conscription, and Japanese hurrying home for military duty,

TRANSLATIONS FROM THE RUSSIAN.

The Stanghai Mercury makes the following translations from the Novi Krai of March 30th :-

translations from the Novi Krai of Natich 30th:—
After the usual church service, a parade consisting of parts of several regiments was held on the grounds adjoining the church in commemoration of the sixth year of the occupation of Port Arthur. Colonel. Gandurin commanded the parade whilst the band of the 14th East Siberian Sharpshooters' Regiment contributed the music.

Amongst those present were the chief of the P. A. Kinchow Army Division as also Lieut-General Stessel.

After receiving the report from the parade com-mander, and the parade present were put through a few movements, Lieut.-General Stessel approached the forces and said:—

To-day exactly six years ago, the Russian flag was hoisted by Prince Vladimirovich on the Golden Hill, who at the present moment is again amongst us serving on the fleet of the Pacific Ocean. Port Arthur was occupied by the 9th East Siberian Sharpshooters' regiment without a single shot and now after six that the pacific town at the state of the pacific state of t regiment without a single shot and now after six years of hardship in constructing the forts, town, etc., we find ourselves obliged to defend the place against a neighbouring country who wish to take it out of our hands. Not imagining for a single moment that they will ever accomplish this, I am convinced that the flag is there to stay even in the event of another wat. We now congratulate our Emperor (this was immediately followed by "hurrahs" which were prolonged till the order was given to stop) "Men, I have already said that the flag was hoisted by Prince Vladimirovich who is at the present moment again with us in the fleet fighting in the battle. We wish his Royal Highness long life and prosperity (Cries again of prolonged "hurrah")

After this Lieut.-General Stessel read to the parade

sperity (Cries again of prolonged "hurrah")

After this Lieut.-General Stessel read to the parade a telegram received from His Highness Viceroy Alexeieff in which the Viceroy congratulated Lieut-General Stessel and his forces on the sixth year of occupation of Port Arthur (cries of "hurrah.")

After this Lieut-General Stessel said, "On the theatre of war has arrived the commander of the Manchurian forces, General Adjutant Kuropatkin under whom, I don't linagine for a single moment we will not be able to stand against our foe should they ever come to us. For congratulating General Adjutant Kuropatkin (cries of hurrah.")

Then cheers were given for Vice Admiral Malex-

Then cheers were given for Vice Admiral Maka roff, the fleet and General Linovitch.

After the usual conclusion ceremonies, the force vere marched back to their respective posts.

On the 26th inst. part of our fleet cleared from the narr harbour for a cruise round the adjacent islands.

inner harbour for a cruise round the adjacent islands. At 10.15 a.m. torpedo-boat Vinimatchini in accordance with instructions signalled from the Nornik, proceeded to inspect several junks that were close by. On her journey she noticed off the small island of Gokigano a small steamer towing a barge. She immediately gave chase and when within cables fired a blank shot across her bows. On the steamer was immediately hoisted the Japanese flag but not the one that meant surrender. She kept on full steam ahead until a second blank shot was fired—when she stopped. Immediately she stopped many persons from the steamer were making their way to the towed barge with the idea evidently of breaking loose from the steamer and making good their escape.

escape. Seeing this, the Vinimatelini lowered a boat at once, which under Midshipman Pini, was despatched to inspect the junk while the torpedo-boat herself went towards the Hanyen Maru and brought her in tow to the cruiser Novik.

tow to the cruiser Acrik.

The Commander of the Novik with several officers accordingly proceeded to inspect their prize. At the same moment the boat lowered from the Vinimatelini returned with 4 Japanese prisoners, a quantity of telegrams, etc. Upon searching the Hannen Marn several Japanese and Chinese were found, besides sundry papers, charts, signal books, wireless telegraphy instrument, etc., two torpedoes (self explosive). After conveying all the people to the Novuk it was found that one of the Chinese was in reality a Japanese in Chinese costume with a false queue. Upon the conclusion of the inspection the commander of the Novik left several of his own crew on board, and took the vessel in tow with the idea of returning to Port Arthur with the prize. After crew on board, and took the vessel in tow with the idea of returning to Port Arthur with the prize. After proceeding several miles the towing lines parted. The Commander of the Novik then decided that in view of the slow speed of the steamer it would not be advisable for her to proceed herself in case the enemy was met. Towing being impossible, orders were given, after taking off the crew and men, to sink the ship. This was accordingly done. The whole fleet then formed up in order and returned to Port Arthur reaching there at 2 p.m. It may also be interesting to record that these are our first Japanese guests in Port Arthur, and comprise 9 Japanese and 11 Chinese.

NEWS OF THE WEEK.

Dr. W. N. Whitney is expected to arrive in Yokohama about the 5th of June. He left Southampton on April 19th.

Misses Takakura, Yanagihara, Chigusa and twenty-one other Court Ladies have donated yen 1,045 to the Volunteer Nurse section of the Japan Red Cross Society.

The London Times' steamer Haimun arrived on April 21st at Nagasaki from Wei-hai-wei, which she left on the 19th. She will enter dock for repairs. Dr. Morrison, Peking correspondent of *The Times*, was on board.

The Bishop of California baptized six adults on the evening of Palm Sunday in the San Francisco Mission to the Japanese, 1304, Post Street. The founder of this mission was Doctor Motoda, on his first visit to the United States.

The Japanese Consul at Lyons telegraphed on April 23rd that the present quotation of raw silk is believed to be the extreme bottom price since it began to go gradually downward. There is, however, no prospect of better things discernible.

The German Steel Trust is about to open negotiations with the British and American Steel Companies, for the purpose of delimiting the respective fields of interest of all the companies in the world's markets, so as to obviate the existing competition.

We learn that in the athletic sports held at Kobe on Saturday, under the auspices of the K.R. and A. C., Mr. W. M. Carst broke the Kobe record for a long jump, clearing 19ft. 11in. The Yokohama record is 20ft. 111/2in., made by J. F. Drummond in May, 1902.

A telegram from Kobe states that Yuen Shisong, ex-compradore of the Russo-Chinese Bank, who brought a case against the bank, has seized twenty-nine thousand yen of the Kwansen Trading Company, Kyoto, which money the Japanese firm had to pay to the bank.

Captain Babin, of of the French steamer Briss Huel, which has been lately in these waters, was staying for the night with a friend in Brooklyn, New York, and was found on the 29th of January dead in his bed, aspyhxiated by gas from a burner that had not been turned off.

Rear-Admiral K. Kimotsuki, Chief of the Naval Hydrographic Office, states the Official Gasette, issued a notice on April 27th to the effect that according to information given by the Dutch Consul at Kobe, mines have been found floating some forty miles off Shantung promontory,

The Meiji Fire Insurance Company held a general meeting on April 20th at which the accounts for the year from April 1st, 1903, to March 21st, 1904 were submitted. The net March 31st, 1904 were submitted. The net income was yen 122,794.54, of which yen 42,500 was to paid to the shareholders as a dividend at the rate of 17 per cent.

The fiji states that two Finns who arrived secretly on April 3 oth at Nagasaki from Shanghai have been arrested. They will be sent home by the next mail steamer. It is alleged that they intended to sell a plan drawn by a British officer named Fisher. The Japanese paper does not describe the alleged plan.

On the night of April 23rd, a locomotive Collided with a train which had just arrived at Shimonoseki station. An engineer was killed, a conductor severely and two firemen slightly injured. The passengers are all safe. Both locomotives sustained severe damage. The negligence of a pointsman seems to have been the

Hungary is now manufacturing salt briquettes for export to tropical countries. A plant erected at the Ausee salt mines turns out from 40,000 to 50,000 briquettes every twenty-four hours, each weighing two pounds. Salt put up in this form

contains only 1 per cent. of moisture. briquettes are manufactured by putting loose salt under hydraulic pressure of 200 atmospheres.

James Hutchison, of Goomtee Estate, Darjeeling, has been selected by the Indian Tea Association as the deputation to visit Formosa, leaving immediately.

A telegram from Hiroshima states that Lieutenant T. Yamoshishi of the army was sentenced on April 27th by court martial to fifteen days imprisonment with hard labour and deprived

According to the Jiji, a telegram has been received in Yokohama from a trustworthy source to the effect that the new Russian loan amounting to eight hundred million francs has been issued in Paris under the guarantee of a Brussels syndi-The price was ninety-eight francs, interest being at the rate of five per cent.

Marchioness Nabeshima entertained Mrs Richardson, and Dr. McGee and her party on the evening of April 26th, when Mrs. Wood, wife of the Military Attache of the U.S. Legation, Marchioness Oyama, Countess Matsudaira, Viscountess Tanaka and other peeresses and some officials of the Imperial Household were present.

The Jiji states that the correspondent of the London Chronicle, who had been arrested at New-chwang by the Russians, but was released, arrived on April 27th at Nagasaki via Shanghai. According to him, thirty thousand Russian soldiers are now at Newchwang, and the Chinese habitants on the frontier are in sympathy with the

The gentle art of the pluralist still flourishes in odd corners of England. In a recent breach of promise case, the defendant was discovered to be clerk to a firm of well-known solicitors, who were clerks to the Justices of the Soho Division; parish constable, sexton, sub-inspector of nuisances, coroner's officer, verger, vestry messenger, rent collector, and licensing clerk.

Weeks after death had taken place, the remains of M. Thibaut, a wealthy Parisian recluse, were recently found in a mummified condition in the bedroom which he had occupied. M. Thibaut bequeathed the bulk of his fortune to the English Society of Friends, and directed that it should be devoted to the advocacy of peace. The sum of £56,000 sterling was found hidden behind pictures and under carpets.

From a report published by Hon. Dr. J. M. Atkinson, P.C.M.O., we learn that the estimated Atkinson, P.C.M.O., we learn that the estimated population of Hongkong in 1903 was 325,631. There were 1034 births and 6185 deaths, 1251 of which were from plague. The birth-rate was 3.17 per 1000 as compared with 3.8 in 1902. The death-rate was 18.9 per 1000 as compared with 21.7 in 1902. For the non-Chinese population the death arts was collected with 5.6 per 1000. tion the death-rate was only 16.6 per 100

In the course of a speech before the United Service Institution, on March 20th, Field-Marshal Lord Roberts said the centre of international gravity had shifted to the Pacific. There the dominating factors in the serious complications of the future would be found, owing to the extraordin-ary development and progress of that part of the world, and also in view of the early completion of the Panama Canal.

Mr. Uchida, Japanese Consul-General at New York, telegraphing his weekly report on April 22nd, said that owing to a fall in price, the demand for raw silk and habutae had increased since the previous report. There was no change in matting. Cotton for future delivery was very inactive as there was no demand from the spinning factories The quotations were: cents 13.76 for May delivery; cents 15.54 for August delivery; and cents 14 for present delivery. The stock throughout the country was 605,959 bales.

The on board as there were no lighters to land them. The state of trade is generally very dull and all merchandise is left on the market untouched. A company of Russian guards is in Tientsin, and the officers in disguise go back and forth between that port and Newchwang in junks. It is reported that General Kurojatkin has arrived at Fenghwantien. It is added that Viceroy Yuan has despatched three hundred soldiers to Peking to act as Imperial Body Guards.

The Russians have a curious word to express that condition of slovenly unpreparedness in which a great crisis has almost always found their It is "khelátnost," and it means, literally, "dressing-gowniness"-the condition of the man who does not trouble to put on his coat and waistcoat in time for the business of the day. is as admirably expressive of the national temper as "manana"—"to-morrow"—is of the Spanish. as " manana "-The Russians use it without sense of shame, and seem to regard it as a sufficient and satisfactory explanation of almost all national misfortunes

On March 12th the first electric train to run on amain line in England made the journey from Liver-pool and Southport—an appropriate choice, since Liverpool was the scene of George Stephenson's first successful demonstration of the capability of the steam-driven locomotive. The trial was in every way a success, and the train, weighing 140 tons and measuring over eighty yards in length, with capacity for carrying 270 passengers, travel-led smoothly, quietly, and well at a speed of sixty miles an hour.

At Sydney, N.S. Wales, on March 12, the Half-Mile Swimming World's record was broken, and the World's Champion, R. Cavill, defeated by a lad named B. Keran, who is not yet 17 years of age The former record stood at 11 min. 50% seconds, but Keran won in 11 min. 29 seconds, Cavill finishing second, in 11 min. 40% seconds. days later, the two met in the quarter-mile cham-pionship of Australasia, when Cavill turned the tables on his opponent by winning by two yards in 5 min. 26 secs.—another World's record, the previous best being 5 min. 28 secs. The World's Competition record for one mile, cycling, was lowered by Floyd Macfarland, from U.S.A., on the same day at Sydney to 1 min. 49 secs.

World says :- Lieut.-Colonel Gough, of the Rifle Brigade, who was decorated with the Victoria Cross by the King the other day, in recognition of his services in Somaliland, has joined the Staff College as a student to qualify for the certificate. He was specially selected for the Camberley course by Lord Roberts before he volunteered for service against the Mullah, in acknowledgment of the high character he gained in the field in South Africa. Colonel Gough is the third member of his family to receive the Victoria Cross. His father, Sir Charles Gough, won his in the stirring days of the Mutiny, as did also his uncle, the veteran Sir Hugh Gough.

THE SALE OF TOBACCO.

ORDINANCE NO. 13 OF THE DEPARTMENT OF FINANCE

REGULATIONS FOR THE SALE OF TOBACCO.

Art, I.—Jobbers, or wholesalers of tobacco shall be nominated by the Minister of Finance.

Persons who have been continuously engaged in business as brokers of manufactured tobacco for more ness as brokers of manufactured tobacco for more than one year prior to the date of the promulgation of the Tobacco Monopoly Law, and paid income tax for the 36th year of Meiji (not including the amount specified in a supplementary report or personal declaration made after the issue of these Regulations), may on application be appointed as wholesalers of tobacco exclusively at the time of the enforcement of these Regulations.

these Regulations.

In case, however, the number of persons who desire to obtain the status of wholesalers in the same retry; cents 15.54 for August Genvery; and cents are to obtain the status of wholesalers in the same that fore present delivery. The stock throughout the country was 605,959 bales.

It was stated by a passenger who arrived at Shimonoseki on April 21st by a steamer from Taku, China, that on the 17th thirteen merchant ships were lying at that port, but their cargoes were still when the nominees have reached the proper number.

Any person desiring to become a wholesaler as prescribed in the foregoing article must forward an application (Form No. 1) not later than the 10th of May in the 37th year of Meyji (1904).

Art. II.—Persons mentioned below can not be no-

All. II.—Persons included below can not be nominated as jobbers or retailers of tobacco:

1. Tobacco growers and persons staying or living in the same house.

2. Those who, acting contrary to the Tobacco Monopoly Law Taxation Regulations, have undergone a penalty exceeding that of fine, and in whose case two years have not elapsed since.

2. Those who, having received a sentence of in-

3. Those who, having received sentence of in-solvency or bankruptcy are to abide by it from the time that it was affirmed until their rehabilitation shall have been established.

4. Those who have been dealt with as defaulters of national tax or as guilty of corresponding offences, and have not yet passed one year.

5. Those who have received a sentence of, or more severe than imprisonment, and those who, having received a sentence of imprisonment or upwards, are to abide by it from such time until judgement shall be

6. Those who are under deprivation or suspension

of public rights.

Those who have failed to pay in full the value obacco purchased, even after the expiration of the

period of payment.

Att. III.—Any person who is appointed as a wholesaler or retailer of tobacco may continue business for five years from the date of appointment.

In case of the death of a wholesaler or retailer of

to case of the teath of a wholesafer or retailer of tobacco, his heir or successor may continue his business for the remaining period of operation provided a report be sent to the Minister of Finance.

Art. IV.—Any wholesafer or retailer of tobacco who desires to abandon his business must report the fact to the Minister of Finance thirty days prior to

lact to the Minister of Finance thirty days prior to the date of abandonment.

Art. V.—In the cases mentioned below the Minister of Finance may withdraw the nomination of a wholesaler or retailer, except in the case of Paragraph 3 which will not be applied to retailers:—

1. When a wholesaler or retailer has neglected the obligations prescribed in these Regulations, or failed to fulfill such obligations even after they have

failed to fulfil such obligations even after they have received warning from the authorities concerned.

2. When he falls within the purview of any of the paragraphs of Art. II.

3. When sales of tobacco do not exceed 5,000 jen.

An. VI.—The value of tobacco to be purchased by a wholesaler shall be determined by making a regular discount upon the fixed price thereof.

Ant. VII.—In case a wholesaler desires to purchase tobacco he must forward, not later than the 5th of

each month, an application for the purchase of tobacco for the next month, to the factory or place of storage designated by the Minister of Finance.

Art. VIII.—No wholesaler of tobacco is allowed to

take delivery of goods before he has paid the value

thereof.
Art. IX.—Tobacco purchased by a wholesaler shall be delivered from the factory or the place of

The expense of the transport of tobacco from the factory or the place of storage to the district of a wholesaler shall be disbursed by the Government at regular rates. No such expense, however, shall be paid to a wholesaler in the district where a factory or place of storage exists, or in other districts of corresponding nature.

Art. X .-- No wholesaler is allowed to pursue the additional business of a retailer, nor can be occupy

the same place of business.

Art. XI.—The places of business of wholesalers of tobacco shall be limited to one each. But in the case of tobacco manufacturers who own more than two of tobacco manufacturers who own more than two factories, or of brokers of manufactured tobacco who are possessed of branches or agencies, transactions may be carried on exclusively in such places.

Art. XII.—No wholesaler of tobacco is allowed to change his place of business without obtaining the permission of the Minister of Finance.

Art. XIII.—In case a wholesaler of tobacco has

Art. XIII.—In case a wholesaler of tobacco has to pursue an additional occupation, he must provide a suitable partition between one place of business and the other.

Art. XIV .-- In case the price of tobacco is lowered or reduced a wholesaler of tobacco may apply to the factory designated by the Minister of Finance, within 15 days from the date of the enforcement of the altered value, for repayment of the difference between the value of tobacco purchased at the former rate and held until the day of the enforcement of the altered price, and the amount shall be calculated in accor-

dance with the altered value.

In the case specified above, the documents as well as a statement of accounts concerning repayment, which together may be taken as evidence in regard to the classification and name of the tobacco, its distinctions as to wrappers, as well as its quantity or amount, must be presented at the factory. Art. XV.—In case it is found that the manufactured

tobacco has deteriorated in quality or its wrappers have been damaged, the wholesaler may apply for exchange at the factory designated by the Minister of Finance. In this case, however, the wholesaler is required to prepare minimute statement of particulars concerning such tobacco, preserving the latter to be inspected by the authorities concerned, and forward the same to the factory, together with a certificate from them.

In the above case, if the exchange is at-tributable to circumstances for which the wholesaler is to be held responsible, or if the cases of exchange lies in circumstances for which a retailer is respon-sible in the case of tobacco which has been received from him either for exchange or repurchase, the wholesaler must pay (to the Government) a sum of money corresponding to the amount of diminution in the value thereof.

Art, XVI,—In case a retailer claims exchange in accordance with Art, XXII. or repurchase in accordance with XXIV., the wholesaler is in no way allowed to refuse.

prepare account-books as per Form Nos. 3 and 4 and to present a monthly return of receipts and payments connected with tobacco, to the supervising Branch Monopoly Office, not later than the 5th of the ensuing month.

Art. XVIII.—In case there is no successor to his business on the death of a wholesaler of tobacco, or his nomination has been withdrawn, or his business is entirely relinquished, application may be made to the factory designated by the Minister of Finance, asking for the repurchase of the tobacco actually on hand.

In the above case, if it is found that the quality of the tobacco has deteriorated owing to circumstance the tobacco has deteriorated owing to circumstances for which the wholesaler is responsible, or that its wrappers have been damaged from causes for which a retailer is to be held responsible, in the case of tobacco which has been received from the latter for the purpose of either exchange or repurchase, a sum of money corresponding to the amount of diminution in value shall be deducted from the sums to be refunded.

Art. XIX.—Retailers of tobacco shall be appointed by the Minister of Finance. Manufacturers of tobacco or brokers in manufactured tobacco, who were not nominated as jobbers or wholesalers at the time of the promulgation of these regulations, and others who have undertaken the retail business of manufactured tobacco, or were engaged in the sale or purchase of leaf tobacco, may be nominated as retailers exclusively at the time of these Regulations coming into operation.

In case any person desires to become a retailer of

In case any person desires to become a retailer of tobacco in conformity with the above provisions, he must forward an application to the supervising Branch Monopoly Office by the 10th of May in the 37th year of Meiji (1904).

Art XX.-Tobacco retailers are not allowed to buy tobacco from any person other than a wholesaler.

Art, XXI.—Tobacco retailers are required to exhibit a price list of tobacco in the most prominent part of their business premises.

Art. XXII.—In case it is found that manufactured tobacco has suffered deterioration or its wrappers have been damaged, the retailer of tobacco may apply to have the same exchanged by the wholesaler from whom it was purchased.

In this case, however, the retailer must prepare a minute statement of particulars connected with it, and, preserving it separately to be inspected by the authorities concerned, forward the same to the wholesaler together with a certificate obtained from them.

In the case specified above, if the necessity for exchange has arisen from causes for which the retailer himself is to be held responsible, the retailer in ques-tion must pay for the diminution in value.

Art. XXIII.—Retailers of tobacco are required to prepare account books (Form No. 7) as well as a monthly return of receipts and payments connected with tobacco, and present them to the supervising Branch Monopoly Office, not later than the 5th of October and the 5th of April every year.

CORRESPONDENCE

THE PARTY OF AMERICAN NURSES.

TO THE EDITOR OF THE "JAPAN MAIL

10 THE EDITOR OF THE JAPAN MAIL

SIR,—Allow me to add a few words to supplement
the note in the Japan Mail of the 23rd dealing with
the practical side of the coming of the American
Nurses. The thought I would express is one that
was doubless in the mind of the writer of the note.

Sympathy in America did not end in the expression
of good wishes, valuable though this immaterial form
is It took form in the shape of a contribution to of good wishes, valuable though this immaterial form is. It took form in the shape of a contribution to the fund for the relief of the families of soldiers, and beyond this it took a form far higher when it became incarnate in this party of Nurses. The beauty of poetry is not to be finally disposed of by weighing, analysing, and labelling, nor is a poetic deed such as this. But Tennyson has said it all in the Moral attached to "The Day Dream," and we may rejoice that some still dream dreams in the day:—

So Lady Elora take my lay.

So, Lady Flora, take my lay,
And if you find no moral there,
Go, look in any glass and say,
What moral is in being fair.
Oh, to what uses shall we put
The wildweed flower that simply blows? And is there any moral shut Within the bosom of the rose?

* * * liberal applications lie In Art like Nature, dearest friend; So 'twere to cramp its use if I Should hook it to some useful end.

I am. Sir, yours, etc.,

F. M.

PEARLS AND GREY DAYS.

By Frances Campbell, in the "Westminster.

By Frances Campbell, in the "Westminster."]
The days are like jewels on a thin gold chain, each with a different colour, sparkle, and light, all its own. They mark the line of life, and we look back and count them all. The colourless gems of childhood, that were yet so rare because of their exceeding purity. The precious stones of early youth, and the more polished jewels of maturity. Diamonds cut into innumerable facets by keen egoism, chrysolite that was first love and borrowed the light of the sun. Turquoise that was the solidification of ineffable happiness, and ruby formed from the heart's blood. Each the expression of sheer triumphant life, each the embodiment of meday lived to its uttermost; till the membodiment of meday lived to its uttermost; the embodiment of m day lived to its uttermost; till we come to the pearl, and with it the Grey Day, Look you; on the chain of life, it follows the blood-Look you, on the chain of the it follows the bloth-red gem which glows with the fire of a tropic dawn. Do you remember how that precious thing was made? With what agony we passed through our Passion towards the crucifixion of Self, and woke on the morrow to the stillness of the Grey Day, and the rounding of the Pearl!

After the agony there is surcease from sorrow—no more poignant pangs, no hopes, no fears. After the pain the silvery silence of the low grey sky, the drifting silvery cloud, the tall bare outline of the trees against the shifting shadow-lights; for it is in winter that the Grey Day comes, the leaf is fallen and the bough bare, and there is reason for this, as the Soul will see. There are no bird-songs on hill or in wood or fell, the mists hover across the silent hills, dimly vast, smooth as the bosom of Hertha asleep under the autumn leaves. The winds are low; they do not reach the tree-tops to move the feathery interlacing of twig and spray. The Soul is snatched across the border-line between Time and Etemity, and sits in that vast silence to which her suffering has opened the portal. And there she is, alone, and hearkens to the voice of Wisdom. There is no interpretation of what the voice says. Only the Soul understands. She may not put it into speech, and the mortal part lets her craving fall away like a garment, and is re-born. After the agony there is surcease from sorrow is re-born.

Then in this interspace comes Misery, and touches eyes and ears, and bids her look out and see; and lo! the hidden things are plain to view. The tones, that were too high and too low; the infinitesimal Branch Monopoly Office, not later than the 5th of October and the 5th of April every year.

Ad, XXIV.—The case there is no successor to the business of a retailer on his death, or his nomination has been withdrawn, or his business relinquished, application may be unade to the wholesaler from which tobacco was purchased, asking for the re-purchase of the goods actually on hand.

In such cases, however, if it is found that the quality of the tobacco has deteriorated or its wrappers have been damaged, a sum of money corresponding to the diminution in value shall be deducted from the sums to be refunded.

Art. XXV.—The documents to be presented to the Minister of Finance as specified in these Regulations must be forwarded through the supervising Branch Monopoly Office.

hidden before because of the blindness of egoism and selfishness. A thousand impressions, strange and lovely, steal in on the newly awakened sense—the sixth sense, which is only to be bought with the sacrifice of Self, and is like fixed quick-silver in an amber ring. A potent thing from which nothing can ever be hid. Thus the pearl among the days is finished and moulded. The Soul looks at it as she sits aloof in the grey isolation which surrounds her, and lets it slip on the golden chain without thought of the canker-worm hidden at its core. All the heart-agonies, the sorrow, the desolation that went to fold and conceal the misery that lies enwrapped in those iridescent depths, are forgotton in the utter loveliness of the perfect gem. Nor can the Soul ever again sink to that plane on which sorrow met her. She lives on a higher level now, where the old joys look sordid and mean, and the new ones are the joys of others and not her own. She wears her chain of jewels at the banquet of the wretched and find happiness in comforting their woes. There, too, she finds a life undreamt of—tastes of the goblet of Life, and finds its exceeding bitter, and past all reckoning sweet, because of the bitterness. She is thankul now for the fennel which floats to her lips on the brimming wine, and looks back without repining to that day when she first raised it to her kiss, thinking it Hippocrene, taste of laughter and the sun, only to find it nauseous, maddeningly heady, and dark with those waters that start from the hidden fountain in the heart. Now the goblet is crowned with bitter leaves. That is what the Grey Day leaves to us all: a fennel wreath! She sits at its close with the struggle are over, she has fought her own battle, now she lends her strength and knowledge to others. She hears the call of the afflicted, the low cry of unconsoled sorrow, the echo of an anguish that was once her own and out of her peace she gives comfort, the quiet and waiting # the Grey Day. When others sink in the mire of their doubt and misery thi hidden before because of the blindness of egoism meaning is clear to all. Thus the pearl is a treasure whose every layer is a ransom for some other soul, whose value would never have been realised had it not been for the fiery ordeal of terrible suffering, and the strength which comes of victory. These three may come to us all—the Ordeal, the Grey Day which follows it, and the pearl of great price made from the heart-pangs and the tears of sorrow. And it is, perhaps, the only jewel of all the long chain of days that we may take in our hands and carry with us to the White Throne.

POPULAR FEELING IN RUSSIA:

[FROM A ST. PETERSBURG CORRESPONDENT.]

[FROM A ST. PETERSBURG CORRESPONDENT.]

I have just made a trip through a considerable part of European Russian and Southern Finland, and while so doing I took the opportunity of studying the effect of the war upon the masses in Russia. Everywhere I was assured that the possibility of war was not even dreamt of as late as the 6th February, either by the masses or the "popes," by the literation of the merchants. One finds an easy excuse for this want of foresight in the prevailing system of secrecy and official tutelage, which by this recent fiasco stands condemned for ever. Intelligent people charge the Russian Government with having been as completely out-done by the Japanese as the stupid month of the mountebank in the Russian tale. It is declared an overwhelming shame that despite the "experienced" Minister at the Court of Tokyo, who served there twenty years ago, and despite his staff of interpreters and military and naval adtachés, the dangerous degree of Japan's readiness for action was entirely overlooked. This error of judgment is taken as evidence of the complete incompetency of the Russian higher officialdom.

The masses in all the "Governments" I visited showed signs of being research.

ficialdom.

The masses in all the "Governments" I visited

Even more than the craft-guilds of artisans or the guild merchants, the masses of the moujiks and rabotites (peasants and labourers), the pedlers and coachinen appreciate the value of every participation in political manifestations. They are now imbued with the desire of putting in their vote when not only demands for the State but proposals for the betterment of their state are at issue. The ordered displays of feeling have prepared them for showing their not only demands for the State but proposals for the betterment of their state are at issue. The ordered displays of feeling have prepared them for showing their own craving for a form of existence more worthy of human beings. This side-issue of the patriotic arrangements is by many officials declared to be of great political importance, and even of considerable danger to the existing order of things. Those Nihilist "patriots" who shout loudest when the cheers are given for the Tsar and for the War know how to make capital for their own propaganda. They demonstrate that now the Tsar wishes to hear the voice of his people directly, i.e., without official intermediation. The most remarkable point is the disappearance of the former distrust of the academic class by the masses of the people. Formerly nothing was easier than to inflame the mob to use their firsts freely on the riotous university students. Now the bystanders listen attentively when an uniformed lad, who is not even allowed to wear the national cockade on his regulation cap, cunningly tells them how many versts it is to Port Arthur, explaining that beyond Holy Russia the whole of the treeless and severely cold Siberian steppe is to be traversed until one comes to the vast country of Manchuria belonging to the Chinese, and that at the further end of it the Japanese are met, who received Port Arthur by right of conquest ten years ago, but were compelled to cede it to the Tsar. Many # peasant is quite awe-stricken when he hears that his son who has been enlisted for the Siberian Army, is to travel thousands of versts, first by the Manchurian

were compelled to cede it to the Tsar. Many peasant is quite awe-stricken when he hears that his son who has been enlisted for the Siberian Army, is to travel thousands of versts, first by the Manchurian and then by the Eastern Chinese Railways, ere he comes to the country of Korea where the Japanese are to be displaced at the point of the bayonet.

Under these conditions one cannot be surprised that the leave-taking at the railway stations is always depressing, tears being shed abundantly and the attitude of the young soldiers showing so much of despondency. It is felt that these lads go even further east than the emigrants to Eastern Siberia, of whom never any more is heard after their departure. Though the officers tell the relatives that by the Tsar's Lieutenant in the Kwantung territory everything is provided for receiving the soldiers, how many moujiks are there who have ever heard of the Lieutenaucy created by the Ukase of July 31 (O. S.) or have a conception what Kwantung may mean?

On the other hand, the philanthropic agitators find it very easy to appeal to the understanding of the masses kindly brought together by the thoughtful authorities. About Tolstoy and his benevolent plans, about organisations of labourers, about the extension of facilities of learning, everybody has in our times of social activity heard something aiready. Now he is told that those riots of students and factory hands are in some way connected with these ideals. The ill-treated rioters thus appear as martyrs in a laudable cause. There are cases on record when throngs of moujiks purposely served as a wall for forbidden assemblages of students, and willingly suffered under the baton of the attacking police and the knouts of the Cossecks, in order to gain time for the endangered students to save themselves by bye-streets and lanes. The masses are easily persuaded that the telegrate the save of the Cossicks, in order to gain time for the endangered students to save themselves by bye-streets and lanes. The masses are easily persuaded that, by this fraternisation with the students, they are not opposing the real wishes of the Tsar, who has shown his desire for improving the intellectual standard and the welfare of the masses by his glorious Institution inscribed "Emperor Nicolas II.'s People's Palace" and by his public proclamations against the horrors of war.

of war.

Of all effects caused by this war up to the present, the students and the masses as the greatest change of the situation in Russia proper. For the upholding of the power of the bureaucracy it is about the most dangerous turn that could have come about.—H. K. Daily Press.

TELEGRAMS. .

(REUTER'S SPECIAL SERVICE.)

RESIGNATION OF VICEROY ALEXIEFF.

London, April 22. Viceroy Alexieff has resigned, having

found himself practically superseded except in civil affairs. Moreover, the appointment of Admiral Skrydloff, who is notoriously hostile to Viceroy Alexieff, was made without consulting him.
BRITISH MISSION TO THIBET.

The House of Lords has adopted a resolution authorising the Thibet expedition.

GREAT FIRE IN TORONTO.

A large fire has occurred in Toronto by which 130 buildings were destroyed. loss is estimated at thirteen million dollars.

BULGARIAN PRISONERS IN TURKEY.

In pursuance of the agreement of April 9th, 495 Bulgarian prisoners at Salonika have been released; 311 others died in

KUROPATKIN'S FORCES.

Reuter's correspondent at St. Petersburg says that General Kuropatkin has now 300,000 troops at his disposal. As this is sufficient for the present the despatch of further forces has been suspended.

ALEXIEFF'S REPORTED RESIG NATION.

It is not officially admitted at St. Petersburg that Viceroy Alexieff has resigned, though it is thought a way may be found to smooth matters temporarily.

THE BRITISH INCOME TAX.

London, April 23 The House of Commons has adopted the Income Tax proposal by a vote of 214 to 116. EXECUTION OF JAPANESE OFFICERS.

General Kuropatkin telegraphs that the Japanese officers' captured on the 18th inst., named Sutewo Fukuoka and Teisuke Oki (captured while attempting to blow up Nonni bridge with guncotton) have been court-martialled at Kharbin, and sentenced to be hanged, but in view of their rank he had them shot, after rejecting their petition to spare their lives.

RUMOURED LARGE RUSSIAN LOAN

Later.

It is reported in Paris that negotiations are proceeding with a view to the floating of m large Russian loan, possibly of thirty-two millions sterling.

THE PANAMA CANAL.

London, April 24.

The contract formally transferring the Panama Canal to the United States has been signed in Paris

STRIKE ON HUNGARIAN RAILWAYS.

There is a strike on the Hungarian railways, involving 30,000 hands. railways are almost paralysed. The negotiations have been without result. The prices of foodstuffs in Buda-Pesth are rising rapidly. The Government has called out the railway reserve regiment.

RUSSIAN LAUNCH TORPEDOED.

Viceroy Alexieff reports that while some launches were laying mines at Port Arthur one of the mines exploded under a launch and killed a lieutenant and all the men on board.

GREAT RECEPTION AT ROME.

London, April 25

M. Loubet has arrived at Rome. Emmanuel met him at the station and they proceeded to the Palace. He had a most enthusiastic and cordial ovation from enormous crowds. The whole city was gaily decorated. The scene was one of unsurpassed brilliancy and magnificence. The French and Italian Press emphasises the political importance of this rapprochement.

THE HUNGARIAN RAILWAY STRIKE

The Hungarian railway strikers have ac-

cepted the Government's terms and have returned to work.

A POLISH PLOT.

A plot has been discovered to secure the independence of Poland and to blow up two new Russian cruisers which are arming on

ALEXIEFF'S RESIGNATION NOT ACCEPTED.

London, April 26.

News from St. Petersburg is to the effect that the Czar has refused to accept Viceroy Alexieft's resignation at present, pointing out that at such a grave moment it is the duty of every Russian to forget private differences. The resignation was thereupon differences. withdrawn, but it is believed that this is only a temporary arrangement pending Admiral Skrydloff's arrival.

PRINCE PU LUN IN WASHINGTON.

Prince Pu Lun (the Chinese Prince who passed through Japan at the end of last month) is meeting with exceptional hospitality in Washington. Mr. John Hay, Secretary of State, entertained him at dinner on April 24th, and President Roosevelt received him on the following day.

ROYAL VISIT TO IRELAND.

King Edward and Queen Alexandra have started for Ireland.

RUSSIA BUYS COMMERCE DESTROYERS.

The Russian Government has purchased indirectly nine German liners which will be fitted up as cruisers and will, it is reported, be used to prey on Japanese commerce.

DEATH OF REAR-ADMIRAL HENRY MAY.

London, April 27. Rear-Admiral Henry May, C.B., is dead.

Rear-Admiral Henry May, C.B., is dead. [There are two Rear-Admirals bearing the name of May. One is Henry John May, C.B., and the other is William Henry May, M. V. O., who is a Lord of the Admiralty and Controller of the Navy. The telegram therefore is not without ambiguity, but reasons which it is not necessary to set forth lead to the conclusion that the former officer is meant. The deceased was born in 1853, and entered the Navy in 1866. His service record reads:—Lieutenant of the Superb at the bombardment of Alexandria, 11th July. 1882; promoted; and during Egyptian war (Egyptian Medal, Alex. Clasp, Khedive's Bronze Star); Assistant Secretary to the Ordnance Committee for some time; Commander in command of Racter, at Suakin, in December, 1888; Senior Officer, and commanded the Naval Brigade at the defeat of the Dervishes at Gemaizah, near Suakin, by Sir F. Grenfell (Sirdar). K.B.C., 20th December, 1888; mentioned in despatches (Gemaizah Clasp); promoted to Captain for this service; Member of the Ordnance Committee, November, 1889, to August, 1890: Inspector of Warlike Stores for the Navy. August, 1890, to October, 1892; Osmanieh of the 3rd Class; C.B. on Her late Majesty's birthday, 24th May, 1892; Member of the Ordnance Committee; Member of the Committee; Member of the Committee; Member of the Royal United Service Institution; Captain R.N. College.

The deceased officer married in 1883 Constance,

College.

The deceased officer married in 1883 Constance, daughter of Admiral Sir W. R. Mends, G. C.B.—ED.

OPERATIONS ON THE YALU.

A telegram from General Kuropatkin states that the Japanese during the last few days have been actively preparing bridges at the Yalu to effect a passage at various points near Wiju. Two companies of in-fantry and a small detachment of cavalry actually crossed fifty kilometres below Siampoussiki, upon which the Russian outposts were strengthened.

THE ROYAL VISIT TO IRELAND.

Their Majesties King Edward and Queen Alexandra landed at Kingstown amid torrents of rain but received an enthusiastic welcome.

LABOUR MINISTRY IN AUSTRALIA.

A Labour Ministry has been formed in The Attorney-General is the Australia. only one who is not a member of the Labour party.

THE RUSSIAN BALTIC FLEET.

London, April 28,

The Russian Admiralty proposes to despatch the Baltic fleet by the Suez Canal, sending the colliers by the Cape and appointing a rendezvous in the Indian Ocean

RUSSIA AND WIRELESS TELE-GRAPHY.

It is understood that the Russian contention regarding wireless telegraphy meets with a good deal of support among naval and military men of the Maritime Powers.

(RECEIVED AT THE LEGATION OF FRANCE.) MORALE EXCELLENT.

Saigon, April 24. Viceroy Alexieff reports that the morale of the squadron at Port Arthur is excellent. FRENCH STATESMEN VISIT ITALY.

April 25. M. Loubet and M. Delcassé have set out for Italy.

THE DESTRUCTION OF A LAUNCH.

It is announced in St. Petersburg that a steam launch while laying mines at Port Arthur was blown up, and 21 lives were lost.

SKIRMISHING ON THE YALU. There have been some skirmishes on the

Yalu. MARINE STRIKE AT MARSEILLES.

The officers of the mercantile marine at Marseilles have gone on strike. The shipping service is suspended.

M. LOUBET.

M. Loubet is expected at Rome, where there is great animation and enthusiasm. ITALIANS ACCLAIM THE FRENCH

PRESIDENT.

Saigon, April 26.

The President of the Republic was cheered from the station to the Quirinal and had to appear twice on the balcony. The enthusiasm was indescribable. The city was siasm was indescribable. magnificently decorated. After a private dinner at the Quirinal the President was After a private present at a torchlight procession. On the forenoon of the next day he lunched at the French Embassy. There were renewed acclamations. Demonstrations took place in all the principal towns of Italy.

April 27 The President of the Republic continues to be acclaimed with the same enthusiasm.

THE STRIKE AT MARSEILLES. Saigon, April 28.

Work is almost completely interrupted at Marseilles owing to the strike, but otherwise everything is calm.

M. LOUBET AT ROME.

The Fête programme in connexion with the visit of M. Loubet to Rome continues without any special incident, in the midst

(RECEIVED AT THE FOREIGN OFFICE IN TORYO.) AUSTRALIAN POLITICS.

Sydney, May 22.

The Labour Party having contrived the United States. rejection of the Government's Labour Bill, a influential citize change of the Federated Ministry is expected. THE ANGLO-FRENCH AGREEMENT. president and Mr. I. Foord as secretary.

course for her except to cultivate Russia's became somewhat dangerous. friendship more assiduously than ever. THE "PORIED." this the Vossische Zeitung replies To that Russia may think what she pleases about this matter. There are some Russians who imagine that Germany will take the lead in urging China to dispense with the services of Japanese military in-structors. That is a most erroneous notion. There is no reason why Germany should go out of her way to assist a Power which extends its own political and military influence in China quite irrespectively of the interests of other Powers, especially of Germany. Even though China turn her face away from Russia and place reliance on Japan, that would not constitute any reason for Germany departing from the attitude of circumspection that she has adopted. would be quite unreasonable to affirm that China is guilty of any violation of neutrality merely because she employs Japanese military experts to train her army. For it is not only China's right but also her duty to adopt such measures as may enable her to protect herself against Russian aggression. Germany is not to be expected to pull the chestnuts out of the fire for Russia. Neither is it to be supposed that because Russian journals depict Germany as having become isolated, she will be induced to change the policy deliberately adopted by her. AMERICAN GUARDS LEAVE SEOUL

Seventy men of the Americau Legation guard at Seoul have been sent away and will return at once to Manila, the number remaining being 27.

STEAM LAUNCH BLOWN UP.

A telegram from Viceroy Alexieff says that on the 22nd instant when several steam launches were engaged in laying torpedoes, one of the launches was accidentally blown up, a lieutenant and 20 men being killed.

THE EXECUTIONS AT MUKDEN.

Reuter's correspondent wires that the names of the two Japanese officers shot by the Russians at Mukden were Yokota and

RUSSIAN SCOUTS SUFFER HEAVILY.

Viceroy Alexieff reports that a scouting party of Russians shot two Japanese soldiers party of Russians shot two Japanese solders near an island on the Yalu. (The name of the island is mentioned, but we cannot identify it.) The Viceroy further reports that a detachment of Russian troops num-bering 32, under two officers, proceeded in three boats to the south of the River (an unitability) and user chasened by unintelligible name) and were observed by a Japanese force which opened fire, killing three men, severely wounding one officer and 11 men, and slightly wounding one officer and four men, (a total of 20 casualties out of 34).

THE EMPEROR OF KOREA.

The Emperor of Korea has expressed his desire to distribute 300 yen among the Japanese soldiers and gensdarmes who assisted in extinguishing the recent conflagration.

U.S. PERRY MEMORIAL FUND.

The movement for raising a Perry Memorial Fund in Aid of the Families of Men at the Front has been warmly approved in the United States. A committee of twenty influential citizens has been formed to promote the work, with Mr. S. L. Woodford as

been accentuated and that there is no Arthur to Mukden Prince Cyril's condition

THE "POBIEDA."

It is further stated that the injury suffered by the Pobieda amidships on the starboard side was due to a torpedo.

TO COMMAND PIGEON BAY.
The Vladivostock journal of the 15th
instant alleged that a fort had been erected
to command Pigeon Bay and that it had been armed with guns from the Isarevitch and the Retvisan.

THE EAST CHINA RAILWAY.

In the same journal it was stated that 33 locomotives and 1,155 wagons had been sent from the Ussuri Railway to the East China Railway, and that the service of the former railway would probably be suspended.

A SAPIENT CONJECTURE.

The Novy Krai of the 19th instant conjectures that the Petropavlovsk was sunk by a torpedo discharged by a Japanese submarine.

THE YUENSAN AFFAIR.

It was at 12.30 p.m. on the 25th instant that two Russian torpedo-boats fired on and sunk the Japanese steamer Goyo Maru in Yuensan harbour. The torpedo-boats steam-ed out at 1 p.m. Four Russian men-of-war were seen in the offing, but nothing was visible of them at 5 p.m. The Japanese residents of the Settlement escaped to the neighbouring country.

(RECEIVED AT THE NAVAL DEPARTMENT IN TOKYO.) RUSSIAN DESCENT ON YUENSAN.

On the 25th instant two Russian torpedo boats entered the harbour of Yuensan and sank a Japanese steamer of 352 tons. This was a vessel engaged in the coasting trade, and the property of Mr. Hori. Subsequently a Russian man-of-war was seen standing to-wards the harbour. The Japanese women, children and old people seem to have escaped from the settlement.

[There are various rumours, but the above facts seem trustworthy,—ED. J.M.]

JAPANESE SQUADRON IN THE YALU.

Admiral Hosoya, who commands the Third Squadron, forwards this report from the Captain of the Maya:

This squadron, as previously arranged, entered the estuary of the Yalu on April 25th. On the way up the enemy opened fire on us with field guns from a position on the river's bank opposite Yongampo. The range was long and they did not touch us. Subsequently we sighted some of the enemy's cavalry on an island in the river. We opened fire on them and dispersed them. On April 26th 100 Cossack cavalry opened fire on one of our launches. Our torpedo-boat No. 60 replied. The enemy. leaving several wounded upon the field, took cover behind a hill. There were no casualties on our side. At 5 p.m. on the same day the enemy opened fire on our squadron from the direction of Antsushan. We replied and at half past five, the enemy's fire having ceased, we also ceased firing.

We had no casualties.

(RECEIVED IN TOKYO.)

WRECK OF THE "KINSHU MARU."

On April 26th the Kinshu Maru, a steamer belonging to the Nippon Yusen Kaisha, was wrecked in the neighbourhood of Yuensan. The cause of the catastrophe and the number of lives lost have not yet been ascertained. The steamer was of In connexion with the Anglo-French agreement, several Russian journals have on the 17th instant the Port Arthur 3,850 tons burden and 2,389 tons register.

The steamer was of agreement, several Russian journals have on the 17th instant the Port Arthur 3,850 tons burden and 2,389 tons register.

The steamer was of 3,850 tons burden and 2,389 tons register. The steamer was of 3,850 tons burden and 2,389 tons register.

(FROM THE "JIJI SHIMPO.")

CHINESE CRUISER A TOTAL WRECK.

Shanghai, April 27.

The Chinese cruiser Haitien, which recently went ashore off Woosung, is in such a condition that she can not be floated.

(FROM THE " N.-C. DAILY NEWS.") DEATH OF VERESTCHAGIN

London, April 16.
The painter Verestchagin, who was a guest of Admiral Makaroff on the Petropacilousk, is among

Admiral Makatoli on the Petropationse, is among the drowned.

[Note:—Verestchagin was born at Tchereponeto in Novgorod on the 26th October, 1842, and entered the navy ill seventeen years of age. He afterwards studied art at Paris under Gérôme, as well as at the studied art at Paris under Gérôme, as well as at the Ecole des Beaux Arts and the St. Petersburg Academy. His travels took him through Turkestan, China, and India. He served in the Caucasus and in the Turkish war; saw the storming of Plevna, and again visited India in 1882-4, where he painted twenty illustrations of Indian history. His war pictures, for which he is more famous than his treatment of sacred subjects, include a cycle of twenty illustrating the campaign in Turkestan. Many of his pictures are collected and preserved in the Tretjakoff collection at Moscow. On board the Petropardovsk he was the honoured guest of the ill-fated Admiral who so untimely accompanied him to that bourne where is no strife or war.—N.-C. D. N.] that bourne where is no strife or war.-N.-C. D. N.]

THE TEA DUTY.

London, April 20.

Opinion in parliamentary circles is unanimous in condemning the increase in the tea duty.

THE AGREEMENTS WITH SIAM

In the House of Commons, Earl Percy, Under-Secretary for Foreign Affairs, stated that the agreements between Great Britain and Siam, relative to the Siamese dependencies in the Malay Peninsula, were strictly confidential, and it was not intended to publish them, in deference to the wish of the Siamese Government.

CHINA'S NEUTRALITY.

Peking, April 22.
Several telegrams received from the Tartar Generals of Kirin and Fëngtien provinces have stated that the Russian Government is vexing China whenever and in whatever way it can find a chance. The inclination must be to make China abandon its attitude of neutrality.

inclination must be to make China abandon its attitude of neutrality.

The Chinese Government seems to have decided to take m strong policy against Russia.

A few days ago the Government telegraphed to Viceroy Yuan Shih-kai to make war preparations secretly, and at the same time telegraphed to General Ma instructing him to keep a quiet and careful watch and await later orders.

A Chinese from Chaoyang states that General Ma's troops in that place are estimated at thirteen battalions, and it is believed that as soon as fighting breaks out between Russia and Japan near Newchwang, General Ma will transfer his camp to Chinchou to prevent the escape of the Russian troops.

BRITISH NORTH BORNEO.

BRITISH NORTH BORNEO.

London, April 22. The Government has approved of the appointment of Mr. Edward P. Guerritz, Sessions Judge at Labuan, and Judge of the High Court and Judicial Commissioner at Sandakan, as Acting Governor of British North Borneo.

(From the "Shanghai Mercury.") FATAL BRAWL AT SINGAPORE

Hongkong, April 20. At Singapore at midnight on the 30th a brawl took place between English and Germans in a house of illfame, when a German engineer named Wurzburg was shot dead by a member of the Stanley troupe. He is now charged with the crime of murder.

LITERARY GOSSIP.

An auctioneer has been claiming that he once sold under the hammer "the house in Yorkshire in which 'Nicholas Nickleby' was written." It is difficult to see how anybody could have achieved that feat, however accomplished he might be in other directions. "Nicholas Nickleby" was not written in Yorkshire.

Interesting books still fetch high prices in England. At a recent auction conducted by Puttick and Simpson, the following volumes from the library of a clergyman changed hands:—
"Horæ Beatæ Mariæ Virginis," MS. on veilum,
written by a French scribe of the fifteenth century,

279; first edition of Oliver Goldsmith's "The Russia on foot; 1892, I was a labourer in the

Vicar of Wakefield," 1766, £,75; and "Dives and Pauper," black letter, the second dated production of Pynson's Press, 1493, £41.

London might not "Grub Street" be allowed to reappear? "Groubs," says the County Gentleman, were the feathers of arrows, and it was in this street that the craftsmen who finished off the arrows went out of fashion, "Groub" Street, which had been shortened to Grub Street, became a home of small printers, and a writer for "Grub Street" became synonymous with a literary back. Later it became a drawback to the letting value, and the name was changed to Milton-lane.

Apropos of a case recently tried, when a solicitor in the City of London refused to puy the solicitor in the City of London refused to puy the "Trophy-tax," which was originally imposed to defray the expenses of the City Militia and was resisted in this case because the tax is no longer used for its original purpose, it may be interesting to recall that Dr. Johnson was once drawn (i.e. selected by lot) for the Trained Bands of the City of London. Says Boswell: "It may be believed that he did not serve in person; but the idea, with all its circumstances, is certainly launchable. with all its circumstances, is certainly laughable. He upon that occasion provided himself with a musket and with a sword and belt, which I have seen hanging in his closet."

The collection of Nelson papers in the Depart-ment of Manuscripts in the British Museum has been increased by a series of letters written by Lord Nelson in 1799 and presented to the museum by the Navy Records Society, which received the letters as a gift from Mrs. Sinclair. Among other Nelson documents recently acquired by the department are the instructions issued by Lord Nelson to the officers under his command as to the tactics to be employed under various circumstances in case of their falling in with the enemy's fleet. These instructions were circulated during the campaign which ended in the victory of Treflegure. of Trafalgar.

Attention has frequently been called to the excellent series of Thin Paper Classics which Messrs. Newnes are issuing. The works of Shakespeare, Milton, Burns, Bacon, Keats, Lamb, and many other of the great names in English literature find a place among the editions, and the latest volume to be added is "Tennyson's Poems, 1820,1820." The volume extends to over six 1830-1859." The volume extends to over six hundred pages, but is exceedingly compact, and the fine, clear type, opaque paper, and lambskin binding render it one to have and to cherish. portrait, printed on vellum, by Edmund J. Sullivan of the "mighty man of song whose deepmouth'd music rolls through all the land " appears as a frontispiece.

A new story is going the rounds concerning Mr. Christie Murray, the novelist and some smart cockney lads. As is well known, he wears habitually a Quaker hat, from beneath which his white hair flows in ample volume. Alighting hurriedly from a hansom in Fleet-street, the other day, Mr. Murray collided with two newspaper boys, and made some quick comment on their being in the way. The youngsters gazed at him for a moment, and when one of them had carefully noted the features of the novelist—the long white hair, the fresh, clean-shaven face, the black velvet coat, and the Puritan hat, he blurted out: "Bill, I'm jiggered if it ain't old Quaker Oats come to life!"

From his writings one would not gather that Maxim Gorki was a humorist. But a short time ago, asked by his publisher to write his own bioago, asked by his publisher to write his own hography, Gorki sent in the following account of his career:—In 1878 I was apprenticed to a shoemaker; 1879, I was apprenticed to a designer; 1880, scullion on board a packet boat; 1883, I worked for a baker; 1884, I became a porter; 1885, baker; 1886, chorister in a troupe of strolling opera players; 1887, I sold apples in the streets;

workshops of a railway. In the same year I pulished my first story.

A most interesting Bunyan relic is about to Among the historic revivals of street names in ondon might not "Grub Street" be allowed to appear? "Groubs," says the County Gentleman, ere the feathers of arrows, and it was in this reet that the craftsmen who finished off the trows had their shops. Later, when bows and their shops. thirteen justices of the peace, six baronets, and seven esquires. It sets forth, in the quaint language of the age, that "one John Bunnyon of yor said Towne Tynker hath divers times within yor said Towne Tynker hath divers times within one Month last past in contempt of his Majties good Lawes preached or teached at a Conventicle Meeteing or assembly under color or p'tence of exercise of Religion in other manner than according to the Liturgie or practise of the Church of England."

AND TIRED MOTHERS

INSTANT RELIEF and refreshing sleep for Skin-tortured Bables and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA CHATMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVERT PILLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

Assisted by CUTICURA ORIMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of failing hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, ill the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toliet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic tolet soap, however expensive, is to be compared with it for all the purposes of the toliet, bath, and nursery. Thus it combines in One Soap at One Price, the Best skin and complexion soap, and the EEST tollet and EEST baby seep in the world. BEST toilet and BEST baby seap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tastalesa, brated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Fut up in screw-cap pocket vials, containing 60 doses.

WASTE SILK.

Market steady. Some business done in Filature Kibiso at quotations, and there is rather a better tone in the advices from consuming centres.

YOKOHAMA: SATURDAY, MAY 7TH, 1904.

MARRIAGES.

On May 2nd, at Spremberg, Germany, EDMUND TROELTSCH, of Wasungen, to Martha, third daughter of Mrs. Carl. Richard, of Spremberg.

On May 4th, 1904, at the British Consulate-General, before E. M. Hobart Hampden, Esq., Acting Consul-General, and afterwards at Christ Church, Yokohama, by the Rev. W. P. G. Field, M.A., HORACE WILFRED, eldest son of FREDRRICK C. BUCKLAND, Sevenoaks, Kent, England, to CATHERINE ELIZABETH, eldest daughter of WALTER FINCH PAGE, of Dzushi, Japan.

SUMMARY OF NEWS.

THREE cases of small-pox were reported on April 28th at Moji.

GENERAL VISCOUNT S. SAKUMA has been appointed Commander-in-Chief of the Tokyo Guards.

DURING April, the foreign trade of Hakodate was : exports, yen 12,593 ; imports, yen 16,421.

IT is rungoured that the Duke of Sutherland will succeed Earl Minto as Governor-General of Canada.

THE estimated cost of H.M.S. Glory's refit by the Hongkong and Whampoa Dock Company was

THE death was announced on April 13 of Chow Khoon Tan, mother of the Queen of Siam and

the residence of the widow of Captain Sakurai, (who went down in the transport Kinshu Maru), to convey a message of condolence.

Owing to a landslip a coolie was killed on April 30th below the Hachiman-yato hill, Yokohama, where he was working

SIR JAMES LYLE MACKAY, K.C.LE., has been elected a director of the Suez Canal in succession to Sir E. S. Dawes, K.C.M.G.

THE Tokyo Bay Steamship Company's steamer Taura Maru went ashore on May 1st at 10 a m. off Yokosuka and sank. All the crew were saved.

COLONEL S. HORIBA, who was connected with a libel case in the Court of Cassation was deprived on April 28th of the Sixth Rank and Third Class

MR. OURA, Minister for Communications, inspected, on May 1st, the construction work on the railway line between Maidzuru and Higashi-Maidzuru.

According to a passenger who arrived on April 28th at Shimonoseki the Japanese commenced on the 22nd to remove the torpedoes laid by the Russians in the Yalu near Yong-Ampho.

A man named Asano, a former official of the Takasaki Tax Bureau, who was charged with having set fire to the office, was sentenced to death on May 2nd in the Maebashi District Court

Marquis Ito entertained Prince Li Chi-yong and his party on April 28th at noon at his villa in Oiso. Marquis Yamagata, Governor Sufu and some officials of the Imperial Household were present.

On Friday the Order of the Sacred Treasure (5th class) was conferred upon Mr. Wm. George Smith, of No. 2 Hiroo-cho, Azabu, as a recognition of his services as English teacher at the Nobles' School (Gakushu-in).

A FERRY boat with soldiers of the 12th company of the 25th regiment capsized on May 2nd on the Toyohira river, Sapporo, the result being that three men were drowned. They were on their way to the barracks from drill.

NINETEEN RUSSIANS, seven Chinese and five Germans of the crews of the Russian ships detained at Saseho since their seizure, having been released, were to arrive on May 2nd at Naga-aki, there to embark for their homes

WITH the approval of Her Majesty the Queen and the sanction of the Japanese Government, Miss Ethel McCaul, R.R.C., accompanied by Miss Ethel McCaul, R.R.C., accompanied by Miss Elaine St. Aubyn, has left for Japan to see and report on the working of the Japanese Red Cross Society.

THE Dato Meldrum, otherwise Mr. James Meldrum, of Johore, who died there on the 11th. aged 83, was one of the oldest European residents in the Straits, having come out originally in May, 1848, from Calcutta by the paddlewheel steamer Eliza Penelope.

THE Russian reverses are the principal topic in Afghanistan. The Amir, lately reviewing his regiments, referred eloquently to the success of Japan, and expressed the hope that his army would give a similar account of themselves if

business at Chefoo and Tientsin is entirely suspended. Cargo is very scarce. Fears with regard to the alleged floating mines are prevalent at all the Chinese ports.

The nominal editor and publisher of the Chuo Shimbun were each sentenced in the Tokyo District Court on April 27th to two months' imprisonment with hard labour and a fine of yen 5 on the charge of having published an article insulting Mr. Ikariyama, Chief of the Kagacho Police.

THE Naniwa Railway Company held a general meeting on April 28th at Nara and declared an interim dividend for the last half-year at the rate of 2 per cent. The shareholders elected a comof 2 per cent. The shareholders elected a committee consisting of eleven to consider a proposal with regard to amalgamation with the Kinki Railway Company.

Count Matsukata, President of the Japan Red Cross Society, telegraphed on April 28th to the President of the U. S. Red Cross Society with reference to the arrival of Dr. McGee and her party, and at the same time expressed his cordial thanks for the valuable assistance which he anticipates will be rendered by those ladies.

A Similar telegram dated April 8th says:— The plague mortality continues to rise in Upper India, the Punjab last week returning 19,000 deaths and the United Provinces 8,000. Elsewhere there is little change in connection with the disease, but this serious outbreak has raised the weekly total of deaths from plague throughout India from 43,000 to 46,000.

Nor long ago, the Globe records, a heavy load of old iron was being carried in a cart down the Strand. The lumbering vehicle blocked the traffic, and the British 'bus-driver began to search eagerly, in his mind for some suitable comment. At last he found one. "Nah, then," he said, with asperity, "get on there with yer Russian Navy."

THE first consignments of building material for the new floating dock at Kiaochau have left Germany. The dock will consist of five separate pontoons, with a total loading capacity of 16,000 tons, and will be able to accommodate the largest battleship in the German Navy, as well as the big liners of the Hamburg and Bremen Steamship Companies.

The latest news of the everlasting Acheen war comes from Pangkalan Brandan:—The last expedition under von Daalen, which set out on 29th February, was very successful. It is unnecessary to speak of many small skirmishes, for mention, is needed only of the large energy in panel of the large energy in the same of the large energy is needed only of the large energy in panel on the large energy is needed to live of the large energy in the large en necessary to speak of many small skirmishes, for mention is needed only of the large engagements which were at Rercho, Pasir, Pepareg, and Kotta Lintang in the course of which 541 Bataks were shot by the Dutch troops; 310 dead was the result of the fight at Pepareg. Rajah Bukit and all his followers fled to the mountains. The Dutch casualties were 3 killed and 30 wounded. The expedition is advancing. The expedition is advancing.

A moving story of cruel sufferings and gallant rescue at sea comes from Havre, where the British ship Cairnisia has just landed the crew of the new Brunswick timber ship, Mary A Trop, whom they had picked up in mid-ocean. The vessel had become water-logged after being struck by a fearful cyclone, and the crew of 13 men and the captain's wife had to take hurriedly to a raft, with nothing to support life but 10 tins of conwith nothing to support life but 10 tins of con-densed milk and one of preserved apricots. In this way they drifted for 26 days, enduring un-speakable agonies from hunger and thirst. One of the men died in a state of madness, and the Khoon Tan, mother of the Queen of Siam and Princess Devawongse Svasti.

According to Mr. Tanimoto, pursor of the speakable agonies from hunger and thirst. One of the men died in a state of madness, and the nel Nagayama, his Aide-de camp, on May 1st to from Taku, China, which she left on the 24th, when picked up.

SUCCESSFUL CROSSING OF THE YALU BY THE JAPANESE ARMY.

Saturday, April 30.

The Nichi Nichi's correspondent, Mr. Kuroda, sends a detailed account of the skirmish at the Yalu on the 7th of April. skirmish at the Yalu on the 7th of April, which passage the Russians can drive them It was an insignificant affair in one sense, but very curious in another. A party of 14 papanese soldiers put off from Wiju in Japanese soldiers put off from Wiju in davance against Kiulien, the strong probability is that the Japanese forces did not bability is that the Japanese forces did not essay the assault of the place immediately essay the assault of the place immediately after crossing the river, but that they adrended a certain distance inland to take up a remained in the boat and 7 landed.

During the absence of the latter, the men in the boat were discovered by a detachment of 70 Russian sharpshooters. Unwilling to be taken prisoners, the 7 plunged into the river, but owing to the floating ice and the extreme cold, only t reached the other side, the remaining 6 being swept away. The Russians, thinking they had disposed of the whole, went away, and after an interval the seven scouts returned, found the boat and escaped in her.

The same correspondent describes the first encounter between reconnaissance parties. It took place on the 11th, but was nothing more than an interchange of shots. On the 12th an attempt was made by a party of Russians under a lieutenant to cross to kussians under a neutenant to cross to the Japanese side by the regular route from Kiulien to Wiju. They embarked in three boats and, coming under the fire of a detachment of Japanese infantry under Captain Matsui, were driven back, leaving three dead and having several wounded. Captain Matsui called for volunteers to cross to the island whence the Russians had embarked and to bring back the bodies lying Among them was the corpse of the old lady, apparently his mother, another of a young woman, doubtless his wife, and the third a picture of children. The officer himself seemed to be about 30 years of age. The Japanese were deeply moved by the spectacle. They buried the body with military honours, interring on either side the corpses of the corporal and private who had not been heard of shared the lieutenant's fate. Tablets were erected to mark the spot.

There is no Japanese official news from the Yalu but some statements are made by Generals Floug and Dessino. They are rather confused statements, chiefly owing to the impossibility of identifying the names of places which have been in the first instance transformed into Russian guise and then transliterated into Japanese kana. The gist of the matter seems to be, however, that after three days' preparation the Japanese bridges were constructed. One, apparently a pontoon bridge, was at a point 15 versts above Wiju; the other, a bridge of boats, was at a point below Wiju, but how far below the account does not say. During the building of these bridges several gunboats and the Japanese began to cross by these bridges, but the artillery fire of the Russians smashed the bridge above Wiju and it became unserviceable. The lower bridge, however, was crossed safely, and a force of Japanese

does not err on the side of favouring the The one indisputable fact which emerges is that the Japanese have succeeded Japanese. in crossing the Yalu. The destruction of the bridge above Wiju matters little since they have secured a passage lower down, which passage will of course remain available. able unless the Russians can drive them back across the river. As to the so-called after crossing the river, but that they advanced a certain distance inland to take up a

good covering position.

As to time—the night of the 25th—the Floug-Dessino report tallies with that already received from Captain Hosoya as to the naval operations in the estuary of the Yalu. It appears pretty plain that without the assistance of the gunboats and torpedoraft the crossing of the river below Wiju might have fared as did the attempt to cross

An interesting feature of the naval operaabove. tions in the estuary is that torpedo-boats engaged land batteries. Both probably had guns of the same calibre. The batteries failed to touch the boats and we have no information as to the effect of the latter's fire on the former, but the Japanese say that the field guns ceased firing.

It is to be observed that according to a London telegram, General Kuropatkin has ordered the withdrawal of the troops from

the Yalu. A Chinese junk left Tatung-kou on the 22nd April and reached Chefoo on the 28th. She reports that at Kiulien there are 1,000 Russian troops; at Antung 2,000 under General Mischenko; on hills in the neighwere found three photographs, one of an bourhood there are 15 guns; at Tatung-kou there are 500 men, and at Takushan 1,000 men with 6 guns. The Russians had laid torpedo-mines near Yong Am-pho but the Japanese removed them. Originally the Russians had three small steamers at Antung but one of them ran ashore and another, which set out a few days ago for Takushan, has

A Japanese who reached Chefoo on the same day says that the roads in northern Korea are now tolerably good and that the Japanese army is in high spirits. On the island of Fusan (Hu-shan) opposite Wiju there were 2 battalions of Russian troops with 40 guns. (These are doubtless the guns that destroyed the Japanese bridge, Ed. J. M.) The Russians had of late showed signs of assuming the offensive. Their headquarters were at Fenghwang, and reinforcements were constantly moving up began to throw bridges over the Yalu from Liaoyang. It was said that Kuropat-during the night of the 25th and 26th. Two kin himself had set out from Liaoyang to assume the direction of operations. There are about 20,000 Russians in Fenghwang; some 12,000 in Antung; about 9,000 in Kiulien; and some 2 or 3 companies at Tatung-kou. The enemy had laid mines at various places in the river near Tatung torpedo-boats entered the estuary and aided and Kiulien, but these had all been discovered. The defences at Chansong (above Wiju) the military operations, using search-lights ed. The defences at Chansong (above Wiju) and quick-firers. On the night of the 26th, were weak. The Russians had burned all the trees on the islands in the river.

Later. There is another short official report from the Yalu. The gist of it is that on the 29th of April a squadron of torpedo-boats opened lien-ching at noon, but was repulsed by the Russian fire.

That is the sum of what Generals Floug and Dessino have to tell. We can be quite sure, from past experience, that their story are on the enemy's position on the right and was interred at the back of Wiju.

(3) On the evening of the 25th instant a naval squadron under Captain Nakagawa Am-pho. It consisted of the Russians, the boats returned to their base. Thereafter a squadron of armed launches—Thereafter a squadron of armed was crossed salely, and a loce of Japanese fire on the enemy's position on the right infantry with artillery advanced against Kiu- fire on the enemy's position on the right

up stream (the position taken seems to have been above the second island) and opened fire upon a body of about 150 Russians who, leaving many killed and wounded, retreated behind a hill called Santaolingtau. former operation concluded at 10.55 a.m. The time of the latter is not stated but presumably it was also in the morning. Japanese sustained no loss.

Another report from the same source shows that exactly similar operations were undertaken on the 30th April. On this occasion, however, the Russians replied to the fire of the torpedo-craft below Yong Am-pho, and it is stated that the launches were confronted by a force of 400 Russian infantry and cavalry, with whom were artillery also, but we fail to discover from the report whether the artillery were included in the 400. The engagement seems to have been brisk and the Russians were driven back, the launches having no casualties. The operations were evidently preliminary to or a part of some programme of which we shall soon hear.

Sunday, May I.

OFFICIAL REPORTS FROM THE YALU.

General Kuroki's official reports from the Yalu began to reach the War Department in Tokyo on the 27th instant and their publication commenced on the forenoon of the 1st. The first of these reports says :-

(1) By way of preliminary to bridging the river a reconnaissance in strength was made by the Guards on the 26th instant, on which occasion they took possession of the island called Kuli-tao (the second in order counting from the Korean side of the river above Wiju). A section of the Second Division sinultaneously obtained possession of Keum-chong island (which is the first island in the river immediately opposite to Wiju). The enemy retired precipitately to Kiulien. In these engagements our casualties were, in the Guards Division, killed (the number is illegible), severely wounded 4, slightly wounded 16; in the Second Division no killed or wounded. The enemy were seen to carry off many killed and wounded.

One of the enemy's wounded who was tended by our hospital corps was found to belong to the Twenty-Second Regiment of the East Siberia Rifles. . He said that the 23rd and 24th Regiments of the Brigade were also in front; that the brigade was under the command of Major General Tsurumieff; that each regiment consisted of two battalions, and that attached to each was a squadron (140 strong) of mounted sconts.

The enemy have 8 guns (9½ cent.) mounted on a hill behind Kiulien and with these they opened fire upon our troops at Sohotung. They appear to have also two Hotchkiss pieces on an elevation in the island of Husan. The only firing done on this day by our artillery at Won-hwa-tong was when they discharged 3 shells at a body of the enemy, apparently a commanding officer's staff on Husan.

(2). The enemy's artillery at Kiulien opened on our men at about noon on the 26th. A private of the Guards was wounded by a shell. On the 27th also this fire was Our artillery renewed from time to time. did not reply. The body of Ensign Senioroff was found on the bank opposite Kuli tao and was interred at the back of Wiju.

by the enemy at Antsu-shan. On the morning of the 26th a torpedo-boat and a launch enemy and the naval armed launches. proceeded to sound the river higher up near Antsu-shan. From 5 to 5.30 p.m. the squadron engaged the enemy at Antsu-shan and silenced his guns. It also fired upon a body of about 100 cavalry. The squadron had no casualties.

(4) On the 28th the enemy were observed to be engaged on some works to the north of Kuilien, They fired upon our men from time to time. Ninety-five corpses of horses were found on the bank opposite Kuli-tao (these had been shot in the engagement on the 26th) and 6 were captured alive.

(5) On the 28th instant two companies of the Guards crossed to ve the Guards crossed to Husan to reconnoitre, and sent a detachment to Yielcha-won, where 30 of the enemy had taken up a defensive position. These were driven off. The enemy left 5 dead upon the field. They belonged to the Twenty-second Regiment of Rifles. About this time the enemy opened fire on us from a battery to the south-east of Yushu-kao, but he failed to inflict any injury. From batteries in the vicinity of Kiulien the enemy frequently opened high-angle fire, and his shells fell on the west of Kuli-tao, Wiju, Soha-tang and Hoinhwa-tong. This

(6). At 3 a.m. on the 30th instant the Twelfth Division finished the construction of a bridge over the Yalu at Sukuchin (this is the place where the Japanese crossed in 1894), and passing over the river, reached the position originally indicated. This movement was completed at 6 p m.

(7). At dawn the Second Regiment of Field Artillery and the Regiment of Heavy Artillery reached their appointed position. At 10.40 a.m. the enemy's guns, posted on eminences to the north and east of Kiulienching, opened fire on our scouts who, setting out from Keumchang, had crossed the first two branches of the Yalu and reached Chung-gang-dai (a small hamlet situated on the island that lies between the second and third streams of the river). This fire commenced the action. Our guns replied and the fire soon grew hot. At 11.15 a.m. the enemy's guns at Kiulien ceased firing (or were silenced, the expression is not clear). Eight guns mounted by the enemy on a hill at Makau opened fire on a bridge thrown by our men over the river at Kuli-tao (the first island on the Korean side of the river just above Wiju). The artillery of the Guard replied. After about 10 minutes' engagement the enemy's guns ceased firing. At 1230 p.m. the enemy's artillery at Kiulien and Makau again came into action, but at 1.20 p.m. was again silenced by our fire. It 1.20 p.m. was again silenced by our fire. It caused by the Russians themselves. They

between 400 infantry and cavalry of the the length of front covered by the three

(10) The army is to continue the attack

as planned at dawn to-morrow (1st).
(11) The enemy's shells have a high initial velocity and their time fuses are set for ranges of 7,500 metres and over.

LATER REPORT.

At dawn the army commenced the attack. as planned, with artillery. At 7.05 a.m. the enemy's guns on Yushukan were silenced. From 7.30 a.m. the various Divisions advanced, covered by artillery fire. Between 8.15 a.m. and 9 a.m. the high grounds from Kiulien to the north of Makau and Yushukan were captured.

The enemy numbered 30,000, with a front extending four miles.

Monday, May 2.

DETAILS OF THE FIGHTING.

wade in water up to their arm pits. It was an exceedingly difficult matter for them to exactly with that taken by ourselves. There keep their rifles and ammunition dry, but they succeeded. Fighting in wet garments was an additional hardship, and we can not but express sincere admiration for the conduct of these gallant men.

least 25,000 combatants.

and wounded at between 700 and 800. No ing heights. estimate can be formed on this side as to the Russian casualties. In addition to losing 28 guns, they had twenty officers and a large number of rank and file made prisoners. It is further stated that captures continue to the results the long books of the Russian content to the results the long books of the Russian resument religence is chiefly placed and if he results the long books of the Russian resument religence is chiefly placed and if he be made, the long boots of the Russian movement reliance is chiefly placed, and if he

soldier incapacitating him for flight.

With the twenty-eight guns there were also captured their teams and wagons. Conasso captured their teams and wagons. Con-cerning these guns there is a perplexity. In stating the enemy's strength, General Ku-roki assigns to him 40 field-pieces and 8 machine guns as his total force of artillery. But in stating the captures, the same report speaks of 28 machine guns and a large quantity of rifles and ammunition. bably this second report errs as to the nature of the guns taken.

During the 1st instant the naval squadron rendered every possible assistance. The gunboats Maya and Uji ascended the river to Antsu-shan and Lutankan, respectively, and the torpedo-boats went as far as Sztan. These various craft engaged the enemy at two or three places. The squadron opened fire on the Russian position

(8) The bridge thrown over the main (central) stream of the Yalu having been completely finished by I p.m., the troops crossed in force to Husan island and advanced along the Kiulien-Liao-yang road, being thus virtually in the rear (9) The naval squadron under Captain of the Guards. The right wing, which con-below Antung. A sharp fight took place

Divisions in their advance was 20 miles, but of course they were not equally distributed throughout the whole distance.

The Japanese took into the field one or two batteries of heavy guns; that is to say, guns of very much larger calibre than is usual in field-pieces. These guns are said to have proved most effective. Without the assistance of the Navy it would not have been possible to transport them. They were, in fact, carried over-sea to the estuary of the Yalu. To their fire a Russian officer who was among the prisoners attributes the wounding of the Russian Commander-in-chief and a General of Division.

The Russians retreated upon Fenghwang, which is only some 38 miles from Wiju. Probably they will make another stand there.

Tuesday, May 3 All the leading Japanese journals publish-It appears that in order to cross the Ai ed on Tuesday morning an analysis of the River the men of the Twelfth Division had to Battle of the Yalu, showing that their view of the strategical features corresponds almost was nothing particularly novel in the disposition. Novelties are scarcely possible where the problem to be solved is perfectly familiar and the means of solution to be Wiju, Soha-tang and Hoinhwa-tong. This was to oppose an attack from our side. Even during the night this fire was occasionally renewed. His practice was was wand, on the whole, ineffective. It inflicted no injury. We did not reply. The Twelfth Division, having dispersed a force of the enemy from the opposite bank of the river at Sukuchin, proceeded to bridge the river at that place.

This duct of these gallant men.

The troops the enemy had in position on the whole of the Third Division of Rifles; namely, the value consisted of the whole of the Third Division of Rifles, namely, the silence his artillery, in part at any rate, and, secondly, to conceal the point at which the passage is to be seriously attempted. As to concealment, it is merely a question of degree. There can not be any effectual hiding of such doings. Thousands of men throwing a bridge over a big river make an employed dictate sameness of method by their very nature. To cross a river in the these forces represent two Divisions, or at throwing a bridge over a big river make an object that can not possibly be hidden from The latest report puts the Japanese killed the view of an enemy posted on command-The so-called concealment, thus can be induced to divide his forces for the purpose of devoting attention equally to all the movements, the object of strategy is sufficiently attained. At the battle of the Yalu General Kuroki organized four crossing movements; one by the fleet operating in the estuary of the river; one by the Second Division, operating at a short distance below Wiju; one by the Pro-Guards, operating just above Wiju; and one by the Twelfth Division, operating at Sukuchin, 13 miles above Wiju. The last was the really important effort. directed along a line which carried the Division behind Tiger's Hill to heights on the bank of the Ai River, an affluent of the Yalu which encircles a group of hills lying behind William hims (the Wall which the Medical William hims (the Wall was the W behind Kiulien-ching (the walled town op-posite to Wiju). The duty before the appeared that our fire had inflicted great set fire to Antung and evacuated it. To of which by the Japanese would render slightly wounded, 2 non-commissioned officers and men killed and 22 wounded.

(8) The bridge thrown over the main in its final advance extended to a dising to hold Antung while a large force of the Japanese interposed between that threaten the communications in rear of Antung and Kiulien.

The artillery duel which took place throughout two days prior to the crossing movements, showed a decided superiority on the Japanese side. How much of this was due to superior gunnery, how much to heavier metal, how much to a larger park, we can not tell. The Russian field artillery or 48 pieces, out of which the Japanese guns and many prisoners. Eight guns had captured 28, and the captured guns were all already been captured by the Twelfth Division on the Yushukau and Malan had a leading to the captured by the Twelfth Division on the Yushukau and Malan had a leading to the captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau and Malan had been captured by the Twelfth Division on the Yushukau advantage of being very heavy. According while the artillery duel was in progress, said that the enemy's batteries crowning the heights above the Ai River were firing 9.5-content to tell what was the composition of the Russian park. The probability is that some of these heavy 9.5-cent. guns would have been among the pieces captured, but they were the sian park. The probability is that some of these heavy 9.5-cent. guns would have been among the pieces captured, but they were the direct attack upon Kiulicn. As for the among the pieces captured but they were the direct attack upon Kiulicn. As for the least. Its advance lay through a mountainwhile the artillery duel was in progress, said On the Japanese side there was the least. Arisaka field gun, a weapon corresponding in many features with the German field in many reatures with the German field the Division that crossed the Ai River piece, and there were also some heavier the Division that crossed the Ai River guns, of which the censorship regulations and stormed the heights of Yushu-kan guns, of which the censorship regulations forbid us to speak in detail, though we may they proved very effective.

The operations of the naval flotilla in the estuary of the Yalu helped, doubtless, to divide the attention of the Russians. Moreover, they contributed materially to the evacuation of Antung. For, on the 1st instant, the gun-boat by torpedo-vessels and pushed up the river to a point within range of Antung, which town, being simultaneously threatened by the turning movement of the Third Division. the Second Division, was evacuated by the

On the 30th the bridge built across the first branch of the river at Sukuchin by the lien; and the Second Division, crossing raised the white flag, having previously broken to the island Keumchong, engaged the the breech-pieces of their guns. One of the Russian guns in Kiulien. The fire of the prisoners declares that during this fight main branch of the Yalu from the same place, two Divisions had practically silenced the Russian artillery before noon on the 30th, and the Second Division, crossing the central commanding the Eleventh and Twelfth Second Division moving down towards branch of the river, took up position on the opposite island of Chung-gang-dai, being thus separated from Kiulien by only one branch of the stream. The Guards, however, do not seem to have advanced equally on their their fate. Not until they were shatter-

and then, turning northward, was to pass their position in the afternoon, and a the Laoku-kau heights, capturing them if second artillery fight took place. Meanwhile necessary, thereafter placing itself athwart the Kiulien-Liaoyang road so as to cut off the Kiulien-Liaoyang road so as to cut off the enemy's retreat. There was, very 9 p.m. the Division crossed to Tiger's Hill little probability of the Russians continuing. Island, where it appears to have taken up a lossition that evening. The sum of the matter. position that evening. The sum of the matter, so far as we know, is that the three Divisions, of the Japanese interposed between that so ar as we know, is that the directly so are as we know, is the directly so are as we know, is the directly so are as we know, is the directly so are as a second of the so are as a second of the so are as gagement, and the Second Division turned down-stream towards Antung, which town it passed on its left flank and then headed northward so as to threaten the com-munications between Kiulien and Liaoyang. The Guards Division headed straight for Kiulien, and the Twelfth Division, crossing the Ai and having captured the entrenchwe can not tell. The Russian field artillery the Ai and having captured the entrenchare are armed with the French gun; a weapon of ments on the opposite eminences, headed great force firing 20 rounds a minute. Each across the rear of Kiulien, for Hoh-mutong, where the retiring Russians had charges 120 shells per minute. The calibre concentrated for a renewed stand. This position seems to have been attacked by advantage of being very heavy. According

operations. That was because it had to pass along the front of the enemy's positions over comparatively level ground. Thus far ous district at first, and that may account for its comparative infinuntity. But this was Had the Russians been and Ma-kan. say that they appear to have been carried by tolerable marksmen, the Division must the navy to the mouth of the Yalu, and that have been badly treated. The advance across the Ai seems to have been made in very extended order, the troops being covered by a line of skirmishers with a front of 4 miles. General Kuroki has not yet sent any definite statement of casualties.

Lieut.-General Sassulitch, who was among the wounded, had command of all the Russian forces between Liaoyang and the Yalu.

GENERAL ISHIMOTO'S STATEMENTS

The Vice-Minister of War, speaking at a meeting of the Marine Association, made some interesting statements, He said that the Yalu at Wiju has a width of from 7,000 to 8,000 metres, but that it is full of islands, large and small, the biggest of them having a circumference of some 10 miles. By these islands the river is divided into several branches. The passing of such an obstacle in the face of an enemy Unexpected delay had was a heavy task. occurred in moving the troops from Pyongyang to Wiju, the state of the roads being execrable, and the resources of the country having been completely exhausted by the Cossacks. With regard to the disposition of the troops for the attack, the Twelfth Division, which crossed at Sukuchin and worked round to the enemy's left rear through the hills on both sides of the Ai, is specially equipped for such operations. The Division is known in Japan as the Sampo Shidan (mountain-gun division). But sian forces between Liaoyang and the Yalu. The other Lieut. General said to have been hit was Kashitarinsky (? , who commanded the Third Division.

The Casuality List.

General Kuroki, telegraphing from Kiulien at 2 a.m. on the 2nd instant, says:

Owing to the very stubborn defence made by the chemp at Hoh-mu-tang, where he of the Valu, and the bank on which it stands Twelfth Division having been completed, by the enemy at Hoh-mu-tang, where he of the Yalu, and the bank on which it stands Twelfth Division having been completed, by the enemy at Hoh-mu-tang, where he of the Yalu, and the bank on which it stands the Division crossed this branch at dawn organized his second resistance, and where and took possession of the central island, he fought to the very last with dogged her fought to the very last with dogged bravery, our casualties must be put at some of the Yalu, and the bank on which it stands is precipitous. It is an ideal position for defending. The Twelfth Division, having taken up a position on the heights overlook-ing the Ai on the evening of the 30th, crossing the first branch on the island of Ku-li-do, commenced an artillery duel with the Russians posted on the Makau eminences behind Kiu-lien; and the Second Division, crossing to the Yalu, and the bank on which it stands is precipitous. It is an ideal position of defending. The Twelfth Division, having taken up a position on the heights overlook-ing the Ai on the evening of the 30th, crossing the first branch the original estimate. The defending of the Yalu, and the bank on which it stands is precipitous. It is an ideal position of defending. The Twelfth Division, having taken up a position on the heights overlook-ing the Ai on the evening of the 30th, crossing the first branch the river at dawn on the 1st and attacked the flank of the Russians, who at that moment were engaged in an artillery duel with the Guards and the Second Division. The Guards the flank of the Yalu, and the bank on which it stands to the row in the 1st and defending. The Twelfth Division, having taken up a position on the levening of the 30th, crossing the first branch the first bra from Antung, Kiulien, Liaoyang and the Ai done on the morning of the 1st was for the the last branch, and we must conclude converge, but the strategical error of massing the entire force at one point is palpable.

GENERAL NOZU SPEAKS.

General Nozu, who commanded the Japanese when they crossed the Yalu in 1894, says that the Ai is not only deep but has a soft bottom, and that the feat of wading it and immediately marshalling on the other bank for an attack can scarcely be over-estimated. The General paysavery high tribute to General Kuroki, who is, he says, just the man for such work, having had large experience in the field and being not only fertile in expedients but also imperturbable and daring yet prudent. When the Japan-ese captured Kiulien in 1894, they took 70 guns from the Chinese-old-pattern weapons which the Chinese could not easily transport. Kiulien is itself a small place offering no facilities for the billetting of troops.

MARSHAL YAMAGATA'S COMMENTS.

Marshal Yamagata remarks that the attack and the defence on this occasion closely resembled those in 1894. In each case a bridge was built in the face of the In each enemy and a flanking force crossed at Sukuchin. But whereas General Kuroki bridged the river at Sukuchin, the Japanese in 1894 crossed it by wading. In 1894 the opera-tions of the attacking party were aided by a thick mist, whereas on the present occasion the sky was clear. Heavy rain fell on the evening of the 1st, after the battle, but the forenoon was fine as was also the and. It is very noticeable that whereas in 1894 the Japanese gunboats could not ascend the Yalu to a distance of more than 7 or 8 miles owing to want of proper charts, they were able on this occasion to get right up to army hospital corps.

THE RUSSIAN VERSION.

Great interest attaches to the Russian statement about the battle of the Yalu, since from that statement we learn definitely that the Russians would have held the position if they could. The fact did not indeed admit they could. of much doubt even prior to the battle, though many persons doubted it; but there was just a possibility that General Sassulitch might advance some allegation calculated to convey the impression that he retired of set purpose. His loss of guns and prisoners would have lent ridicule to any plea of the kind, yet for the sake of the Russian nation he might have made the essay. However, he admits frankly that he was beaten. But it will be observed that he attributes his defeat to the overwhelming superiority of the Japanese artillery. Now that is a very curious statement. There certainly was an artillery duel during the three days prior to the battle itself, but we fail to see how the Japanese can have taken any large force of artillery into action on the ist instant when they stormed the Russian positions. The case is very clear. At only two places was the river bridged, at Sukuchin and immediately above Kiulien. Both bridges were thrown over the middle branch of the Yalu, and after crossing them the troops had still to pass the third branch by wading. As for the Sukuchin bridge, it spanned the Yalu only, As for the and did not afford any help in the passage

three Divisions to cross these rivers, and in doing so they had to wade, the Guards and the Second Division up to their waists, the Twelfth Division up to their breasts. That, at least, seems to be the interpretation of the accounts hitherto received, and it is the interpretation accepted in Japanese military circles. But under such circumstances no heavy guns could have been taken over to the Manchurian side. Moreover, the hardest fighting of all took place on the Hohmu-tang heights, where the Russians made their second stand: took place, that is to say, at a position some miles in rear of Kiulienching and therefore entirely out of range of any batteries which might possibly have assisted, from the southern side of the river, in the attack on Kiulien. It is difficult to comprehend the Russian General's statement that he was beaten by artillery. Before arriving at any definite conclusion, however, we must await further details. The question is one that will have immense interest for the French, since the Russian artillery is on the French pattern.

THE ENGLISH NEWSPAPERS.

Reports of the views expressed by English newspapers are brief. They do not appear to have discussed the strategical features of the affair with much minuteness as yet, their disposition being rather to congratulate the Japanese and to estimate the disturbing effect that this defeat will exercise upon Russian public opinion and on the spirit of the Russian troops. It may indeed be taken for granted that the Russians will be much Their talk was tall, soared almost out of sight, when they under-took to predict the terrible chastisement they were able on this occasion to get right up to would inflict on these audacious Japanese so Antung, thus contributing materially to the soon as they met them face to face in the convenience of the commissariat and of the land lists. The humiliation of defeat will be correspondingly keen. But it must appear to careful onlookers that the Russians will have to change their methods if they hope to crush Japanese armies. Close scrutiny shows a curious resemblance between them and the Chinese. Both made precisely the same mistake in their defence of the Yalu position. Both sat quietly to be attacked. The Russians did not show the least sign of offensive initiative. Neither did the Chinese. A defensive attitude has great advantages in these days of wonderful weapons of destruction, but to stand on the defensive without any offensive effort is to invite defeat. The Japanese had to attack under great difficulties, it is true, but can we imagine that General Kuroki would have launched his troops beyond a big river to assail a strong enemy strongly entrenched if that enemy had shown any capacity for enterprise? The Japanese General took the measure of his foe accurately, and unless the Russians grow to greatly changed dimensions pretty soon, they will probably fare no better in the future than they have done in the past.

THE FRENCH NEWSPAPERS

Shimpo that the French newspapers publish the Russian official account Shimpo that the French newspapers publish wounded; the Japanese casualties were 10 the Russian official accounts only of the killed and 26 wounded. They left a quantity Yalu battle and refrain from mentioning the of rifles and ammunition and fled, one half to details furnished from Japan. They say the Yalu, the other half to the north. On the that the retreat of the Russians upon Liao- same day a body of 1,500 Japanese with 12 yang will probably be an arduous business, and that General Kuropatkin's wisest plan of the Ai River which lay beyond. Thus, on the night of the 30th of April, the Guards and the Second Division encamped on islands fronting the third branch of the Yalu, and the Twelfth Division bivouacked on the Ai. The first thing to be They crossed it, however, by wading (opposite to Sukuchin). Two companies of our infantry, a body of Cossacks and 2 mount to ur infantry, a body of Cossacks and 2 mount to a time the doubted whether such a view is founded at the Second Division encamped on islands on careful consideration of the facts. The attempted to oppose this movement, but were obliged to retire with 4 wounded, among them being the Lieut-Colonel. hither side of the Ai. The first thing to be They crossed it, however, by wading

that their heavy artillery and their commis-sariat could not immediately follow them. The enemy having been driven away from the northern bank, no great difficulty could have been found in bridging the river for the passage of guns and provisions, but the operation would necessarily take some time, and pending its completion General Kuroki could not push forward to any distance from the Yalu. Troops are only human, and if we reflect on what the Japanese troops went through during the 29th and 30th of April and the 1st of May, we can appreciate the fact that a moment's respite was essential. If the accounts of the battle thus far received be correct, General Kuroki took a great risk. He moved his men across a river of some depth without any reasonably secure road of defeat in the event of discomfiture. Had the Russians driven back the Japanese and forced them to retire across the Yalu, something like an overwhelming catastrophe would now have to be recorded. It is admitted to be the part of genius to take such risks when proportionate success is within sight, and we must therefore take off our hats to General Kuroki. But unless he be a superhuman commander he will have to pause moment before pushing on to Fenghwang, and in that moment the Russians will be able to recover breath. Evidently at this juncture also the command of the sea has proved of immense value to the Japanese. Not only was the flotilla under Captain Hosoya able to search the right bank of the Yalu up to Antung and possibly to render the Russian positions at the latter place untenable, but also after the battle the ships probably rendered great service in transport-ing provisions if not artillery. Nevertheless we do not share the French view that the Russian retreat is in imminent peril of being converted into a catastrophe. They may be assumed to have fortified Fenghwang-ching as an advanced base, and since from the Yalu to that place there is a distance of nearly 40 miles, some interval must elapse before the Japanese can reach the new position. There is one contingency which might create an immense peril for the Russians. That is the landing of a Japanese army at Takushan, or some other point on the littoral of the Yellow Sea, and its march direct upon the Fenghwang-ching—Liaoyang road. But such points of strategy are enveloped in splendid obscurity.

THE FLOUG-DESSINO ACHIEVEMENT.

This factory has been again at work. Its product with regard to the Yalu battle is: "At midnight (apparently on the 29th) General Sassulitch crossed the Yalu and ordered 2 battalions of the 22nd, the 10th and the 12th regiments to attack the Japanese outposts which had taken possession of Husan and Yulchasan. These troops had mountain guns with them. They united with the artillery that had been cannonading Hotehtienzarori (?), and they drove out the Japanese. We had 2 men killed and 13 guns attempted to cross the river at Anping (opposite to Sukuchin). Two companies of our infantry, a body of Cossacks and 2 moun-

them." (What then happened the factory does not say). "On the 30th a Japanese park of 24 field-pieces and 120 machineguns, firing from a temporary battery constructed by us " (apparently on the south side of the Yalu) "fired unceasingly on our this battle does not by any means decide position at Kiulien from 10 a.m. to 5 p.m. We replied with 8 field pieces until 11 a.m. During this artillery fight an immense force of the enemy crossed the river at Shindeago (?) and attacked a battalion under Colonel Kuramoff with two guns. Therefore are force retreated in good order from osition at Kiulien from 10 a.m. to 5 p.m. fore our force retreated in good order from Husan to Poririnzu (?). Our casualties were insignificant and our guns were safe. The enemy's losses are unknown. On the 1st of May the enemy again attacked our army at Kiulien. We, according to our previously arranged plan, abandoned Kiulien and retired to Rushigo (? Lishukou) on the road from Hohmutang to Liaoyang."

The Asahi Shimbun, referring to this previously arranged plan," calls it teki no yoki seru haisen, or in other words " the defeat the enemy expected." It would be superfluous to ask Generals Floug and Dessino whether the loss of 28 guns and several hundreds of prisoners, to say nothing of casualties, was part of the "previously arranged plan." More apposite is the suggestion made by an onlooker, namely, that these Generals might save themselves some trouble if, instead of manufacturing wonderfully clumsy fictions, they borrowed Mark Twain's description of his victorious combat: -" Then by a skilful manceuvre I inserted my nose between my adversary's teeth and held it there."

Friday, May 6.

THE ITALIAN AND AUSTRIAN JOURNALS.

The Tribuna observes that, considering the fact of the Russians being in a defensive position with everything in their favour on the Yalu and the Japanese having to attack a difficult position, the discomfiture of the former could not have been anticipated. The future alone can show whether the abandonment of Antung and the strong positions in its vicinity will prove advantageous to the general plan of General Kuro-

Le Patrie observes that the Yalu Battle does not constitute a sufficient basis for building any theory as to the fate of the war in Manchuria, but certainly the fight on the 1st instant was of much importance as indicating that Russia's military dispositions are as imperfect as her naval. From a strategical point of view there can be no doubt that the retreat of the Russians was a

victory for the Japanese.

Il Popolo Romano admits that Russia has suffered a mortal defeat in her first engagement but no immediate inference can be drawn as to the issue of the war.

The various journals of Vienna agree that this defeat will have grave moral consequences for Russia.

The Frendemblatt says that whereas everybody expected to see Russia reverse on land the defeats she had suffered at sea, such has not been the case. On the contrary the result of the first battle has been to demon-Even granting that there be some exaggera-tion on the Japanese side, nothing can conceal the fact that Russia has suffered a

defeat.

Russia to seek mediation.

in Europe.

The Russian Consul at Tientsin is reported to have issued a circular to his colleagues declaring that General Kuroki's report of the Battle of the Yalu is false. This brave Consul seems to have been only laughed at for his pains. As well he might be for what could he possibly know about the fighting on the Yalu? Without any desire to speak ill of the Russians we are bound to say that their official procedure throughout this war has been contemptibls. Any similar "squirming" and misrepresentation on the part of the Japanese would evoke from the world a shout of denuncia-tion. Then indeed we should hear much of Oriental ways. Yet all is fair in war.

According to news received in Russia, no details of the Yalu battle have yet been made public, and the newspapers confine themselves to a broad statement that a retirement has taken place. Nevertheless public feeling is much perturbed. The nation had been earnestly looking for news from the field, being quite convinced that the first encounter of the land forces would atone for the defeats hitherto suffered by Russia at Manifestoes hostile to the Government are widely circulated, in defiance of police prohibition, and are openly read aloud to listening audiences. It is stated that a feeling of profound dejection has been caused alike in court and in official circles by the receipt of the bad news.

According to General Sassulitch's official report the number of Russian wounded who have been brought in to Fenghwangteng is about 800. He has no certain record of the killed. Our readers know that there are 100 Russian wounded in the hands of the Japanese, besides 230 prisoners. Hence it would appear that the Russian casualties must have totalled fully 1,500.

THE " KINSHU" AFFAIR.

Monday, May 2.

It is reported that the Russian soldiers in garrison in Peking indulged in a night's jollification when they received news of the sinking of the Kinshu Maru. They are

thankful for small mercies.
From the Floug-Dessino bureau the public learns that the Japanese transferred from the Kinshu Maru to the Rossia were 17 officers, 85 sailors, 65 coolies, and 30 soldiers. The remaining 200, having refused to surrender, were sunk with the ship. This does not differ greatly from the Russian report vià Petersburg and London, except that in the Floug-Dessino version 85 sailors and 65 St. Petersburg telegram says 20.

The Nakamura Maru, which the Russians claim to have sunk, is obviously the Goyo

Another strongly applauds the strategy whereas the Japanese say that not so much trates vividly the difference between Occid-and tactics of the Japanese and declares that as one soldier was captured, the Russian re-ental and Japanese views of death.

Japan has now shown that in the field she turn shows 20 military men. This discre-has nothing to fear from the greatest Power pancy is due to confusion between military and naval. From detailed lists now published in Japan, it appears that 14 blue-jackets, 4 warrant-officers and 2 commissioned officers of the navy were on board the Kinshu Marn, and these are doubtless the 20 men men-tioned in the Russian account. The remaining detail on board the vessel was

Officers of the ship 11 Crew..... 57

According to the latest Russian official report from St. Petersburg the persons captured were

Officers...... 1

These numbers are probably incorrect. It is unlikely that the Russians would have made any very accurate examination into the composition of the men captured. But it will be observed that their account is larger than the Japanese total by 22. The only apparent method of accounting for this disapparent method of accounting for this dis-crepancy is to suppose that the Russians rescued some of the soldiers from the water after the vessel sank. They might and pro-bably would err in their description of the details, but their total would scarcely be in-correct. We trust that this supposition will prove correct, as it will avert another disgrace from the Russians. They were undoubtedly justified in sinking the Kinshu Maru since the soldiers on board made no act of surrender. In this respect the case was analogous to that of the Kowshing. But so soon as the vessel sank it was the imperative duty of her sinkers to do everything in their power to save life, and if they failed to do so they will be disgraced. Their own account certainly does not suggest any such effort. It speaks curtly of having sent to the bottom the ship and the 200 soldiers who did not surrender. But until more positive proof is forthcoming, it would be unjust to lay this sin of brutality to Russia's charge.

Japanese newspapers are unanimous in regarding the incident as a petty affair with regard to its dimensions. For such losses a country at war must be prepared. are also unanimous in declaring that the soldiers and their officers behaved in a manner worthy of Japanese sanurai. Mili-tary forces are powerless at sea, and they are well aware of the fact. There was nothing to be done but to surrender or to die, and these men chose death, as is a soldier's duty. They assembled on the deck of the ship, fired their last volley and died. Nothing more could have been asked of them. Their last act was a message to their country; a message which she reads to mean that so long as Japan is served by such burg account is 85 coolies and 65 of the crew. The Japanese say that no soldiers were taken by the Russians. The Floug-conduct of Commander Mizoguchi and Dessino factory says 30 were taken; the Paymaster Iida, who seem to have used to have Paymaster Iida, who seem to have proceeded at once to the Russian ship and to have remained there. It is supposed that they went with the object of saving life and that the Russians immediately made prisoners of them, but among the comments evoked by Another Vienna journal considers that the event will have the effect of inclining Russia to seek mediation.

Another strongly applicate the strategy with the strategy and the s

Captain Sakurai who commanded the ties. The people in its northern part cross the officer in command at Yuensan decided company of soldiers and who died with freely into Russian territory and many of to send a company of men to Iwon by way them, has been honoured with the Order of them become naturalized there. the Golden Kite. He was an officer of high promise. In the war of 1894-5, while still a young lieutenant, he distinguished himself highly, conducting perilous and independent operations which demanded the utmost intelligence and zeal.

The soldiers that died were of the Fourth Division; that is to say, the Osaka Division. The Osaka troops have hitherto had a bad name among military men. They were charged with pusillanimity on the occasion of the first Formosa campaign, and the stigma clung to them ever afterwards. No opportunity of removing it was given to them in the war of 1894-5. But they have now rehabilitated their reputation.

Only faint reference is made—by Kokumin Shimbun-to the fact that the Kinshu Maru was without naval escort. Yet that is the feature to which foreign atreported to him that she had gone northwated present the silence of the Japanese press as an indication of unwillingness to dwell upon an error of which naval officers have declared themselves keenly conscious; unwillingness all the more explicable in view of the splendid service hitherto rendered by the navy. Perhaps the justest criticism is to say that this incident, despite the terrible loss of life it entailed, is fortunate for the Japanese. It will recall to tention will be chiefly directed. We intertheir minds their own profoundly wise proverb Katte kabuto no o wo shimero (fasten your helmet strings in the hour of victory). again, we imagine, will a transport be found

For the Russians this has been one—their first—stroke of good luck. They must have been very close to Japanese men of war during the night of the 25th-26th. Probably nothing but the heavy fog averted an encounter, and the fog was essentially an accident. What we wonder is that arrangements for using wireless telegraphy are not more fully made along the east coast of Korea. Detachments of troops placed at important points and having access to wireless telegraphic stations should effectually prevent these undetected forays.

From the detailed reports it appears that the soldiers on board the Kinshiu Maru burned all their documents and removed all badges from their uniforms, in order, even was therefore detacled to make a search after death, that the Russians might not know of the adjacent coast, which she did, pointments. They will probably be singing to what regiment they belonged. After examining the whole shore from the vicinity firing their last volley they gave three of Kilju to Chahopo. She found nothing, cheers for the Emperor and for Japan and knowing that the torpedo-boats were to

There are signs that troops of Cossacks are riding down the eastern coast. Those Marn's catastrophe and found that that entered Songchin on the 16th were said had been sent to rescue the survivors. that entered Songchin on the 16th were said to have retired northward from that place after burning the Japanese settlement, but some accounts represented them as having moved southward to Tanchhon, and it is now said that the Koreans seem to expect them at Pakchhong and are mending the roads to accommodate them. The town of Iwon, where the ill-fated Kinshu Maru called on the 25th, lies 27 miles above Pakchhong, and it may be assumed either that the Kinshu Maru left a force there or that the officers she carried saw no reason to adopt such a precaution. At any rate the Cossacks are not in sufficient force to effect anything considerable. The main trouble is that they seem to have the full sympathies of the continued his search without success and returned to Yuensan on the 28th.

It is stated that at the time when the Goyo Maru a thick fog prevailed; so thick that objects were indistinguishable at a distance of a few yards. The Taisei Maru, which had reached the port an hour after the weather, and after spending the night of the 25th-26th in Challon, where the ill-fated Kinshu Maru called hopo, hebarely succeeded in making Yuensan. Then being sent out to search for the Kinshu Maru, which had reached the port an hour after the Goyo Maru, was not detected by the Russians and escaped unscathed. Further, the high to the 25th. On the 27th he met the first place, deterred from completing the voyage southward in company with the Kinshu on the weather, and after spending the night of the 25th-26th in Challon, which had reached the port an hour after the Goyo Maru, was not detected by the Russians and escaped unscathed. Further, the high the first place, and the first place, and the roads to accommodate them. The town of the kinshu Maru, and it is stated that at the time when the Torpedo Squadron reports that the time when the Torpedo Squadron reports that the time when the Torpedo Squadron reports and tompeting the night of the exceedingly threatening state of the weather, and after some individual to the first place t the inhabitants. The province of Ham-gyong-do, as we have already explained, has the reason of the movement which result- the Russian officers made no examination long been noted for its Russo-phil proclivi- ed in the loss of the Kinshu Maru was that whatever of the ship and her cargo. In

Tuesday, May 3. It appears from Admiral Kamimura's report that he had his squadron at Yuensan on the 23rd. That day he set out with the intention of proceeding to Vladivostock but the further he steamed the more densely he became enveloped in a fog. For three days he was unable to take any bearings, and during the greater part of the time he could not even discern the vessels of his squadron. On the 26th he returned to Yuensan, not being able to make Vladivostock in such weather. Then for the first time the sky cleared. It was precisely in this interval that the Goyo Maru and the Kinshu Maru were sunk, the former on the afternoon of the 25th, the latter after midnight on the same day. When Admiral Kaminura entered Yuensan on the 26th the fate of the Kinshu Maru was not known, but the Consul having convoyed the transport to Iwon, which after the discharge of the first torpedo. place was reached at 2 p.m. on the 25th, Then the men fell in on the deck and opened and a body of troops having landed to make a fierce fire with their rifles. The distance a reconaissance, the Kinshu and her escort was only 200 metres and they fired as set out again at 6 p.m. for Yuensan. The weather looked so threatening, however, that the torpedo division put into Chahopo for the night, leaving the transport to proceed on her way. The question then was, what had become of the Kinshu. Had statement is that these men lowered a boat and they fired as set out again at 6 p.m. for Yuensan. The was, when they gave three cheers and went down. With regard to the fact that none of the blue-jackets were saved, the statement is that these men lowered a boat and we was the Russine or had she lost her. she met the Russians or had she lost her and prepared to save life when the vessel course in the fog? Torpedo-boats were at sank, but they were all killed and their boat once sent to search for her, the Admiral hingswamped by the Russian fire. self deciding to remain in Yuensan until the 27th. This intention he carried out, and burning of the Japanese settlement at Songsearch the rest of the coast, she put back to Yuensan, where she learned of the Kinshui

Maru's catastrophe and found that wessel

to send a company of men to Iwon by way of the precaution against a possible advance of the Cossacks from the north.

As for Admiral Kamimura's squadron, having left Yuensan for Vladivostock on the 27th instant, as above related, it found itself enveloped once more in blinding fog towards evening on the 28th and had no choice but to return to Yuensan, where it arrived on the 30th. On the way back the Naniwa observed a bouyant torpedo of the enemy and the Isumi destroyed it. Further, at a point a little south of Songchin two boats that had belonged to the Kinshu

Maru were picked up.
It need scarcely be said that British newspapers—according to a telegram from Lon-don—congratulate the Japanese nation on the grand discipline and courage shown by the soldiers on board the Kinshu Maru.

Wednesday, May 4.
According to a report from Yuensan, the officer commanding the company on board

while en route for Vladivostock on the day chin have not been without effect in Korea. the squadron picked up a barge in which The former event has been magnified into were a rifle (Japanese), and sword and a boat. There were no signs of blood, and it Yuensan, and the latter into the complete was conjectured that the Kinshu Maru, seeing the Russian cruisers, bad steamed northward and been beached, her crew Japanese subjects. Thus for the moment escaping inland. The cruiser Chihaya the Russian party is in the ascendant, and
THE YUENSAN AFFAIR.

Saturday, April 30. It is stated that at the time when the

twenty minutes' time they drove out the crew at the point of the pistol, departed in their own boats and discharged a fish torpedo which struck the little steamer on the port side, destroyed her machinery and sent her to the bottom in a few hours.

It is alleged that there will be little difficulty in raising her, and that operations for that purpose have already commenced.

The Haginoura Maru left Songchin for Fusan on the 26th of April and has not since been heard of. It is now conjectured that she was the so-called Nakamura Maru which the Russians reported that they sank subsequently to the Kinshu Maru

It is stated that the inhabitants of Yuensan are considerably alarmed. No Japanese war-ships are known to be in their neighbourhood and a vessel which was expected has not arrived.

Friday, May 6.

It is stated that the Vladivostock Squadron has not yet returned to port but is cruising in the sea of Japan. The source of the statement is not trustworthy, however, and we do not hear that the squadron has visited any port on the Korean coast since its escapade at Yuensan on the 25th of April. If it be still Korean at sea, its coal supply must be getting scarce. Besides, it will be remembered that we had an official Russian report of the Yuensan and Kinshu incidents shortly after their occurrence. The report may have been sent by wireless telegraphy, but that method of transmission would be risky as not unlikely to betray the presence of the squadron by means of interception. It seems more probable that the Russians returned to Vladivostock at once after closing the third chapter of their ruin-and-run strategy.

The Haginoura Maru's fate becomes more and more a matter of solicitude. She was just in the track of the merchant-men-destroying cruisers when they steamed north from Yuensan, and nothing has since been heard of her unless the Nakamura Maru, which the Russians claim to have added to their bag of non-combatant victims, be a mis-pronunciation of *Haginoura Maru*. This little steamer, like the *Toyo Maru*, was the pro-perty of Mr. Hori of Osaka. Misfortunes, in his case, have verified their character of never coming singly. The Haginoura Maru was the steamer that rescued the Japanese residents of Songchin as the Cossacks were riding into the place. Subsequently she took a cargo of dried fish from that place for Subsequently she Fusan, and the latter port has not seen any-thing more of her. She had a crew of 23. Presumably they were rescued, or the Russians could not have gathered even their confused idea about the name of the steamer.

KOREA.

It is stated that on the 2nd instant the Korean Government ordered its Representative in St. Petersburg to return at once.

The First Bank is about to open a branch

at Wiju. A staff of clerks from Anju and Chemulpo have set out to organize the institution.

GOTEMBA LEPER HOSPITAL.

We beg to acknowledge with thanks the receipt of a cheque for yen 50 from Mr. J. T. Hamilton on behalf of the Gotemba Leper Hospital, which recently made an appeal for funds through our columns.

POR1 ARTHUR.

Monday, May 2.

There appears to have been some kind of operation at Port Arthur. A Russian report says that on the night of the 27th and 28th April three Japanese torpedo-boatsapproached the place where the *Petropavlovsk* sank and, coming into the field of the forts' searchlights, were fired upon. They endeavoured to destroy the search-light on fort 22 (or 12). On the following day (20th) sounds of can-nonading were heard in the direction of Liaotishan by two Japanese junks, one of which entered Newchwang, the other Chefoo. It appears that Prince Cyril was thrown

from the bridge to the deck of the Petropavlovsk but that though badly hurt, he did not When the ship went lose consciousness. down, he managed to support himself by means of a tarpaulin that floated past, and after clinging to this for some ten minutes he was rescued by the destroyer Beschumni. Admiral Makaroff was on the bridge at the same time. It is supposed that he was severely wounded before the vessel went down A statement in the Novy Krai, made by one of the survivors, indicates that the battleship struck two mines in succession. shock of the first explosion hurled a quantity of gear from the stern of the vessel into the water, and as the first mine struck her on the starboard bow it would almost appear that the shock must have lifted her fore part from the water. Almost at the same instant another mine struck her and she became enveloped in a cloud of yellow vapour. In a minute's time-an obvious exaggeration her bows plunged into the sea, and standing for an instant almost perpendicular with her screw racing in the air, she plunged to the bottom. According to Russian accounts the 13th of April was an even blacker day for the Russian Navy than has been supposed. In addition to the loss of the Petropavlovsk, the torpedoing of the Pobieda, and the collision of the Poltava and the Sevastopol, 3 cruisers were injured and 6 destroyers have not since been heard of. This is partially borne out by a statement attributed to a foreman of the Port Arthur dockyard, who having left that place on April 23rd, told an Asahi reporter in Chefoo that the war-vessels still serviceable on the Russian side did not exceed one battle-ship and three cruisers, and that of 30 destroyers available when the war commenced only 10 remain now. To this list of catastrophes has to be added the sinking of a Russian hospital ship, the Europa, which was recently sent to the bottom by a collision inside the harbour.

Wednesday, May 4.

There is confirmation of the news that the Shilka, a steamer belonging to the East China Railway Company, was sunk by coming in contact with a torpedo when leaving Dalny with a load of 3,000 tons of coal for Port Arthur. It is said that 3 Russians and I Chinese were lost.

Thursday, May 5 The *Jiji Shimpo's* Chefoo correspondent telegraphs under date of the 4th at 8.55 a.m. that, according to a trustworthy authority a Japanese flotilla of 9 steamers, taking advantage of a thick fog, approached Port Arthur, and were sunk by their crews under a heavy fire from the forts. It is believed that Port Arthur is now completely blocked.

Friday, May 6.

took in 8 steamers to Port Arthur with the intention of blocking the entrance, but that they failed to effect their purpose, the steamers and two torpedo-boats being sunk by the forts before reaching their destination.

General Floug, telegraphing to General Dessino on the afternoon of the 4th, says that during the night of the 2nd and 3rd eight Japanese steamers escorted by three torpedo-boats approached the harbour, but were detected and, being brought within the field of the search-lights, were subjected to a heavy fire from the forts and all the ships in the harbour (sic), so that they sank without reaching the desired position and the entrance to the harbour continues unobstructed. Two of the Japanese torpedo-boats were sunk, and the third was so much injured that it had to be towed away (sic). Probably the crews of the steamers were all lost. Numbers of corpses are seen floating in the offing. A small number of officers and 30 sailors were made

General Floug's previous performances as a purveyor of news have not inspired confidence in his accuracy, and even though he commanded the utmost credence the above account contains internal evidence which requires much explanation. In the first place he tells us that all the ships in the harbour opened fire on the Japanese steamers. That is a physical impossibility unless the ships steamed out for the purpose, and if they steamed out, then to speak of them as ships in harbour is delusive. In the next place we are told that all the steamers having been disabled or sunk by the fierce fire of the Russians, and two out of the three torpedo-boats having been sent to the bottom, the third was so much injured that she had to be towed Towed away by what? Were there away. any other Japanese ships upon the scene? If so, what were they and how did they fare? The General seems to have suddenly brought into the field of operation a phantom vessel expressly for the purpose of demonstrating the disablement of the third torpedo-boat and thus rounding off the Japanese catastrophe.

There can be little doubt that another, a third, attempt has been made to block the harbour. It is in the nature of Japanese belligerents to stick to a task once imposed upon them, and in this case although the difficulties of success increased in a rapid ratio with each attempt, the naval men have evidently been undeterred. We can not, however, dismiss General Floug's story as a mere invention. Certainly an officer who could persuade himself to deliberately represent the battle of the Yalu as a previously planned retreat by the Russians preceded by some losses in-flicted on the Japanese, such an officer must step down for ever from the rank of veracious chroniclers. Still his latest story must have some foundation. Very likely the Japanese suffered severely in this last essay, and we shall not be surprised to learn eventually that one or more of the steamers was sunk before reaching the harbour's mouth and that a torpedo-boat suffered the tate which the brave Japanese sailors have so often risked. But that the Russians, using only gun-fire, managed to sink the whole 8 or 9 steamers during the brief space of 20 or 25 minutes that the vessels were within easy range, and to sink also, two out of three torpedo-boats, thus sweeping to craft out of it off the surface of the A telegram to the German newspaper at sea—that is altogether too tall a tale. The Shanghai from Cheefoo says that on the Japanese official account must be awaitmorning of the 3rd instant the Japanese ed before coming to any definite conclusion.

established that fact. Happily we are not obliged to depend upon any Mukden-Shanghai manufactures.

CHINA,

Saturday, April 30.

The Asahi Shimbun publishes a long report compiled by a Chinaman whom its Peking correspondent despatched from Shanhaikwan on the 18th instant to examine the military dispositions of the Russians along the Liao. We have read the result of this envoy's expedition but the impression it conveys is one of extreme distrust, and we shall refrain from perplexing our readers with the details. A Chinese civilian is not under any circumstances highly quali-fied to make useful observations of the strength and arrangement of a Russian military force. The only fact which seems to emerge with any distinctness is that the objective point of the principal stream of commissariat is Fenghwang, which would suggest that the Russian troops are massed in great force at that place. The Chinaman also mentions that place. The Chinaman also mentions incidentally an interesting feature; namely, that the land transport are using 300 artillery wagons for the purpose of conveying provisions and that 5 roubles a day are paid for ox-carts. He says it takes 5 days for a cart to travel from Liaoyang to Fenghwang, and that the distance is 120 miles. The proposed of the control of the care for Enghwang for Enghwang for the care for the proposed for the care fo principal depot of stores for Fenghwang is a point among the hills some 20 miles westward. It would seem that very great difficulties are experienced in organizing a satisfactory transport service. Every animal

tion, which was in itself a comical step the grave question would arise whether seeing that they had no right to be driving the horses and that they have deprived Tseng of all practical power to control the ler obligations towards a neutral Power, taking the law into their own hands and apprehending the Hunghutze. It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route.

It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route.

It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route.

It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route.

It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route.

It is stated that the Russians are laving a relivery form Mongolia merely to be despoiled of them by the Hunghutze en route. Tseng of all practical power to control the her obligations towards a neutral Power, Hunghutze. Tseng is said to have replied there now stands between France and a that he had no objection to the Russians serious trouble nothing but the thin wall of

railway from Mukden to Sinming-chin, which is on the west of the Liao along the high-road to Kinchow and Shanhaikwan. They have also sent troops to Kaufongtsu.

The public has the satisfaction of knowing that the Japanese official accounts are altogether trustworthy. Experience has 2 killed. Two partially successful attempts at any given moment. to wreck the railway took place.

> Friday, May 6. The Russians in Manchuria, according to the *Jiji Shimpo's* Peking correspondent, are adopting a more conciliatory policy in Manchuria. They are paying regular wages to such of the Hunghutze as tender submission, and they have ceased to requisition goods and animals without compensation. But inasmuch as their payments are made with rouble notes which are not exchange-able and have no appreciable value in Chinese eyes, it is alleged that this gentler mood produces no corresponding results. Of course each success gained by the Japanese in Manchuria and each forward step taken by them tends to depreciate Russian promises to pay and thus aggravates the situation for the soldiers of the Tsar. The circumstances illustrate that pithy saying "cast thy bread upon the waters." During the campaign of 1894-5 the Japanese armies in Manchuria paid their way with strict honesty and refrained uniformly from ex-cesses of any kind. They will now find cesses of any kind. They will now find that a memory of their moderation and integrity survives in the Three Eastern Provinces and that their promises will be trusted. That is no small advantage to an army on foreign soil.

A French journal, writing about the Yalu battle, expressed some apprehensions lest it satisfactory transport service. Every animal is easy to sympathise with French uneasiness in the region has been commandeered, with the result that agricultural operations have been suspended.

General Tseng seems to be developing humourous tendencies. He reports that recently as the Russians were driving a mob of a thousand horses from Mongolia to Manchuria—a performance altogether illegal —they were interrupted by a party of Hunghutze who carried off several hundreds of the horses. The Russians complained to Tseng and demanded compensation, which was in itself a comical step

the railway at two places in the closing as policemen at Dalny, fled from that place days of April in the vicinity of Tehling, a few days ago and reached Chefoo on the This is probably an echo of the report already published as emanating from that the Russians are breaking up the railway the Floug factory. Of course the factory at Dalny and sending the rails and rolling showed the railway as not having suffered stock to Harbin, their evident intention any approximate days of Rust the actual being to absorbe the place. there is no longer the least room for doubt that they decline to regard as neutral territory the region which they formally evacuated in 1902 in accordance with treaty. to detach a large force for guarding the line. Shanghai, that the Japanese officers captured Wednesnay, May 4. Recent accounts speak of some 25,000 nen at Wiju in the beginning of the war have being detailed for this duty. We do not been sent to Irkutsk and would proceed think the number at all likely to be exagthence to Russia. Thus the stories that are very active in Kirin. They are organizing a force could not furnish more than a fourth treatment or committed suicide proves, as and they have frequent skirmishes with the or a fifth of its total for sentry purposes. In we conjectured, to be baseless.

A MEETING OF RELIGIONISTS.

The leading representatives of Buddhism, Confucianism, Christianity and the various philosophies, have planned a monster meeting to be held in Tokyo from the 16th of next month. It is the intention of the promoters of this demonstration to enter a strong protest against the attempts made by various writers in continental Europe to foment an anti-Japanese crusade on the ground of racial and religious prejudices. If such prejudices are to carry any force, it should be clearly understood that the field of their potentiality is limited to the Occident and that they have no influence in Japan at all events. The West, or certain interested and self-appointed exponents of Western thought, are seeking to prove that the rise of Japan to a position of eminence and strength would mean the commencement of an effort on the part of the Orient to re-establish the old barriers standing between itself and the Occident, and even to expose the latter to some of the indignities and oppressions which, in its days of unchallenged might, it obliged the former to suffer at its hands. All this miserable scheme has its origin in the very sentiments it professes to condemn. It is not in Japan that racial prejudice or religious bigotry prevails. The beam is in the eves of her traducers. She stands in the eyes of her traducers. should have a disturbing effect upon the in the eyes of her traducers. She stands imagination of the Chinese, and should impel for the equality and fraternity of all races, them to throw in their lot with Japan, abanand it is to secure the supremacy of those doning the neutrality which alone enables the noble ideals that she is fighting to-day, not limits of the war to be circumscribed. It merely to protect herself against the prois easy to sympathise with French uneasiness pinquity of a military dictator. Therefore

Wednesday, May 4

明治伊五华三月曾日第三種鄭賀物郡可

General Kuropatkin reports to the Tsar that the names of the two Japanese executed at Mukden on the 21st of April were Yukoka(?) Seizo and Oki Teisuke. He calls them Japanese officers, and says that they were disguised as Mongolians and that they carried explosives as well as a map of Manchuria, their avowed object being to destroy Russian railways.

The master of the S. S. Satsuma Maria

reports that on the morning of the 30th ult., when steaming about 40 miles westward of Tsushima, he observed a buoyant torpedo within about 20 yards of the vessel. It had apparently been carried there by the current, and he considered that it resembled the mine destroyed recently by the Asama.

Captain Kurokawa and 5 others, wounded in the engagement at Chonju, have arrived at the Hiroshima Hospital by the Hakuai Maru, and are reported to be doing well. It is stated that the greatest success has attended the field surgery and field-hospital arrangements in this campaign.

The story that the Russians are removing the railway at Dalny and making preparations to evacuate the place requires much confirmation. Another account, received later, represents them as busily fortifying it.

Thursday, May 5. Yokokawa Seizo, whose execution at Mukden recently took place under military law, and whom General Kuropatkin described as an "officer," proves to have been nothing more or less than a Soshi. He was a man of many adventures; just such a person as we might expect to find blowing up Russian bridges and wrecking Russian railways. Honour to his memory. He served his country according to his lights and he deserves as much applause as the stoutest warrior. With him died Oki Teisuke, who was at one time a teacher of the Japanese language in Peking. At the outbreak of war he seems to have joined the Hunghutze. He too was a patriot, and like his comrade he was probably prepared for death at any moment.

No legally acceptable protest having been made with regard to the captured steamer Slav she will probably be declared a Japanese prize immediately. Her master and two of her officers being on the active military list will be kept as prisoners. All the rest of her crew have been released. It is stated that the value of all the ships taken is from 7 to 8 millions of yen.

London telegraphs that General Kuro patkin, at the head of 20,000 men, has set out from Liaoyang to succour the force which suffered defeat on the Yalu.

A junk's crew has now to be added to the list of victims accidentally killed by the Russians. Having on board 80 passengers she left Daluy secretly on the night of the 27th and, running on a mine, was blown up. Another junk which was in her company brought the news to Chefoo.

Friday, May 6. His Majesty the Tsar is said to have ordered that the Russian men-of-war now in the Far East shall henceforth be called the First Pacific Squadron, and that steps shall be immediately taken to organize a Second Pacific Squadron. Bedobrazoff is to command the First Squadron, and Roshudesto-

A foreigner who lately returned from Newchwang to Shanhaikwan says that the Russians are collecting quantities of beans and bean-cake at the former place, not with

wenski the Second.

the object of using them for forage-which indeed would be difficult in the case of beancake-but for the purpose of substituting them for coal should the supply of that mineral prove insufficient for the locomotives on the line. This tale is regarded, rightly we imagine, as a Newchwang "goak." What is more credible is that the Russian prohibition of the export of beans is due to a wish to keep as large a quantity of the cereal as possible for their own consumption. As to their right to veto the export of bean-cake, a fertilizer pure and simple, from the neutral territory on the west of the Liao, they have no such right. But in the present mood of the Powers, Russia's ability to enforce her wishes is the only practical measure of their legitimacy.

The same authority alleges that nothing could be lower than the spirit of the Russian troops in the Yinkow district. They think only of devices to avoid going into battle. One of these plans is to swallow quantities of a Chinese medicine called "pato" which produces diarrheea and thus brings its user into hospital. About a score of men have killed themselves by using too much of the drug, and notices have been posted forbidding all sales of medicine to the soldiers and promising dire penalties for any violation of the

MR. KAWAGUCHI'S BONA FIDES.

Captain Randal Parr, Chinese Joint Commissioner with the Amban or Chinese Resident in Tibet, writes to a friend in Japan Younghusband's camp in the Chumbi Valley as follows :-

Irom Col. Youngnuspand's camp in the Chumbi Valley as follows:—

Dear,—Mr. Kawaguchi passed through Vatung (Tibet) on his way to Darjeeling from Lhassa about June, 1902. During his brief stay at Vatung, he, to my personal knowledge, attended or prescribed for the wife of the local Tibetan official there, commonly known as Dhurkly Sirdar. Soon after he had crossed the Jelap Pass into Sikhim (British Protected territory) an order was sent from Lhassa to the effect that he had been living at the Yompa of Sera. Lhassa, for some 15 months and had suddenly disappeared, and was believed to be a foreigner. Therefore Dhurkly Sirdar was instructed to encompass his arrest. This in itself would seem sufficient proof or corroboration of Kawaguchi's statements; however, they need not rest on this alone for there is no Tibetan official or merchant whom I have met who was not cognisant of Kawaguchi's lengthened residence at Sera Yompa and his flight therefrom. As I have already mentioned I never yet met an official or merchant who did not know of Kawaguchi's lengthened residence at Lhassa, but I have still to meet either one or the other who has ever heard of Landor of spiked-saddle fante!

Piense tell Kawaguchi that from inquiries I have ascertained that his teacher and the merchants who befriended him have been released. I am, however,

ascertained that his teacher and the merchants who befriended him have been released. I am, however, instituting fuller inquiries and will do all in my power for them and let him know as soon as possible. Since last we met I have wandered much and fought in South Africa.

Believe me, sincerely yours, RANDAL PARR.
Tuna, March 17, 1904.

THE CRISIS.

Through fiercely blowing winds of war, Through clouds that hovered near and far, Men saw thy rising like a star—
("Banzai, Japan!")

Yet through the darkness falling dread, The blade that flashed, the wound that bled Were in the path where Honour led("Banzai, Japan!")

Comes now again the crucial hour! Reveal once more the hero's power— Bloom forth, O "mountain cherry-flower!" ("Banzai, Japan!")

True knight art thou of Asian land—With sunward brow, undaunted stand! The sword of God is in thy hand! ("Banzai, Japan!")

MRS. M. C. HARRIS, Oakland, Cal.

GERMANY AND RUSSIA.

Recent intelligence about the sale of steamers by Germany to Russia has not passed without notice in Japan. We find a very plainly worded article in the Nichi Nichi on the subject. It is commonly affirmed, says our contemporary, that when a rumour of the probable sale of the *Prince Bismarck* to Russia reached Japan, the Government of the latter Power approached the Berlin Government and inquired about the truth of the rumour, receiving for answer that no such transaction was at all probable. Then came news that the sale had actually been effected, whereupon another question was asked, the answer elicited being that the affair had taken place without attracting official attention, but that there would not be any repetition of such incidents. It appeared, however, that the thing had not failed to cause surprise in Germany also, for it was made the subject of a query in the Reichstag, when Count von Buelow returned an apparently clever answer, namely, that the transaction could not be called a violation of neutrality since Japan, also was free to make similar purchases. But it is plain that such a reply has no radical validity, for Russia happens to be in dire need of ships just at present, and she is also on the spot to utilize them, whereas they would be of no immediate service to Japan. The act is consequently inconsistent with any equitable theory of neutrality. And now, again, the public learns that Germany is selling to Russia 7 or 8 steamers which are to be converted into commerce-destroyers. The destruction of merchantmen seems to be the limit of Russia's naval capacities at present and these German steamers may help her mate-rially to follow the bent of her genius. But as to the sale being reconcilable with the rules of strict neutrality, that is more than doubtlul. The Nichi Nichi, having made these statements, goes on to note that at the beginning of the war Germany took pains to proclaim her absolute neutrality, being anxious, apparently, to efface the re-collection of the Liaotung coup in 1898. But subsequently it occurred to the Berlin statesmen that something should be done to placate Russia, and so they have changed front. Our contemporary does not believe that the Government of Germany has the people of Germany with it in this procedure. But the Government of Germany is the Emperor of Germany, and when all is said and done the Emperor of Germany is the father of the Yellow-Peril Bogie.

THE NEW WARSHIPS.

A London telegram of April 9th says the A Bolidon telegram of April 3th says the two new battleships ordered in England by Japan will be exceedingly powerful. Their length is 445 feet, which will exceed that of the most powerful British battleship by two feet. In order to meet the capacity of docking accommodation, the beam and draught have been fixed at 78 feet and 26 feet respectively. Each will have a displacement of 16,400 tons. To facilitate comparison we (Japan Mail) may say that the great battleships now under construction for the British navy,—the Commonwealth, Domi-British navy,—the Commonwealth, Domi-nion, Hindustan, King Edward VII, and New Zealand,—which are of 16,350 tons displacement, measure 425 feet in length, and 78 feet in beam, with a draught of 2634 feet. The Japanese ships will therefore (supposing the figures telegraphed to be correct) be not two but twenty feet longer than the Commonwealth class,

inches less water. If the reference in the while another is an ordinary roadway, with dispatch is to the most powerful British battleship afloat then the difference is very top of the dam for vehicular and passenger marked. The Formidable class are 15,000 traffic. The biggest lock will be 1,000 feet tons, 400 feet in length, 75 feet beam and long and 100 feet wide so that the largest draw 26 1/4 feet; the Majestics are of 14,900 steamer in the world, the Baltic, (now being tons, 390 feet in length, and similar beam, built at Belfast) which is 726 feet long and but draw 27½ feet; while the Duncan 75½ feet beam may easily be accommodat-class are 405 feet long, of 75½ feet beam and 26½ feet draught. The only warships a perpetual high tide lake 46 miles long (battleships, not armoured cruisers the and from a quarter to half a mile wide. The largest of which greatly exceed the above alternative proposal now before Parliament lengths) that resemble the Japanese in length are the Patrie and Justice classes docks and the dredging of the river so as to building for the French Navy (14,927 tons) length 4383/4 feet, beam 791/4 feet and draught 273/4 feet; and the U.S. ships now on the slips, the Connecticut class of 16,000 tons, length 450 feet, beam 77 feet, draught 2634 feet, and the Georgia class of 14,948 tons, length 435 feet, beam 7634 feet and mean draught 2334 feet.

THE PROPOSED THAMES BARRAGE.

We learn from a London telegram of April 11th that while the scheme on foot for turning the River Thames at London into a lake by locking the tide out at Gravesend has not advanced beyond the stage of inargument in favor of the scheme is the impossibility of dredging the single to the proposal farm and appreciation of the benefit that is very favourably regarded. One strong England. Without that alliance Japan could possibility of dredging the single to the scheme is the impossibility of dredging the single to the single possibility of dredging the river to a sufficient Northern Power, for she would have felt depth over the Thames tunnel. At present that whatever success attended her arms, possibility of dredging the river to a sufficient the mud at the top of the tunnel forms a barrier, but the courts refuse to permit the whose temper she had been sufficiently insuffer. If, however, the Thames is locked at Gravesend the water could always be that the lists would not be intruded on kept at a sufficient depth to allow large ships to get right up to London bridge. This is a delightful prospect from a commercial point of view, and the scheme in land gained from the alliance? Some say addition would have the advantage of cnthat she has gained nothing. But she has abling Londoners to use the river as a She has gained knowledge of Russia's abling Londoners to use the river as a means of rapid transit, as Parisians use the

An interesting description of the scheme is given in the Graphic of March 19th, with illustrations showing a cross section of the river, the locks, and sluices and the tunnel under the dam, a section of the barrage and a general plan of the work in relation to the Tilbuy and Gravesend shores. There is also a full page view of the river from the Gravesend bank as it the dam is restricted.

Russia entente will be in a better position after this war to estimate the value of such an arrangement. will appear if the dam is constructed.

will have the same beam and will draw 9 the north and south sides of the Thames; movable bridges at the locks, on the steamer in the world, the Baltic, (now being docks and the dredging of the river so as to secure greater depth of water all the way up to the docks in the higher reaches of the Thames. Under this project it is estimated £30,000,000 would have to be spent in purchasing the existing docks and £7,000,000 in improving them and dredging the river. Moreover it is contended with some show of reason that dredging of the kind contemplated would seriously threaten the foundations of riverside wharves and buildings.

NOTES ON CURRENT EVENIS.

The fiji Shimpo repeats with strong emphasis its appreciation of the benefit that the issue must be settled by a tribunal of by others, and that no coalition of States would arbitrarily overturn the results of the fight. On the other hand, what has Eng-She has gained knowledge of Russia's berth to any enemy that might threaten her naval impotence, and she can apply that knowledge when fixing the limits of her own naval expansion. She has also gained an opportunity to settle the Persian and Thibetan questions, an opportunity which it will be her own fault if she fails to utilize. The smoke observed one day on the horizon. She she was a long line of smoke observed one day on the horizon. She start was a long line of smoke observed one day on the horizon. She smoke observed one day on the horizon. She smoke observed one day on the horizon. She

Russia's latest state document evokes in From the information furnished by our con- Japan the derision it deserves. Big bubbly temporary we gather that the cost of the talk is what we expect from Russia. Her rework as proposed will be £3,658,000, for putation rests upon her bulk and her language which a depth of water will be obtained is proportionately turgid. It is not wonder-varying from 65 feet at Gravesend to 32 feet ful, therefore, that even at the present stage at London Bridge, so that ships drawing 30 of m war in which she has hitherto suffered feet can proceed to London Bridge at any nothing but defeats, Russia should still hour of the day or night without waiting for indulge in high language and should add tides; ships of all tonnages and draughts another to the pile of ridiculous documents can traverse the river, anchor anywhere, lie alongside any wharf or quay, always remain at one level for loading or unloading and need not lie out in the river or obstruct the against mediation; dock entrances can be left in the future? Which are the newspapers of the saving the cost and time lost in whose comments have stirred the Decision. open, thus saving the cost and time lost in working them—the London and India Docks Company estimate the cost of working their entrances at £50,000 per annum; while intervention? They are Russian newspapers. It was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that started the idea and it was the Novosti that combatted it. Thus the whole thing becomes a mere unfortunate than that differences of nation—the Novosti and the little or of creed should create any troubles

the hat goes round collecting the francs in Paris and Brussels. The whole performance is addressed to an audience consisting of French and Belgian capitalists and Russian socialists and nihilists.

We are asked to state that the financial results of the Tokyo Dramatic Society's two representations in Tokyo and one in Yoko-hama in aid of the "Shussei Gunjin Kazoku Imon Fujin Kwai" are as follows:—

Receipts, Tokyo: Sale of tickets and donations2,036 Expenditures	.00
Net Profit	.00

Net Profit...... 488.60 A cheque for yen 2,100.00 has been sent to Princess Mori, President of this Society.

A telegram to the Specie Bank shows that the rise in Japanese securities continues with great rapidity. The 4 per-cents are now quoted at £70 (a rise of £3 15s.) and the 5 per-cents at £82 (a rise of £3 10s.) Meanwhile Russian stocks are falling slowly but steadily.

The voyage from England to Japan round the Cape of the N. Y. K. steamer Sado Maru seems to have been quite devoid of incident, though the arrival at Capetown and Durban of a large steamship flying the sunflag of Japan created much interest at those ports. When war broke out and it became evident that to proceed home through the Mediterranean, the Suez Canal and the Red Sea would involve considerable danger of capture, the Sado discharged her general cargo and, on February 17th, went round to Cardiff for coal. At the Welsh port she ballasted with smokeless fuel and left on February 28th for the Cape. The Japanese characters on her bows were painted out and she steamed a course intended to give a wide berth to any enemy that might threaten her reached Capetown on March 22nd, but was ordered to Durban for bunkering purposes and at once proceeded thither. She left Durban on March 30th and, shunning the usual track of steamers, arrived in Sunda Straits on April 16th, at Singapore on the 18th, at Hongkong on the 24th, and at Saseho on the 30th.

The first Military Attaché ever despatched by the Commonwealth of Australia arrived in Japan by the *Empire* from Melbourne—Colonel J. C. Hoad, C.M.G., A.D.C. to the Governor-General. He was attached to the staff of Lord Roberts in the South African campaign and saw a good deal of service

The Prime Minister has addressed an interesting injunction to the Fukuin Domeikai, desiring that his words may be conveyed due to tidal drift. The barrage will be 800 acrobatic performance. The Novosti and the unfortunate than that differences of nationary ards long, of mass concrete faced with Novoye Vremya are both directed to act ality or of creed should create any troubles granite on all exposed faces, and a feature of the scheme is a tunnel in the forward the chief juggler in the shape of the soundations linking up the railways on Government itself. And then the man with by the Japanese Government at the outset, but complete success can not be claimed in view of the idle rumours circulated to the detriment of members of the Greek Church No official efforts will be spared to avert complications of that nature and the Premier looks to the Christians to render every assistance in their power.

We can obtain no confirmation of the reported offer of a loan of £10,000,000 to the Japanese Government by the local branch of the H. & S. Bank. Gossip says the loan is to be secured on the Customs revenues, issued at 93 and bear interest at the rate of 6 per cent.

LADIES' INTERNATIONAL FÊTE.

A well-attended meeting was held on Thursday morning at 118-A Bluff, when Mrs. J. P. Mollison thanked the ladies very warmly for their hearty, unselfish and indefatigable co-operation which had done so much to make the International Fête

the brilliant success it undoubtedly was.

It was decided that the funds should be handed to H. E. Governor Sufu for the Kanagawa Relief Association.

FLORENCE C. HAWKINS, Hon. Treasurer,

April 29th, 1904.

In handing over the statement of accounts for publication the Committee of the Ladies International Fête desire to acknowledge with gratitude their indebtedness to all who contributed gifts to the raffles; to the Newspapers for their liberality in the matter of advertisements and liberality in the matter of advertisements and notices, gratis; to Mr. Sharp, of Messrs. Kelly & Walsh, for printing tickets, programmes and everything connected with the Fête absolutely free of charge; to Mr. C. H. Thorn and Mr. A. Bellamy Brown for producing and contributing the Yokohama American and the Britishing the Yokohama American and the Britishing to making a merely nominal charge for the supply of light; to the Public Hall Association for charging rent on a charity basis; to the Japan Brewery for supplying Kirin beer gratis to the Beer Garden; to Messrs. Boehmer & Co.

and the Gardeners Association for Floral decorations and generous contributions to the Flower Stall; to Mrs. Manley for similar assistance and for decorating the Hall; as well as to other friends too numerous to mention who gave valuable assistance in various ways.

The following have been handed to us for publication:

To Governor K. Sufu, President, Kanagawa Ken Relief Association. Dear Governor Sufu,

As the result of the International Fete organized by Ladies of Yokohama for the Relief of the Wives and Children of Japanese Soldiers and Sailors called to the front, I have great pleasure in handing you we cheque for yen 5,373.41. It is the wish of the Ladies that this money should go towards the relief of suffering families in this neighbourhood under the auspices of the Kanagawa Ken Relief Association, and I would ask you as President of that Association, to be good enough to supervise its distribution in the direction indicated, so as to give help and comfort where most needed. As the result of the International Fete organized

where most needed

With kind regards, believe me, yours sincerely, (Sgd.) S MOLLISON.

Yokohama, May 3rd, 1904.

Yokohama, May 3, 1904.

DEAR MRS. MOLLISON,—I have the honour to acknowledge the receipt of your yesterday's favour with enclosed cheque for yen 5,373,41, being the nett proceeds of the International Féte which the Yokohama ladies under your presidency were so good as to organize in favour of the suffering families of the Soldiers and Sailors called to the front.

of the Soldiers and Sailors called to the front.

I hereby beg to express to you and the Ladies who so kindly co-operated with you, as well as to the whole Foreign Community at large, my heartfelt gratitude for your practical sympathy which will no doubt be greatly appreciated by all my countrymen.

The committee's wish that this sum should be contributed to the Kanagawa Ken Relief Association will be duly complied with, and I may assure you that I will personally look after it, so that those families who are most in want of help will be first attended to. Thanking you once more for your attended to. Thanking you once more for your great kindness,

I remain, sincerely yours, (Signed) KOHEY SUFU.

Governor of Kanagawa Ken. President, Kanagawa Ken Relief Association

MARRIAGE OF MISS PAGE

A very large number of friends, eloquently testifying to the well-deserved popularity of the contracting parties, assembled at Christ Church, Yokohama, on Wednesday afternoon to witness the nuptials of Mr. Horace Wilfred Buckland and Miss Catherine Elizabeth Page, eldest daughter of Mr. and Mrs. Walter Finch Page, of Dzushi. The church had been very prettily decorated for the occasion with white azaleas, lilies, bamboo and other foliage and presented an ornate appearance. Punctually at half-past two o'clock, while a voluntary was played by Mr. J. T. Griffin on the organ, the bride entered the building leaning on the arm of her father and proceeded to the chancel rails.

The bridesmaids were the sisters of the bride.

The bridesmaids were the sisters of the bride The bridegroom was attended by Mr. R. M. Stirling as best man, the ushers being Messrs. P. Stirling as best man, the ushers being Messrs. P. A. Cox, A. J. McClure, A. R. Owen, L. J. Healing and S. Wheeler. The service was performed by Rev. W. P. G. Field, and the bride was given away by her father. The hymn, "The Voice that breathed o'er Eden" was sung before the cremony, and at the close "Oh, Perfect Love," while after the signing of the Register Mendelssohn's Wedding March was played by Mr. Griffin. The bride, as champing # Grure as ever entered

The bride, as charming m figure as ever entered the church, wore m dress of heavy pearl coloured

de chine with a satin stripe, shirred bodices and skirt yokes with lace yokes to the bodices, and wore white rice straw hats trimmed with white chiffon, with each a wreath of fresh rose-buds and leaves. The mother of the bride wore a dress of mauve and black foulard, black chiffon and lace toque with ecru lace trimmings.

A reception was subsequently held at the residence of Mr. and Mrs. L. J. Healing, No. 20, Bluff, where the numerous wedding gifts that had been presented to the happy pair could be seen, and where the healths of the newly-wedded couple were heartily pledged, the toast being given by Dr. Wheeler in his usual pleasant fashion and fittingly responded to by the bridgeroom. The bridal couple leave for England on May 10th on a year's furlough.

JAPANESE TEA.

On Sunday, 31,400 kin of new tea were sold to foreign firms in Yokohama, the quotations being yen 58 to yes 32.

The Yokohama Tea Guild circulated a letter on April 28th among tea manufacturers in Suruga and Totomi provinces. The purport of the letter is that the preparation of leaf has lately been going from bad to worse so that colour, flavour, and form have deteriorated. Unless careful attention is paid to these points failure will overtake the tea industry of Japan. Foreign firms in Yokohama also complain about unexpected reductions in weight after the tea has been fired in their godowns.

On April 28th, 3,200 kin of new tea were sold to foreign firms in Yokohama by the Japanese, the quotations being yen 54 to 43.

A telegram from Kobe reports that the Sei-cha Kaisha sold 2,200 kin of new tea on May 2nd to a foreign firm, this being the first transaction in new leaf. The quotation for the Kii province crop is thirty-five yen, ten yen cheaper than last year.

The first shipment of new tea from Kobe will be made by the steamer Athenian, which will leave on May 8th for America.

The standard quotation of Sayama tea in the Yokohama market has been settled as follows: Choicest, yen 45 and choice, yen 40. This is yen 5 cheaper than last year.

CUSTOM APPEALS.

Baron Sone, Minister for Finance, rendered his decision on April 25th on an appeal lodged by Mr. F. H. Ziegfeld, representative of the China and Japan Trading Company, against a decision of the Yokohama Customs. It appears that the firm imported twenty gross and one dozen of metal pencil holders on which the Customs imposed to a per cent adjustment during the contraction. dozen of metal pencil holders on which the Customs imposed 20 per cent. ad valorem duty in accordance with No. 271 of the tariff, which deals with "all other manufactures of metal or metals, not otherwise provided for." The importers contended that the duty should be 15 per cent. ad valorem under No. 298 of the tariff which provides for "all other stationeries." The appeal was systained on the ground that the article appeal was sustained on the ground that the article in dispute belongs to the class of stationery.

The following day the Minister delivered another decision on an appeal by Mr. D. H. Blake, of the American Trading Company, Yokohama, against the Yokohama Customs. The firm imported on Dec. 24th last a quantity of gluc, on which the Customs authorities imposed 10 per cent. ad valorem duty under No. 136 of the tariff,

THE BATTLE OF THE YALU.

May 7, 1904.

NTELLIGENCE of the first great land fight is reaching us in fragments, and as the fragments are in the Japanese language, the general public has difficulty in piecing them together. Speaking broadly, General Kuroki's plan of operations seems to have been three feinted crossings and one real. The lowest of these down stream can scarcely be called a crossing. It consisted merely of maval attack in the estuary and a little above it, and may be said to have been limited to an artil- Hill. The night of the 29th passed with Fenghwang. The last-named town is 38 lery duel in which the Russians failed to inflict any injury whatever on the Japanese, but were nevertheless obliged to con- thousand Russians. Of course it is not posfront them in some strength, since the movements of the Japanese gun-boats and armed launches might have pre- be the estimate of the Japanese staff, whose luded, the transport of a Division judgment and information may be trusted. from the south to the north bank by water. To give additional colour to these sumed operations, but the Twelfth Division naval movements they were carried on took the lead in point of time by capturing vigorously for two days prior to the main Tiger's Hill and thus converting the crossings in the neighbourhood of Wiju, one, above and below Wiju into a comparatively gradually drawing the Japanese on to by the Second Division, immediately below easy performance. The artillery on both a crushing defeat. In our opinion the latter Wiju, the other by the Guards Division im- sides was brought largely into play on mediately above Wiju. It is not to be this day, as it had been in the pre-afford to make pretended resistance at the supposed, of course, that General Kukoki liminary stages, but details of this feature cost of losing 28 pieces of ordnance, being devoted two Divisions-two-thirds of his whole force—to the mere purpose of making tinct idea. Tiger's Hill commands Wiju, leaving a number of his officers and men feints. These two crossings were actually and its capture by the Japanese constituted in the hands of the enemy. Such sacrito take place, but their order was to be a cardinal operation. We shall doubtless fices are too real, too substantial, to regulated in accordance with the course of hear a great deal of the manner in which it be classed in the category of feints. If the principal attack, which was made by was effected, and also of the crossing of the the Russian General-who, as well as a the Twelfth Division at | point-Sukuchin | final branch of the river by the three Divi- Divisional General, is said to have been the place where the Japanese crossed all posted on the north side of the river and Japanese and to retreat at leisure when he the Yalu in October, 1894. They chose prepared to resume their advance the follow- had sufficiently baited them, he altogether it then and they chose it now because ing morning. Their artillery fire had subdued mistook the quality of his toes, and his misthe key of the whole position is the high- that of the Russians in some of the latter's take has resulted in a signal defeat, which the land on an island called Husan (Tiger's principal batteries, and the men were in high most credulous of Russia's friends will be Hill), which lies near the northern bank of spirits. The Twelfth Division, however, had unable to represent in the light of a decoy. the river nearly opposite to Sukuchin. It still a hard task. It had to cross the river Further, if the Russians had anything like must be remembered that the bed of the Ai, a tributary of the Yalu which runs be-!twenty thousand men on the Yalu, they meant Yalu in the immediate vicinity of Wiju is tween the latter and Kiulien. Our readers business. Of that there can not be the least occupied by a group of islands, and that by must be already familiar with the name doubt. The position was splendidly defensive. these its stream is divided into three bran- Kiulien-ching, but we may explain here that MISCHENKO'S Cossacks, it is true, made poor ches, all of which have to be crossed. So it is a walled city lying on the northern bank use of an equally fine position in northern long as Husan remained in the enemy's hands opposite Wiju and beyond the river Ai. Korea, but Mischenko's division may be said and so long as his artillery was posted there, The Russians had entrenched themselves on to have been outnumbered, whereas the Rusany attempt to pass a large force over the the right bank-the Kiulien side-of the Ai, sians had nearly 3 months to mass troops on river at points lower down must have been and the Japanese advanced against them the Yalu, which is only 145 miles from highly perilous, and could hardly have suc- over a front of 5 miles in skirmishing order. Liaoyang, their principal base. As beceeded, at all events without heavy loss. The Ai was crossed by wading breast-high, tween the two combatants, it should The programme therefore was that, during and by 8.50 a.m. this serious obstacle have been a much easier matter for the the 29th of April, the Second Division had been traversed and seven entrenchments Russians to organize a strong resistance on (below Wiju) should cross to the island of of the Russians on the Yushikau and Makau the Yalu than for the Japanese to prepare a Keumchong, which lies nearest to the south- heights had been captured, together with 8 powerful attack. The river is 330 miles ern bank at that side, there to prepare pieces of artillery. The Twelfth Division from Seoul and nearly 170 miles from for bridging the middle branch of the river now found itself on the left rear of Kiulien Pyongyang. Even if we regard the latter which, in this position, would separate the (speaking with regard to the enemy's front) as the Japanese basis, they had a heavier troops from the middle island of Cheung-sang, while the other two Divisions, the Guards task to reach Wiju in the face of Russian Simultaneously the Guards Division (above and the Second, were advancing upon its resistance than the Russians had to reach Wiju) were to cross to Kulido Island, and right. The three Divisions seem to have Kiulien without encountering any resistance similarly prepare for bridging the central attacked the place simultaneously. Appa- at all. From whatever point of view we rebranch of the river. Thus posted, the Second rently the Russians had their artillery posted gard the Yalu battle it is a great triumph

which traverses the Yalu islands from Wiju taken, together with 20 officers and I large to Kiulien. Meanwhile the Twelfth Division, during the night of the 28th and 29th, had bridged the branch of the river immediately before Sukuchin, but thereafter throughout the 29th the Division remained inactive, waiting until the operations on either side of Wiju had developed sufficiently to be a pressing menace to the Russians. This state of affairs having been attained towards evening, the Twelfth Division crossed, and apparently encountering little resistance, reached a position in rear of Tiger's the three Divisions in these positions. On the opposite side, facing them, were some twenty sible to speak with certainty as to this last point, but the number here given is said to At dawn of the 30th the three Divisions re-Then there were two pretended passage of the last branches of the river must be awaited before forming any dis--13 miles above Wiju. Sukuchin is sions. The night of the 30th found them Division and the Guards Division, would be in the immediate neighbourhood, for when for Japan, and when we remember the tone

number of rank and file. The Japanese casualties are estimated at 700 killed and wounded; the Russians are believed to have lost much more heavily.

It will be observed that nothing is heard about Antung in the above account. General Kuroki lest that place severely alone. The fact is that Antung becomes untenable after the fall of Kiulien. It lies down-stream from the latter place, and the Japanese at Kiulien may be said to command the communications between Antung and its base, miles from Kiulien on the road to Liaoyang. The Russians have doubtless fallen back upon Fenghwang and will there await the Japanese advance.

The interesting question is, what does this Yalu battle represent? May we conclude that the Russians made a really resolute effort to hold the Yalu line, or are we to suppose that they adopted the policy attributed to them by some of their advocates, the policy of merely simulating resistance in advanced positions and hypothesis is untenable. No General can driven from seven fortified positions and wounded-intended merely to fence with the advancing on either side of the main road the position was stormed 20 guns were of contemptuous assurance adopted by the made light of their naval disasters and said "Wait until we reach these fellows on shore," the significance of this first encounter is not to be over-estimated.

General Kuroki's dispositions appear to have been admirable. All the movements of his troops were excellently synchronised, and his plan seems to have been conceived with great ability. It had been generally supposed that in this Yalu fight he would have been assisted by a flanking army landed somewhere on the littoral of the Yellow Sea, but he was left to do the work alone, and in so leaving him the Head Quarter and in so leaving him the Head Quarter
Staff evidently made no mistake as to the Last number on the programme was J.
Hartley Manners' "A Queen's Messenger," the acting rights of which had been personally given capacity of the man and his army.

DRAMATIC AND VARIETY ENTERTAINMENT.

A large audience gathered at the Public Hall on Saturday evening on the occasion of the dramatic and variety entertainment given by local mateurs and members of the Physical Culture amateurs and members of the Physical Culture Club, and that the long and varied programme was thoroughly enjoyed, the number of recalls—the "Florodora" Sextett was alone sung four times —amply testify. To the great success of the evening the Bijou Orchestra largely contributed with spirited selections from modern operas and modern composers. The opening sketch, "A Day and a Night in a Doll-Shop," though pretty in its setting, as was only natural where children are concerned, lacked coherency. No explanation was given either in the programme or by the play. was given either in the programme or by the players as to "what it was all about," and if it was how, whatever it was, it served to introduce a clever little Indian Club swinger in the person of morning. After the preliminary "business" of Master Carlisle McIvor; a dainty dancer of the "lighting up"—(for the room is in complete hornpipe in Miss Winnie Sharp; a capital singer darkness, the rising of the curtain giving the of a song in Mr. Windett—"Oh, is n't it like a more sensitive a fit of "the creeps")—during Man?"—which was encored; and an exceeding which Captain Standish drops his bag on a pretty song and chorus "My Pauline," by Miss vase with destructive results and knocks over a H. McIvor and Miss Leslie McIvilians, assisted by all the Dolls. These little ladies were:— the rest of the family are still at the Broken Doll, Winnie Sharp; French Doll, marked? ed by all the Dolls. These little ladies were:—
Broken Doll, Winnie Sharp; French Doll,
Edith Suzor; Pompadour, May Cameron; Spanish
Doll, Gladys Scott; Watteau Dolls, Henrietta McIvor and Leslie McWilliams; "Night"
Doll, Ralphia Martin; Du Barry Doll, Sybil
Howard; Scotch Doll, Carlisle McIvor; Carmencita, Helen McIvor. The other characters were: worm in the past one and he must leave the house in half an hour if he is to catch his train. She cita, Helen McIvor. The other characters were: hands him her letter and after some by-play grows on the interest of the intention of getting Shopkeeper, Mr. T. Rodoet; Maid, Miss Madge consents to remove her mask. The Queen's Miss J. Drummond. The song and chorus, "We're all good fellows," from The Chaperons, in which appeared Messrs. Wheeler, Cracey and Windett—lacked somewhat in balance, the parts being rather ragged in time and uneven in timbre, and thus prevented and uneven in timbre, and thus prevented and uneven in timbre, and thus prevented audience. The same gentlemen came on again two numbers later in a Stein Song. "Heidelburg," from "The Prince of Pilsen," and this went much better, so much so that they were asked to sing it again, which they kindly did. The Living Pictures by Mrs J. Drummond. Cooper, Foster, Mollison, Walker, Palmer, focoper, Foster, Mollison, Walker, Palmer, Gracey and Windett—lacked somewhat in balance, the parts being rather ragged in time and uneven in timbre, and thus prevented the words from being distinctly caught by the audience. The same gentlemen came on again two numbers later_in a Stein Song. "Heidelburg," from "The Prince of Pilsen," and this word which banishes fear is not burg," from "The Prince of Pilsen," and this the little word which banishes fear is not "love but 'duty." They now drink, he to their present meeting. After impartasked to sing it again, which they kindly did. The Living Pictures by Mrs. J. Drummond, the Misses K. and E. Ekstrand and Madge Cameron were very lovely, but here again the programme might have been Resignation, or it might have been Lady Macbeth, or the Witch of Endor, or anything you takes the keys, opens the bag and obtains the despatch. The Messenger soon after makes a uniber of semi-incoherent remarks about Contame." The gentleman is now thoroughly impressed and tries to talk of love, but the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what has just turns the damper on slightly by reminding him the lady soliloquises on what

Russians with regard to the result of all down the house again with "Molly the Marchion-military encounters between them and the Japanese, when we remember how they allowed Mr. Horne to escape another recall. The Jockey Dance that followed pleased a good many people, but we must own that we can quite understand that it did not accord with all tastes nor yet satisfy every one's sense of the graceful and be-coming. The jockies were:—The Misses Helen coming. The jockies were:—The Misses Helen McIvor, Gladys Scott, May Cameron, Henrietta McIvor, Sybil Howard, and Leslie McWilliams.

The next item created a veritable furore. was the double sextett from Floradorame, Pretty Maiden," and had to be given altoge-ther four times ere the singers and dancers were allowed to depart. Those participating in this triumph were:—Mesdames E. W. Frazar and J. Strauss, the Misses Beatrice Sharp, R. Cameron, F. Waddilove and M. Sharp, Messrs. Cooper, Foster, Mollison, Wheeler, Palmer and Walker.

by the author to Mrs. McWilliams when on her recent visit to San Francisco. It is a duologue, the players being Mr. Cyril Allen (An English Officer) and Mrs. McWilliams (A Masked Lady).

The play is concerned with the nocturnal adventure at a lonely house near Berlin of "A Queen's Messenger." An important despatch has been prepared at the British Embassy and land, asks him to take a letter to "Count Leo Morovski" of the Russian Embassy in London. intended as a dumb-show on the lines of "I'enfant. He consents and in order that he may receive the Prodigue," then the introduction of the songs was letter he accompanies her to her home, carrying superfluous. If this was not the intention, then with him a "big bag" which plays an important She asks him to wait a while, saying that her people should be back at once. The time is now twenty- has fallen "a victim to a poor weak woman" five past one and he must leave the house in says, "How very English!" The officer, who

Europe's safeguard, or words to that effect. After accepting a cigar he answers a number of questions as to his cigar cutter, his signet ring andtions as to his cigar cutter, his signer ring and—
of course—his keys, kindly and not without some
pride, pointing out those that open the "big bag."
It transpires that despatches are never lost, and,
that for any Messenger who should lose his, the
only course open would be to "walk off the edge
of things." At this point he quite gratuitously
blows a cloud of smoke in the lady's face, and apologising, throws away his cigar, on which the *inconnue* produces a box of large and small cigarettes. He takes one of the former at her suggestion—of course—and though he finds "curious" and thinks it "reminds him of somewhile the lady "spins" him a "yarn" to the effect that there are Russian spics after him who will not scruple to kill him for the possession will not scruple to kill him for the possession of his despatches, and tells him she has brought him here to save him. He expresses his gratitude and, again at her suggestion, takes another cigarette. Up to this point the play had dragged drearily, not one epigram or one faint sparkle of wit irradiating the dull mass of verbiage. But things now brightened a bit from the spectator's point of view. The players began to talk of sentiment and love and so forth, and the Oueen's ment and love and so forth, and the Queen's Messenger speaks with deep feeling of some one whom he loves in England (named Constance, who doesn't know what a fool he is making of himself in Berlin) and whose heart would be broken if "those papers" had been stolen. The Russian lady now plays him a Oueen, but with a stranger he betrays the Queen of his love, and—poof!—it is nothing. "Oh yes; the English are brave." In default of anything better to do under these eers he looks at his watch. He has five minutes longer andat his watch.

At his beaccepts another cigarette, although anybody but a Messenger of his type would know that his head is already buzzing. While the lady walks head is already buzzing. While the lady walks up and down watching her victim there is a good deal of conversation, chiefly on her side. She talks of her lover,-boasts in fact of his devotion to duty as compared with the person whom she is addressing,-announces (to the dazed surprise of the Messenger) that she is an emissary of the Imperial Court of Russia and that she intends to rob him of his despatches. She then shows him some of the meshes of the net in which he has been caught, and, taunting him over the ease with which he

has seen something in his face that she never saw before—a man looking at death with the name on his lips of the woman he loves. England is a great country and her people are heroes. (Some one in the audience very unkindly giggled here) Consequently he will have his despatch back un-opened and he will catch his train. "Oh! why are we women born with hearts!" There, it is all over! They exchange presents: he gives her his signet ring and she indicates the picture frame, from which he extracts both picture and despatch; he kisses her hand;—"300 yards away there is a coach house, in it a trap, I will myself harness the horse and drive you to the station and all with one minute to spare." So he blows out the candles, she turns out the lamp. Sepulchral darkness falls again upon the stage. The man must'nt move until she tells him because he must'nt "make another false step now, eh?" and so with comments upon each other's looks, upon the air and upon the moon they disappear, the last we hear being assurances from her of safe guidance. And we wonder whether he ever told Constance!

Putting aside the wild improbability of the whole story; the impossible Queen's Messenger; whole story; the impossible Queen's Messenger; the equally impossible Lady; we have nothing but praise for both Mrs. McWilliams and Mr. Allen. The lady acted superbly, and Mr. Allen ably supported her. Both are worthy of better material to work upon. The curtain descended shortly before midnight on a house thoroughly delighted with the entertainment that had been

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

Being of opinion that there is a danger of the nation going to excess in the exaltation of manly qualities and of forgetting the claims of the other side of human character, Dr. Anezaki contributed a long article to the April number of the Taiyo entitled Kyuyen no Josei (The never-changing nature of woman); his object being to show that the two great religions of the world, Christianity and Buddhism, have both utilized the finest traits of semale character as reforming agencies. Religious devotees and real admirers of art, says Dr. Anezaki, are alike ever in search of ideas, principles and moral qualities that are indestructible. To the casual observer the world is one scene of change, dissolution, disintegration. All things seem to be passing away never to appear again in the same form. It is the special function of religion to show that beneath the surface of things there are eternal principles, grand ideas which work themselves out throughout successive ages despite the transitoriness of all else. Dr. Anezaki then proceeds to dwell on the manner in which both Buddhism and Christianity have insisted on the perpetuity of the mysterious energy which lies beneath external nature. The eternal principle is, according to Christianity, embodied in the Logos, according to Buddhism in the Dharma. From this Dr. Anezaki passes on to discuss the special merits of female character. In Japan, where woman still occupies a very inferior position in the estimation of the majority of men, such an article as the one before us may prove instructive, but in the West during the past fifty years all the weak and strong points of women have been so exhaustively treated by fiction writers that Dr. Anezaki's remarks could not but appear to foreign readers very commonplace were they transferred to these columns. His view is that woman's connexion with religion is closer

that ethically Japan occupies a higher plane than that occupied by Russia. The Kirisutokyō Sekai discusses this subject in a leading article published in No. 1,070, entitled Iwayuru Kirisutokyo Koku, the substance of which we give below. Opinion in Europe has greatly changed since the time of the China-Japan war. The Emperor William's picture, which called forth so much comment when it appeared, was no doubt designed to express general European sentiment in reference to the attitude to be assumed by Chestian countries towards heather countries and Christian countries towards heathen countries, and it is generally believed that when Germany and France sided with Russia against us they did so to considerable extent on account of racial and religious antipathy. By an article which appeared in the Novoe Vremya a short time ago it would appear that the Russians still expect to make political capital out of the unity of religious belief throughout Europe and America. Before the war broke out, in a leading article this Russian journal wrote:—"If it comes to war, it will be a war between Christianity and heathenism whose effects will be felt even in the remotest corners of Christendom." The Novoe Vremya takes it for granted that the Christian world will be on her side, but it is an undoubted fact that the opposite is the case. The sympathy of Christendom as expressed in leading Christian journals is with apan.* The American Congregationalist in an article entitled "Christians Sympathize with Japan" doubtless expresses the general feeling in America. This article asserts that the real cause for this sympathy is the fact that in granting liberty of belief to all her subjects Japan is acting on one of the most pronounced and highly esteemed of modern Christian principles. The Novoe Vremya is twenty or thirty years behind the age. Public opinion in the West has changed, says the Congregationalist, and to-day Japan's liberality towards believers in alien creeds has normally towards believers in a tien creess has proved sufficient to bring the greater part of Christendom over to her side.† Though the majority of Japanese are Buddhists or Shintoists by profession, they allow Christians to teach in their schools and give to Christian ministers and missionaries of all sects every facility for the prosecution of their work. The Kirisutokyō Sekai quotes from a New

York journal words to the same effect, and then concludes in a very sensible manner by observing that it ill becomes Japanese Christians to boast of the superiority of Japanese civilisation, which still is defective in many important respects. The present situation calls for sobriety, self-control and great circumspection. Japan must show that she can act up to the high ideals which she possesses.

In an extremely interesting article written by Dr. Inoue 'Petsujiro for the January Taijo entitled "Japan's Present Situation and Environment," which we had only space to notice at the time of its publication in a most cursory manner, the wonderful manner in which racial and religious barriers have been broken down by means of political events connected with the Far East

* There are some exceptions to this, however. For instance, Bishop Cinfton of Wisconsin writes:—
"The sympathy of America should be with Russia in the present struggle. . . . Japan is enlightened heathenism, and uniting with China will be a menace to Civilisation." A few Americans argue, we observe, that it is illogical to maintain that Christianity is infinitely superior ethically to non-Christian moral systems and at the same time to admit that Japanese ethics are better than Russian Christian ethics.—
(WRITER OF SYMMARY. (WRITER OF SUMMARY,

that woman's connexion with religion is closer than that of man, because religion has largely to depend on feelings rather than on logic for its power. He says that both Christianity and Buddhism regard woman in her capacity of mothers as occupying the highest function she can fill; hence the worship of the Virgin Mary and the numerous Buddhist references to exemplary mothers.

There are not wanting those who explain this very striking phenomenon by citing the fact that the Western world to-day attaches infinitely less importance to a man's professed religious belief than to his everyday practical code of morality. In many circles so little does religious belief than to his everyday practical code of morality. In many circles so little does religious belief than to his everyday practical code of morality. knocked away (as all the ancient demands of Melodrama insistently require) by the Russian lady who tells him that he has conquered. She ground for this sympathy is said to be the fact maintaining their prestige and preserving peace, have entered into various alliances with each other, England, whose policy it has been to keep aloof from such alliances, has joined hands with a far-off Asiatic country. This is an entirely new departure in the history of nations. One of the results of this great change of policy is that the Asiatic country which figures in this alliance has now been raised to the level of a European State. Again, considering this alliance from the point of view of race, nearly all Europeaus are Aryans, and among them there are not a few who hold that the Aryan race is destined in future to conquer the world. The Japanese, I need hardly say, come from Mongolian stock. That nations belonging to such widely different races should have formed an alliance must be regarded as a new page in the world's history. Again, the fact that during the troubles in Northern China a few years ago Japanese and Occidental troops fought side by side in the suppression of the Boxers marks a new epoch in history. . . . What happen-ed may be said to be a striking example of the fact that oneness of race is no sure reason for alliance and difference of race no sure reason for enmity. (Kore ni yotte döjinshu naraba, kanarazu shimo rengöshi, ijinshu naraba aiteki suru to iu kencho naru jitsurei wo hiraita wake de arimasenu). This incident may well be regarded as a heavy blow struck at narrow-minded and bigoted race hatred and jealousy. When, next, we consider the matter from the point of view of religion, we find that in this war Christians and Buddhists were fighting side by side. This circumstance, regarded from the standpoint of the progress of enlightenment is of im-mense importance. This and our alliance with Christian England conclusively shows that we have now reached a stage of thought when friendship between nations is no longer to be interruptship between nations is no longer to be interrupted by any local petty differences of creed,

The reason for my saying that Japan occupies a unique position in the world is the fact that she has brought about a great change of ideas in respect to the relation of the world's communities to each other. It can hardly be doubted that the results of her action on civilisation generally will prove in the end to be great beyond all expectation."

In the Kiristokyō Sekai Mr. Ueda Shûtarō writes in high praise of the character of the late Prince Konoe. He says that many Japanese grieve over his death as much as though they had lost a parent. It is not for his high rank nor for his intellectual superiority that the Prince will he chiefly remembered, says Mr. Ueda, but for the depth of his benevolence. He was a man who by nature was endowed with was a man who by nature was endowed with Christian love. A story is told of him which is worthy of being placed on permanent record. When I was in Hawaii some 5 years ago, says Mr. Ueda, I observed among a group of Japanese labourers a woman about 30 years of age. She was evidently very poor and was to be seen day after day slaving away with her husband, though she still had mehild at her breast. Her way of treating this child attracted my attention. She not only showed towards it the strong love of a mother, but she seemed to treat it with quite a mother, but she seemed to treat it with quite unusual respect, as though its rank was deemed to be higher than her own. I asked the reason of this and with tears in her eyes she gave me the history of its birth. It was born, she said, on board the ship in which Prince Konoe crossed the Pacific in the spring of 1899. No sooner was the birth of the child announced to the Prince than he proceeded in person to the third-class quarters and, despite the filth, noise and malodour of the place where the emigrants were herded

together like so much luggage, he made his way We give a literal translation of Dr. Inque's words. (WRITER OF SUMMARY.)

* There are of course a few journals like the London Spectator which hold that England was quite wrong to trust a heathen nation; that outside the pale of Christendom there is no high and thoroughly trustworthy code of ethics; but such journals show lamentable ignorance of facts. (WRITER OF SUM-

to the room of the mother, congratulated her on the birth, took the child in his arms and graciously bestowed a name on it in remembrance of the incident. Therefore it is that the mother gladly works day and night to support the child, regarding it as a gift of Heaven. Having had experience of what kindness and love exists in the hearts of certain men, when later on this woman and her husband heard of the love of Christ, they were at once attracted by it and became earnes Christians. Their attachment to Christianity was the result of prior affinity of nature to its teaching, and can only be compared to iron being drawn to a compass. They had been predisposed towards Christianity by Prince Konoe's act. was not I that converted this couple, but the Prince. It was his goodness that impressed and converted them. (Kore wa yo no dendo no kekkwa de nai, sunawachi Konoe Ko no hataraki de arō. Kō (公) no biloku kankwaryoku (微化力) de arō). In numbers of cases persons who have subsequently proved susceptible to religious teaching have first been moved by the purely secular in-fluence wielded by kind-hearted and virtuous men like the late Prince Konoe.

Mr. Ebina Danjō contributes to the Kirisutokyi Sekai two articles entitled Tōyō Minsoku no Rei-kwa (量 化). "The Reform of Oriental Nations," in which in a most earnest manner he calls on his fellow-countrymen and more especially his tellow-Christians to prepare themselves for utilizing the golden opportunity which victory in this war is bound to bring in its train—which is no other than the opportunity to regenerate China and Korea. What is wanted for this great enterprise, says Mr. Ebina, is a large supply of devoted men who are ready to sacrifice everything to the one great purpose of enlightening their fellow-men. There is, he continues, a great lack of whole-hearted devotion among our young men, a great want of enterprise and spirit. To find men who will endure headful in ord rejustion cheefull in want of enterprise and spirit. To find men who will endure hardship and privation cheerfully in order to realize their aims is very difficult. Our young men read the lives of Livingstone and General Gordon with admiration, but it never occurs to them that they might, if they had the will, follow in the footsteps of such men. Nevertheless, at the conclusion of his second article Mr. Ebina expresses the conviction that Japan will, when the times comes for action, prove herself equal to the task of regenerating the whole of the Eastern world.

On April 19th last, 30 years had elapsed since the commencement of the work of the American Board of Foreign Missions, now known in Japan as the Kumiai Kyōkai. The Kirtzutokyō Sekai. in No. 1,077 furnishes a short account of the fortunes of the Mission; which we epitomize below. On April 19th, 1874, eleven persons were baptized in Kōbe in connexion with the American Board and constituted the nucleus of the first Japanese Christian Church belonging to that mission. On May 24th the same year a church was founded at Ösaka connected with the same mission. Six years later churches were founded in Yokohama and Tōkyō by the Kumiai Kyökai. In one sense the Kumiai Kyökai may be said to have been born in the first year of Meiji, for it was in that year that the late Dr. Niijima, who was then studying in America, conferred with Dr. Clark, the Secretary of the American Board, in reference to the department

teacher of the Japanese language to one of the missionaries. One day he was suddenly arrested by an officer belonging to the Danjodai (Board of Police, abolished in 1871) on the charge of having in his possession a Japanese manuscript trans-lation of part of the New Testament. This was true. He and his wife were imprisoned in Kyōto, where the following year the husband succumbed to the barsh treatment he received. Ichikawa may be said to have been the first martyr of our new Church. But his imprisonment and death were the means of bringing about a radical change in the attitude of the Japanese Government to Christianity. When shortly after Ichikawa's death Japan's envoy was paying a visit to the American Secretary of State, he was reminded that Japan was not treating the religion of foreigners with the respect due to it; that persecution of Christians, was taking place in Kyōto at that very time, and that this was contrary to the spirit of Western civilisation, and so ou. As a consequence of this representa tion the anti-Christian laws were all abrogated. Thus did the death of this one man give new life to the whole country. The Kōbe Christians belonging to our Church now number over 600. They possess a church building that seats 800 people and the Kumiai Kōbe church in its ideas, in its finance, in its organization, is quite inde-pendent. And this church has no less than 99 ister churches in various parts of the country, which have a membership of over 10,000 per-sons. In considering the causes of this great success, while acknowledging the merits of foreign missionaries, we cannot but perceive that the founding of the Dôshisha by Dr. Nijima and the acquisition by that institution of a very fine set of young men who had graduated at the Kumamoto School of Foreign Learning and who subsequently became first-class evangelists and first-rate teachers contributed immensely to the results achieved. Japanese Protestants to day number nearly 50,000 and if Roman Catholic converts be added to these, the number exceeds too,ooo; and all this as the result of 30 years work, much of which was only of a preparatory kind. Surely the success of the next thirty years ought, with the present facilities for communica-tion, and the advance of education and the increasing power of the press, to be far greater than that which we have already scored.

As observed in our last Summary, in the March number of the Scisho no Kenkyū Mr. (Ichimura Kanzō states at great length in the form of questions and answers his reasons for not belonging to any church. In Europe and America and in Australia there are a few powerful preachers who have severed their connexion with the bodies to which they originally belonged for one reason or which they originally belonged for one reason or another, but who are warmly supported by their congregations. The Japanese general public rather admires the spirit of such men as Mr. Uchimura Kanzō, who are prepared to defy ordinary Christian public opinion and strike out on lines of their own. The term jimbutsu (men of character) we frequently hear applied to such persons, Mr. Uchimura's defence of his position as an earnest, hard-working unattached Christian is too long to be epitonized in one Summary. We give the first part of his statement only this month, reserving the remainder for a future occasion, and for the sake of brevity will dispense with the questions of the real or imaginary Christof missionaries to this country. The following year the Board decided to open up work in
Japan and appointed the Rev. D. C. Greene and
Mrs. Greene to Japan. They took up their residence
in Köbe in March, 1870. It was during the next
three years that modern Japan began to assume
definite shape. Those were stirring times, when
definite shape. Those were stirring times, when far-reaching changes in Government administration and in organization were being inaugurated. We must bear in mind that it was not until authorized interpreter of God's word. The sects 1872 that the anti-Christian editor were rescinded. We must bear in mind that it was not until authorized interpreter of God's word. The sects jikyoku wo retain tomo, Ivinon Scirporan no imme 1873 that the anti-Christian edicts were rescinded and the Government public notices forbidding Japanese to enter the Christian Church were removed. It is not generally known that this measure was brought about by means of information conveyed to the American Government by a Köle missionary. In the very early days of the Mission there was in Köbe a Japanese scholar my obligation to become a member of any occasion who was acting as a Christian sect if he chooses to keep separate and points. In the sects jikyoku wo retain tomo, Ivinon Scirporan no immersionate, in Ivinon ni todomari, Rokchu ni wa danjite kikoku in wa kitaku in wa danjite kikoku in wa danjite kikoku in wa kitaku in wa kitaku in wa kitaku in wa danjite kikoku in wa kitaku in kitaku in wa kitaku in kitaku in wa kitaku in wa kitaku in wa kitaku in wa kitaku

thinks it best to do so. Mr. Uchimura points out that many of the prophets spent their lives in denouncing the bodies which in their day claimed authority over individual servants of God who wished to worship Jehovah in their own way. who wished to worship Jehovah in their own way. He thinks that the prophets plainly denounced forms and ceremonies as possessing in themselves no merit whatever. He considers that Isaiah I. 10—14 and Amos V. 21—23 not only teach that religious services performed by wicked people are a mere mockery, but that under no circumstances can a ceremony possess the same value in the eyes of God as real devotion of heart and holiness of life. Forms and ceremonies may be dispensed with without loss of any kind, says Mr. Uchimura. He observes that the religious bodies which existed during the centuries covered by the Old Testament history were habitually denounced by God's special messengers as obstructing the progress of real religion by the assumption of authority which they had no real right to exercise, and he says that every reform in religion has begun by determined opposition to existing ecclesiastical authority. Protestantism itself began thus, and every separate Protestant sect had its origin in the desire of certain persons to free themselves from thraldom of some kind or other. It has to be remembered, says Mr. Uchimura, that according to the Bible, Churches have no value at all apart from the faith and devotion of the members that form them. The Church is a result and not a cause. not a fact that there is faith because there is a not a lact that there is latin because there is a Church, but that there is a Church because there is faith. (Kyökai wa kekkwa de arimashite, genin de wa arimasen. Kyökai atte no shinkö de wa naku shite, shinkö alte no kyökai de arimasu). Mr. Uchimura's interlocutor asks him whether he regards himself as a modern prophet sent by God to denounce existing religious bodies which fail to come up to his ideal, and whether he thinks the time for the dissolution of existing Christian organizations has come. To this ques-tion Mr. Uchimura replies that in a certain sense he may be so regarded, on the principle that he He is not that is not with a cause is against it. in sympathy with any existing Christian denomi-nation. The reasons for this he states at considerable length. These reasons will receive our attention next month.

article entitled "The Greek Church and the Situation" which gives a full account of the manner in which the Christians belonging to Bishop Nicolai's Mission have acted in the trying position in which they find themselves. First, in reference to Bishop Nicolai's attitude to the existing situation, the Scikyō Shimpō calls attention to the fact that nine years ago when three European Powers dictated certain terms to Japan, Bishop Nicolai foresaw that Russia's action would eventually lead to war between herself and Japan, and he then said, "Should this occur, in as far as circumstances permitted, I should decide to remain in this country and shepherd the flock which I have gathered here as I am doing to-day." His mind has never wavered on the point since that time. When Japanese negotiations with Russia had heen broken off and war was seen to be inevitable, Baron Rosen, the Russian Minister in Tökyö, wrote to the Bishop urging him speedily to make up his mind whether it was his duty to go or to stay. The Bishop having given himself body and soul to the service of the Japanese branch of the Greek Church, wisely determined that his best plan was to place the natter entirely in their hands and to do what they advised. A meeting of all the leading Christians was called, and after discussing the question the following resolution was unanimously passed : Shukyō Kakka (主教間下) wa, ikanaru jikyoku wo kitasu tomo, Nihon Seikyōka: no tame ni Nihon ni todomari, Rokeku ni wa danjite kikoku

In the Seikyō Shimpō, No. 557, we find an article entitled "The Greek Church and the

in favour of his moving to the Australia Against in order to insure better protection. Others proposed that he be asked to temporarily take up his residence in some American city. The Bishop residence in some American city. The Bishop disapproved of these proposals, and said that if he were commanded by his own Government or by the Japanese Government to leave the country, by the Japanese Government to leave the country, he would go to Shanghai, in order to be as near Japan as possible. The Christians realize that the situation has its dangers, but there are scores of them who would gladly sacrifice their lives rather than have their beloved pastor injured in any way.

In reference to the work of the Church, continued the Schulz Stand programment of the country of the church of the churc

tinues the Seikyō Shimpō, our Synod unanimously agreed that the situation called for no retrenchment and for no radical change of plans. Of course in the matter of finance there was cause for some little anxiety; but they could exercise more economy, and doubtless earnest men would be found ready to save the situation by subscribing money, or would give help in other ways. In school work, in the publication of books and the like there must be no relaxation of effort on account of the war. The Greek Church Christians must be prepared to find themselves suspected in some quarters. But they can live this down.

At the end of the article which we are epitomiz ing it is stated that Bishop Nicolai has been placed under the protection of the French Minister. For a short time it was feared that the Russian Gov-ernment would order the Bishop to return to his country, but through the kind appreciation of the Bishop's point of view on the part of Baron Rosen, a satisfactory arrangement was made, and at present the Japanese Government are specially guarding the Bishop. The Greek Church Christians have started a War Relief fund of their own and are displaying their patriotism in every possible way.

Uuder the title "A New way of Regarding Morality" Mr. Matsuo Otojirō writes in the following strain in the Rikugō Zasshi. One of the defects of traditional Japanese morality is a certain supra-mundane superiority which it assumes. This has its origin in history. Japanese morality was developed principally by the warrior class, which kept aloof from traders, artizans and business men of all kinds. So that to pursue moral ideals of a high type was for centuries considered to be incompatible with the pursuit of wealth or devotion to business. Lies, for instance, were supposed to be quite necessary in trade.
This largely accounts for the deterioration of the
Japanese merchant class compared with the military This largely accounts for the deterioration of the Japanese merchant class compared with the military class. They were for centuries taught that the high code of morals practised by the samurai was not one that they were expected to observe. They were engaged in making profit and there was no connexion between money-making and the practice of a lofty code of morals. So our morality became a kind of dress coat which only one section of the community was ever expected to wear. And yet when we go back to the origin of our word for morality, dotoku, we find that it is made up of toku that which is acquired, profit, or gain, and michi the right or proper way of acquiring anything sought for. There is connected with every object sought for, a natural and measonable way of doing so. Now, to say that morality only concerns the action and words of a certain small section of the community, as a moral code was bowed to as the one suprema authority, though it may appear to enhance the value of morality, in reality does the opposite, as it limits its scope to a small section of the community.

Since morality, properly defined, controls the actions of all men at all times; since it is the doing of right actions in a right manner, it is in timately connected with the lives of every member of a community and instead of being placed outside the life of money-making, it should control the whole of that life. What is called profit includes a great namy things besides the accumulation of property. It embraces man's permanent benefit and happiness. In business life men are brought and chappiness. In business life men are brought into contact with each other in a manner that calls for a keen appreciation of the rights of each life the content of the con

in favour of his moving to the Austrian Legation individual. There is no comparison between the profits that have been made in defiance of all the laws of morality and those which have been ac-quired in an honest, straightforward and con-scientious manner. Mr. Matsuo in the last part of his article writes thus: Doloku wa tokunoma no okimono shisubeki mono ni arazu shite, kiwamete jitsuyo teki naru mono de aru; johin (上品) sugiru mono ni arazu shite, kiwamete riyeki na mono de aru; hijobutsu shiosubeki mono ni arazu shite, kiwamete hiroku amaneku okonawarubeki mono de aru. " Morality is not to be regarded as something to be placed as an ornament on the shelf, but is decidedly an article for daily use. It is not something of too superior m quality to be mixed with money-making. It must not be regarded as some choice curiosity, but practised far and wide by everybody."

YOKOHAMA YACHT CLUB.

We take from a late number of Forest and Stream, the following account of the Yokohama Yacht Club, by Mr. A. R. Catto, which will be of interest to local yachtsmen:—

Early in the history of the foreign settlement in Yokohama there were occasional sailing races amongst the boats of the ships lying in the port, and as boats were acquired by the residents, the sport grew amongst the boats of the ships lying in the port, and as boats were acquired by the residents, the sport grew in popularity. For many years the fleet consisted of open boats, old converted ships' lifeboats &c., but as time went on craft were specially built for the purpose, and during the season of 1886 races were held regularly and so much enthusiasm was shewn that it was felt that the sport required the establishment of a properly organized Yacht Club. At the outset there was some difficulty, as the Rowing Club, to which most of the boat owners belonged, wished to take the matter in hand. The Rowing Club had a pavilion and landing stage, which they represented as being indispensable to the owners of the sailing boats, but the latter felt that it would be better to have their own organization, and decided to form a separate Club, even if they had only the wide, wide sea as their Club house. The Yokohama Sailing Club was therefore formed, and commenced the season of 1887 with about 24 sail on their register. Of these, five were specially built yachts, decked and ballasted, five were open or half decked, one was built on the model of a Japandes first of the special stips' boats. The champion for the season of 1886 is still on the Club register, and still races occasionally in handicaps.

The succeeding four years saw a large number of new boats built. One built in 1888 from lines supplied by the late Ed. Burgess, with a water line length of 1860 first built yachts dail area of about 1900 sq. ft., is still well to the front in her class, and in her own particular weather picks up an occasional prize. A few yachts have been imported, from the Solent, the Clyde, and New York, but the majority have been Clyde, and New York, but the majority have been

races were sailed. The rating formula is the cube root of l.w.l.x.s.a., but as the types of yachts are so varied, a fair proportion of races are sailed under handicaps, except of course races for the "Lark"

class.

From its situation on the Gulf of Yedo, Yokohama is admirably suited for the headquarters of a Yacht Club. The harbour is well protected by a breakwater, and the part assigned by the authorities for the yacht anchorage is next to the Bund, with a depth of from 2 to 3½ fathoms. The average rise and fall of tide is about 5 feet. The Gulf of Yedo extends some 40 miles by 20, and affords excellent cruising and racing water, especially to the West and South, where it opens to the Pacific by a channel about 6 miles wide. Outside there is splendid scope for coastwise cruising, with numerous snug harbours at convenient intervals. Off the coast lies Vies Island, which forms an objective for more ambitious voyages, and has been visited by several of the larger voyages, and has been visited by several of the larger yachts, as excellent woodcock shooting is to be got there.

Japanese make very good yacht bands, as they are born sailors. They take a very keen interest in racing, and at the close of every season there is a race for the small boats, manned by native paid hands only. This event is always productive of great excitement, and there is usually some carrying away of gers amongst the competing hosts.

great excitement, and there is usually some carrying away of gear amongst the competing boats.

In and about Yokohama are some excellent Japanese shipwrights, who turn out very good work, and the cost of construction is low. One of the most prominent members of the Yacht Club, a gentleman who has done a great deal for the good of the sport, and a very successful designer, has in connexion with his business a staff of sailmakers. Yacht sails supplied from his loft have been pronounced by good judges to be equal to anything obtainable in America. Altogether the expenses of yachting in Yokohama are lower than almost anywhere else in the world, and anyone with a taste for the sport can indulge in it to the top of his bent.

NINE YEARS FOR INCENDIARISM.

M. C. Fernando, charged with incendiarism, was sentenced on April 29th in the Yokohama District Court to nine years' confinement with hard labour.

A SILK TRANSACTION.

Judgment was rendered on May 3rd in the Yokohama District Court by Judge Danno, in the case instituted by Messrs. W. M. Strachan & Co. against M. Sarasawa, habutae silk dealer. Defendant was ordered to pay plaintiffs yen 422.30 with interest at the rate of 6 per cent. per annum from Jan. 6th last till execution of judgment, and to bear costs. to bear costs.

LIBEL CASE.

The case filed by Mr. S. Isaacs against his younger brother, Mr. Max Isaacs, claiming yen 12,000 on the ground that the latter had presented to the Court in another case a statement defamato the Court in another case a statement defania-tory of plaintiff, came up again on May 3rd in the Yokohama District Court before Judge Danno, when judgment was delivered dismissing the claim of plaintiff with costs.

CLAIM ON A SHARE TRANSACTION.

The hearing of this case, brought by Mr. R. J. Ward against B. Sho, a sharebroker, claiming yen 8,515.60, was resumed on May 3rd in the Yokohama District Court before Judge Danno.

Mr. Sydney Smith was examined as witness.

Mr. Smith stated that he arrived on Sept. 27th

Mr. Smith stated that he arrived on Sept. 17th last in Yokohama from San Francisco and took up his residence at the Club Hotel where he up his residence at the Chib Fioter where he found the name of Tokumiya sharebrokers, Tokyo, among other advertising matter. The witness sent a letter to the brokers enquiring about business, and received from them a reply about business, and received from them a reply in which they asked him to enquire at the Yokohama office. Before he made any enquiry at the Yokohama office, Muramatsu, an employee of Tokumiya, called on witness and offered him a share quotation list. Later the witness ordered Muramatsu to sell sixty shares each of the Nippon Yusen Kaisha and Toyo Kisen Kaisha. Yusen Kaisha and 10yo Kisen Kaisha. Suo-sequently he paid a visit to Miyanoshita and several other places, after which he arrived in Tokyo and stayed at the Metropole Hotel. While in Tokyo, witness called at the office of defendant where he met very often Mr. Morito of the Yoko-hama office and his employer. Mivagates. The hama office and his employee, Muramatsu. The witness believed that the Tokyo and Yokohama offices were the same business, that of B. Sho, the Witness received several receipts defendant. from Sho in connexion with transactions which documents were all signed by the firm name, Tokumiya.

Witness produced these documents to the Court for confirmation of his statement.

The examination of witness was here concluded.

It may be remembered that the case was adjourned till May 5th at the previous hearing which took place on April 22nd. Since then plaintiff's counsel asked the Court for leave to examine Mr. S. Smith to secure his evidence as he is about to leave Yokohama.

The hearing of this case, brought by R. J. Ward against B. Sho, share-broker, claiming yen 8,515,60, was resumed on May 5th in the Yokohama District Court before Judge Danno.

Having produced in Court two letters as evidence, Plaintiff's counsel stated that Tokumiya.

Exchange Regulations and held that under the eastern Virginia has been dissoived. The ex-regulations a stock-broker is not permitted to planation is that the nerger did not pay, and the establish a branch, so that the Vokohama office is properties are all separated into the different a different business from that of defendant, though interests as before the merger took place.

he carries on business in Tokyo and has his domicile there

Plaintiff's counsel stated in reply to the contention of the other side that the provisions of the Exchange Regulations were admitted as to the establishment of branches, but said they referred to the relations between the exchange and brokers but not to transactions between a broker and his customer. Defendant as a broker could accept orders from customers anywhere. Defendant's counsel asked the Court for leave to examine Muramatsu of the Yokohama office. The Court

rejected the application.
Counsel entered into a lengthy discussion, after
which the Court announced that it would give judgment on May 7th at 9 a.m.

HAIM v. BRETSCHNEIDER.

The hearing of this case, in which plaintiff claims yen 1,413.25 was resumed on May 3rd in the Yokohama District Court before Judge Danno.

J. Hayashi, an employe of Tashiroya, porce-lain dealer, was examined as a witness. Ha-yashi stated that in December last he paid a yashi stated that in December last he paid a visit to defendant at his office, where he saw a sample cup and several cases containing cups same as sample. The porcelain was quite similar to the sample in quality and pattern. The price was rin 7 or 8 per piece. Witness was asked by defendant whether he could make the porcelain the cheap rice, and received a cup as a sample. at a cheap price, and received a cup as a sample.
Witness produced two cups in Court, one of
them being the sample which he received from defendant.

The Court declared that Mr. M. Surth, of Messrs. H. Ahrens & Co., whom the Court had asked to be present as an expert as to the com-mercial usage in Yokohama, had written saying that he was about to go in the interior on private

Defendant's counsel asked the Court for leave to examine J. Hayashi again as to the sample of plaintiff, and Mr. Otto Koch who saw the sample and cups which defendant received from the

Japanese manufacturers.

'The Court decided to do so on May 24th.

STEWART v. STORNEBRINK

This case, in which plaintiff claims yen 1,700 came up again on May 4th in the Yokohama District Court before Judge Nakanishi on the protest of defendant against the judgement given on March 17th in favour of plaintiff when defen-

on March 17th it lavoid of plants was not present or represented.

Plaintiff's counsel repeated his statement presented to the Court on March 17th.

Defendant's counsel admitted that Mr. H. L. Stornebrink borrowed yen 1,200 on June 1st, 1900, from plaintiff on security of the perpetual lease of No. 270 Bluff together with two buildings and a factory situated on the same ground and that the due day for repayment was March 1st 1903. But counsel contended that the security with another and that he was possessed jointly with another and that he had been in litigation to separate their interests.
That case was not yet concluded. On March and last, which was the day next to the due date designant acted plants of the disputer of the d defendant asked plaintiff to wait till the dispute as to the property was settled after which the former would sell it and pay the claim. At that time, plaintiff consented to the request of the defendant, so that the former must wait till the other case is closed.

The proceedings were concluded and the Court announced that judgment will be given on May 6th.

No. 78, Yokohama, was the same business as in Tokyo—that of B. Sho, the defendant.

Defendant's counsel submitted a copy of the Exchange Regulations and held that under the regulations a stock-broker is not permitted to planation is that the negree did not you and the

The Whistler Memorial Exhibition, in Boston, there appeared to be a connexion. In a case filed against B. Sho, the defendant in the present has scored a great artistic success. "It is pleating against B. Sho, the defendant in the present has scored a great artistic success." It is pleating the purisdiction lay with the Tokyo Court as sing," as a writer in the New York Outlook research the present the search probability is a second a probability of the present the search probability is a second a probability of the present the search probability is a second a probability of the present marks, "to see a prophet thus honoured in his own Country. Whistler was born in Massachusetts, and had Yankee shrewdness and wit as well as the artistic temperament. There was something distinctly American, too, in his first-hand attitude toward art—his starting out to paint as if nobody else had ever painted before, and as if the art had begun with him. . . The memorial exhibition shows Whistler for what he was, not what his eccentricities obscured. Only a simple, sincere, patient genius could have produced this collection. of rich and varied work." Country. Whistler was born in Massachusetts, and had Yankee shrewdness and wit as well as the and had Yankee shrewdness and wit as well as the

May 7, 1904-

In an address delivered at a banquet in New York City, Gen. Joseph H. Wilson declared that the coal and iron supply in America and England would give out in a couple of hundred years. He suggested that Asia then would have the coal supply of coal and iron. He added: the only supply of coal and iron. He added:
"There are only 400,000,000 white people on earth and about 1,200,000,000 coloured people, counting the yellow man. The yellow man is counting the yellow man. The yellow man is going to set up in business for himself, and that business has only just had its beginning in the Dusiness has only just had its beginning in the Far East. There are 400,000,000 people in China. When Chiua starts she is going to have a big say in the world. The great question is, who is going to control that coal and iron supply? In four or five hundred years the white man is going to be up

The position of the U.S. Treasury continued to improve during the month of March, remarks Bradstreets, and at the end of the month it was found that the receipts exceeded the expenditures by over \$2,960,000. This welcome addition to by over \$2,960,000. This welcome addition to the small surplus brought it at the end of the nine months' period to over \$7,800,000. This outcome is decidedly encouraging. The excess of receipts over expenditures does not represent quite three-fourths of the sum estimated by the Treasury officials earlier in the year as the probable surplus for the fiscal year, but the tendency of late years has been for April and May to show excesses of receipts, while the month of June, the last month of the fiscal year, has usually been above the average in this respect. It will not surprise anybody if the surplus for the fiscal year should be the property of Secretary equal if not exceed the estimate of Secretary

Deposits of \$250,360,310 were held by the state banks of Chicago as shown by their statements of condition as of March 22. This is the ments of condition as of March 22. This is the highest mark for deposits, the best previous figures being \$236.344,135, on October 15, 1903. Peposits of the national banks January 22 were \$267,046,799, which also set a new record. This makes the combined deposits of national and state banks \$517,407,118. Cash resources of all banks in Chicagon are now the leavest area to the company. banks \$517,407,118. Cash resources of all in Chicago are now the largest ever known. state banks gained in cash resources from the date of their last statement, December 30, 1903, \$13,719,140, or 19.25 per cent.; loans gained \$259,719, or 17 per cent., and deposits increased \$16,927,874, or 7.25 per cent.

Says Public Opinion:—When trust promoters fall out the public occasionally get a little inside information. This is what happened in the shipbuilding case, and now we are promised the true history of Amalgamated copper. A few facts of interest have already come out during the course of the Boston gas hearing in which the copper promoters were also interested. Mr. Lawson said on the stand that \$46,000,000 profit was involved in one transaction in which he was interested with the "Standard Oil crowd." This sum was raised to \$66,000,000 profit statement. true history of Amalgamated copper. AMERICAN TOPICS.

It is announced that the Norfolk, Portsmouth
Newport News Company's \$0,000,000 merger, at figures ranging from fifty to one hundred per at figures ranging from fifty to one hundred per cent above their cost and value. Amalgamated was floated at par and is now quoted at 49. This, in brief, is the history of another combination in restraint of trade.

Mr. Andrew Carnegie will again be the largest

taxpayer on personal property in New York. He has been assessed this year on \$5,000,000, and as he sailed for Scotland withous making objection to the assessment he will pay on the whole amount, Mr. Russell Sage, who had been assessed on \$2,000,000, applied to have the amount cut down to \$500,000. He said in a letter to the board that he is unable to attend the offices of the commission personally, and has asked of the commission personally, and has asked that his lawyer be allowed to swear off for him. Mr. Sage has been informed that the only way this can be done is to send an affidavit stating that he is physically incapable of coming in person. Mr. Charles M. Schwab was assessed at \$100,000, but he called personally on the board and said that he objected to this figure, but owing to the fact that he enjoyed many privi-leges in New York he was willing to pay on an assessment of \$5,000. This was agreeable to the department, and he settled on that basis.

The latest statehood bill is one providing for the admission of Oklahoma and Indian Territory as the state of Oklahoma, and of Arizona and New Mexico as the state of Arizona. No restriction in point of time is placed upon the admission of the two latter territories, but it is provided that the two former cannot be admitted until 1905, by which time all the Indian lands will have been allotted. It is provided that the constitutions to be formed under the bill must contain an absolute prohibition of polygamy, and that under them suffrage cannot be restricted except for ignorance, imbecility, age and sex. Revenues for schools are to be provided in the first-mentioned state by an appropriation of \$5,000,000 out of the Treasury. This is to meet the fact that the Indian lands of Oklahoma and Indian Territory have been allotted in severalty to the Indians under a law which makes them non-taxable. The principal of this fund is to be used to the extent necessary, the remainder being placed on deposit at 3 per cent, interest to the credit of the state for the maintenance of the schools established.

As a general rule, in a presidential year the domi-nant party in Congress is more careful about the size of the appropriations than at other times. is, therefore, not surprising to find that the chairman of the House Committee on Appropriations felicitates the House and the country on the fact that the appropriation bills carry less than might have been the case under other management. The sum total of all the annual supply bills, as reported by him is \$598,802.324, to which must be added \$84,971,820 estimated to be required for permanent appropriations for interest on the public debt, the expense of collecting customs, and other purposes, exclusive of the sinking fund. This gives a total of of the sinking fund. This gives a total of \$682,774,144, which is still \$22,000,000 less than the total estimated revenues. The result has been made possible by the omission to pass a general river and harbour bill at the present session of Congress and by a careful economy in the pre-paration of the appropriation bills. The amount carried by the Sundry Civil bill represents a reduction of \$29,000,000 as compared with the appropriations for the current year.

years of ceaseless work, and he took a rest. Little was done with the lamp, however, in the first six months of that year, owing to the exhibition and trials of the completed phonograph. In August Mr. Edison began again upon his experiments with carbon filaments. Trials were continued until October, 1879, when lamps were made of paper carbon, and with carbons of common sewing thread, looked for, in the Twelve English Statesmen placed in a receiver or bulb made of glass with the leading-in wires scaled by fusion. The whole thing was then exhausted by the Sprengel pump to nearly one-millionth of an atmosphere. Mr. Fredetic Harrison, who contributed the sketch of Cromwell to the same series. Since to nearly one-millionth of an atmosphere. Mr. Edison then continues: "These filaments of carbon, although naturally quite fragile owing to their length and small mass, had a smaller radiatcarbon filaments. Trials were continued until October, 1879, when lamps were made of paper carbon, and with carbons of common sewing thread,

ing surface and higher resistance than we dared hope. We had virtually reached the position where the carbons were stable. In other words, the incantomaker of the carbons were stable. In other words, the incantomaker of the carbons were stable. In other words, the incantomaker of the carbons were stable. hope. We had virtually reached the position where the carbons were stable. In other words, the incandescent lamp as we still know it to-day, in essentially all its particulars unchanged, had been born." He then tells of his experience with bamboos and other vegetable substances to get the best carbon filaments, and the final use of the contributors, but that arrangement likewise tell through.

Under the title of "Far Eastern Impressions," cellulose. He says in conclusion that upon a moderate computation the production of incandes-cent lamps in the country since his first success has reached a total of 250,000,000 lamps, or not less than 10,000,000 a year for each of the twenty-five years. The lamp has remained structurally the same since 1879.

LITERARY GOSSIP.

Mrs. Gertrude Atherton's novel, "The Rulers of " which will shortly be published by Messrs. Macmillan introduces the present Emperors of Germany and Austria among the characters, and attempts a portraiture of both in imaginary circumstances

Mr. Candler, the Daily Mail correspondent, who, to the regret of his many friends, was so severely wounded in the Tibetan rush at Tuna, with the result that he has lost his left hand, is the entertaining author of "A Vagabond in Asia." He is a graduate of Cambridge,

Mr. Irving Hancock, the author of "Japanese Physical Training," has appearing through G. P. Putman's Sons another book treating of "Jiujitsu." It is entitled "Physical Training for Woman according to Japanese Methods," and has explanatory illustrations taken from life.

Major Martin Hume has been adding two new chapters to his recent successful book Courtships of Queen Elizabeth." He had endless inquiries from readers of it as to whether he could throw more light on the real nature of the relations that existed between Elizabeth and her admirers. His answer is contained in these fresh chapters, which also represent fresh research and information. Mr. Eveleigh Nash publishes the

Mr. Frank T. Bullen, in an introduction which he has written to "The Way of the Sea," a new book by a new author, Mr. Norman Duncan, makes the following statement:—"I am absolutely certain that with the exception of Mr. Joseph Conrad and Mr. Rudyard Kipling, no writing about the sea has ever probed so deeply and so faithfully into its mysteries as his." The book will be published immediately by Messrs. Hodder and Stoughton.

At Compostella there has just died a strange individual, half-tramp, half musician, with a certain dash of the poet about him, who, even in a land of old world survivals like Spain, may probably be regarded as the very last of the troubadours. His name was Adolfo Garcia, and he was a native of Galicia. Equipped with nothing but an old fiddle and a great umbrella that served against either sun or rain, and did service between times as an alpenstock, he had roamed through every Thomas A. Edison, writing for the Electrical province of Spain. Artiving in town or village, World and Engineer, tells of his experiments with the incandescent electric lamp, which will celebrate its twenty-fifth birthday this year. He began trying to subdivide the electric light in the chivalry, mostly to airs of his own composing fall of 1877 and continued until July, 1878, when he broke down under the strain of a number of ment and delicacy, and never failed to reach the heart of the certific paids who had hearts or the purses of the gentle maids who had been selected for the serenade.

It is with no small regret that the historical and literary student learns that Mr. John Morley has definitely abandoned his intention of writing

Messrs Hutchinson & Company are publishing very shortly a work by Mr Ernest F. G. Hatch, M.P., embodying observations made during an extended series of journeyings in Japan, Korea and China some three years since. Mr. Hatch, whom many still remember in Yokohama, during his tour made it his business to inquire into trade questions which affect Britain. On the political aspects of the Far Eastern question, Mr. Hatch gives notes of conversations he had with prominent men. The work will be illustrated by a large series of photographs.

The following lines, written by Mr. Lee Wilson in the New York Life, are quoted by the American Bookman as a pleasant statement of the spirit of criticism to-day :-

LEONINA SOCIETAS.

A reader of the Hour Met the Writer of the Week, Where Critics of the Minute Formed an influential clique:
"He has style," they said, "an
And his treatment is unique." and power! So the Reader of the Hour Bought the Novel of the Week,
And he still delights to speak

"He has style and native power,"
Says the Reader of the Hour,

"And his treatment is unique."

"The Vineyard," John Oliver Hobbes's new novel, published by Mr. T. Fisher Unwin, is full of sparking epigrams. Here are a few:—

There is no woman who does not love to be loved. Heaven and hell, the two places where everybody

has to drop pretences.

One takes a husband nowadays as one takes a

One takes a mistakin howadays as one takes a ouise—according to one's income.

The happiest lives are led by those who fear noing, know nothing, and want nothing.

Human love is not a single and simple impulse, at an emotional force of innumerable complications.

The grab, bluster, and bluff of modern business

means getting as much as you can for as little as you can give.

There is no loving-kindness, even in the best of

provincial Christians, for ill-behaved members of the aristocracy.

aristocracy.

If a man really wants a thing he will ask for it, and if he really loves a woman he will take any risk rather than lose her.

Treachery kills a woman's love, while jealousy will keep it burning. When men lie to women who love them, they are fools.

The individual is but the symbol of the great mass, and the history of a country is but the story, on the heroic measure, of any one human being.

Mr. H. B. Marriott-Watson, in the Daily Mail, enters a plea for greater freedom for girls in the matter of reading. Honestly, he says, the matron may conceive that her daughters should be kept "uncontaminated" by knowledge of the world; therefore she supervises their reading, and sees to it that their library books are strictly "proper." What a farce it is! If the girl is to live her life wholesomely, sanely, and fully, she should know as much as there is to know of what counts and matters. The theory of the sheltered life is ridiculous. Few women in these days can or do ridiculous. Few women in these days can or do live sheltered lives. It is a battle for most of them, and the best they can do is to get to learn the terms on which it is fought. So far as literanot pleasing to their taste; and they have also not pleasing to their taste; and they have also a curious knack of ignoring what they do not wish to notice. And, after all, is there not a certain amount of hyprocrisy in this foolish segregation of girls? Or if not hypocrisy, sheer blind stupidity? No one will deny her daughters access to the Bible, or to Shakespeare, or to any thesis and the sheet for the girls of them. access to the Bible, or to Shakespeare, or to any classic poet. And here life is discovered to them fairly amply. If it is the desire of the matron to bring up her daughter quite ignorant of her surroundings, she should rigorously exclude Shakespeare and Milton. In point of fact, young girls often know more than their mothers suppose them to: and it is a good thing they do. If men had the control of their daughters there would cease to be any difficulty in the question, "What should girls read?" The answer would be "What their girls read?" The answer would be, "What their brothers read."

At the famous dinner-party at Dilly's to which At the famous dinner-party at Dilly's to which Boswell successfully manoeuvred to bring both Johnson and Wilkes, Bozzy, as a Scotch advocate, was expounding the law as to the arrest of a debtor who meditates flight from the country—the very same law which a few days ago was enforced in the Isle of Man—and emphasising the engagically of the Scotch system to that prevailing superiority of the Scotch system to that prevailing in England in regard to arrest for debt. He pointed out that before judgment was obtained the creditor could arrest his debtor if he could swear that the latter was about to fly from the country, or, as it was technically expressed, was in meditatione fugae; to which Wilkes—who had, in meditatione fugue; to which Wilkes—who had, in common with Johnson, a pleasure in bantering the Scotch—immediately retorted, "That, I should think, may be safely sworn of all the Scotch nation!" Mention of this procedure also occurs in "Redgauntlet," where Peter Peebles bursts in upon Justice Foxley with the inquiry, "Is't here they sell fugie warrants?"—Peter desiring, and, as will be remembered, getting, one for the apprehension of his runaway advocate for the apprehension of his runaway advocate Alan Fairford.

The following, taken from the Milwaukee Sentinel is an excellent parody on the announce-ments of new books which publishers send out from time to time :

"Wild Beasts I Have Saw," by Bridget Seton-Clancy. This charming group of essays has about it the odour of the backwoods to a remarkable

The authoress explains, in the preface, that her early life was spent in the wilds of Northern Mionesota, where she associated almost entirely with wild animals. She says:—

mals. She says:—
Many times I used to set under a tree for hours "Many times I used to set under a tree for hours to a time, watching for to get a shot at a rabbit. I could shoot good with a rifle, and have often saw men who were worse shots than I be. When the other girls were wasting their time going to district school, I would be walking through the woods, watching the wild beasts playing in the trees and on the grass, and learning something every minute. I seen lots of funny incidents, which I will try to mention in this here book."

mention in this here book."

Miss Seton-Clancy is one of those free, untamed souls who occasionally startle the literary world by their supreme disregard for the statute in such case made and provided. If she is ever worried by the rules of grammar, it does not appear in her work. She has something to say, and says it straight from the shoulder. the shoulder.

This is one of the best books of the year, and it should enjoy a large sale.
"Wild Beasts I Have Saw," by Bridget Seton-

NEWS OF THE WEEK.

The death is announced of Mr. W. J. Ford, the well-known Middlesex cricketer.

The Burnley, Lancashire, authorities have decided that children must not be allowed to dance the cake-walk, as it is demoralising.

The captured Russian steamer Manchuria, which is now in use by the Japanese Government, arrived on April 28th at Shimonoseki.

Staff-Surgeon Meaden, R.N., and a middy from H.M.S. Glory are in the Naval Hospital at Hongkong suffering from enteric fever.

The main steam pipe of the British steamer Courie, 3,155 tons, burst as she was leaving

The shipment of dogs, cats and snakes from the Philippines to the United States has been

During April, gold coins and gold bullion were exported from Yokohania to the amount of уеп 10,060,274.

Japanese gold coins amounting to fifty thousand yen were to be exported on May 5th from Yokohama to Shanghai.

Mr. Noguchi, a member of the Lower House, for Tsuchiura, Ibaraki prefecture, was prosecut-ed on May 3rd on a charge of infringing the Election Law

Lieut.-Colonel Macpherson, of the British Army, paid a visit on May 3rd to the Japan Red Cross Society's offices and hospital and inspected the arrangements.

A telegram from Nagasaki states that Dr. Morrison, correspondent of the London Times, who had been for some days in the port, left on April 30th for Shanghai.

Admirals Bienaime and Ravel have been relieved of their functions at Toulon as being responsible for the divulging of documents at the time of the interpellation on the French navy.

Mr. Kurino, formerly Japanese Minister at St. Petersburg, left Hakata on May 3rd by train for Kobe, which he is expected to leave to-day (the 5th) by the steamer Tai Sang for Yokohama

A telegram from London was received on May 4th at the Foreign Office to the effect that Japanese bonds had advanced. The quotations were: old 5 per cent., £83.10.0; new 5 per cent., £79.10.0; and 4 per cent., £68.

Mr. Kakeuchi and two other directors of the Seoul-Fusan Railway Company and Mr. Higo, Councillor of the Communications Department, lest Shimonoseki on April 28th by the steamer Chihugugawa Maru sor Korea.

A St. Petersburg dispatch dated April 10th said:—The War Ministry has granted the peti-tion of Madame Pousep, daughter of Colonel Maxiowcondurow, who desired to be enrolled in a Cossack regiment. The Ministry has ordered a Cossack regiment. The Ministry has ordered her enrolment in the First Regiment of Riflemen.

The steamship Nebraskan, of the American-Hawaiian Line, has made the longest trip record-ed with oil as fuel. She has arrived at New York from San Francisco after a voyage of 12,724 nautical miles, made in 51 days, without making any stop for replenishing fuel.

Mr. de la Camp, of Kobe, says the Asahi, has been decorated by the Kaiser with the Fourth Class of the Crown. The paper adds that this gentleman was in Japan for twenty-four years, and during that time devoted himself to the public interest and to extending German trade in this country.

A St. Petersburg telegram of April 11th said: The model three-inch quick-firing guns, firing eighteen shots a minute, are being issued to the artillery colleges of St. Petersburg for the purpose of instructing the senior cadets in the handling of these pieces. The Emperor will confer diplomas on them in May instead of next fall,

11th that Colonel Marchand of Fashoda fame recently offered his resignation to the Minister of War, General André. Marchand wished to accept an invitation of Emperor Nicholas to follow the Russian operations in the Far East, but the War Minister refused to grant him the necessary

Hongkong on the 21st for the north with a cargo Chamber of Deputies on March 29th, M. Chauof kerosene oil from Sumatra, and she is detained met, one of the members for Bordeaux, asserted for repairs.

that the dockyard at Biserta was in such a backward state that the Russian torpedo boats could not get any repairs effected and had to go to Naples.

A Shimonoseki telegram (Jiji) reports that the British steamer *Upada*, 5,000 tons, with Lieut,-General Sir Ian Hamilton and eleven other foreign military officers, went ashore on the evening of May 1st off Hikoshima near the Shi-monoseki Straits. Attempts are being made to float her. It is added that the cable between Shimonoseki and the island is damaged.

The Lord Mayor of London on March 28th formally declared open the widened footways of London-bridge. The widening, which has occupied nearly two years, has been executed by the Bridge House Estates Committee at a cost of about £100,000. An additional width of 6in, has been given to the roadway and of 5st. 6in, to each footway—a total addition of 11st. 6in,

It was announced by the chairman at the annual meeting of Marconi's Wireless Telegraph Company (Ltd.) on March 30th that the Post Office had intimated on the previous day to the directors their willingness to conclude an agreement with the company for the establishment of a system of inland wireless telegraphy.

The King has been pleased to grant to John Nicholson Seymour, Esq., B.A., authority that he may accept and wear the Insignia of the Fifth Class of the Imperial Japanese Order of the Rising Sun, conferred upon him by H.I.M. the Emperor of Japan in recognition of services rendered by him as Teacher at the Second High School, Sendai, Miyagi Prefecture, Japan.

Advantage will be taken of the presence of British troops in Tibet to ascertain the effect of extreme cold upon cordite ammunition. The cartridges have necessarily been subjected to temperature several degrees below zero for a long period, and it will be interesting to learn if cordite has deteriorated in any way. It has stood satisfactorily the heat tests in India and elsewhere.

The old cup challenger Shamrock I is rapidly being broken up in Hawkins' shipyard at City Island, says the New York Times, preparatory to being sold for old iron. The vessel, which cost Sir Thomas Lipton \$250,000, was sold to a Newark firm for \$17,000, and will no doubt bring twice that price in junk shops. The best of everything was used in the craft, and the material will bring the highest market price.

In reply to a question in the House of Com-mons on March 28th, Earl Percy said last month His Majesty's Consul urged the retention of a British man-of-war at Newchwang during the war, but it was decided, after consultation with the Lords Commissioners of the Admiralty, and on the advice of the Commander-in-Chief on the China Station, that it would not be desirable to retain His Majesty's ship Espiegle at the port. The newly-appointed Commander in Chief had since been also consulted, and had advised that the former decision be adhered to.

The funeral of Mr. George Bayfield, who died in St. Luke's Hospital, Tokyo, on April 28th, took place on the 29th from Christ Church, his remains being followed to the grave by a considerable number of mourners. Mr. Bayfield, who was an Englishman, born in the Far East, was well known in Yokohama, having been long connected with the firm of Messis. Smith, Baker & Co., and both here and in Kobe, whither The Journal des Debats of Paris, said on April and respected. Deceased had been ill for a few weeks and had come to Tokyo for treatment.

Mr. J. Shearme, third officer of the Peninsular and Oriental steamer Candia, was last month presented with the Stanhope gold medal by Mr. H. H. Joseph, General Manager of the Company, on behalf of the Royal Humane Society. The presentation took place on board the steamship In the course of a debate in the French Arabia, at Tilbury Dock, in the presence of the

whole of the ship's officers and crew and of various officials. The Stanhope gold medal is awarded by the Society in recognition of what is awarded by the Society in recognition of what is adjudged to be the greatest act of heroism performed during the year. Mr. Shearme, while fourth officer of the Malacca, leaped overboard one night in the China Sea, during a heavy sea and with a strong tide running, and rescued one of the ship's quarter-masters, who had fallen over-

Popular interest in the "canals" of Mars will be revived by the remarkable observations of Mr. Lowell recorded in a recent issue of Nature. Although the canals were observed and mapped by the Italian astronomer Schiaparelli nearly thirty years ago, it was not until twenty years later, when M. Flammarion hinted that they might be designed to attract the attention of dwellers upon Earth, that the fact of their existence became known to the general public. About a year ago Mr. Maunder boldly declared them to be optical illusions. His demonstrations appeared to many to be conclusive, but now Mr. Lowell has come forward with a record of observations extending over several years, and justifying, in his opinion, the belief, not only that the canals are actual and artificial, but that they are used for irrigation and are artificially regulated.

The Manila Cablenews of the 16th March contains details of operations against the Moros in Mindanao in the early part of this month in Mindanao in the early part of this month. While a house was being searched, a native rushed upon Captain David P. Wheeler, 22nd U.S. Infantry, and stabbed him and Corporal Percy Heyvelt so badly that both died. Captain Wheeler was a native of Ohio, and was born July 18, 1876. He became a cadet at the military academy June 15, 1894, and a second lieutenant in the 23rd infantry April 26, 1898. He was one of the fortunate class which was graduated early and given commissions during the Spanish war. He became a first lieutenant of the 22nd war. He became a mist neutenant of the 22nd Infantry March 2, 1899, and a captain in the 26th Infantry January 27, 1903. He was transferred back to the 22nd Infantry April 7, 1903. The list of killed and wounded between 2nd and 9th April is as follows:—Killed 2; wounded, 11 (including 2nd Lieut. H. L. Harris, jun.). The Morce lets heavily. Moros lost heavily.

An attempted fraud was detected on May 3rd (Tuesday) at 2.20 p.m. at the Chartered Bank, No. 58, Yokohama, It appears that Noike Yoshizo (23) an employee of Messrs. L. J. Healing & Co., having obtained a blank cheque of that bank, filled it up under date April 30th, 1904, making it payable to "Midzuno & Co. or bearer" and appended the forged signature of "J. G. Doering" filling in the amount of "Six hundred and eighty only" in writing and "680.00" in figures. He endorsed it with the Japanese name "Midzuno Kenkichi, Tokyo," and attached the stamp "Midzuno." He attempted to cash the cheque at the Chartered He attempted to cash the cheque at the Chartered Bank where his design was discovered by the staff of the bank, who reported the matter to the Kaga-cho Police, Noike waiting at the counter. A detective from the station arrested him as he was running away from the bank when the officer appeared. He underwent preliminary examination in the afternoon at the police station.

HEAVY RAINS.

Owing to heavy rains, a landslip occurred on May 2nd on the side of the Ohira hill, Nishi-Chikuma, Nagano prefecture, with the result that twenty-three coolies were killed and seventeen injured. They had been engaged in making a new road below the hill.

A telegram from Shidzuoka states that heavy rains have been experienced since the 1st, the Oi, Tenryu and Fuji river overflowing their banks. Bridges over the last-named river were destroyed on the Tokaido

A section of the railway between Saigo and Akeslii, Nagano prefecture, was damaged by rains on the 2nd. Traffic was suspended.

In consequence of repairs to the railway between Yonezawa and Fukushima, the transporta-tion of goods will be suspended for three weeks commencing May 10th.

THE HIROSE MONUMENT.

TO THE EDITOR OF THE " JAPAN MAIL."

Str.-I enclose herewith a small contribution to

SIR,—I enclose herewith a small contribution to the fund for erecting a monument to that most admirable hero, Commander Hirose, I.J.N.

The fact that the standard of patriotism, and chivalry is so high in the Navy and Army of Japan, as to render it unnecessary to have any new examples of heroism for models to encourage the others, makes this death of Hirose particularly sad and to be repretted. and to be regreited. Very sincerely,

C. C. MARSH, U.S. Naval Attaché

Tokyo, May 3rd, 1904.

NEWS FROM VARIOUS SOURCES.

A Washington dispatch of April 5th said:—The United States State Department has received the following cablegram from Mr. McCornick, the American Ambassador at St. Petersburg:—"A rumour concerning a possible demonstration against the Jews concerning a possible demonstration against the Jews at Odessa having reached me, I communicated with the United States Consul there, asking him if it were well founded. He replied to me as follows:—'Reports of anti-Jewish demonstrations are not unusual at this season of the year. Owing to the occurrences of last Easter, the Hebrew population is exceedingly nervous, but with so energetic a man as Governor Neidhardt in charge of the city, and with Baron Kaulbars as commander-in-chief of the troops in this southern country, I should regard a serious outbreak of any kind impossible. During the present week the newspapers have circulated notices to the public warning those who disturb the peace that they will be dealt with severely.'

It was reported from St. Petersburg on April 3rd that Ambassador McCormick was negotiating with the Foreign Office for a treaty with Russia which will give to United States corporations the right to sue in Russian courts and to Russian corporations the right to sue in courts of the United States. Under the Russian law United States corporations can be sued but cannot sue in the courts of the empire. This has caused United States firms great annoyance as well as losses in the past. In addition the Ambassador hopes to secure in the treaty a broad clause which will give to the United States corporations all privileges of whatever character now enjoyed by the corporations of any foreign country. Although there are difficulties in the way of accomplishing the desired result, the Ambassador's advances have been met in the friendliest manner and the indications are that his negotiations will terminate successfully. The only countries now enjoying the privileges which Ambassador McCormick is striving to obtain for the United States are Germany, Greece, Bulgaria It was reported from St. Petersburg on April and for the United States are Germany, Greece, Bulgaria

A Copenhagen correspondent wired on April 9; King Edward and Queen Alexandra to-day visited the Finsen Ray Institute, where there are many British and American patients, who presented Her Majesty with a magnificent bouquet. Their Majesties conversed with the patients.

Two thousand strikers at Amiens, France, on April 9th attacked a force of infantry sent to guard a factory there. Cavalry reinforcements arrived and factory there. Cavalry reinforcements arrived and charged the mob, using their sabres upon those who refused to disperse. Many of the rioters were fatally wounded, and a number of soldiers were seriously wounded. The town at night was patrolled by a large force of militia and a detachment of artillery with machine-guns had been summoned. Business was at a stand-still.

was at a stand-still.

A London telegram of April 12 said: In giving the results of the prize firing in His Majesty's fleet during 1903, the Lords of the Admiralty note with satisfaction the improvement in shooting with nearly all classes of guns. Among the battleships the Majestic holds pride of place with a total of 80.440 points, 98.169 being credited to her four twelve-inch guns and 74.543 to her twelve six-inch. Petty Officer W. Primmer is the best shot in the ship with the six-inch gun, having established the fine record of 91.485 points. The Venerable comes a long way down the list, but Chief Petty Officer Lutman made for her the splendid figure of 90.24 points with the twelve-inch gun. On the Jupiter, Petty Officer Carter made 85.365 with the twelve-inch. Among the cruisers the Good Hope is at the top with 97.264. Her best shot, Lance-sergeant W. McFadden, R. M. A., made-102.488 points with the six-inch gun.

In the presence of an immense crowd of spectators, the steamer Augustus B. Wolvin, the largest ever built on fresh water, and said to be the largest boat designed specially for carrying freight in the world, was successfully launched at Loraine, (O.,) on April 9th. She will cost about \$500,000.

Emperor William on the morning of April 12th visited the British fleet and inspected the torpedo net, anchor and boat drills. He lunched on board the battleship Butwark, flagship of Admiral Sir Compton Domville, commanding the Meditertanean fleet, and made a speech of congratulation to the officers and the men on their efficiency. During the afternoon the Emperor received the Roman Catholic Archbishop of Malta, the Most Rev. P. Pace, on board the imperial yacht Hohensalleru, and later drove to Citta Vecchia and visited points of interest. In the evening His Majesty officially dined at the palace, and afterwards held a reception on board the Bulwark of two hundred invited guests, and visited the illuminations of the fleet in the harbour.

A correspondent at Urumi Yah, North Persia, telegraphed on April 9th: The murder of Rev. Benjamin W. Larabee was an act of vengeance. It appears that his murderer, Seld, recently slew a Syrian, who was a British subject, whereupon the representatives of the Anglo-Saxon Mission insisted that the assassin be punished. When the culprit learned of this he announced that he would kill the missionaries, so the latter, we have a more than the control by the control of the cont latter no longer insisted upon his arrest. Seid, nevertheless, took his revenge, Mr. Larabee being his first victim. The missionaries fear further outrages.

A special cable to New York on April 8th from Berlin said:—"The Brunswick Landes Leitung prints, with circumstantial detail, the unofficial an-nouncement of the engagement of Crown Prince Frederick William and Princess Alexandra of Bruns-Frederick William and Princess Alexandra of Brunswick and Lunenburg. It is stated that the Emperor himself negotiated the alliance when he visited Copenhagen a year ago. The prospective Crown Princess is the second daughter of the Duke of Cumberland. She is 23 years old. Crown Prince Frederick William has inherited his father's independence of mind, and the Emperor is known to feel that the domestic peace of his family will be better assured when his son and heir has taken a wife."

The King's visit to Copenhagen, according to the correspondent of the *Daily Mail* at that city, lelegraphing on April 12th, has resulted in the beginning of pung on April 12th, has resulted in the beginning of negotiations for a new treaty between Great Britain, Denmark and Russia, replacing the convention with Denmark concluded by the late Emperor Alexander III.

A Rome correspondent wiring on April 9th said:—According to semi-official information received here, Foreign Minister Tittoni and Count Goluchowski, the Austro-Hungarian Foreign Minister, at their meeting at Abbazia to-day, succeeded in completing all the points, even to the smallest detail, of a thorough Austro-Italian accord regarding the Balkans, and also in agreeing upon a method of solution of several questions withch may arise between them, thus strengthening the Triple Alliance and adding a new coefficient to European peace.

Ex-Queen Isabella of Spain, grandmother of King Alfonso, died at Paris at 9.45 o'clock in the morning of April 9th of influenza with complications. The Infantas Isabella, Eulalie and Marie, daughters of the late ex-Queen, were at the bedside when she died. Queen Isabella it was reported from Paris on April 6, was suffering from a severe

attack of influenza, which caused great anxiety on account of her advanced age. She was born in 1830. The Princess Isabella, her daughter, started from Madrid the same day for Paris, on account of the condition of her mother, and it was announced that in case the former Queen grew worse King Alfonso would abandon his visit to Catalonia and start would abandon his visit to Catalonia and start immediately for Faris. A year ago last February Isabella expressed a wish to visit her grandson, King Alfonso, but the Queen Mother, it was reported, informed her that if she came to Madrid she would not be received at court, nor be allowed to live at the palace, giving as her reason that she wished to keep Alfonso as far as possible in ignorance of his was deather's northing. grandmother's past life.

The Moscow Gasette on April 4th published a historical review of Russo-American relations, concluding: "Henceforth the Americans will be styled the ungrateful Yankees.

Washington, April 10.

The Geological Survey has received a report of an extensive deposit of coal in Alaska, accessible to the Pacific ocean, located from twelve to twenty-five miles inland from Controller bay, Alaska. The coal fields lie behind the Controller bay oil fields, at the foot of the Chugach mountains. The coal and oil were found to be in two distinctly separate formations that lie in roughly parallel belts. The coal area, as at present recognized, includes about eighty-five square miles. The coal resembles the harder bituminous coals of the East, more than it does anthractite. Washington, April 10.

Vladivostock, April 13.

News has been received here that the Japanese recently destroyed the orthodox Russian church at Yokohama. It aroused indignation, but there has not been the slightest attempt to disturb the Japanese temple here. (Truly this is news to us in Japan.)

Paris, April 13 The imports of France for the past three months show a decrease of \$5,004,800, while the exports have increased \$5,272,800.

Beyreot, April 13.
The Covernor of Beyrout was attacked and fired npon on April 11th by soldiers who were dissatisfied because their pay was in arrears. He was not injured. His guard returned the fire, wounding eight persons. All is now quiet.

New York, April 22.

Difficulty is being experienced by the Government with the Buriats, the aboriginal inhabitants of Transbaikatia, according to a Times dispatch from its Russian correspondent. The Buriats, who are Buddhists, are accustomed to a nomadic life and object to being organized into settled communities. Many have expressed a desire to emigrate to Mongolia, but the Government has refused permission.

Richmond (Va.), April 12.
Thomas H. Russell, the original "Little Lord Fauntleroy," who is a brother of Miss Annie Russell, the actress, and now a business man in New York, was married this afternoon to Miss Grace Elliott Shields. The ceremony was performed in St. Paul's Episcopal Church. After the wedding trip Mr. and Mrs. Russell will go to their home in Short Hills, N. J.

Berlin, April 13.

A special to the Vossische Zeitung from Kattowatz, Prussia, says that two Russians tried to pass the frontier yesterday morning and the frontier guards fired, killing one and severely wounding the other. An investigation disclosed the fact that the woundep An investigation disclosed the fact that the man was in Prussian territory when struck

Rome, April 12.

The Pope spent a had night, and was so much agitated to-day that Dr. Lapponi, who had been called to the Vatican, prescribed a soothing potion. The Pope's illness is thought to be due to yesterday's long ceremony in St. Peter's, when he had to fast until after 1 p.m. because of his celebrating mass. Some prelates of the inner Vatican circles, however, say that Pius X has been much affected of late by reported anarchistic plots against his life. As he allows no one to open his private correspondence he has read, within a few weeks, several anonymous letters threatening his life. The reported Rome, April 12. pondence be has read, within a few weeks, several anonymous letters threatening his life. The reported plot of South American anarchists, a few days ago, increased his anxiety, although he tried to make little of the threats and laughed about them with the prelates. The Italian Government yesterday took extraordinary precautions to protect the Pope's person, and swarms of detectives in civilian clothes or in priestly garb were stationed throughout the church during the ceremony.

of the country. He declares the army must adopt a system of training suited to the changed conditions, and abandon ebsolete traditions. All ranks require increased knowledge and improved martial qualities. Lord Kitchener condemns the present military arrangements in India, and announces rearrangements which the Government has sanctioned.

THE TIBEL EXPEDITION.

London, April 4. Candler, the correspondent of the Daily Mail who wounded during the fighting between the British the Tibetans at Guru on March 31, and whose left hand has been amputated, thus describes the

left hand has been amputated, thus describes the attack upon him:—

"I was watching the Tibetans being disarmed, when I was attacked by a swordsman. This was before a shot had been fired. The onslaught was too sudden for me to draw my revolver. I caught the Tibetan around the knees and threw him, but I was myself dragged down and in trying to rise was cut down by several swordsmen. These were even. cut down by several swordsmen. These were even-tually shot."

St. Petersburg, April 3.

The newspapers continue to discuss the British expedition in Tibet and the speech of the Viceroy of India, Lord Curaon of Kedleston, on March 30, at Calcutta, but most of them in a singularly dispas-

The Bourse Gazette openly suggests that King Edward is planning an entente between Great Britain and Russia and then says:—

"There is no need for alarm. We have been accustomed since the days of Disraeli and Salisbury to such veiled threats (referring to Lord Curson's speech). Indian Secretary Brodrick's announcement of big guns for India has broken no bones, nor is any one frightened by the forthcoming British naval demonstration in the Mediterranean. The fact is that the British foreign policy is now in higher hands than Lord Curzon's and we all know that a sincere, peaceful and loyal influence is being exerted by King Edward. There is no longer doubt of British neutrality and there is no reason for apprehension regarding the promise of a friendly agreement with Russia concerning Tibet. We are only curious to see how Great Britain will explain armed aggression within a Chinese province."

The Russ says that Great Britain took a leaf out of Japan's book on the way to open hostilities by

of Japan's book on the way to open hostillities by attacking the Tibetans without a declaration of war. The Namoe Viennya says:—
"The American millionaires have changed the destinies of India. Since Lord Curzon became Lord Kitchener's brother-in-law (s/c) their personalities seem to have been merged. Curzon spoke with the words of Kitchener on the glacistheory and Kitchener adopted the policy of Curzon in sending an alleged diplomatic mission into Tibet. The glacis theory is all right so long as it has to do with unarmed foes."

St. Petersburg, April 4.

The Russian newspapers continue to discuss the possible Anglo-Franco-Russian entente favourably, while at the same time sharply criticizing the British while at the same time sharply criticizing the British Tibetan expedition. For instance, the Nove Fremya declares Great Britain's seizure of Tibet is bound to cause trouble for Russia, but it follows this declaration with a significant editorial on the falsity of sentiment in politics, in which the point is made that Russian assistance to the United States at the most critical period in her history availed her nothing, and that the real interests of Russia and Great Britain now call for an understanding. The Novosti favours an alliance, pointing out as a basis that Russia wants ports on the Pacific, an opening on the Persian Gulf and the free passage of the Bosphorus, for which Russia will guarantee Great Britain peace in India.

The Sect alone is bitter, declaring that Great

Britain peace in India.

The Sizet alone is bitter, declaring that Great Britain's diplomatic mission to Tibet is unmasked, having become one of blood letting, showing that Great Britain is profiting by Russia's attention being occupied elsewhere.

A despatch received at the India Office to-night, said that General MacDonald's infantry, while reconnoiting near Kalapanga, encountered 300 Thetans, who opened fire, but there were no casualties. London, April 13.

The House of Commons reassembled on Tuesday, the artisticing of the Openetics of the Control of the Contr

In anticipation of the Opposition moving an adjournment in order to call attention to the bloodshed in Tibet, an urgent whip was sent out by the Govern-

ment supporters.
Premier Ballour, however, headed off the Opposi-tion's action by himself referring to the matter.
He said that since the recess began there had been during the ceremony.

Simla, April 11.

General Lord Kitchener, commanding the forces in India, has issued an army order based on conclusions formed after making a tour of the garnsons!

In a said that since the recess began there had been an action in Tibet, which had made it necessary, in accordance with the statute, to ask the House to sanction the employment of Indian troops beyond the frontier. The Premier thought there should be no delay in the discussion, and therefore he would clusions formed after making a tour of the garnsons!

A dispatch to the Times from Gyangtse, Tibet, dated April 11th, reports that further fig dated April 11th, reports that further fighting in the course of the march of the Younghusband expedition occurred on April 8th at Red Idol gorge, where precipitous mountains border a winding river. The Tibetan guns on the crests were silenced by the British and a passage forced. The Tibetans lost 200 killed. The British had ten wounded and none

The House of Commons to-day, by 270 to 61 votes, adopted a resolution sanctioning the employment of Indian troops for the protection of the political mission to Thibet.

political mission to Thibet.

War Secretary Brodrick, in introducing the resolution, read a telegram from Colonel Younghusband, the political agent at the head of the missiou, to the effect that Colonel McDonald, in command of the escort, reached his goal, Gyanguse, Tibet, on April 11th, without the loss of a man. The telegram added that the Tibetan force was highly demoralized and was fleeing from the Gyangtse valley; that the Chin-ese delegate was coming in, and that the Tibetan

delegates were on their way to Gyanglee.

Brodrick proceeded to defend the British action, saying that the Tibetans were attempting to open up relations with Russia. The British Government could not acquiesce in any change in the status quo in Tibet, nor countenance an attempt on the part any foreign government to establish a predominant interest there

The British Government, declared Brodrick, had

The British Government, declared Brodrick, had no desire to occupy the country or to establish a permanent mission in Tibet, but the Government was absolutely resolved that if any power is to be predominant in Thibet it must be Great Britain.

The Liberal leader, Sir Henry Campbell-Bannerman, warmly criticised and condemned the mission and the "Slaughter of the Tibetans," declaring that Brodrick's explanation of the reasons of the expedition was wholly insufficient. The debate ended with a short speech by Premier Balfour, declaring the mission had no ulterior objects. The last thing the Government desired, he said, was to add to its Indian frontier and responsibilities.

SLEEPING HEROES.

From Russia has come the news that the peasantry are confidently looking for the appearance of St. George, who, bestriding a fiery horse, will gallop across Siberia, and himself rout the forces of Japan. But there is more interest in the simultaneous report that in rural Russia the belief is widely and firmly held that the great Skobeleff, the hero of Plevna, is not dead, but has lain waiting in readiness to come forth and lead the Russian Army to victory in the Far East. Nearly every race has so immortalised some hero. In popular belief he is not dead! he merely sleeps, and in the hour of supreme danger he will arise in his might to save his country. Even so recent an historic figure as Mr. Parnell has become a sleeping hero of Irish faith. The belief originated in the widespread incredulity concerning his death at Brighton. Those who saw his dead body were so few that his actual decease was questioned. Many of Mr. Parnell's political disciples and his relatives became strongly possessed of the idea that the report was a strategic move.

and his relatives became strongly possessed of the idea that the report was a strategic move.

Some, indeed, have so strengthened themselves in his belief that they declare they have since seen Mr. Pamell alive and in the flesh. Little wonder, therefore, that the fanciful Irish peasant firmly asserts that the death was a ruse, and that when the fitting moment comes Mr. Parnell will emerge from the shadow of his empty grave to give Ireland her independence. During the Boer war thousands of imaginative Celts believed that De Wet was really their "uncrowned king," avenging himself against England. From this belief it is an easy step to the superstition cherished in many an Irish much-lut that when Parnell has atoned for his worldly sin he will return to lead a United Ireland.

Gordon's heroic character similarly impressed

when Parnell has atoned for his worldly sin he will return to lead a United Ireland.

Gordon's heroic character similarly impressed itself on the minds of the Soudanese. They believed him to be merely sleeping, and they saw his awakened spirit hovering over the avenging army which Lord Kitchener led to Khartoum. In India the stirring up of native feeling five of six years ago, when the mysterious chupaties which heralded the Mutiny were again in evidence, was attributed to the Hindu belief that the time for the fulfilment of the prophecy that the tenth avatar of Krishna will restore India to independence is at hand. French peasants may still be found to assert that Napoleon is only sleeping, and that some day he will arise again to rule. We have also the British legend that Arthur did not die, but sleeps in Avalon, and that in the hour of need he will awake, deliver the land, and restore the golden age, How
Drake he's in his hammock till the great Armadas come,

come.

Slung atween the round shot, listening for the drum.

has been sung by Mr. Newbolt; and in a Devon church there is still preserved the great Admiral's drum, to call him back in the day of England's

druin, to call him back in the day of Englands stress.

Charlemagne sleeps in Unterberg, near Salzburg. When the time of Anti-Christ is fulfilled he will arise to avenge the martyred saints and prepare Christendom for the Second Advent. Similarly, all true Mahomedans believe that when Anti-Christ appears Mahomed Mahodi will awake and overthrow him. In Swiss folk-lore and popular belief three members of the Tell family who now sleep the sleep of the enchanted at Rutili, near the Vierwall-Statter-See, are the heroes who will deliver Switzerland from the incursion of any tyrant. At Kyffhausberg, Thuringia, sleeps Frederick I., nicknamed Barbarossa ("Redbeard"), of Germany. With him lie six of his gallant knights, and when the time comes Barbarossa will stride forth to raise Germany above all other kingdoms. As the centuries pass he stirs from his slumber to say, "Isit time?" and being answered "Not yet," he lays himself to sleep again. In Germany, also, it is the popular belief that Charles V. will rise from his tomb to reign over Germany, Spain, Portugal, Denmark, Belgium, and Holland. Belgium, and Holland

The Servians look to the awakening of Knez Lazar, who was slain by the Turks in 1389 Then he will rout all the enemies of his country and glorify he will rout all the enemies of his country and glorify Servia. The Moors have always regarded their expulsion from Spain as only temporary, for some day Bobadil el Chico, the last of the Moorish Kings of Granada, will arise from his slumber near the Alhambra, and re-establish his dominion. In proof of this belief many of the ancient families in Tangier and other parts of Morocco still treasure the keys of the houses in Spain occupied by their ancestors before the expulsion of the Moors. Now Spaniards hold those houses, but the descendants of the Moorish owners still guard the keys in the hope and belief of some day resuming their property. Norway's unwilling partnership with Sweden is well-known, and legend declares that Olaf Trygyesson is only asleep. At the fitting time he will awake, overthrow the Swedes, and restoring Norway's independence, will raise the country to a first-class independence, will raise the country to a first-class Power. In the vault of the Royal castle of Kronberg aleeps Holgar Danske, waiting and listening for the call of Denmark in need.

call of Denmark in need.

The sleeping hero of Brazil is Sebastian I., who fell at the battle of Alcazarquchin in 1578. When he awakes he will make Brazil the foremost kingdom in the world. The French slain at the Sicilian Vespers did not really die; they sleep, biding their time for vengeance. Brian Boroimhe, the King of Ireland, who, after defeating the Danes in twenty nitched battles, was overcome at Clonging the page of the property of the defeating the Danes in twenty nitched battles, was overcome at Clonging the page of th hiding their time for vengeance. Brian Boroinne, the King of Ireland, who, after defeating the Danes in twenty pitched battles, was overcome at Clontarf in 1014, was not killed, but only stunned. Through the centuries he has slept at the castle of Kincora, but some day he will break the bonds of slumber and clothe himself in might and majesty. Desmond of Kilmallock likewise has slept under the waters of Lough Cur since the days of Queen Elizabeth. Every seventh year he rises to the surface, and clad in full armour rides round the lake. Some day he will not return to his watery bed, but establish himself again in the Desmond estates. The present Russian belief in Skobeleff's awakening has its parallel in an older legend. For endeavouring to establish a tolerant form of Mahomedanism in Asiatic Russia, Elijah, Mansur, warrior, prophet, and priest, was imprisoned beneath the Ural Mountains. There he sleeps in the bowels of the earth, ultimately to come forth and scourge Russia for its rejection of Islam.—Globe.

CARNEGIE FUND FOR HEROES.

Pittsburg (Pa.) April 15.

Andrew Carnegie has created a fund of \$5,000,000 for the benefit of "the dependents of those losing their lives in heroic effort to save their fellowmen or for the heroes themselves if injured only." Provision is also made for medals to be given in commemora-

is also made for medals to be given in commemora-tion of heroic acts.

The endowment is to be known as "The Hero Fund," and consists of \$5,000,000 of first collateral 5 per cent bonds of the United States Steel Corpora-tion. The trust is placed in the hands of a com-

in his own words, is "to place those following peace ful vocations who have been injured in heroic effort to save human life in somewhat better positions pecuniarily than before until again able to work. In case of death the widow and children or other dependents to be provided for—the widow until she is remarried and the children until they reach a self-supporting age. For children exceptional grants may be made for education. Grants of sums of money may also be made to heroes or heroines, as the committee thinks advisable, each case to be judged on its merits."

It is provided that no grant is to be continued.

unless it be properly used, and the recipients re-main respectable, well-behaved members of the

main respectable, welf-behaved memoers of the community.

A medal shall be given to the hero's widow or next of kin, which shall recite the heroic deed it commemorates. The medal shall be given for the heroic act even if the doer be uninjured, and also a sum of money should the commission deem such offt desirable. gift desirable.

Mr. Carnegie warns the commission against the danger of interference or conflict with the pension funds for municipal employes that exist in many cities and urges it to act in harmony with such funds.
This, as is the case with all the details of the fund's administration, is left to the commission.
The claims upon the fund for some years cannot

exhaust it. After years, however, pensioners will become numerous. Should be commission find, after allowing liberally for this, that a surplus will remain, it has the power to make grants in case of accidents (preferably where m hero has appeared) to

those injured.

Foreseeing the probability that cities and employers on this continent will ultimately be placed under similar conditions to those of British, German and other European states, and required to provide against accidents to the employes, the commission is empowered to, by a two-thirds vote, devote any

is empowered to, by a two-third's vote, devote any surplus that may accrue to relief of those in want, caused by no fault of their own.

The field embraced by the fund is the United States and Canada and the water thereof.

"The sea is the scene of many heroic acts," says Mr. Carnegie's letter, "and no action is more heroic than that of doctors and nurses volunteering their services in the case of epidemics. Railroad employes are remarkable for heroism. All these and similar cases are embraced. Whenever heroism is displayed by man or woman in saying human life, the fund applies."

The usual provision for reports and accounts is flade, and it is directed that a roll of the heroes and the herones shall be kept displayed in the offices at Pittsburg.

THE ANGLO-FRENCH AGREEMENT.

Paris, April 7.

It was learned to-day that the Anglo-French colonial treaty about to be signed will contain a clause providing for equality of tariff duties on goods from Morocco and Egypt for a period of thirty years from the date of the signing of the trenty. The clause specifies that this equality is only between the parties to the treaty, but the officials say that the favoured nation principle will prevail and will give all countries incides may like of teattern. similar equality of treatment, this having the effect of establishing the open door in Morocco and Egypt. The officials say this insures a notable opening for American trade for the next thirty years.

Paris, April 9. Although the Anglo-French Colonial Treaty, just signed, makes no specific reference to any protectorates it is now recognised that, between the lines, the Treaty means the establishment of a French protectorate over Morocco, similar to the present protectorate over Tunis, and that it makes permanent the British protectorate over Egypt. Thus, the effect of the Treaty is to transform the entire political geography of Northern Africa, with Great Britain dominating the eastern shores of the Mediterranean and France the western shores.

London, April O.

London, April o. The Government has long been a stranger to such a chorus of universal approval and congratulation as that exhibited editorially this morning in all the London newspapers, because of the happy conclusion of the Anglo-French negotiations for a Colonial

Treaty.

This approval is none the less whole-hearted because it is recognised that France has obtained substantial concessions, while surrendering little of real value. The King = again hailed as a successful diplomatist, and the greater portion of the thanks is accorded to him for having initiated the rapprochement and to President Loubet for having received the overtures in a corresponding spirit. Lord Lansdowne and M. Delcasse are equally complimented for their services to the cause of peace between the two

diplomatic skill which Mr. Balfour and Lord Lans-downe have displayed, adding: "Never in our re-collection has Great Britain given away so much for nothing

Morning Post thinks that much better terms The Morning Post thinks that much better terms might have been obtained in exchange for what is a virtual recognition of the French right to a protectorate over Morocco, and complains that the Newfoundland settlement also unduly favours France.

Much satisfaction is expressed over the settlement which liberates accumulated funds of nearly six millions in the case of the Egyptian Debt, which can now be expended upon raifroads and other public works needed for the development of Egypt.

Although the Anglo-French entente does not ap-

ratinough the Anglo-French entente does not appear to provoke enthusiasm, the general tone of the press, even the newspapers hostile to the Government, is distinctly favorable, the editorials for the most part expressing belief that possible causes of conflict between France and Great Britain have now been removed without the making of undue sacrifices on the part of France. Although the Anglo-French entente does not

EUROYBAN RULERS SLIGHT KING . LEOPOLD.

Brussels, April 11. There is growing comment here on the apparent disposition of European sovereigns to slight King Leopold of Belgium on account of his peculiar codes

disposition of European sovereigns to slight King Leopold of Belgium on acount of his peculiar codes of morals and ethics.

It was recently announced that while Prince and Princess Albert would likely visit the St. Louis Exposition, King Leopold was only prevented from going to the States by the necessity of his remaining at home to welcome Emperor Francis Joseph to Belgium in June, on the conclusion of that monarch's visit to England. In response to this a semi-official announcement comes from Vienna to the effect that the Austrian Emperor has no intention whatever of paying a visit to Belgium.

King Leopold endeavoured to have the King and Queen of Italy stop over in Belgium on their return to Rome from England last fall, but his efforts were fruitless. It was announced that Emperor William, when he estarted for the Medicerranean last month, would stop over to see King Leopold, but as a matter of fact the German Emperor carefully avoided stopping at any Belgian port, though he took pains to make a stop at Dover. Since his accession King Edward has never visited the court of Brussels, though he is a former friend of King Leopold and a very near relative. Even President Loubet has turned a deaf ear to the suggestion that he should return in state at Brussels the numerous visits which King Leopold has made to Paris.

Strange as it may appear, the general dislike with which he is regarded abroad has raised the King in the estimation of his own people. The Belgians are content to criticise him themselves, but do not like foreigners to do so, regarding it as incumbent upon their national dignity to defend their chief executive from reproach. All classes, except, of course, the most rabid Socialists, are ready to admit that, while all the King's private and public acts are not to be approved, yet as monarch he has been of advantage to his country, contributing in no small mensure to the development of its resources, and acquiring for it, by his statecraft and diplomacy, a far more important role in the concert of th

WHY WAS IT NOT USED?

London, April 12.

A news agency dispatch from St. Petersburg says the military administration recently dispatched to the troops on the Yalu river appliances and material which will enable them to obstruct by fire any Japanese attempt to cross the river. The process is military secret that has been acquired from an inventor, who is a Colonel of Engineers.

The first, which cost 40,000 roubles, was carried out

The first, which cost 40,000 roubles, was carried out years ago during manocuvres in the presence of the imperial family. Sappers threw across a river a pontoon bridge. Then a small oily patch appeared in the middle of the stream close to the bridge. This gradually grew larger, and at the end of three minutes it was 200 yards in length. The flames then burst out, and soon attained an immense height, constituting a formidable curtain which completely hid the bridge. The flames rapidly reached the height of a seven-story building, throwing out terrific heat.

After working for eight minutes the apparatus was stopped. The flames died out in two minutes, and it was then seen that the bridge had been completely destroyed. The apparatus, which was invisible to the spectators, was ten kilometers from the river, to which it transmitted by a liquid process through tubes build in the earth.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

OPERATIONS ON THE YALU.

London, April 29.

Unofficial telegrams published in St. Petersburg give various reports with respect to attempts made by the Japanese to cross the Yalu. According to one account the Russian artillery destroyed a bridge thrown across the river on the north of Wiju but a force of Japanese crossed successfully on the south of Wiju. A portion with a battery of artillery advanced towards Feng-whang but were severely repulsed.

THE "KINSHU MARU."

London, April 29.

The Russian torpedo-boats after leaving Yuensan on the 25th inst. encountered at sea on the night of the 26th inst. the Japanese transport Kinshu Maru, 4,000 tons. Seventeen officers, 20 soldiers, 85 carriers, and 65 of the crew surrendered and were taken on board a Russian cruiser. The remainder of the crew, 200 in number, refused to surrender and were sent to the bottom with the vessel.

RUSSIA ON MEDIATION OR INTERVENTION.

The Russian Government has sent a cir-

cular to its representatives abroad declaring categorically that Russia will not accept mediation to terminate the war, and will not admit the intervention of any Power whatsoever in the Russo-Japanese negotiations after the war.

ROYAL VISIT TO IRELAND.

London, April 30.

Their Majesties the King and Queen continue to be everywhere loyally welcomed in Ireland. They were present at Punchestown and Leopardstown races, where there was no hitch or discordant note,

THE JAPANESE VICTORY ON THE YALU

London, May 1.

Telegraphic news from Washington is to the effect that reports have reached the State Department of a great battle on the Yalu, resulting in a complete victory for the Japanese Army.

ST. LOUIS EXHIBITION FORMALLY OPENED.

The St. Louis Exhibition has been formally opened by President Roosevelt at Washington, who touched a button, setting all the machinery in motion and unfurling the flag. An immense throng sang "The Star-Spangled Banner."

U.S. REVENUE AND EXPENDITURE

Washington reports that the U.S. revenue for the coming fiscal year is estimated at £140,800,000 sterling and the expenditure at £156,300,000.

FRANCE AND ITALY.

President Loubet has reached Marseilles on his return from his visit to Italy, which was highly successful both politically and socially

SWEDEN AND NORWAY DECLARE NEUTRALITY.

London, May 2.

Sweden and Norway have issued a proclamation of neutrality forbidding warships of belligerents to enter the naval ports or certain waters protected by mines.

ST. LOUIS WORLD'S FAIR.

National Pavilions. It is the greatest exhibition in the world, exceeding the Chicago exhibition. An impressive ceremonial was conducted at the opening in the presence of the civil, military, and naval services and which is near Sukchin). foreign dignitaries.

THE BATTLE OF THE "YALU."

London, May 3.

Russian official despatches dated the 1st May admit the overwhelming superiority of the Japanese Artillery. The heavy losses it inflicted compelled General Sassulitch to evacuate the position at Turetchen (Kiulienchen) and to retire to the second position at Potientiousky (Fenghwangtien).

WHAT EUROPE THINKS OF THE YALU FIGHT.

London, May 4.

The Japanese victory at the Yalu is extolled everywhere in England and on the continent as a great feat of arms, and as likely to create a great moral effect.

The German and French papers, however, contend that Russia's force at the Yalu was small and that she never intended to do more than to harrass and impede the Japanese army.

(RECEIVED AT THE LEGATION OF FRANCE.) PRESIDENT LOUBET IN ITALY.

Saigon, April 29.

The King of Italy and President Loubet have arrived at Naples, much acclaimed.

PRESIDENT LOUBET LEAVES ITALY.

Saigon, May 2.

It is telegraphed from Naples that the King of Italy and President Loubet reviewed the Italian and French squadrons, after which the President set out for France in the cruiser Marseillaise. The King and President Loubet embraced each other

(RECEIVED AT THE NAVAL DEPARTMENT IN TOKYO.) RUSSIANS SINK THE "KINSHU

MARU. SEVENTY-NINE PERISH.

Commander Fukui, of the gunboat Chihaya, telegraphs from Yuensan that a ship has just arrived carrying men who escaped from the Kinshu Maru. There were no men of the Navy amongst the number. A Staff inspecting officer, the captain of the ship, and the chief paymaster went to the Russian ships. The other non-combatants seem to have been taken prisoner. The steamer was torpedoed and sank. Those that escaped were: 45 soldiers and 9 non-combatants.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.) On the 26th at 6 p.m. the steamer Kinshu Maru left Iwon (82 miles south of Song-chin). After steaming at 8 knots an hour for 5 hours she fell in with the enemy about half past 11 and was signalled by a gun to About 12 o'clock she came to. stop. captain, and the Staff inspecting officer had some conversation in English with the Russians. Meanwhile the soldiers re-mained quiet in their cabins. The captain, the inspector, and the chief paymaster went to the Russian ships and did not return. Shortly afterwards, I officer and 2 seamen came from the Russians and made an inspection of the steamer. As soon as they saw armed soldiers on board they at once retired, and torpedoes were afterwards fired at the ship,

are represented, of whom 19 have erected on board went into three small boats and rowed westward. (Here follows a statement of the places that they reached and the hours, but it will be enough to say that on the 27th at 1 p.m. they arrived at Sintho, which is near Sukchin). Those that returned subsequently in a steamer sent to succour them were: 45 soldiers, 3 merchants, and 6 coolies. They reached Yuensan on the 28th. According to their account the majority of the crew went to the Russian

(RECEIVED AT THE WAR DEPARTMENT)

On April 25th the 9th company of the 37th regiment of infantry embarked on the Kinshu Maru, and after performing a reconnaissance at Iwon the ship was proceeding south to Yuensan when she was met by a Russian squadron and sunk. After a signal to stop was made by the Russians the cap-tain of the ship, the Staff inspecting offi-cer and the chief paymaster, with one other, repaired to the Russian ships and did not return. The enemy then signalled for all those remaining on the Kinshu Maru to go on board their ships, and gave an hour's law for this operation. At 12 p.m. nearly all the crew of the Kinshu Marn had left her, but the soldiers, in compliance with orders, remained below. At 1.30 a.m the enemy fired a torpedo and also some other kind of explosive, which the ship. The soldiers then assembled on deck and, standing in several ranks, fired at the enemy. The Russians returned the fire with quick-firing guns and killed many of the soldlers. The sergeant-major at this point committed suicide by disembowelling himself, and several non-commissioned officers and men followed his example. At 2 a.m. the enemy fired another torpedo, with the result that the steamer divided into two at her engine-room and sank. Of those that were on deck some managed to get into the boats and to cut themselves adrift. They were uearly swamped, but by throwing all heavy articles overboard they man-aged to keep afloat. They then rowed westward, and on the 26th at 5 p.m. they reached an island on the coast. The first boat to reach the island contained 37 soldiers. Another boat with 8 soldiers arrived subsequently. It is also reported that some naval men effected their escape in another boat, but nothing has been heard of them. The greater part of the crew are believed to have been taken on board the cruiser Rossia. Not one soldier was made prisoner by the Russians. Those that perished were: 2 captains, 2 lieutenants, 1 sub-lieutenant, 1 sergeantmajor, and 73 non-commissioned officers and men. Amongst those rescued there were 10 slightly and 1 somewhat severely wounded. The others died a splendid death.

(RECEIVED IN TOKYO.)

St. Petersburg.-The officer in command of the Vladivostock squadron reports that on the night of the 26th 2 Russian torpedo boats met the Japanese steamer Kinsku Maru and took off her 28 officers and 20 soldiers, with 85 coolies and 65 members of her crew. Those that refused to surrender were sunk with the vessel.

On the 25th at 8 p.m. the Nakamura Maru was sunk.

RUSSIA'S ARMY IN MANCHURIA.

Paris.-It is stated in Paris that the total Russian forces in Manchuria are! 170,000 ST. LOUIS WORLD'S FAIR.

The St. Louis Exhibition is on an immense scale. The grounds cover an area At 2 a.m. the ship sank. The soldiers, of the cavalry and 32 of the guns are of 1,240 acres. Fifty Foreign Governments the coolies and some merchants who were engaged guarding the railway. By June the total force will be raised to: 300,000 infantry, 47,000 cavalry and 506 guns. GENERAL LINEVITCH PROMOTED.

General Linevitch has been appointed Commander-in-Chief of the defences in the Amur region, by which is meant the whole of the Za-Siberian region. The appointment carries with it the office of the Governor-General of the District.

CHINA RETURNS HER THANKS.

The Chinese Government, through the Japanese Representative in Peking, has requested the Foreign Office in Tokyo to convey to H. E. Mr. Hayashi, the Japanese Representative in Scoul, the Chinese Government's high appreciation of the ability and tact shown by him, to which the Chinese Government attributes the fact that its subjects in Korea are able to carry on their occupations in peace and tranquillity.

RUSSIANS AND NEWCHWANG.

On the 1st inst. the Russian authorities at Newchwang announced that the export of beans, bean-cake, and bean-oil to any place on the littoral of the Gulf of Pechili will henceforth be forbidden.

PRESS COMMENTS ON THE YALU VICTORY.

The London Times of the 3rd inst. says that the Japanese Army undoubtedly gained a great success in the fight on the Yalu. Japan's victories on sea had merely had the effect of preparing people to find her making a good fight on shore, but those victories did not suffice to weaken the world's belief in Russia's military prowess. Now that the two armies have actually met, a clear proof has been afforded that the Japanese soldier ranks at least above the middle class of European fighting men.

Referring to the news received from Shanghai that Antung having now passed into the possession of Japan, the U.S. Consul will at once proceed thither, The Times says that this fact affords a clear indication of the relative attitude of the belligerent Powers towards questions of trade. Whereever Japanese arms are successful there Commerce will find an open door.

The Standard says that the moral effects of the victory at the Yalu will be much greater than the material results, to which too much importance should not be attached.

The Daily Telegraph says that Japan had already gained a definitely high position as a naval power; she has now won for herself a similar position in the military world.

Another leading journal says that even Japan's best friends had not anticipated that she would show herself so powerful on

The French newspapers agree in regarding Japan's success as signal and in saying or recover the bodies of the drowned. that its moral effect will be considerable, but they deny that any proof has yet been furnished as to the final issue of the war. Some say that Russia's plan was not to make any obstinate resistance at the Yalu, but merely to harrass Japan and inflict as much loss upon her as possible, while drawing her on to the interior. Other papers note that the loss of so many guns by the Russian army is a most important fact.

The Socialist newspapers loudly praise Japan and ridicule the impotence of the Russian Army. They say that the incompetence, want of experience, and lack of solidarity on the part of the Russians, offer a marked contrast to the courage, profound caution and strategy of the Japanese.

The Echo de Paris says that what is most to be feared as a result of this victory of the in the Bungo Channel on Saturday night.

Japanese in that it will have the effect of She has arrived here and will have to be inducing China to abandon her attitude of docked for extensive repairs,

RUSSIAN SECURITIES.

Russian securities fell on receipt of the news of the battle of the Yalu, from over

GERMAN PRESS OPINION.

The German newspapers do not contain special comment on the Yalu fight. They appear to be maintaining an attitude of reticence, but in inserting the news they observe that this first victory on land for the Japanese will certainly have a great moral effect and that the Russian losses of men and guns will be heavily felt by them. They add that the withdrawal of the Russians from Antung is-a clear proof of defeat and that they will scarcely be able to render any further military opposition on the lower reaches of the Yalu.

(RECEIVED AT THE WAR DEPARTMENT). THE RUSSIAN DEAD.

General Kuroki reports that in clearing the field of the recent battle, 200 more Russian corpses were found, and others are likely to be discovered.

Among the Russians who surrendered is an Assistant-Surgeon, who is now working in the Japanese Field Hospital.

(RECEIVED AT THE FOREIGN OFFICE.) VICEROY ALEXIEFF AT PORT **ARTHUR**

Viceroy Alexieff reports to St. Petersburg that on the 2nd inst. the Japanese made another attack on Port Arthur and were handsomely beaten off. Five torpedó-boats appeared near shore at I a.m. on the 2nd and were driven back by fire from the forts and ships. At 1.40 a.m. a number of steamers were seen approaching. First came one big ship, which was followed in rapid succession by seven other steamers, steering in from E. and S.E. I at once embarked on the Otvasny, and with the Giljak and the Gremastchy went out of harbour and in company with the forts opened fire on the Japanese. The eight steamers were all sent to the bottom by means of gun-fire, fishtorpedoes and mines.

The officer commanding the forts and the Captain of the Giljak say that at 4 o'clock in the morning two Japanese torpedo-boats were sunk. Thereafter we ceased our cannonading and only fired a few shots at Japanese torpedo-boats when they appeared occasionally in the offing. We saved 30 Japanese, among whom were two officers severely wounded. On account of the wind and the waves it has not yet been possible to ascertain the condition of the harbour mouth

(FROM OUR CORRESPONDENT.) THE PRESS CENSORSHIP

Kobe, May Mr. A. W. Curtis, Editor of the Kobe Herald, was to-day fined yen 20, for a breach of the Press Censorship regulations relating to Military and Naval affairs. The prosecution was based upon an editorial article printed on the 27th April in which appeared a statement that the squadron in the Sea of Japan left Chinhaiwan the week before.

Mr. Curtis has appealed.

"MONMOUTHSHIRE" RUNS

The steamer Monmouthshire went ashore

(FROM THE " ЈІЛ ЅНІМРО.")

ALL IN THE PLAN.
London, May 3. London, May 3.

It is declared by the Russian Headquarters that the Battle of the Yalu was an unimportant engagement, in which only a small Russian force took part. The withdrawal from Kiulien-ching was a part of the strategical plan of General Kuropatkin.

(FROM SHANGHAI PAPERS.)

SUBMARINES AT PORT ARTHUR.
London, April 26.
A St. Petersburg telegram states that a telegram from Port Arthur says that experiments have been made with submarine boats which proved a brilliant

This is the first intimation that there are submarine boats at Port Arthur, though it was reported weeks ago that Admiral Makaroff had requested some to be sent by rail.

YOKOHAMA: SATURDAY, MAY 14TH, 1904.

SUMMARY OF NEWS.

THE Tsar has appointed M. de Lessar a Privy Councillor.

MR. H. ABE, a well-known speculator of Osaka, died on May 5th in Tokyo.

THE Mino Commercial Bank, Gifu prefecture, suspended payment for twenty days on May 9th.

THE construction of the branch line between Hakata and Sasakuri having been completed, traffic will be opened on May 15th.

TELEGRAPHIC intelligence from Otaru, Hokkaido, says that a boat capsized in that harbour on May 8th and ten men were drowned,

THE crew of the *Haginoura Maru*, some 20 men, were taken off that vessel before the Russians sank her. They are all safe.

IT is reported from Osaka that the Minister for Finance has requested prominent bankers to come up to Tokyo not later than May 11th.

THE electric railway between Shinagawa and Omori was opened on May 8th for traffic. This is a section of the Tokyo-Yokohama Railway,

was murdered on the night of May 8th. Details are not yet given.

THE 1st class cruiser Black Prince, 9,210 tons, which is used as a training-ship for boys at Queenstown, has been re-named The Emerald, as a compliment to Ireland.

THE Austro-Hungarian minister entertained the foreign diplomatic officials and Baron Komura, Minister for Foreign Affairs, on the evening of May 7th at the legation.

J. Hosoya (58) a barber, at Tobe, Yokohama, attempted to commit suicide on May 6th, injuring himself severely in the throat with a razor. The cause is reported to be poverty.

THE Mayor and the City Councillors of Tokyo met on May 10th at 2 p.m., when they decided to hold a public dinner party after the occupation of Port Arthur, to celebrate the victories

A TELEGRAM from Osaka reports that Japanese marine insurance companies have agreed to reduce the rate of war risk on the line between Japan, Shanghai, and Hongkong from May 6th.

AT the request of the Chinese Minister, the Tokyo University has provided a special department for law and political sciences for Chinese students who can not attend the regular courses.

LIEUTENANT S. TAKEOKA, of the artillery, Konodai, Chiba prefecture, committed suicide on the morning of May 5th by jumping into the Tone river. The cause is reported to be insanity.

Over a hundred fishermen from Hiroshima on May 5th attacked fishermen who were working at Hiuchinada, near Matsuyama. Many of the latter were injured. The cause is not reported.

THE Captain of the Russian steamer captured in February at Yokohama was released on May 10th upon taking the usual oath not to participate in hostilities. He will shortly leave Yokohama for Shanghai.

THE Jiji publishes a telegram from Sapporo stating that a sampan with 55 men was capsized at the entrance of Otaru harbour by a strong wind on the morning of the 8th inst. Twelve lives were lost.

MESSRS. K. OI, Toyama, H. Kano and others belonging to several political parties have organized a union aiming at the restoration of Sag-They have established a halien to Japan. temporary office at Shitaya, Tokyo.

On the evening of May 10th an unknown man inflicted serious injuries with a large knife on K. Tanaka, a detective of the Tokyo Metropolitan Police, who was about to examine him as a suspected person. The culprit is still at large.

Mr. Matsumoto, M.P., for Nara prefecture, charged with having insulted a government official, was sentenced on May 6th in the Nara District Court to one month's imprisonment with hard labour and a fine of five yen.

captured Russian steamer Mukden, petitioning for the release of the ship and its cargo, having been concluded in the Sasebo Prize Court, judgment will be given on May 16th.

BARON SOME, Minister for Finance, was to meet leading bankers of Tokyo, Osaka, Nagoya, Kyoto, etc., on the evening of May 11th at his official residence, to explain negotiations regarding the foreign loan, and the financial situation at present and in the future.

THE President and Committee of the Japan Red Cross Society met on May 4th and decided to ask Dr. McGee and her party to take up the nursing at the Matsuyama Hospital, Ehime prefecture, for which purpose they have applied to the Minister for War for approval.

According to intelligence from Shanghai, says the Jiji's Nagasaki correspondent, the Chinese Government has cancelled the prohibition of the export of bar and pig iron. The Government had classified the material as contraband of war, against which the representative of Japan protested.

COUNTESS OTANI (elder sister of the Crown Princess), wife of the Lord Abbot of the Nishi Hongwan-ji, Kyoto, has arrived at Gifu on the way from Tokyo. On May 10th she delivered a speech at a meeting of Buddhist ladies with reference to the obligations of women at the present time.

According to a passenger who arrived on May 10th from Chinnampho, says the Jiji's Shimono-seki correspondent, business in the Korean port is reviving since the export of grain recently com-menced. The intelligence adds that the first preparation for floating the Varyag, sunk at Chemulpho, is completed.

Miss Ethel. McCaul, who was instructed by Queen Alexandra to report on the working of the Japan Red Cross Society, arrived on May 6th in Tokyo by the 9.14 p.m. train from Kobe. On arrival at Shimbashi, she was welcomed by Count Matsukata, President of the Japan Red Cross Society, and his staff, and many ladies and gentlemen.

A TELEGRAM from Hakodate says that 319 fishermen, an official of the Japanese consulate, 20 women, and an official of the French consulate, arrived there on May 8th from Saghalien by steamer. According to them, the Russian authorities gave facilities to the fugitives when they were leaving the island. The Russians did not capture any of the Japanese fishing vessels.

Mr. M. Tanaka, of Osaka, received a telegram on May 5th from the Horikyu-shoten, Chemulpo, to the effect that the steamer Haginochemispo, to the enect that the scaner ranging-ura Maru (219 tons) belonging to the former was sunk on April 25th at 8 p.m. by the Russians. The place of the casualty was not mentioned. She had been employed on the line between Fusan, Yuensan and Song-chin. The crew consisted of about 20 men.

PRINCE ARSENE KARGEORGEVITCH, who has just been appointed to the command of the Baikal Cossacks for service in the Far East, is the only brother of King Peter of Servia. Both brothers commenced their military career in the French service. Prince Arsene did not take a very is a section of the Tokyo-Yokolama Railway.

A TELEGRAM from Numazu reports that M. Goto

Akiyama, representative of the owner of the an officer in the Russian Guards.

THE BATTLE OF THE YALU.

Saturday, May 7.

There does not appear to be as yet any absolutely definite return of the Japanese casualties at the battle of the Yalu, but an impression evidently prevails that the 300 additional casualties subsequently reported by Kuroki must be added to the 700 estimated by him as the first instance. That would bring the Japanese casualties up to fully a thousand, and we must confess that some such figure was what we ourselves anticipated originally. The casualties at them 180 were deaths. Pyongyang, however, was not by any means as serious an engagement as that on the Yalu, an engagement as that on the Yalu, nor was the position as difficult for the On the present occasion, therefore, if the list of casualties does not exceed a thousand, and above all if the killed do not number more than 150—which seems tolerably certain—, the Japanese will have purchased a great victory at a remarkably small price. The Russians had all the advantage of position and were acting throughout on the defensive. Had they held even tolerably straight, they should have decimated their assailants.

Monday, May 9.

Some Details of the Fighting.

A letter received at Kokura from Lieut. General Inouye, who commands the Twefth Division, says that in crossing the Ai on the morning of the 1st the Division met with considerable resistance. It reached the Hohmu-tung position at 2 p.m., having captured the heights westward on Yulchawon. At Yulchawon four regiments of Russians were massed with 14 or 15 guns. (General Kuropatkin, it will be remembered, speaks of this force as a covering body and puts its strength at only one regiment). These troops stood their ground stoutly as their position was essential to the communications with the other sections of the Russian The men from the Kiulien plateau moved to join them, but being intercepted, changed front and endeavoured to bear back the Guards, who were advancing on their left flank. Unsuccessful in this, they finally broke and fled. According to General Inouye, the fight at Hohmu-tung lasted until .20 p.m., though General Kuroki's report 7.20 p.m., though Ceneral Innits it to 6 p.m. These Russian regiments seem to have made a very fine stand, and the honour belongs to them of having saved the defeat from becoming a catastrophe. They well deserve General Kuropatkin's eulogy, and we can readily understand his disposition to under-estimate their numbers. disposition to under-estimate their numbers. In and so the Japanese, and two of them are General Inouye adds that Major-General commanding officers. The second and more Kiyoshi's brigade bore the brunt of the fighting on the 1st instant, and that the heaviest to wounded. Modern rifles, in spite of their work of all fell to the 24th Regiment.

He does not say which wing of the advancing Division was formed by the advancing Brigade, but we conjecture that it is about the ratio indicated by the experience was the left wing, which confronted the of recent wars. Now it will be observed that heights on the west of the Ai River at the the Japanese return shows 715 wounded time of the flank attack. The General puts against 185 killed, a ratio of very nearly 4 the Russian casualties at about 1,300, but to 1. The Russian return, however, shows there must be a certain amount of conjecture in such a statement.

rinski (?), who is said to have been killed, be more fatal on account of its larger calibre. seems to have sent a report which is Assuming, however, that the rifles are alike telegraphed from London. He says that the in this respect, the Russians ought to have Eleventh Regiment held its ground for two had 2,280 wounded instead of 1,119. Their under Captain Omura crossed by boat and hours, but that its communications were total losses as shown by Kuropatkin are took possession of Husan, bivouacking there severed and it suffered terribly. The Colonel 2,394, whereas they ought to be probably for the night. The next morning a party in command, 40 officers and 200 men were 3,500.

killed. That would mean that this regiment alone must have had a total list of at least 600 casualties. Assuming the strength of the Regiment to have been 2,000-a maximum figure—, that is a loss of nearly
30 per cent. This may be the regiment
specially referred to by General Kuropatkin.
General Kuroki sends the following re-

ports, published in Tokyo on Sunday:

ports, published in 10kyo on Sumoay:—

1. On the 6th instant a cavalry reconnaissance sent out by us, fell in with the enemy's cavalry at a point on the north east of Fenghwang, and attacked them, killing 3 and wounding several.

2. On the same day our cavalry attacked and drove back the enemy's cavalry at Lutaitze, Santaitze and Sutaitze. Thereafter a body of our infantry took, possession of Fenghwang, According to reports received, most of the houses along the Liaoyang road have been burned.

possession or rengineary.

received, most of the houses along the Liaoyang road have been burned.

3. Various hospital equipment abandoned by the enemy along the route of his retreat, was picked up by our troops and is now being used for the uses of the wounded of both armies. Further a number of the enemy's hospital corps are employed, at their own request, tending the Russian wounded.

4. The enemy, when retreating from Fenghwang, burned his powder magazine and his ammunition magazine. On the 7th many fugitive soldiers of the enemy energed from the groves and villages and surrendered. These surrenders are still going on. Many graves are also seen where the enemy buried his dead. The Chinese say that the Russian wounded who were carried to Fenghwang on the 2nd, totalled about 800. On the whole it would seem that the enemy's losses exceeded 3,000 of all arms.

The Chinese are said to be much incensed

The Chinese are said to be much incensed by the conduct of the Russians in burning Antung at the time of their retreat.

Tuesday, May 10.

The Asahi and the fiji both publish telegrams saying that the number of Russian dead found by the Japanese between the Yalu and Tang-shan-ching was 1,363. news was evidently conveyed to the two journals from the same source, but even the weight of their authority in publishing it does not carry conviction. If 1,363 men were killed there must have been at least 4,000 wounded, whereas General Kuroki's latest accounts put the total Russian casualties at some 3,000.

Wednesday, May 11.

THE CASUALTY LIST.

General Kuropatkin has now sent in his official statement of the casualties at the battle of the Yalu. We tabulate them side by side with the Japanese authenticated account of their own losses:--

Killed. Wounded. Miser Wounded Misers
Officers Men. Officers Men. Officers Russian ... 26 564 38 1,081 6
Japanese... 5 180 25 690 —

There are one or two comments to be made. The first is that General Kuropatkin returns only 6 officers as missing, whereas there are actually 30 Russian officers in the ere must be a certain amount of conjecture 1,119 wounded and 590 killed, a ratio of less such m statement.

The Russian Divisional General Kasta-Japanese and Russian, the Russian should

Thursday, May 12.

WHAT EYE-WITNESSES SAW

It appears from correspondence in Japanse journals that the Guards did not cross the first channel of the Yalu to Kulido by wading. They had to bridge this channel at the outset as well as the central channel subsequently. They began by sounding the river on the night of April 23rd. Three men stripped and made their way over by swimming and wading. One returned, but two were temporarily disabled by the cold. Then two others crossed, and these never returned though their two predecessors On the 25th eleven boats which had been built in Wiju by the Engineers were carried to the river's edge, and a battalion and two companies were told off to cross by them, it being evidently im-possible to build a bridge. The night of the 25th was bright with moon-light and the crossing had to be deferred until The night 3.50 a.m. on the 26th when the moon went down. Twenty men embarked in each of the boats and when three boats had reached the Kulido shore, the enemy opened fire on them, at a distance of about 100 metres. Then a detachment of over 40 Russians advanced and fired a volley, killing about 20 Japanese. The latter nevertheless advanced unchecked. Five more fell killed or wounded, but the others pressed on singing a war-song. At the same time the two reserve companies opened on the Russians, who retired, and the crossing was effected. A conflagration now burst out in a village in the centre of Kulido island. It was obviously a signal, for invariantly affected the control of the centre of the control of the centre immediately afterwards two others flamed up further south, and the scene became as light as day. The Russians, however, fled from the island. Most of their boats were on the other side of the main channel and they had a struggle with each other as to who should embark first in the three boats on this side. At this time they lost an officer. Beyond the channel the path was narrow and steep. The Russians had to creep up it, and the spectacle moved the onlooking Japanese to laughter. They opened fire, but suddenly became themselves the objects of a fusillade which killed or wounded some 16 men. Simultaneously wounded some 16 men. the Russians that had gained the shelter of the rocks began to use their rifles with effect. The Japanese therefore entrenched them-selves. Presently two squadrons of Russian cavalry were observed advancing from the Tiger's Hill direction. They were supposed to be a reinforcement, but they proved to be a covering body. The troopers, dismounting and taking positions on high ground, opened fire while the infantry retired. In this crossing operation the Japanese had 41 casualties, including 5 sappers. According to statements made by Russian prisoners, the force defending Kulido had been 140 mounted infantry of the Cossack Division.

At dawn on the 27th Lieutenant Sakamoto stripped and swam across to Husan to reconnoitre. He found the position deserted, and on receiving his report a company

Yulchawon heights to reconnoitre. They found a company of the enemy in the act of ascending the hill. A fight ensued. The Brigade came upon the enemy just as he arrived and forced the assailants back to Russians during the course of the engagement received a reinforcement of 20 men; the Japanese were re-inforced by a company. Ultimately the Russians withdrew towards Kiulien, leaving 3 killed and wounded. The Japanese had no casualties. Subsequently a battalion of Russian infantry with 3 guns advanced to attack the place, and the Japanese were driven back to Kulido, losing their hardly won position and having 3 killed and 7 wounded. The latter probably fell into the hands of the Russians. Again on the 29th a reconnaissance sent to Husan found it again deserted. A Japanese battalion was therefore sent over by boat, and it took possession of both the Husan and the Yulchawon heights. As the same time the Twelfth Division crossed by bridge at Sukuchin, and advanced to the east of Yulchawon. Thus the position-Husan-Yulchawon-between the Yalu and the Ai River was completely won. On the 30th preparations commenced for a general attack. The detachment in Wiju and the wounded were carried to a sheltered position at Yeuhwatung (up stream from Wiju). The Guards posted a park of 20 guns on Keumchong island. These had to to be taken over by boat. The Second Division placed a park of 35 quick-firers on the same island on the left flank of the Guards' battery. At Yeuhwatung also a park of artillery was placed, and another on Kulido Island. At 10 a.m. the general attack commenced with a violent artillery duel. The early morning had been so foggy that objects could not be distinguished at any distance, and the clearing away of the mist had to be awaited. For this reason the opening of fire was deferred until 10 o'clock. After two hours of this artillery engagement the enemy's guns were silenced. At 9 p.m. on that day, the various bodies of troops took up the positions assigned to them. By this time the Guards had built four bridges from Kuliao Island to Husan. Before dawn on the 1st the final attack commenced. The Second Division as well as the Guards marched rapidly to Husan, and the Second Division posted a park of guns on the heights of Cheung-gan island. By the break of day these two Divisions were advancing in long serpentlike columns, the Guards heading castwards towards Kiulien, the Second Divithe Japanese artillery opened fire but the enemy did not reply, their evident object being not to unmask their positions. When the skirmishing line of the Guards had crossed the Ai River, however, they found the enemy, and the action compensed with the enemy and the action commenced with a hot fire of guns and small arms on both sides. At this time the head-quarters of the Guards were on one of the Husan heights and the newspaper correspondents were with them. Bets were made as to whether the attack would succeed. A French correstroops could not possibly cross the Ai and escalade such a position as the Russians were occupying. But after the fire had lasted 75 minutes, the Guards commenced to wade the Ai and planted their flags on the top of the opposite bank. Simultaneously the Twelfth Division crossed higher up and the Second Division lower down the fact that the fact that the news of Japanese victories, and the Russians consequently find that the assistance of the Chinese regulars is needed to preserve order. But it is plain that if the Chinese roving band. They owe their mobility to the fact that the news of Japanese victories, and the Russians consequently find that the assistance of the Chinese regulars is needed to preserve order. But it is plain that if the Chinese roving band. They owe their mobility to

lien, while the First Brigade advanced against while the Twelsth Division had advanced on the Russian's left flank and pushing on Korea offers a free field for every kind of rapidly westward, had severed his line of military enterprise. communications with Fenghwang. Therefore the Russians from Kiulien re-formed at Hohmutang where they made a desperate stand. Two regiments and 600 cavalry from Antung attempted to join them, but were headed off by the Second Division and had the right wing consisting of the 46th Regi-ment under Colonel Harada. The right then retired to Kaichhong and Sunchhang. on the Kiulien road, was presently appro-ached by a body of the enemy retreating from the latter place. It opened fire on them at close range, but they were gradually joined by other troops arriving from the same quarter, and the whole offered a strong resistance. Hohmutang is a poor position for defensive purposes. It lies in a hollow for defensive purposes. It lies in a hollow surrounded by hills, and the Japanese having crowned the latter, were able to pour a deadly fire upon the Russians, who, on the contrary, could not inflict much injury on their assailants. The Russians finally attempted to retreat to the south, but finding the ground too precipitous, crossed eastward where they encountered Colonel Harada's men. At this moment a battalion of the Russians delivered a fierce flank attack and a bayonet engagement took place, the Russian battalion being presently reinforced by a body of Cossacks. Happily a battery of Japanese artiflery now crowned a height at a distance of about 1,500 metres and opened fire on the Russians, who were thrown into disorder. But as the Guards were advancing on their rear from Kiulien and the Second Division on their left rear from Antung, they had nothing for it but to surrender. Over 200 were taken prisoners, the remainder being killed or wounded. The spectacle is said to have been appalling.

Friday, May 13. Supplementing the intelligence of a Cossack raid against Anju comes news that on the 15th of April a party of 200 Cossacks crossed the Yalu at Chhosan and moving up the river to Wiwon, associated themselves ously the Twelfth Division crossed higher up and the Second Division lower down, and all were seen advancing vehemently amid shouts of banzai. The foreign cortespondents on Husan all joined in the is stated that in this raid they forced the cheering, with the exception of the man who had bet 500 yeu. The Second Brigade of declaring that any one refusing to do so the Guards under Major-General Watanabe would be treated as a Japanese. At Anju gambling. The culprits got away after having was directed against the right flank of Kiu-

mined onset. It lasted from 6 a.m. until 7 was retreating from Kiulien with 6 guns Nyongpyong. It is a curious method of and a number of commissariat wagons. warfare, this riding to and fro of detached He offered a strong resistance but finally bands without any base; veritable columns broke, leaving the guns and wagons in the air. Of course nothing of the kind the lands of the Japanese. The Guards would be possible in country where reason-had over 30 casualties in this fight. Meanwhile the Twelfth Division had advanced on assertion of administrative authority. But

The following telegram reached Head Quarters in Tokyo on the afternoon of the 11th from place not mentioned, signed by Captain Haraguchi :- " A Company of our relieving force arrived at Anju on the 10th to escape into the hills. The conflict at at 1 p.m., and lent its assistance to the Hohmutang lasted from 2 p.m. until 6 p.m. garrison of that place which, since early Hohmutang lasted from 2 p.m. until 6 p.m. garrison of that place which, since early morning, had been engaged with an attackBrigade (of the Twelfth Division) under MajorGeneral Kigoshi. He left a force to guard the road leading to the Ai, and the divided the road leading to the Ai, and the divided the remainder of his troops into two bodies, the right wing consisting of the 46th Regis from Kasan and Sukrhong and the enemy. wing attacked from the west and captured A portion of the Anju garrison is now a commanding position. The left advanced from the east. This latter regiment being wounded. The enemy's casualties were over 50 in killed and wounded, and we took one sergeant prisoner. According to the latter's statement, the enemy consisted of Cossacks and numbered 500.

If our readers look at the map they will see that the Cossacks retired to the south of Anju, and struck the road which trends eastward and northward to Nyongwon and Kangke, finally emerging at Wiwon on the Yalu. These men must have had a severe Russians, who, lesson. If they lost over 50 out of a force of 500 they are not likely to return soon again to the attack.

> The Asahi says that the number of Russian prisoners now exceeds 700, including wounded men. About 300 have reached Saseho, including 25 officers. These are all wounded and are now under treatment at Matsuyama Hospital. It is probable that the Japanese will adopt the plan of releasing all prisoners and sending them home on parole. Even if some break their parole, that would a lesser evil than the trouble and

cost of having to support them. According to the Kokumin, news has been received that the Japanese troops captured at Fenghwang on the 6th instant 3,200 koku of grain, 200 bags of salt and 350 gun-cartridges.

MANCHURIA.

Tientsin says that the Russians have changed their policy in the matter of taking away the arms of the Chinese soldiers in Manchuria. They are now allowing the soldiers to carry rifles. This departure is attributed to the fact that the population of

THE LAST BLOCKING OPERATION.

Saturday, May 7 The official report of the last blocking operation at Port Arthur claims that five out of

the eight steamers were sunk by their crewsat the desired place, and that the harbour is thereby blocked, egress being impossible for any vessel larger than a torpedo-craft. The remaining three steamers were sunk by the Russians, and did not contribute to the purpose of the operation. It was splendid act of heroism. So far as we can estimate, at least 63 officers and men lost their lives out of a total of 160. The official report

runs as follows:-The united squadron, operating as previously determined, carried out the blocking of Port Arthur between 3 and 4 o'clock a.m. on the 3rd instant. The blocking vessels, escorted by the gun-boats Akagi (Commander Fujimoto) and Chôkai (Commander Iwamura), the Second Destroyer Squadron (Commander Ishida), the Third Destroyer Squadron (Commander Tsuchiya), the Fourth Destroyer Squadron (Commander Nagai), the Fifth Destroyer Squadron (Commander Mano), the Ninth Torpedo-Squadron (Commander Yajima), the Tenth Torpedo Squadron (Commander Otaki) and the Fourteenth Torpedo Squadron, less the Kasasagi and the Managuri (Commander Sakurai), parted from the Fleet on the evening of the 2nd instant and took the previously determined route for Port Arthur. Unfortunately from about 11 p.m. a strong south-easterly wind began to blow, and attaining storm force, raised a heavy sea. The blocking steamers became separated and lost sight of each other. Commander Hayashi, who was in command of these steamers, seeing that it would be impossible to carry out the operation successfully, gave the order to withdraw. But the signal was not observed, and in spite of various essays to make it clear, the ships held on their course, reaching the neighbourhood of Port Arthur at 2 a.m. The Mikawa Maru (Lieutenant Sosa), observing the enemy open fire upon our torpedo-boat No. 14, which had had been sent to reconnoitre, imagined that the blocking steamers had already gone in. She therefore steamed at full speed for the mouth of the harbour. Another steamer, apparently the Sakura Maru (Lieutenant Shiraishi, who commanded the Japanese storming party at the Taku Forts after the death of Commander Hattori), followed the Mikawa Maru. The enemy had laid electric mines at the mouth of the port. With these, supplemented by heavy gun-fire from the forts and powerful search-lights, they essayed to oppose the coming of the two steamers. Nevertheless the Mikawa Maru, breaking a gap in the boom, entered far into the channel and, anchoring in an excellent place, was sunk by her crew. The steamer resembling the Sakura anchored near the pointed rock at the entrance of the harbour and was sent to the bottom by her crew. These vessels were followed in quick succession by the Totomi Maru (Commander Honda), the Edo Maru (Commander Takayanagi), the Otaru Maru (Commander Nonura), the Sagami Maru (Commander Yuasa), the Aikoku Maru (Commander Inuzuka) and the Asagao Mara (Commander Kikutaro. By this time the cannonade of the enemy had become exceedingly hot and electric
reached the shore and were saved. It would
mines were bursting on all sides. The
crews of the steamers had many killed
these to the 13 mentioned above, the tale
combustibles carried in her hold or to ome of boom, and, her head coming round to the cord.

Maru had reached the entrance and was just about to drop her anchor when her commander (Takayagi) received a shot in his stomach which killed him. His place was immediately taken by Lieut. Nagata, who ordered the anchor to be dropped and the vessel was sunk. Two other steamers, apparently the Otaru Maru and the Sagami Maru, entered the harbour's mouth and were sunk. The Aikoku Maru struck a contact mine about 5 cables from the entrance and went down in an instant. Lieutenant Uchida, the second in com-mand, Chief-engineer Aoki and III others of the crew of this vessel are missing. A steamer like the Asagao Maru seemed to have had her rudder injured, for she ran ashore at the foot of Golden Hill and was there exploded. Thus among the 8 steamed that, on the least favourable estimate, exit has become impossible for anything as large as a cruiser. This blocking operation large as a cruiser. This blocking operation was incomparably more hazardous than either of those that preceded it, the storm adding to the difficulties and the enemy's fire being of unprecedented severity. Thus it was impossible to save even one of the crews of the Sakura Maru, the Otaru Maru, the Sagami Maru and the Asagao Maru. Further it is most unhappily impossible to learn any details of this their last great act of daring. But I believe that their heroism will long stand in the pages of their country's history The Destroyer Squadrons and the Torpedo Squadrons, battling against the violent wind and high seas during the whole night and often exposed to the enemy's fire, did their duty well. Above all it should be noticed that the Torpedo Squadrons stood in close to the harbour and saved about one half of the crews. No. 65 Torpedo-boat, under the command of Lieut. Taira, had one of her steam pipes hit, and lost 3 men. She became disabled but was taken in tow and rescued by Torpedo-boat No. 75 under command of Lieutenant Narimoto. The Aotaka (Commander Yajima) was also hit by a shell on the port side of her machinery and lost one man. In the torpedo-boat Hayabusa one man was killed. No casualties whatever occurred in the remainder of the torpedo-craft. At a.m. the Third Squadron under Rear Admiral Dewa, and at 9 a.m. the First Squadron under Vice-Admiral Togo, stood in and searched all the waters adjacent to Port Arthur, in the hope of saving some of the steamers' crews, but they were unsuccessful, athough they continued the search until 4 p.m. There was a dense fog on this day and the state of the enemy could not be observed. That night the squadrons all returned to their base.

It will be observed from the above most sober and unemotional account, that 2 men were killed in the torpedo-boats and II in the steamers-or, at any rate, II are missing. Moreover Admiral Togo says that not one person was rescued among the crews of 4 steamers. Judging from past experi-ence, we may estimate that, on the average, each steamer had a crew of 20, all told. Four steamers, therefore, represent a total of 80 officers and men, and from Russian and wounded. The Totomi Maru struck the of deaths aggregates 63. It is a terrible return the many engines of destruction bursting boom, and, her head coming round to the cord. To utter any eulogy of such and hurtling around. But for all their mines,

west, she was sunk in that position, blocking heroism seems almost an impertinence about one half of the entrance. The Edo In this war the Japanese are showing In this war the Japanese are showing splendid qualities. They are proving themselves to be not only brave in a superlative degree but also exceptionally competent. The little incident of the disabled torpedo-boat No. 65 is an eloquent illustration. In a gale of wind with a heavy sea running and inside the zone of the enemy's fire, the crippled craft was taken in tow by another boat, No. 75, and saved from destruction. The men that did that were fine sailors. And consider the work upon which these destroyers and torpedoers have been engaged for the past three months. Think of them again and again steaming in pitchy darkness, without a light burning and often in heavy seas, either to attack the enemy or to escort steamers engaged on duty of the deadliest peril, yet never once is there there exploded. Thus among the 8 steam- In fatal collision or an accident of any kind ers 5 entered the mouth of the harbour and that can be attributed to faulty seamanship were sunk there, so that it may be concluded that, on the least favourable estimate, several collisions, if half a dozen or even half a score of these frail little craft had perished by catastrophes commonly incidental to such operations, could any one have been justly surprised? But not one has been lost from first to last. We call it a fine record. There is no good luck in such achievement. There is simply good guiding. And concerning the story of the 8 steamers, there are striking features. It is not merely that men were found, found in scores, to willingly engage in such perilous work. We have ceased to think that wonderful where Japanese are concerned. What seems more remarkable is the dogged determination underlying the adventure. Port Arthur had to be blocked. One failure, two failures, no matter how many failures made or how many lives lost, the task had to be achieved. Admiral Togo and his men knew the thing to be of cardinal importance; knew that duty dictated its accomplishment. So they went at it again and again with set teeth, and they succeeded at last. We do not see how men of that calibre are to be beaten. If they were our own countrymen we should be proud and thankful. The way they held on, too, in the face of a gale of wind and in spite of rapidly rising seas, is something to be remembered. The officer in command wanted to restrain the vessels, in view of the extremely unfavourable conditions. But no one was looking for a signal to stop, and therefore every steamer held her course without a thought of being deterred by the storm. In this respect the adventure resembles the second torpedo attack upon the Port Arthur fleet.

The names of the 8 steamers and other particulars relating to them are given below :-

Name.	Built.	Tonnage	. Owners,
Mikawa Maru	1884	1,967	Yusen Kaisha.
Sakura Maru	1887	2.978	Yusen Kaisha.
Totomi Maru	1883	1,952	Yusen Kaisha.
Edo Maru	1884	1,724	Hiromi Nisaburo,
Otaru Maru	1886	2.547	Yusen Kaisha.
Sagami Maru	1884	1,926	Yusen Kaisha.
Aikoku Maru	1879	1,781	Osaka Shosen

Asagao Maru......1889 2,464 Yusen Kaisha.

There is, it will be observed, a very great discrepancy between the Russian and the Japanese accounts of this affair. The Russians say that they sank all the steamers. They doubtless beheved they had done so. It must be almost impossible to distinguish the exact facts on such an occasion; and their shells and their search-lights they failed even to injure five out of the eight vessels. As for the two torpedo-boats they imagined they had sunk, these are now safe with Admiral Togo's fleet. The great point, the blocking of the harbour, may still be open to doubt, perhaps. We do not ourselves think that it is. Admiral Togo's reports are always remarkably conservative. On neither the first nor the second occasion did he venture to pronounce a definite opinion. He merely said that some partial success seemed to have been obtained. But now he declares his belief that, on the most moderate calculation. nothing larger than a torpedo-craft can get out. The Russians, on the contrary, affirm that the whole affair failed and that the harbour is open.

Junk-masters carry rumours to Chefoo that during the night of the 4th-5th strenuous cannonading was heard in the direction of Port Arthur and flash-lights were observed. It is conjectured that these phenomena were caused by a naval attack on the place designed to divert attention from the landing operations.

Sunday, May 8.

Since the above was in type an accurate statement of the losses has been published as follows :-

73.
The number of officers killed or missing is All these have been promoted, and their families have been granted pensions of from 300 to 500 yen annually. Five of of this kind were an old Japanese custom as them were First Lieutenants, 5 Second they were also European. In the Occident Lieutenants, 4 Chief Engineers and I was an Engineer.

PORT ARIHUR.

Saturday, May 7

It is now stated that the steamer which was destroyed accidentally by a torpedo mine en route for Port Arthur from Dalny with a cargo of coal, was the Amur not the Silka. The statements of Chinese junkmen seem to be the only source of information.

We may mention in this context that Japanese naval men ridicule the report recently circulated in the sense that an errant torpedo was seen floating near Tsushima. They say that the thing is impossible.

Monday, May 9

Viceroy Alexieff is reported to have left Port Arthur on the 3rd instant. Did he wait to assure himself whether the harbour was sealed? His last report on the subject said that owing to the state of the wind and the waves no conclusive investigation could be made. We suspect that it was made and made thoroughly before the Viceroy entrained for the north. He was in command of the squadron at Port Arthur. His despatch describes how, on the night of the 2nd-3rd, immediately on being advised of the imminence of a Japanese attack, he invited to man the eight blocking steamers strategy is unfolding itself very ably.

It is stated that both fates have befallen it, the garrison serving for red-cross purposes. The Mongolia was scriously injured on the occasion of the 7th attack. Admiral Togo reports that since the 6th in-any large scale southward of the point where his main line of communications is directly menaced, may be greatly doubted. Japanese data intervals in the direction of Port Arthur. This would lend colour to the statement made by an Indian, as referred to elsewhere, that on the 5th instant the Russians began invited to man the eight blocking steamers to blow up the ships in the harbour.

went on board the gunboat Otvazny and assisted by the gunboats Giljak, Bobre and Gremiastchy, directed the defence. It does not appear that these gunboats left the port, and what they could accomplish from inside is difficult to conjecture. But that is a parenthesis. The point is that Alexieff was in actual command on the night of the 2nd-3rd, and that on the 4th, or perhaps the 5th, he took his departure, no officer having yet arrived to relieve him. Of course it may be that his duties as Viceroy summoned him north. But it may be that there were other reasons. All all events his retirement is one of the most timely episodes of the war.

We do not make a rule of translating the messages of approval sent by the Emperor to his soldiers and sailors, or the replies for-warded by officers in command. These documents have no special interest and necessarily present little variety. It may be noted, however, that in His Majesty's mes sage to the Naval Squadron in connexion with the blocking of Port Arthur, the result of the operation is spoken of as a success.

It is now reported that the S.S. Noni, of the East China Railway Company, has become another victim of a mine accident at Dalny. The Noni is a vessel of 2,469 tons.

Tuesday, May 10. It is said to be stated at Saseho that prior to the seventh and eighth attacks upon Port Arthur, Admiral Togo flashed by wireless telegraphy a message to Admiral Makaroff inviting surrender. The Russians made no reply, as was not unnatural. The seventh and eighth attacks took place during the night of the 12th-13th of April and during the day of the 13th. The seventh attack consisted in laying the contact mines which proved fatal to the *Petropavlovsk* and to Admiral Makaroff himself in the eighth attack. On the night of the 2nd-3rd May when Port Arthur was sealed, there seems to have been some talk of subsequently inviting surrender, but whether it took the form of action we do not know. Perhaps it should be added that invitations they may be identified in the herald's summons to capitulation. In Japan they were often very formal affairs, and simultaneously with the summons, it was not unusual to send from one army to the other any wives whose blood relationship was closer to the men of the latter than to those of the form-In these times the ceremony of invitation seems a little out of place, and we observe that Commander Hirose's idea of visiting his Russian friends in Port Arthur and advising them to yield has been ridiculed by some foreign journals. Yet there would be no difficulty in citing from the annals of recent wars many instances of invitations to surrender where resistance seemed futile. Lord Robert's message to Cronje at Paardeberg is a case very much in point. Cronje contemptuously declined. He expected to be relieved by De Wet from Blooemfontein, and he was mistaken. Arthur, when it was first summoned, did not expect to be either blocked or isolated. Now was sealed? His last report on the subject that both fates have befallen it, the garrison

on the last occasion, twenty thousand names were sent in, and the civilian members of the crews of the steamers prayed to be allowed to remain at their posts. The eight steamers, each with her number flaunted on banners ahead, amidship and astern, steamed away from the base amid the playing of military bands and the bansais of thousands of voices.

Wednesday, May 11.
It is rumoured from London (Asahi's service) that the Russian Government has cancelled the contracts made by it for coal supplies in connexion with the despatch of the Baltic Squadron eastward. The fact is that the Squadron, did it sail, would be in the perplexing predicament of having no destination.
Were it on the spot now it could not enter
Vladiyostock or Port Arthur without first engaging the Japanese fleet, and what would become of its disabled vessels under these circumstances we can not easily conjecture. The situation at sea is hopeless for Russia. There was a time when a remedy offered; a desperate remedy indeed, but still not altogether hopeless. That time was the moment when Admiral Makaroff had restored some vitality to the Port Arthur squadron. Had he then gone out boldly and risked everything in an attempt to join the cruiser squadron in Vladivostock, the situation might be different now. Japanese naval officers spoke of such a step as his

only resource.

It is affirmed that the Japanese fitted electric search-lights in the Aikoku Maru and 4 others of the steamers which went in to block Port Arthur on the morning of the 3rd. The Russians employed seven powerful lights, but the Japanese plan was to confuse the enemy by meeting light with light. How far this novel device was successful we have not heard, but it is broadly spoken of as having contributed materially to the completion of the enterprise.

Thursday, May 12.
An Indian who has just reached Chefoo from Port Arthur is said to have declared that on the 5th instant he was an eye-witness of the destruction of 7 war-ships in Port Arthur by the Russians themselves. Perhaps some such incident is to be anticipated, but the links in the chain of evidence are weak. An Indian-Chefoo-if Shanghai also could

be introduced the array would be complete. A Chinese subject—an official interpreter who left Port Arthur prior to the 10th and who also chooses Chesoo for his place of utter-ance, says that since Makaroff's death all the foreigners have left Port Arthur and that the Indians and Koreans were expelled. The horses of the livery stables have been impressed for military purposes and the drivers and grooms have been drafted into the ranks. The field hospital, the Oriental Club, the Naval Club and Viceroy Alexieff's residence have been wrecked by Japanese shells. The town is deserted and the spirit of the garrison is at a low ebb. The S.S. Harbin and the Hailar are used for hospital ships and are anchored in a safe place in the Western Harbour. The Mongolia and the Kazan have been painted white and are serving for red-cross purposes. The Mongolia was seriously injured on the occasion of the 7th attack.

2nd-3rd he was in the Dock buildings as enemy's vessels inside the harbour took the usual when, at I a.m., he heard the sound of cannon. Ascending a height, he observed 3 steamers making for the mouth
of the harbour. The foremost struck
the boom, and almost immediately an One chief cause of the heavy losses on the electric mine was fired from the shore. It seemed to strike the vessel. Her head ing the boats by which they were to escape, came round suddenly to the west and she could not make any way against the fierce sank, almost touching the boom. The two south-east wind. On the next day the main next were swept round in a similar manner by the wave of the explosion, and were sunk in a line with the first, the three going down between the middle of the channel and the Tiger's Tail spit. Part of the boom seemed to be fractured by the mine. Two other steamers made their way inside the boom. One of them went ashore on the Tiger's Tail spit, and sank, heading north. The other sank on the side of the Golden Hill Fort between the two vessels which had first gone down and nearly parallel to the boom. Of the remaining steamers, 2 went down outside the harbour to the east of the Tiger's Tail Spit, and another sank on the south of Golden Hill. The result of this blocking operation was to render the channel of exit so narrow and so intricate that not even a torpedo-boat could navigate it. Chinaman adds that he ascertained these positions of the vessels by observing them on the morning after the affair. The canonade on the Russian side, the firing of small arms and the exploding of mines made a scene indescribably awful; so terrible than even an onlooker was appalled. As to the crews of the steamers, what became of the 10 men and one officer belonging to the vessel that stranded on the Tiger's Tail, is not known. The twelve men forming the crew of the Golden Hill vessel all fought fiercely until they were killed. Judging from the number of corpses floating the next morning in the harbour, it would seem that the crews of the three vessels which went down at the boom were all lost. that were saved are said to have belonged to the vessels which went down outside. This was the most fearful fight witnessed since the beginning. The Russians were astoundthe valour of the Japanese who, in a time of storm and tempest, passed unflinchingly into the zone of such a murderous cannonade. When this Chinaman went to the station on the 4th to board the train, he found all the carriages full of soldiers about to travel north. During the 2nd and 3rd new ordnance sent out from Russia was tested at Port Arthur.

Another Chinaman who left Port Arthur on the 3rd alleges that 40 or 50 Japanese landed on Golden Hill and perished fighting to the last

From Saseho it is reported that as the leading steamer, the Mikawa Maru, approached the port, a hail of shells was showered on her from newly built forts which stood near the water's edge and mounted 12-pounder guns. This fire began at a distance of some 4 miles. The Missian Shanghai has a rumour that the Japanese Shanghai has a rumour that the Japanese Shanghai has a rumour that the Japanese Shanghai has a rumour that the Japanese Shanghai has a rumour that the Japanese at a distance of some 4 mies. And regulated her advance so as to suit the convenience of the vessels following, pien is 75 miles north of Pulantien. Of course it is not impossible that the Japanese took to course it is not impossible that the Japanese when the remnant of her crew took to course it is not impossible that the Japanese and when the remnant of her crew took to the boats, they were necessarily impeded in their escape by these steamers. No one had any hope of returning alive. The Totomis she felt a violent shock and imagined that she had struck a rock. But her way was not lost, and presently the shock was repeated. Then for the first time she recognised has been in a constant mood of expectation.

A Chinese subject, connected with the that she had come in contact with a mine, Port Arthur Dock, who left the place on the and that her object would be attained if she 4th instant, reports that on the night of the went to the bottom at once. None of the least part in the defence. Their crews either Japanese side was that the men, after enter squadron stood in to inspect the state of affairs. Usually when the Japanese ships appeared in the offing, the forts opened fire on them at 10,000 metres. On this day not a shot was fired. The masts and funnels of the sunken steamers could be plainly seen, adding not a little to the desolation of the silent scene.

> Friday, May 13 Viceroy Alexieff's report that communications were re-established with Port Arthur on the night of the 9th must be supposed to be correct until something to the contrary is heard. But inasmuch as a Japanese army of considerable size is within a few miles of the railway, such re-establishment must be very uncertain affair. It may fairly assumed that the Japanese detach-ment which took possession of Pulantien on the 6th instant was supported by the moving forward of other troops on the 7th and 8th; or that its orders were to wreck the railway and retire. In either case the re-establishment of communications is inexplicable. If the Japanese occupation was in force, a heavy engagement must have preceded their evacuation of such an important position. If they had wrecked the railway through a distance of one or two miles, its restoration must have been a work of time, nor could such work have been safely attempted unless the enemy had first been driven back. The puzzle must be left for future solution. Only of one thing can we be certain, namely, that had the restoration of communications been preceded by a Russian victory, Alexieff would not have failed to report the novel event.

> Turning to other sources of information we read that some officials of the East China Railway, who left Port Arthur by train on the 6th instant, report that as far as Kinchow everything went as usual. It was not until the train arrived in the neighbourhood of Pulantien that the seizure of the place by Japanese troops became known. All the passengers were then ordered to alight, and they found that the line had been wrecked through a distance of three miles and an iron bridge had been broken. The Japanese were in possession as far as Wafantien, which is 51/4 miles beyond Pulantien. Now if this report be even approximately true, how can communications have been restored

since the war broke out. It were a pity that the place should be permanently disappointed.

Of course there are varions estimates as to the Russian force in Port Arthur.

THE LANDING ON LIAOTUNG.

Saturday, May 7. Vice-Admiral Kataoka, Commander-in-Chief of the Third Naval Squadron, telegraphs from the Advanced Base at 6.25 p.m. on the 5th instant :-

On the 4th instant the Third Squadron left the Rendezvous, and operating as planned, escorted the first section of the Second Army to the Advanced Base. The troops were in the act of debarking at the time of the despatch of the telegram. According to statements made by Chinese sailors the enemy in the vicinity did not exceed 100 men.

At 3 p.m. on the 4th the Kaga Maru ran aground near the base but was dragged off uninjured by the Akilsushima, and reached the base safely at 5 p.m.

Rear-Admiral Hosoya, Second in Com-mand of the Third Squadron, reporting from the Advanced Base at 10 p.m. on the 5th, says :-

5th, says:—
At 5.30 a.m. on the 5th instant the Seventh Sectional Squadron and the Twentieth Torpedo boat division together with the Hongkong Maru and the Nippon Maru, steamed to the advanced base on the Liaotung Peninsula. A few Russians, apparently a patrol, were observed on shore; fire was opened on them and after a few shots they dispersed. Captain Nomoto then received orders to lead the landing party. The tide was out, and the boats could not get close to the shore, but the men sprang into the water, and wading up to their navels over space of 1,000 metres, reached the shore at 7.25 a.m. Advancing at once, they occupied the heights space of 1,000 metres, reached the shore at 7.25 a.m. Advancing at once, they occupied the heights without fring n shot, and raised the flag of Japan on the highest eminence. Simultaneously the gunboats Akagr, Oshima and Chokati were ordered to make a diversion in the neighbourhood of the real landing place. They did so, opening fire on about 100 Russian soldiers who were observed. These dispersed, leaving 2 or 3 of their number on the ground. The first division of army transports stood in at 8.05 a.m., the raising of the flag being a signal to them. The landing began at once. The men had to wade but they pushed forward rapidly, and mmediately the work of constructing jetties was commenced, the naval squadron giving all assistance.

General Kuroki, telegraphing under date of the 4th instant at I p.m., says :-

General Kuroki, telegraphing under date of the 4th instant at I p.m., says:—

On the third a cavalry reconnaisance of 14 troopers under Lieutenant Voshigami rode out of Kiulien as far as Tangshanchong (20 miles from Kiulien). On an eminence there they observed a mounted Russian patrol of 15 or 16 Cossacks. The Japanese at once rode round and attacked. After a shap conflict, the Russians retreated in the direction of Fenghwang. The Japanese pursued as far as the bank of the Kucheum River which is about 2½ miles on the Kucheum River which is about 2½ miles on the Kiulien side of Kaulimon (32 miles from Kiulien and a little more than 10 miles from Fenghwang). It was then observed that both sides of the road were lined with Russian scouts, and the Japanese withdrew. According to a statement made by the people of the neighbourhood, during the fight on the 1st instant, a body of Russian infantry, some 2,000 strong, stationed on an eminence at Tangshanchong, opened fire by mistake on a party of 300 of their own people who were retreating from the south-east. The result was 110 were killed and 70 wounded, and that the land transport corps (whom these 300 were apparently escorting), deserted their vehicles and fied. According to statements made by the Russian prisoners the only bodies that retired in good order after the battle on the 1st, were five or six battalions of infantry and two batteries of artillery. The rest were all in confusion. of infantry and two batteries of artillery. The rest

Sunday, May 8.
On Sunday forenoon General Oku, com-

Monday, May 9 The Nichi Nichi has an estimate of the Russian forces on the Liaotung Peninsula. The estimate is based on information collected from various sources. It is :-

In Fort Arthur 9,600 infantry 300 or 400 cavalry. 300 Field Artillery. 200 Cavalry 100 Artillery

In the interval between Dalny, Pulantien and Newchwang there are only small detachments of cavalry.

The Chinese report that 6 or 7 Japanese females are kept close prisoners in the upper storey of the police-station at Dalny, provisions being furnished to them by means of

Tuesday, May 10, The marines that Captain Nomoto led to the landing place on the Liaotung Peninsula formed two battalions. On the 27th of April they embarked at Saseho in the Hongkong Maru and the Nippon Maru. of forming part of these battalions, but they do not appear to have offered any resistance. Another detachment was sent of choice had to be overcome. Naturally they had a great send off, and most gallantly they performed. send off, and most galiantly they performed the duty of going in advance of the troops and occupying the hills that commanded the place chosen for debarkation. It is not difficult to conceive what the consequences must have been had the Russians succeeded in gaining positions of vantage during the interval required by the troops for wading over a thousand metres of mud-bank. Five hundred rifles well posted during such an operation would have easily decimated an army of twenty thousand. One is compellated to add to add the question could these things ed to ask the question, could these things have been achieved by the Japanese had they not observed the most absolute secrecy throughout every stage of the proceedings. If, by any contrivance, the Russians had obtained an inkling of Japanese plans, there would be a different story to tell now. It may have appeared to outsiders that Japanese methods of guarding secrets were excessive; that sometimes they even verged on the ridiculous. Our own deliberate opinion is that there can be no discretion in such matters. The choice lies simply between absolute secrecy and no concealment at all; between dropping the curtain comple-tely and raising it altogether. From the moment that any discrimination is permitted, from that moment real privacy is defied. And, after all, what possible com-parison can be set up between the existence of a nation and the idle curiosity of onlookers; between the issue of a life-anddeath struggle between two empires and the satisfaction of alien appetite for sensational news? The Japanese have acted in this matter with profound wisdom. History will surely applaud them, and other countries

invaders were reduced, as the Japanese are quiet on the Yalu and that the Japan proverb has it, to the condition of a rat in army does not appear to be advancing. they were shut into a trap. They had left detachment has taken possession of a place at Pulantien, however, a small force of twenty whose name we can not identify. For the men under a sergeant. This little band understood the situation. The sergeant the fighting lines. conjured them to resist to the death, and aided by a number of transport coolies they succeeded in holding a large Chinese force at succeeded in holding a large Chinese force at accurately informed as to what is going on bay until Major-General Nogi, by a forced march, arrived at the head of a brigade of the ought to have known on the 7th, which troops, and the situation was saved. This is the date of the despatch of the above report Pulantien is now in the possession of the from Mukden, that Feng-hwang-tung had Japanese. We do not suggest that they been occupied by the Japanese on the 6th landed there. That is another question The distance from Fenghwang to Mukden is which the regulations forbid us to discuss. 132 miles, and it may be assumed that a But it is certain that wherever the landing took place, not a moment was lost in occupy ing Pulantien and cutting the railway, which there debouches on the coast.

Immediately after landing, a detachment of the Japanese army moved swiftly across the Peninsula and took possession of the position at Pulantien.. Two or three hundthe war of 1894-5.

Wednesday, May 11.

Between Fenghwang and Lioyang there are two routes. One, the north-eastern route, lies among the hills where the Japanese conducted such an arduous campaign ou their pretended advance to Mukden in the winter of 1894-5. Here are the mountains of Lienshan and Matinglung, negotiable only by passes where a small force can hold an army in check. The other route is by the south-east; somewhat circuitous route but traversing comparatively level country. From Fenghwang it goes to Sunyuen and thence to Haicheng, a station on the railway south of Liaoyang. Students of the war of 1894-5 will remember that while Major-General Tatsumi penetrated into the mountainous region from Fenghwang and held Sung's army engaged there, Lieut-General Katsura led an army by the level route to Haicheng. Recently—that is to say when the Russians were still masters of the situation in Manchuria—news came that a contract had been made by Vicery Alexief with anese conducted such an arduous campaign tion in Manchuria—news came that a contract tung Peninsula. The seizure of Pulanhad been made by Viceroy Alexieff with tien was a momentous operation. Acchinese industrials to build a railway from cording to various accounts the Russians Haitien to Fenghwang vid Sunyuen, and had massed a considerable force at Tashikithat the work had actually commenced ao, the junction of the main line and News now comes that it has been abandoned the Newchwang branch. Tashikiao is 92 Any one can appreciate the great difference miles from Pulantien, and in fialf a day it that such a railway would have made would have been possible to despatch by in the situation. Had it been built before train two or three battalions from the the sword was drawn, Alexieff could have former place to guard the latter. On the where they would have been within 40 landing place to Pulantien is 16 miles. A miles of the Yalu. The seizure of Pyongyang and the occupation of the whole of northern Korea would then have been easy been almost as interesting as the race for

chow and occupied Pulantien. It was terribly Port Arthur's communications with Liaoyang significant intelligence for it meant that the The two Generals further announce that things are quiet on the Yalu and that the Japanese Their communications were cut and the same time they add that I Japanese cavalry

the fighting lines.

It may be observed here that General The distance from Fenghwang to Mukden is 132 miles, and it may be assumed that a line of field telegraph exists via Liaoyang.

Thursday, May 12.
The Floug-Dessino bureau of intelligence says that at dawn on the 5th a Japanese army began to land at Pitsewo and at another place in theneighbourhood which we can not identify. There were about 60 transports. Russian outposts retired, and the Russian post and telegraph stations at Pitsewo were destroyed, their inmates withdrawing. According to Chinese accounts the Japanese force is very large. From the evening of the 5th(?) they opened fire on the point where the landing was to be made, and the men subsequently came ashore in two columns of a regiment each. One column went south; another south-west. A part of the Japanese fleet covered the landing, and another part watched Port Arthur during the 5th and

carried his men by train to Fenghwang other hand, the distance from the Japanese surely applaud them, and other countries will imitate them.

Pulantien has historical interest for the Japanese. It was there that the Chinese made one of the few really able strategical moves standing to their credit in the campaign of 1894-5. At two places the Liaotung Peninsula takes the form of a narrow listImus. Those places are Pulantien on the north and Kinchow on the south. When the Japanese troops had marched down the Peninsula and had just taken Port Arthur, news suddenly reached General Yamaji, who commanded the invading force, that the Chinese had moved down from Full times. It may be added that the lapanese landing to the proposed line from Fenghwang to Haitung Peninsula are the Kinchow Isthmus. They had at least ligence we learn that the Japanese landing to hours' leisure to garrison the western end place on the Liaotung Peninsula was near Pitsewo, and that a detachment rode over that the Chinese had moved down from Full times. It may be added that the length of the proposed line from Fenghwang to Haitung Peninsula are the Kinchow Isthmus and the Yenta Isthmus. They had at least to hours' leisure to garrison the western end of the latter Isthmus, in other words, to Pitsewo, and that a detachment rode over that the Chinese had moved down from Full that the Chinese had moved down from Full the chinese had moved down from Full the chinese had moved down from Full them.

Russian methods up to the present. They appear never to have opened the pages of Liaoyang in the war of 1894-5. history. In 1894 the Japanese crossed the Yalu at Sakuchin and routed the Chinese by pursuing almost the identical line of strategy followed last month. Russians were not prepared either for the crossing or the strategy. In 1894 the Japanese landed at Pitsewo, and pushed their outposts at once to the opposite coast. They did precisely the same things on the 5th and 6th instant, yet again the Russians allowed

themselves to be taken by surprise.

We have a later product also of the Floug-Dessino factory. We have a telegram from General Floug dated at Mukden on the 9th instant at 8.29 p.m. It indicates that a new toggle-joint has been introduced into the machine. Results are now to be recorded briefly without any reference to causes. The latest previous output of the factory was an assertion from Mukden that all was quiet on the Yalu and that the Japanese showed no sign of advancing. That was showed no sign of advancing. dated the 8th inst. Now comes this telegram of the 9th instant which says "the enemy is still in Fenghwang. He has sent out cavalry patrols along the Liaoyang mainroad and into the districts on either side of it." So on the 8th the Japanese were still on the Yalu showing no signs of advancing and on the 9th they were still in Fenghwang, which is 37 miles west of the Yalu. General Floug has adopted the casual style. Like Topsy's analysis of that natal prodigy, things are just to grow. When the Japanese take Haicheng, the Floug-Dessino factory will be smoothly evolving intelligence that they are still there, and when they take Port Arthur their presence in the fortress will be invested with a similar atmosphere of restfulness.

The telegram of the 9th further alleges

that no change has taken place in the com-munications with Port Arthur and other places in the fighting line. Yes, there has been no change. The communications with Port Arthur have not been restored. General Floug merely omits the trivial intervening incident that the communications were severed. It is as though a physician's bulletin were to record in consecutive issues that a patient's condition was unchanged, omitting to mention that he had died and been buried in the interval between the writing of the reports.

Friday, May 13

The shore on which the marines landed is said to have been low and flat, the only eminences being undulations at a short dis tance from the tide-line. As they waded over the shallows the marines pushed before them boats carrying field-pieces, which they ran ashore without much difficulty. Russian videttes were in sight, but they had no force capable of making any resistance. After the marines had planted the Rising Sun on the eminences and handed over the latter to the regular troops, which landed immediately afterwards, they re-embarked in the Hongkong Maru and the Nihon Maru. Landing in the face of the enemy being of all military operations the most perilous in these days of magazine rifles, a large proportion of casualties were expected, and due provision of hospital ships had been made. But not so much as one man was hurt, and it is related that among the troops there prevailed a sentiment that the whole affair had been over-easy.

Shanghai telegraphs (Asahi Shimbun) that the Russians are adopting most thorough measures to fortify and strengthen the Liao-Cossacks made their appearance on the supreme effort at clearly indicated places, yang position. It would seem to be their morning of the 10th at Anju and attacked There are still, however, two factors of un-

There has been a fatal likeness between the intention to await there a Japanese assault. The Japanese did not go as far as contented themselves with penetrating to Haicheng, and it is not inconceivable that they may adopt a similar policy on the present occasion. Were Russia ousted from the whole littoral of the Yellow Sea and the Gulf of Pechili, she might be left sitting at Liaoyang.

The Nichi Nichi's Chefoo correspondent wires that among foreigners there it is currently reported that the Japanese captured Dalny on the night of the 10th, and that the Russians have blown up all their Port Arthur vessels.

KOREA.

Monday, May 9.
In spite of the alleged fact that the Pope had appealed to the Japanese Government to protect the Roman Catholic element of the Korean population, it would seem that these latter, inspired probably by French missionaries, are hand-in-glove with the Russophil party in Korea and have contrived to cause much inconvenience to the Japan-ese. Now, however, the news of the Yalu victory is said to have convinced these people that all hope of a victorious Russian re-entry into Seoul must be abandoned, and that their most prudent course is to accept the situation as it stands. The Yalu is the situation as it stands. The Yalu is further said to be responsible for the recall of the Korean Representative in St. Peterburg. This official was recently reported to have retired to Paris, but the story proves to have been an invention. He remained at his post all the while, and the relations between Korea and Russia continued unchanged.

It is reported from Seoul that the Minister of Foreign Affairs has made a representation to the Emperor in the sense that neither Russia nor France is the country for Korea to lean upon: her only safe prop is Japan. His Excellency described to the Sovereign, so the story runs, the whole course of the war up to the present, and one can understand that the events to be related made a picture capable of impressing the mind of the Korean ruler. It is easy to ridicule Korea's vacillation; her leaning this way to-day and that way to-morrow. But what country would not vacillate in her position?

His Majesty's appreciation of the trend of events took a very practical form. When the Japanese, in their settlement in Seoul, organized a torch-light procession to cele-brate the battle of the Yalu, the Emperor contributed a thousand yen to the expenses.

Tuesday, May 10. There is a report that about 450 Russian troops have reached Kyongsong, but that they show no sign of moving south. Kyong-song is considerably to the north of Kilju. If Russia has no better use for her forces than to dissipate them for the purposes of these futile raids, we must suppose her to be

very amply supplied with men.

The buildings erected by the Russian timber company at Yong Am-pho have been completely destroyed by fire. This, we presume, is the work of some Koreans who retain terrible memories of the doings of the Cossacks. But the revenge is of an exceedingly vicarious character.

Thursday, May 12. There is a report from Seoul that 200

the place. The result of their effort is not stated. They are said to have ridden from Kaichhon, which would mean that they had travelled through the mountains from Wiwon, 200 miles up the Yalu, vià Kangke and Nyongpyong, an immense ride. But they may also have set out from Chhasan. In any case their essay, though gallant, must be pronounced futile.

Friday, May 13. The First Bank, which was recently reorted to be about to establish a temporary branch in Wiju, is now said to have abandoned that enterprise, and to be about to establish instead a permanent branch in Antung, where business will be opened about the 15th or 16th instead.

The Emperor of Korea has addressed a very strongly worded message to the Mini-sters of the Crown censuring their neglect of their duties; declaring that administrative affairs make no progress, and asking whether they regard their country with indifference or consider their Sovereign's beliests of no importance. This message is said to have been elicited by the prevalence of party squabbles which have had the effect of paralysing official competence. The immediate result has been the resignation of the Cabinet en bloc, but it is not imagined that any great importance attaches to the latter step or that the Ministers will persist.

NEWCHWANG.

Saturday, May 7. The Nichi Nichi's Chefoo correspondent alleges that according to statements made by Chinese subjects who have fled from Port Arthur, Newchwang and Talien, they were compelled to escape, since the only alternative was to serve in the Russian ranks without pay, with very inferior weapons and in consideration solely of receiving food. To decline involved being driven out, and so they chose flight. The story is scarcely credible. We can not suppose that the Russians would put arms into the hands of such men under such circumstances.

Wednesday, May 11.
From Peking and Chefoo comes intelligence that the Russians show signs of withdrawing from Newchwang and concentrating at Liaoyang. Newchwang, indeed, has ceased to be of any use in the plan of cam-paign. It was put into a state of defence solely for the purpose of preventing a Japanese landing there. In almost every quarter an impression prevailed at one time that such a landing would take place. We never believed it ourselves, but it was no part of our business to say so. Now, however, the Japanese plan of campaign has developed sufficiently to show that Newchwang has no particular military importance, and that its defenders may be more usefully employed elsewhere.

Thursday, May 12. News continues to arrive that the Russians are deserting Newchwang. Various details are given, but the gist of them is that the troops are being withdrawn to Tashikiao, not only from the port but also from the regions immediately westward of it. That is perfectly natural. Russia now knows where her defensive efforts must be concentrated. Hitherto her strength has been dissipated by the necessity of preparing to meet eventualities atunknown points throughout a wide region. Now she can draw in her greatly extended flanks and knit her forces for a

certainty-the Third and the Fourth Japanese Armies. It has been truly said that events shape strategy. We are witnessing a verification of the adage. Meanwhile

Newchwang itself is probably rejoicing.
There are various rumours of injury done to the Manchurian railway by Hunghutze.

MAJOR-GENERAL DESSINO.

The following letter has appeared in Shanghai journals :

SIR,—Having noticed in the Japan Daily Mail of the 14th instant a paragraph in which it is attempted to show that I apparently pervent the text of those telegrams received by me from the theatre of war and, in this condition have them published in the

newspapers.
This imputation being absolutely without foundation I beg to inform you that those messages are duly published in the actual condition in which they are received, also that I disclose the authority which gave

Attached, as I am, to the Imperial Russian Milliary-Diplomatic Service in China I could not, even if I so desired, subvert the context of telegrams despatched with the authority of the Viceroy Alexieff and with which facts the author of the paragraph in Inpan Daily Mail should be familiar. In conclusion I beg to state that I consider the publication of such as frivolous, dishonorable and unbecoming a recognized based the set of referred integrations.

as involus, distinct and disconning a recognized leader of refined journalism.

Apologising for encroaching upon your space,
With thanks in advance, I beg to remain, Sir, Yours faithfully,

Imperial Russian Military Agent in China.

The paragraph alluded to by Major-General Dessino is this :-

This veracious historian now professes to have received a letter from Mukden dated 11 a.m. on the 29th of March, to the effect that the Russian boats succeeded in sinking the four Japanese blocking steanners at a long distance from their intended berths, and that, according to subsequent investigations, they were all new steamers, constructed for the purpose, each over 2,000 tons. The dictionary will soon have to include a "Dessino" among current terms.

We frankly admit that we doubted whether Major-General Dessino's wishes had not led him to read into his intelligence from Mukden a meaning which the facts did not warrant. But since he now declares that he has always published, without addition or subtraction of any kind, the despatches authoritatively sent to him, we withdraw our implication and offer an apology. In doing so, however, we can not for a moment admit that the despatches themselves were undeserving of the strictures applied to them. It is unnecessary to assume, and we have no intention of suggesting, that the statements they contained were deli-berate perversions of truth, but we most emphatically insist that they did pervert the truth, pervert it most signally, although no part of the responsibility may have rested on Major-General Dessino's shoulders. All is fair in love and in war. There may be exigencies which impose upon military leaders and duty of concealment, exaggeration and even falsehood. There may be also an altogether insuperable propensity to see things in a false light when they are observed through patriotic spectacles. Which explanation is correct the public are not bound to determine, but they certainly have the right to exercise discrimination and to withhold cremine, but they certainly have the right to exercise discrimination and to withhold cremine.

The following to operate on a large scale to the sum of their victims and their victims and their reflictions of their victims and reflictions. These bands now agglomerating in Mukden and Liaoyang are said to be influenced solely by anti-Russian sentiment, but their capability to distinguish one Western nationality from another may be questioned, and we can be quite sure that the Russians will ask the world to class them with the Iho-chuan of 1900. Let us judge them by their deeds, however. as well as irreconcilable with ascertained results. Unfortunately for himself Major-General Dessino has been the involuntary medium of publishing several extremely misleading narratives, and to say that publicists who analyse these narratives and associate him with their contents are doing anything "frivolous" or "dishonourable" seems to us to be an abuse of terms.

MR. KURINO ARRIVES HOME.

Mr. Kurino, who arrived in Yokohama on Friday, told a correspondent of the Jiji Shimpo in Kobe on the evening of the 5th that Russia did not originally expect war, she looked to intimidate Japan. But when, on the 6th of infinidate Japan. But when, on the out of the February, Mr. Kurino, acting in accordance with instructions from Tokyo, proceeded to produced on Chinese sentiment by the the Foreign Office and announced the rupture of diplomatic relations, it appeared that of restraining the Chinese in a position of the crisis had been foreseen, for the informa-tion was received calmly. The present war, Mr. Kurino thinks, is not in accord with the wishes of the Russian nation. Already the people are tired of paying heavy taxes on account of Far-Eastern enterprises which do not directly concern them, and now they are asked to give their lives and their treasure on the same account. Nevertheless it would be over-hasty to infer that any domestic disturbances will occur. There are some signs of unrest in the Caucasus, in Poland, and in Finland, but the malcontents have no organization that fits them to meet regular troops. The Nihilists can do nothing unless they manage to win the army to their side, and that is what they are now trying to do. As for the predictions that Ruswould be straitened for funds, they are not likely to be realized. Russia has a large war reserve amassed by way of have foreseen a danger that news of precaution against Germany. Probably it Japanese successes might drive him to amounts to a thousand million yen. Be-openly abandon the task of useless concilia-sides she has specie reserves in the Banks of tion, and to employ his remnant of authority. England, France, Holland and Germany, in a manner more consistent with manhood, as security for her bonds. These reserves aggregate about 2 years' interest on her debt. These are doubtless the main reasons why her bonds depreciated comparatively they must take upon their own shoulders the little after the outbreak of war. Finally, she can easily make re-allotments of large amounts from her annual appropriations on account of public works.

A RUSSIAN SOUTHWARD MOVEMENT.

A telegram from Peking says that the Russian forces are moving rapidly southward from Liaoyang to Kaiping. This last-named place is on the west side of the Liaotung Peninsula, a little south of Tashikiao where the Newchwang-Talien Railway joins the Mukden-Port Arthur line. If General Kuropatkin be moving any considerable body of troops in the manner here suggested, it must be in anticipation of a Japanese landing somewhere in the immediately vicinity of check or beating back the advance of General Kuroki's army from the Yalu, and the task of crushing any Japanese force that may land on the littoral of Manchuria. One needs his army driven back upon Liaoyang by the Japanese from the Yalu, then it is easy to appreciate the situation in which the troops south of Liaoyang would find themselves, depending for their supplies solely on the directly threatened by the enemy.

RUSSIA AND CHINA,

Saturday, May 7.

It is stated by the Jiji Shimpo's Peking correspondent that the Russians in Mukden have confiscated all the weapons of war in the possession of General Tseng's soldiers. If this be credible it creates a curious situation. Doubtless the Russians have been strict neutrality is becoming slender, and that the wisest course is to destroy the mis-chivous potentialities of this uncertain ele-ment. From that point of view they are probably right in the step they have taken. The situation was so anomalous as to defy efficient control. On the one hand, General Tseng was exercising administrative functions under the authority of the Peking Government and had troops under his command for the purpose of enforcing his mandates; on the other, the Russians were in military possession and Tseng could not move a finger without their endorsement. It would appear that the unfortunate Governor-General has been driven to a state of desperation by the inevitable failure of his futile attempts to preserve the sovereign dignity of Peking while submitting to the military mandates of St. Petersburg, and the Russians may asserting his authority, and it follows that they must take upon their own shoulders the whole responsibility of administration as well as the preservation of order rendered doubly unstable by the presence of that proverbially lawless element, a mob of disbanded Chinese soldiers without any lawful means of sub-sistence. Viceroy Alexieff has a hard task. Perhaps his best plan would be proclaim martial law throughout the whole of Manchuria. Could he conjure up half a million troops in addition to those he already commands, that method would be easy.

Supplementing the above news comes intelligence from the same source that there have been organized, or are in process of organization in Mukden and Liaoyang, bands of patriots calling themselves *Innichian*, or the "party of popular rights." The Boxers went by the name of Iho-chuan, and there is an unpleasant resemblance between the two Liaotung. In other words, he has assigned terms. Of course the Boxers were in their for himself two tasks; the task of holding in own eyes as good patriots on ever walked own eyes as good patriots on ever walked up to the muzzle of a cannon, and it would not be at all difficult to prove that, judged even by Occidental canons and motives, Were there any spark of patriotism, however faint, among the Chinese inhabitants of Manchuria, the place would have long ago become unpleasantly hot for the Russians, whose recent attempts to allay the flame of single railway whose central point was indignation their exactions and outrages have been fanning prove the alarm they feel at the

prospect. If the Imin-chuan turn their attention to railway wrecking, and if they suc-ceed as well as their namesakes of 1900 who with their naked hands tore up miles of

Wednesday, May 11.

Reports continue to be received showing that the Chinese are becoming more and more difficult to restrain in a position of strict neutrality. Japan's recent operations have naturally roused China's troops to a sharpened sense of the ignominy of remaining idle under the circumstances. They are enraged, too, more and more enraged, by knowing. But this statement attributed to Russia's arbitrary action in the West Liao him by the Journal betrays remarkable region and General Ma himself is said to have petitioned the Throne for leave to adopt a stronger course. It is in connexion with this state of affairs that Reuter telegraphed a few days ago about the exertions of the Foreign Representatives in Peking to prevent any rupture of neutrality. Nevertheless the danger does not seem to us to be so very imminent. China must understand tolerably well what she gains by keeping quiet and what she might lose by drawing the sword. Perhaps the main source of peril is Russia herself. If Russia finds her situation desperate in Manchuria, she may deliberately goad the Chinese beyond patience with the object of calling into active operation the provisions of the Russo-French agreement which binds France to come to her ally's assistance in the event of the latter being attacked by two Powers. The weight that France could throw into the scale would far out-balance anything that China could contribute in the way of belligerent force. But the question arises, would the agreement apply to such a case. Is France bound to come to Russia's assistance what-ever may have been the prelude to such a conjuncture? M. Delcassé would scarcely answer in the affirmative, we think. That eminently prudent and far-sighted statesman would searcely admit that his country is pledged to endorse every procedure adopted by Russia from the moment that it involves war. If Russia respect China's neutrality China will remain neutral. If Russia persist in treating Chinese territory as within the belligerent area, China, on her side, may cease to be neutral. Does France, in the latter event, incur the responsibility of standing between Russia and the consequences of Russian arbitrariness?

By way of illustrating the curious situation now existing, news comes that on the singular appreciation of floral beauty by birds 5th instant the Hunghutze wrecked a part was given by Signor Beccari, who says that of the railway and cut the telegraph line they build a hut about two feet in height, near Mukden, whereupon Viceroy Alexieff with the central support of a small tree near Mukden, whereupon Viceroy Alexiett with the central support of a small tree required Governor-General Tseng to station growing in a glade or clearing in the dense of Chinese troops along the line for the purpose of guarding it. Tseng is said to have complied, and thereupon Mr. Uchida, Japanese Minister in Peking, addressed a formal interior, access to which is by an angular remonstrance to the Chinese Government in opening, the central support of a small tree railroad—it could either build the line with the support of a small tree railroad—it could either build the line with the support of construction, or, thirdly, endow with sufficient power some company whose interests would be the same as the Government's interior, access to which is by an angular opening, the central support of a small tree railroad—it could either build the line with the support of construction, or, thirdly, endow with sufficient power some company whose interests. The annual cost to the American Government of providing for 800 miles of Philippine railroad—it could either build the line with the central support of a small tree railroad—it could either build the line with the dense its own forces, or it could either build the line with the dense its own forces, or it could either build the line with the dense its own forces, or it could either build the line with the dense its own forces, or it could either build the line with the dense its own forces, or it could either build the line with the dense its own forces, or it could either build the line with the line with the dense its own forces, or it could either build the line with the troops was a flagrant breach of neutrality. promenade is made between it and the slopAnd so in truth it is. Conceive the notion ing roof. But the extraordinary effort of ment. If by the constructing of the railof a neutral State using its military forces to this bird is in evidence outside his playhouse, roads the necessity of a standing army guard the communications of a belligerent! for in front is laid out, with infinite care, should be removed and a native constabulary Neutrality becomes an absolute farce in such a garden. Fresh moss is brought by the established the inestimable benefit is apparent. conditions. No one knows that better than diligent occupants, and a verdant carpet, Viceroy Alexieff. His condition must be almost desperate when he resorts to such exclosing about six feet, is first prepared, most desperate when he resorts to such exclosing about six feet, is first prepared, most desperate when he resorts to such exclosing about six feet, is first prepared, most desperate when he resorts to such exclosing about six feet, is first prepared, and pedients. And in deed the same inference is and berries of every variety to delight the one Frenchman, arrived at Hakodate on the to be drawn from his using Chinese soldiers eyes. As these wither or become unsightly 8th instant by steamer. They report that at all for such a purpose. It is a veritable they are removed and laid in a heap at the every facility was given to them by the case of quis custodies custodies. The Chinese back of the hut, presumably out of sight of Russians; that they did not suffer any moment become more dangerons to the mossy lawn are placed continually fresh ed with provisions. These furtifiers report

NOTES ON CURRENT EVENTS.

During his voyage from Port Said to Marseilles, Baron Rosen is said to have track, more will be heard of these patriots. informed a member of the Journal's staff that whereas many of the principal political leaders in Japan were in favour of a pacific settlement, "General Terauchi, the War Minister, and Baron Yamamoto, the Naval Minister, were intractable and demanded war." We can not believe that Baron ignorance; ignorance which is not conceivable. We find it incomparably easier to assume that the Journal's reporter made a mistake than to imagine Baron Rosen using such words.

> Tokyo organized an immense lantern pro-cession on Sunday night. All the newspapers of the capital took part, as did also several of the newspaper correspondents now staying in the Imperial Hotel. At the Babasaki Gate leading into the outer enclosure of p.m. the Palace, a terrible accident occurred. The police suddenly closed the gate in the face of the crowd, and as hundreds of people were already on the narrow bridge over the moat, while thousands, ignorant of the closing of the gate, were pressing from behind, nineteen young folks were crushed to death. Then the crowd, learning that admission from the Baba side was impossible, surged round to the Sakurada gate, and there met the outflowing stream of onlookers. In the collision of the two currents, 15 persons were wounded. From a city of rejoicing Tokyo was converted into a city of mourning.

This procession was organized chiefly by the newspapers of Tokyo. They also despatched to General Kuroki and Admiral Togo warm messages of appreciation and congratulation,

There is only one creature that we know of besides mankind which shows its appreciation of flowers and green foliage by adorning its home with them, and that is the "gar-dener bird" of New Guinea (Amblyornis inornatus), a member of the family of bower birds which are peculiar to the Austral region, including New Guinea. Some naturalists place these bower birds among the birds of paradise. The first account of such any moment become more dangerons to the mossy lawn are placed continually fresh ed with provisions. These fugitives report property under their care than even the blooms. As far as is known each of these that there are 600 Russian soldiers with 6 Hung-hutze would be.

birds, and it is not certain whether the tasteful decorations are arranged by the male only; it would be pleasant to think that it was so—that all this refined effort was but to show his devotion and to make some little reparation for his lack of beauty and dingy appearance.

One of the many smart coaling performances, for which the Mitsu Bishi Company war." We can not believe that Baron and Nagasaki are jointly famous, took place Rosen made that assertion. Baron Rosen in connection with the R.M.S. Empress of knew much about the Japanese. It was Japan, says the Nagasaki Press. The steamer his business to know and he had means of was late leaving Vancouver and owing to an extra stormy passage only one day, instead of two as desired, was gained before reaching Yokohama. The vessel went direct to Nagasaki without touching at Kobe and arrived there at 1 p.m. In order to fulfil her mail contract it was necessary for her to leave the same evening for Shanghai. Coaling commenced at 2 p.m. but it was not until 2.30 that all the gangs were at work. At 6 p.m. precisely coaling was stopped, no less than 1,235 tons having been taken on board, an average of about 320 tons an hour, and the Empress resumed her voyage at 6.30

> Sir William Van Horne, says Harper's Weekly, has given some very good advice touching projected railroads in the Philippines, drawn from his experience in Cuba. Sir William declares that the success which has attended his efforts in Cuba is largely due to the methods employed in dealing with the native inhabitants. Had he and his colleagues been guided by a short-sighted policy of chipping off a little here and a little there at the expense of the native, in Sir William's opinion he would have been doomed to failure. Seeds would have been planted which would have borne bitter fruit for generations. He endeavoured not only to obtain, but even more, to deserve, the confidence of the natives from the very outset as the basis of operations. He employed only native labour in constructing the 400 miles of the Cuban railroad, and awarded no building contracts. To have done so would, in Sir William's view, have been suicidal. His success in Cuba convinces him that the same policy should be followed in the Philippines if the dual object of the American Governmentto educate the Filipinos in respect for the Americans, and confidence in them, and at the same time to bring about the industrial development of the islands—is to be secured. The Government has three alternatives in constructing the projected Philippine railroad-it could either build the line with

The total payments by life-insurance companies-including death claims, dividends, cash surrenders, annuities and other estimated payments-amount in the United States alone to about \$350,000,000 (gold) annually. In other words, the life-insurance companies a larger sum than the entire national debt of the country. The distribution of this sum in life-insurance payments illustrates the beneficent work and shows the tremendous amount of good that life insurance accomplishes by the payment of large sums in the time of greatest need. As nearly as can be calculated, there are twenty two American cities in which life-insurance payments annually amount to over \$1,000,-000. New York City leads with annual payments of about \$23,000,000. Philadelphia, Chicago and Brooklyn follow in the order named. The following table shows the cities in which the life insurance payments in 1902 amounted to over \$1,000,000:

New York\$	22,945,475
Philadelphia	8,926,098
Chicago	6,922,457
Brooklyn	6,805,277
Boston	6,024,583
St. Louis	3,727,666
Baltimore	3,660,600

In New York State the amount of life-

penury. It is stated that the Municipality have petitioned the Minister of Finance to It is stated that the Municipality issue orders that the collection of debts by the Bank of Agriculture and Commerce shall cease until the war is over.

THE WAR ILLUSTRATED.

Foreigners who have inspected some of the cheap, flaming prints that issue almost daily from Tokyo workshops professing to pourtray scenes of the war will be interested by the reproductions in the Graphic (April 2nd) of similar sheets that are scattered broadcast to impress the popular of the control of t that are scattered broadcast to impress the populace in St. Petersburg. The latter are two in number and depict one of the incidents invented by Russian official chroniclers—"The bombardment of Port Arthur and the sinking of a Japanese cruiser. Our losses almost nil." One shows a Japanese warship sinking under a storm of shell and the glare of many search-lights and the other presents an even more harrowing spectacle, but in this case the electric beam is dispensed with. As in the Japanese pictures the huge warships fight almost at arm's length, lack of space dictating resort to this trifling inaccuracy. huge warships fight almost at arm's length, lack of space dictating resort to this trifling inaccuracy. A double page picture of the Guards leaving Tokyo for the front is above the average of the war sketches that have been published, and the other scenes associated with the war—including the Japanese landing at Chemulpo—are worthy of praise. Miss Bovill's sketch of a lantern procession is also a capital piece of work.

bare There on the old black chair. The dear dilapidation of the place Smiles in my face, And I am loath to go.

Here from the window is a glimpse of sea, Enough for me;

And every evening, through the window bars. Peer in the friendly stars.

And yet I know That some day I must go, and close the

door And see the House no more.

MARY BURT MESSER.

YACHTING.

The yachting season of the Yokohama clubs opened on Saturday afternoon with fine weather,

opened on Saturday afternoon with fine weather, though the wind was very light and fluky. The various yachts were able to go over the courses laid down for them—though at times they barely had steerage way—and to finish long before dark. As neither Mary nor Maid Marion was ready to start, Kingfisher did not care for me sail over, and the race for Yokohama Yacht Club 39 raters did not come off. All the Cruising Class were under way some time before the first gun was fired, but there seemed hardly enough wind to take them up to the line. Asagao was first across, In New York State the amount of life-insurance payments in 1902 was \$47,900,000. Pennsylvania followed with \$24,400,000. Massachusetts came next with \$16,600,000. The state of affairs in Vladivostock is reported to be quite pitiable. All trade has come to an end, and the banks having closed down on their debtors, the latter have had to come into the market as sellers of property for which there are no buyers. Sharp distress has resulted, and many people hitherto well to do have been reduced to penury. It is stated that the Municipality and \$\mathcal{Syray}\$, seconds only separating these three as and Soray, seconds only separating these three as they gybed round the Lightship and set spin-nakers to starboard, and they had a close race right to the finish, with Asagao gradually closing

Daimyo took first prize by 10 seconds corrected time from Nina, the official return being:—

, , , , , , , , , , , , , , , , , , , ,	
	h.m.s.
Daimyo	4.14.12.
Nina	4.14.22.
Wanderer	4.15.20.
Kathleen	4.17.45.
Asagao	4.26.95.
Spray	4.30.00.

Daintyo takes first prize and two record points; Nina wins second prize and one record point.

The yachts of the Mosquito Yacht Club The yachts of the Mosquito Yacht Club had a race over course No. 2—out to the Lightship, thence to Quarantine Ship and back to the Lightship (figure of eight) then home. The prize was a cup presented by the Hon. Sec. (Mr. J. J. M. Carst). The starting gun was fired at 2.15.00 and Winsome was over sharp on the report, Sunbeam four seconds, Edna 30 seconds, Pele 55 seconds, and Chocho (former Wandeska) 1 m. 10 secs later. Winsome held her lead on the beat out to the Lightship and Pele worked into second place, a short board required at the mark throwing Sunbam out of that berth.

at 3.36.45; Pele had run up on her and followed at 3.39.00; Sunbeam, however, had slowed down and only got round 25s. (3.44.20) ahead of Chocho (3.44.45). Running in, Pele drew up on Winsome and finished first, some half-a-dozen hosts of the difference of the diff boats of the different classes coming up the har-bour in a picturesque bunch. The official times

	Finish,	Club	Time.	Correcte
	h.m.s.			h.m.s.
Chocho	.4.33.30	2	.38	.4.30.52
Edna	4.38,00	0	52	4.37.08
Pele	4.32.19	0	52	.4.31.27
Winsome	4.32.55		-	.4.32.55
Sunbeam	4.36.30	0	\$2	4.34.58

Seven "Larks" were ready when the starting gun went at 2.30.00, but after No. 6 (the property of Mr. H. A. Poole but sailed by Mr. J. Drummond) had crossed the line the others J. Drummond) had crossed the line the others returned and after dodging about for ten minutes or so went away on a two-gun signal as usually given. The course was to the Lightship and back and they gradually caught up No. 6 and passed her, finishing pretty close to one another. No. 13 (Mr. P. Gampert) had certainly the best position approaching the finish line but by an unnecessary tack allowed No. 14 (Mr. M. F. Stephens) to come up and finish level with him Stephens) to come up and finish level with him, No. 12 (Mr. H. A. Poole) a few seconds off, No. 10 (Mr. Stephens) came next. The other boats were: No. 1 (Mr. O. T. Gillon) and No. 5 (Mr. C. H. Abbey).

The members of the Mosquito Yacht Club opened their cruising season with a trip to Tomioka on Sunday, which, with sunny weather and a fine southerly breeze for the run home, proved a most delightful outing. Twenty-four men started about 10 a.m. in Aborigine (the flagship), Nina, Pete, Sunbeam, Chocho, a Lark, and a launch, which, owing to lack of wind in the forenoon, had to tow the yachts to Tomioka. Tiffin was eaten and the afternoon was enjoyably spent at the Clubhouse, where photographs were taken and various games occupied the party till after 3 o'clock, when the homeward stage of the excursion was begun. A capital breeze had sprung up and the yachts rattled home in fine style, arriving about 4 o'clock.

BIG FIRE AT OTAKU.

Details with regard to the great conflagra-tion at Otaru have been received by Tokyo papers and show that 2,481 buildings consisting papers and show that 2,481 Dutlongs consisting of 2,745 dwellings were destroyed, including the Exchange, Mitsui Bank, Nippon Commercial Bank, Tax Bureau, Custom House, Post Office, etc. The damage was estimated at over three million yen. One man was killed. Baron Sonoda, Governor of Hokkaido, proceeded to the scene to inspect the damage, which affects

almost one-third of the city.

According to an official report, the fire occurred on May 11th at 9.5 a.m. at Inaho-machi, the flames extending to Ironai, Minamihama, Kitahama and other surrounding streets owing to the strong wind prevailing. The loss included 1,228 buildings which comprised 2,482 dwellings, 11 godowns, 247 sheds, one post office, one tax office, 2 police sub-stations, one school, 6 banks, one exchange office, one Shinto temple, one Buddhist temple, 3 hospitals and 4 others, and also 240 telegraph poles. The homeless people were temporarily removed to Buddhist temples and schools, where they are receiving relief from the local government.

The total loss of the Tokyo, Meiji and five other fire insurance companies is reported by the Jiji to be over yen 220,000.

Fire broke out on May 6th at the village of Imae, Nomi, near Kanazawa, destroying forty

Fire broke out in a farm house at Mita-mura, Aiko-gori, Kanagawa Prefecture, on the afternoon of the 8th inst. Twelve houses and four godowns

THE BATTLE OF THE YALU.

T is now possible to form a tolerably clear idea of the battle of the Yalu and to correct some misapprehensions suggested by the fragmentary accounts that came to hand at first

At Wiju the Yalu has a width of from 7,000 to 8,000 metres, but the actual watersurface is comparatively small, the bed being occupied by many islands of which the largest (Keumchong-do) measures nearly 10 miles in circumference. These islands divide the river into three channels. Only the central, however, can not be crossed without a bridge or a boat: the two side channels are passable by wading waist-deep, unless the river be in flood. On the Man- of the Yalu from Antung downwards, the churian side the banks are steep, and the gunboats, torpedoers and launches not only walled city of Kiulien, nearly opposite to searching the right bank with their fire, but Wiju, stands on ground elevated some 60 also threatening to land a force at some metres above the river. At dawn on the 28th two companies of the Guards crossed by boat to Tiger's Hill. Evidences of the deadliness of their fire on the preceding day were seen in the corpses of 95 horses. The body of an officer also was

The two companies of Guards then continued their march northward to the eminence at Yulchawon. Here a detachment of about 30 Russians were posted. These the Guards succeeded in dislodging without any casualties to themselves, though the enemy left 5 dead upon the field. Thus the important hills lying in the angle between the Ai and the Yalu passed into Japanese occupation, and so soon as artillery could be posted there the tenure of Kiulien by the enemy must have become very precarious. On this day (28th) the Russians were observed to be entrenching positions on the eminences beyond the right bank of the Ai; that is to say, the eminences of Makau and Yushikau, northward of Kiulien. The whole position might have been entrenched a long time previously, but there appears to have been a great lack of serious diligence.

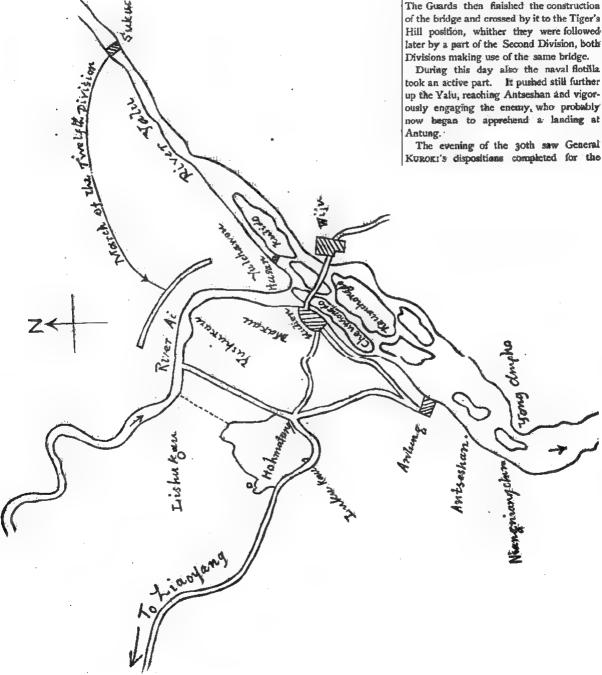

On the 29th the Guards proceeded to bridge the stream across which they had sent two companies on the preceding day: the stream between Kulido island and Tiger's Hill. This hill covered the bridge-builders against direct artillery fire By the 27th of April everything had been from the Makau heights, and the high allowed themselves to be dislodged so easily. In short further assume that the final destination of ed solely to secure Japan's gold currency they served for news-carriers, neither more these transports depended on the issue of the system; in other words, to guarantee the nor less. These things render it difficult Yalu engagement. Had General KUROKI'S convertibility of her notes. No part of to believe that Kinchow is really the fine attack on the Russian positions failed, it is to be devoted to meeting outlays on landing place, unless indeed we assume then the Second Army would doubtless account of the war. In fact, the whole of the that the overweening confidence of the have been thrown ashore at some point proceeds will probably be kept in London; Russians as to their own superiority on on the littoral of the Yellow Sea, probably such funds as are needed for belligerent land—the confidence which led Kuropatkin Takushan, whence the Russians at Kiulien expenditures being obtained by domestic to declare that he would dictate terms of and Fenghwang would have been menaced peace in Tokyo—betrayed them into neglect-by an assault from their right rear. But floated ere long. The Government of Japan ing the most rudimentary precautions. Kuroki's attack having succeeded, the will thus be absolutely relieved of anxiety Another somewhat puzzling feature of blocking steamers, all held in previous on account of the stability of its currency, the incident is that among the ships taking readiness, are launched at Port Arthur, and will be able to apply all its available part in the landing operation was the and the Liaotung Peninsula becomes the funds without stint to the prosecution of the Squadron under Rear-Admiral Hosoya objective of the Second Army. If that war. It was well worth while, in fact it was which, only two full days previously, had has really been the programme, if all a measure showing the courage of true been bombarding the Russian positions in its parts have been mutually subordinated statesmanship, to make some pecuniary the Yalu. It is quite within the range of and associated with such excellent celerity sacrifices for the sake of arriving at such a practical possibilities that this squadron, and fine synchronism, the Japanese are to result; for the sake of effectually protecting having assisted at the capture of Antung on be congratulated on a display of strategical the national currency against all perils. Better the forenoon of May 1st, steamed down to and organizing ability which will elicit the world's applause.

THE NEW FOREIGN LOAN.

THE following is a translation of the Imperial Ordinance just issued with reference to a new foreign loan :-

IMPERIAL ORDINANCE No. 138, PROMULGATED MAY 10TH, 1904.

Art. 1.—A loan of ten million pounds sterling (£10,000,000) shall be raised in London and New York in accordance with Law No. 1 of the 37th year of Meiji. This Loan shall be issued through under-

on April 5th and October 5th of each year, respectively for the preceding six months including the month of payment.

Art. V.—The bonds to be issued for the Loan shall be unregistered, with coupons attached, and the face value shall be stated in English currency, and shall be of two denominations; namely one hundred and two hundred pounds sterling respectively.

The rate of exchange between English and American currencies shall be fixed at one pound sterling to four dollars and eighty-seven cents.

Art. VI.—Mattured coupons and drawn bonds of the Loan shall be accepted without question in payment of the Customs duties at the rate of two shillings and one half penny to one year.

lings and one half penny to one yen.
Art. VII.—The payment of the principal and interest of the Loan shall be a first charge upon cus-

SUPPLEMENTARY PROVISION.

This Imperial Ordinance shall be in force on and after the date of promulgation.

terms could doubtless have been obtained by waiting, but to wait would have been to prolong a feeling of insecurity likely to cost the country a great deal more than the expense it now incurs. What has been done, in a word, is to insure the national currency against war risks, and in order to avoid having to pay a war-rate premium, it would have been necessary to wait until the reasons for insurance had correspondingly diminished. Business men will now be able to prosecute their various enterprises with an unperturbed mind, an advantage of incalculable value. As for the loan itself, it becomes payable in part or in toto from April, 1907, and it must be paid off completely by April, 1911. The shortness of the period could not fail to affect the terms offered by foreign capitalists, to whom a long outlying loan is far more attractive. But the Japanese Government has been well advised in making this transaction of a temporary character, and it will also be wise enough, we entertain no doubt, to wipe off the liability at the earliest possi-

AN INSIDIOUS ENEMY OF JAPAN.

IN The Literary Digest of April 9th there appears an article headed "Revolt against Japan's Censorship." Among the quotations of which the article is composed the following is taken from the Kobe Chronicle:-

"Indeed, for some days before the actual rupture of negotiations occurred, attempts made to send to Europe definite information of the critical state of affairs; and of the certainty that failing the receipt of Peninsula by dawn on the 5th. And on that day the landing is effected. In our reading of history we do not remember any series of consecutive operations carried the face value of one hundred pounds sterling and ten shillings against the face value of one hundred pounds sterling.

Art. III.—The issue price of the Loan shall be take action—all such references in the press messages were struck out, so that news of the actual one four monthly installments from May to August of the face value of one hundred pounds sterling.

Art. IX.—Subscriptions to the Loan shall be paid in four monthly installments from May to August of the certainty that failing the receipt of the Russian reply within a certain time Japan would take action—all such references in the press messages were struck out, so that news of the actual or representation of the certainty that failing the receipt of the Russian reply within a certain time Japan would take action—all such references in the press messages were struck out, so that news of the actual or representation.

Art. IX.—Subscriptions to the Loan shall be paid in four monthly installments from May to August of the certainty that failing the receipt of the Russian reply within a certain time Japan would take action—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so that news of the actual or representation—all such references in the press messages were struck out, so was deliberately intended to take Russia by surprise and strike a blow before it was realized in St. Petersburg that the rupture of diplomatic relations meant the beginning of hostilities. It is even rumoured in Tokyo that for ten days before the actual rupture of relations took place not a single telegram—whether despatched by a legation or a private individual—was allowed to leave Tokyo for abroad."

The most malevolent charge preferred against Japan in connexion with this war was a charge of treachery. She was accused of striking without due notice; following, in short, a dishonourable course by attacking Russia before the latter had any conception that war really threatened. The world's jurisconsults, without exception, have laughed this accusation to scorn, and we have hitherto supposed that by Russians alone had such a foolish and unwarrantable slander been uttered. Least of all should we have looked to find it supported by an English journal and that, too, an English journal published in Japan. We now learn, however, from the above extract, that the Kobe Chronicle lent its full assistance to the enemies of Japan, and endeavoured to fix upon this country the stigma of treachery. It unequivocally affirmed that some days before the rupture of negotiations press telegrams compiled in Tokyo were purged of all references giving information of a critical state of affairs or of the "certainty that failing the receipt of the Russian reply within a certain time Japan would take action," and it added that, according to rumour current in Tokyo, "for ten days before the actual rupture of relations took place not a single telegram—whether despatched by a Legation or a private individual—was allowed to leave Tokyo for abroad." "Such methods," the Kobe Chronicle declared, "naturally suggest that it was deliberately intended to take " for ten days before the actual rupture of relations took place not a single telegramwhether despatched by a Legation or a that it was deliberately intended to take Russia by surprise and strike a blow before it was realized in St. Petersburg that the rupture of diplomatic negotiations meant the beginning of hostilities." And in order to beginning of hostilities. The independent is patient. Events would move rapidly the Russian Note proved materially unsatisfactory, if the Russian Note proved materially unsatisfactory, is the proved materially unsatisfactory. that it was deliberately intended to take extend the circle of indignation against ing an ultimatum. Japan's alleged treachery, the Kobe journal further opined that, in consequence of this garbling and suppression by the Tokyo Authorities "news of the actual rupture must have come upon Europe with a considerable shock, to the great injury of trade and commerce generally."

The reader will perceive that two charges are made and that they are flagrantly inconsistent. For the first is that certain references only were elided from press telegrams during "some days" before the actual rupture of negotiations, whereas the second is that during ten days before the rupture " not a single telegram was allowed to leave Tokyo for abroad." Apparently the Kobe Chronicle's desire to malign and discredit Japan was so blinding that it failed to detect the obviously contradictory nature of its libels. However, that is a minor question. What we have to inquire is whether there are grounds for affirming that official mutilation and suppression of telegrams took place with the object of betraying the world in general and Russia in particular into a sense of false security in order that Japan sense of false security in order that Japan has no intention of replying and is treating Japan the security in order that Japan sense of false security in order that Japan has no intention of replying and is treating Japan to detect the obviously contradictory nature to detect the obviously contradictory nature of the Emperor.

Great importance is attached to this conference.

Store of the Emperor.

Great importance is attached to this conference.

Ha an interview yesterday between Baron Rosen and Baron Komura, which took place at the latter's and Baron Komura, which took place at the latter's later on concealment of their exasperation at the requirement of their exasperation at the requirement of their exasperation at the report which has now come from post post of the proposition of the Europe that the reply is again postponed for several days is not, in the circumstances, a complete surprise, but it has caused profound regret, since the delay is not in the circumstances, a complete surprise. Baron Rosen will leave Tokyo on the 12th inst., after an audience of the Mikado on the 11th, which are the fallow of the Chyon on the report which has now come from the proposition of the proposition of the Constant of the Emperor.

An ordinance was issued to-day fixing the war

An ordinance was issued to-day nxing the war pay of the Japanese army and navy.

No official intimation of the cessation of comercial traffic by the Trans-Asian Railway has reached the Japanese postal officials. Tokyo, February 1.

Tokyo, February I.

Beyond the fact that the Russian reply has not yet arrived, there is absolutely no trustworthy information to be obtained regarding the situation. Well-informed circles, however, do not take a sanguine view as to the likelihood of Russia's answer proving easisfactors.

THE JAPANESE DEMANDS. OPINION IN PEKING.

(From Our Correspondent.)

Tokyo, February 2.

The following is believed in Tokyo to be a correct resion of the negotiations between Japan and

Russia:

Japan proposed, first, that Russia should acknowledge Chinese sovereignty in Manchuria and should restore the Chinese administration and recognize the equality and commercial rights of all Powers in that province; secondly, that Russia should recognize Japan's political influence in the whole of Korea.

JAPANESE PREPARATIONS. (From Our Special Correspondent.) Tokyo, February 3

The commendable secrecy with which the Japane The commendable secrecy with which the Japanese Government has prepared against every eventuality precludes the sending of any specific information by telegraph. During the last day or two, however, I have seen official memoranda relating to certain significant reforms in the service regulations which show that the tension has increased rather than otherwise. The self-control of both the officials and the public must excite admiration. public must excite admiration.

COUNCIL AT TOKYO.

Tokyo, February 3. Tokyo, February 3.

To-day's events indicate that the prolonged tension has reached its climax. The Marquis Ito was summoned from his country seat during the night and was received by the Emperor to-day. A Council, which was attended by five of the Elder Statesmen, the Prime Minister, the Ministers of War and the Navy, the Vice-War Minister, and three admirals, was afterward held. The conference lasted seven hours, and in the course of it the Premier and the Minister for Foreign Affairs had a long audience of the Emperor.

(From Our Correspondent.)

(From Our Correspondent.)

Tokyo, February 4.

All the powerful warships except one, which is being repaired, left Port Arthur yesterday. Their destination is unknown.

According to official news received at Tokyo, houses for billeting Russian soldiers are being hastily prepared at Kai-chau, Hai-cheng, Liauyang, and elsewhere. At Liauyang 1,000 carts have already been requisitioned, of which over 100 are despatched daily, for the transport of ammunition and provisions to Feng-hwang-chen.

The Russian have begun to despatch troops to the Ya-lu. It is alleged that six companies left Liau-yang on the 1st and 2nd instant for the Ya-lu.

The Japanese commercial agent at Vladivostock received notice yesterday from the commandant that a state of siege might be declared at any moment a therefore, lapanese residents should be prepared to leave, otherwise they would be ordered to received.

therefore, lapanese residents should be prepared to leave, otherwise they would be ordered to repair to Khabarovka.

All this contrasts strangely with Russia's peaceful professions

CONFERENCE AT TORYO.

Tokyo, February 4.
A conference of the Elder Statesmen was held this a conserence of the Euger Statesmen was held this afternoon in the presence of the Emperor, at which it is believed that a decision of the utmost importance was arrived at. The general impression now is that all hope of peace is gone.

THE ATTITUDE OF JAPAN. (From Our Correspondent.)

(From Our Correspondent.)

Tokyo, February 5.

It is generally believed that the councils of Elder Statesmen on the 3rd and 4th instructed on the final measures to be taken in the event of an unfavourable Russian reply.

Opinion is unanimous that no arrangement by which Manchuria was altogether abandoned to Russia could secure a lasting peace.

The Tokyo Press rejoices in the prospect of the termination of the long suspense and delay, which have been opposed to Japan's interests.

The voluntary subscription to the war funds already exceed 2,000,000 yen.

Little credence is placed in the persistent rumours that Russian troops are about to proceed to Korea at the resulted of that State.

that Russian troops are about to proceed to Korea at the request of that State.

THE PORT ARTHUR FLEET. (From Our Correspondent.)

Tokyo, February 5.
The Russian fleet has returned to Port Arthur. February 6.

February 6.

There are indications that Russia is moving her forces towards the Ya-lu.
Orders have been issued for the suspension of cipher telegrams between Korea and Japan.
Time-expired men in the army and navy have been ordered to remain at their posts.

Tokyo, February 6.

All the ordinary steamship services to North China ports and to Korea are suspended.

THE SITUATION IN TOKIO. (From Our Correspondent.)

(From Our Correspondent.)

Tokyo, February 7, 25 a.m.
Baron Rosen, the Russian Minister, having been instructed to prepare to leave Tokyo, has transferred the care of Russian interests to the Austrian Minister and exchanged farewell visits with Baron Komura.

The Japanese residents have nearly all withdrawn from Vladivostok, Kharbin, and other places in Manchuria, as well as from Wi-ju.

The Russian gunboat Mandjur is in dock at Nagasaki and will probably be unable to leave before hostilities are begun.

hostilities are begun.

The leading journals declare that Japan is most reluctant to draw the sword, but that she has no choice. They republish Russia's Note of 1895 declaring that the retention of the Liautung peninsula by a foreign Power would imperil the Chiaese capital, render the independence of Korea illusory, and jeopardize peace in the Orient. They invite a repetition of Trafalgar and Waterloo, since Japan fights, as England fought, to crush a military despotism and secure equal rights for all nations in Eastern Asia.

Digitized by Google

Much sympathy is felt with Baron Rosen, who is a true friend of Japan and an advocate of peace.

February 7. A declaration of war is expected soon. Japan forwarded to the Powers yesterday a statement of the events that led to the breaking off of relations

There is no popular excitement here as yet. In the face of these telegrams the falsehood of the Kobe Chronicle's statements is palpably demonstrated. First as to the accusation that " for ten days before the actual rupture of relations took place not a single telegram-whether despatched by a Legation or a private individual-was allowed to leave Tokyo for abroad," it is seen that every day without exception from the 1st of February to the 7th, long telegrams were despatched from two sources in Tokyo to The Times, which is only one of many papers. Secondly, as to the accusation that "all references" conveying "definite information of the critical state of affairs were struck out," we find that on February 1st London was informed that Japanese "public opinion did not anticipate any solid concession"; that " Japanese subjects were withdrawing rapidly from the Liaotung Peninsula"; that the "war pay of the Japanese army and navy had been fixed," and that "well informed circles did not take a sanguine view as to the likelihood of Russia's answer proving satisfactory. On February 2nd news was sent that "the tension had been increased by the movement of troops into Manchuria," and that "events would move rapidly if the Russian note proved materially unsatisfactory. On the 3rd it was announced that significant reforms had been made in the make, condensed milk, pianos, mineral greases and nubricants, inters for tables and adaptable to water pipes, enamelled kitchen ware, bottles and capsules, rubber ware of all kinds, steel from Styria, buttons, imitation jewellry, imitation precious stones, bentwood furniture of fine make, condensed milk, pianos, mineral service regulations showing that the tension had increased rather than otherwise," and the prolonged tension was declared to have "reached its climax." On the 4th Russia's warlike measures were described, and it was presents a very attractive appearance. stated that "the general impression now was that all hope of peace was gone." On the 5th firm courteously entertained their many visitors. the Elder Statesmen's decision as to the final measures to be taken in the event of an unfavourable Russian reply was declared to have been arrived at; the satisfaction of the Tokyo press at the termination of the long suspense and delay was described, and the rapid growth of subscriptions to the war not steady, and the new crop is expected to be funds was mentioned. And on the 5th the very good. suspension of cipher telegrams between Korea and Japan, the stoppage of the steam-korea and Japan, the stoppage of the steam-korea and Japan, the stoppage of the steam-says that since the previous weekly report, the ship services to North China ports and silk market has been very quiet after a temporary revival. It is runnured that the output of France revival. It is runnured that the output of France revival. pired men in the, army and navy to remain pired men in the army and navy to remain last. The fine growth of silk worms and the at their posts were telegraphed. In short, it rich supply of mulberry leaves in the two countries inconceivable that had not the Kobe tries suggests successful sericulture this year. Chronicle's over-mastering anxiety been to Chronicle's over-mastering anxiety been to support the accusations brought against Japan by her enemies and to sway public at Shanghai, the stock of Japanese Consul-General at Shanghai, the stock of Japanese Cotton Yarn there aggregated 1,500 bales and Indian yarn 22,000 bales. The price of the latter is very to conciliate that sentiment was of vital steady, but the former only nominal, there being importance to her, it would have been betrayed into formulating slanders which were at once inconsistent and grossly contrary to easily ascertained facts. During the China-Japan war of 1894-5, the foreign press of Japan, with one or two exceptions, adopted a tone of hostile prejudice which the bags.

commonest dictates of decency should have forbidden. To-day the same newspapers are conspicuously friendly to her, with the exception of the Kobe Chronicle, which, in its anxiety to injure her cause and bring obloquy on her head, bears false witness against her, and unjustly accuses her of treachery which by the new organization. its own conduct alone displays.

LOCAL EXHIBITION OF AUSTRIAN MANUFACTURES.

There is now on view at the premises of Messrs. Heller Bros, 176-A, Yokohama, a collection of samples of Austrian manufactures which awaken a striking sense of the variety, extent and high quality of those products. The exhibits, to the preparation of which the Austrian Government has given substantial support, are arranged in four rooms and will be on view The smallest of the rooms is used for the recep-tion of visitors, and with the exception of the —curtains, furniture, etc.,—while a huge showcase is filled with perfumes, soaps, and kindred
objects. The other three rooms are devoted to
the display of manufactures of all imaginable
kinds which are largely utilized for purposes of
decoration. Among the samples here shown
are: an acetylene machine, bookbinders' manufacture, printing. are: an acetylene machine, bookbinders' ma-chinery, printing machine, boiler grates, cork-stone (insulating, ice cellurs, steampipes, etc.), fancy electric lamp-globes, electric and glass-lamps, fine Bohemian glassware, as vases, stands, etc., Bohemian glassware for laboratories, plate and wire glass, gelatine, glue, chemi-cals cigarette and other papers woodpulp cals, cigarette and other papers, woodpulp, cloth, curtain and carpet cloth, malt, hops, hardware, soaps and perfumery, machine greases and lubricants, filters for tables and

DESULTORY NOTES ON SPORT.

The Kobe Yacht Club and Kobe Canoe and Dinghy Club have amalgamated, and will now be known as the Kobe Sailing Club. The Kobe Yacht Club had been practically moribund for

The Yokohama Yacht Club opened the racing season last Saturnay, with prospects of good sport in all classes except the 39 raters, which are sadly diminished in numbers. The Mary is getting ready to race, and it is reported that Kinglisher will come out again this season. Maid Marion has been hauled up at the Engine and Iron Works, and will have the inside ballast removed, and more lead put on her keel.

The Cruising Class will be well represented. Spray has been taken over by Capt. Olsen; IVanderer has been recaulked and looks quite smart in a coat of a delicate hue; Daimyo is

Saturday, and the Yacht Club took the following Saturday for the 21 raters. Pele, Edna, Winsome, Sunbeam, Vixen, Beatrice (late Stella) Cho-Cho, and Yugao have been put into commission. wants a new mainsail, the present one being very badly out of shape. Vixen is getting a new sail plan. Mr. Clausen has a new boat in this class, and another from the same lines is now being completed.

Rain has interfered considerably with training on the race course, the recent spell of wet weather inconveniently happening just when the trainers wanted to give their horses faster work. Of the seniors, Rose de France has been reported as ailing somewhat. Hitachi, late Therapis, has been doing some very good work, and is looking very well. Kachidoki, late Cameo, is going well, but Mayung does not look as proprieting as the but Maymie does not look so promising as she did a fortnight ago. She is not an easy mare to train, and it is doubtful if she will go to the post so fit to the hour as she did last meeting.

Suma has had more fast work than anything on the course, and up to a week ago seemed to be doing excellently well on it. Perhaps the easing enforced by the rain will be fortunate in her case. Osaka, a month ago, seemed to be running very light, but is looking a bit better now. She has had a few days away from the course, now and again, and Stella has also required the indulgence of an occasional spell. Maysie a month ago seemed to be improving in a very gratifying fashion, but is said to have gone

Of the new Australian subscription horses, Carnation, Alexandra, Tarantella and Parisienne are most fancied by the cognoscenti. Treasure was probably about the best of the batch, but is now a very doubtful starter, being laid up with a damaged hip.

In the senior China pony class The Leader is steadily improving, although considered of little account in the earlier stages of training. The Dove, in spite of a nasty temper, would be a fancy of many if his owner had a little longer time to get him ready. May-moth, late Moth, is doing very well.

No strong favorite has been yet announced for the China Grand Prix. Pit-a-pat, and Mayor are thought well of by some, but next week, if fine, will probably bring some of them to the front.

The new arrangements as regards stands and

CUSTOMS DECISIONS.

Mr. H. Minakami, Director of the Yokohama Customs, rendered a decision on May 5th on a protest lodged by Messrs Carl Rohde & Co., No. 70, Yokohama. It appears that the firm imported a quantity of packing paper—principally used for packing cigarette boxes. The material was landed at Tokyo instead of Yokohama. An application for permit of import was presented at the Tokyo branch of the Yokohama Customs, where the appraisers imposed specific duty at the rate of yen 1.163 per 100 kin in accordance with No. 292-B of the tariff. The importers contended that the duty should be ad valorem 10 per cent under No. 293 which provides in its 5th item for wrappers or packing papers. The protest was rejected on the ground that the goods were of the nature of printing paper. of printing paper.

The same day, the director of the Yokohama Customs delivered another decision on a protest filed by Messrs. L. J. Healing & Co., No. 74, Yokohama. The firm imported underground telegraph wires on which the Customs imposed telegraph wires on which the Customs imposed 10 per cent. ad valorem duty under No. 483 of the statutory tariff which provides for "submarine and underground telegraphic lines." The importers contended that the duty should be 5 per cent. ad valorem in accordance with No. 13 of the conventional tariff between Japan and Germany. The protest was not sustained on the ground that No. 13 of the conventional tariff between Japan and Germany provides for "telegraphic wire" but does not include underground telegraphic lines. telegraphic lines.

The Director of the Yokohama Customs gave another decision the same day on a protest brought by the Kaitsu Gomei Kaisha, Customs brokers. They imported footballs on which the appraisers im posed 25 per cent. advalorem duty under No. 442 of the statutory tariff which provides "all articles of of the statutory tarint which provides a flatteres of games used in playing tennis, cricket, chess, etc." The importers held that the duty should be 10 per cent. in accordance with No. 1 of the conventional tariff between Japan and Great Britain which provides for manufactures of caout-chouc,—or No. 496 of the statutory tariff—which provides for all articles, new or unmanufactured. The protest was dismissed on the ground that the le in dispute was not made of rubber only and besides was employed in games, and not unmanufactured.

THE LAW COURTS.

STEWART v. STORNEBRINK.

In the Yokohama District Court before Judge Danno, this case in which plaintiff claims seven-Danno, this case in which plainting claims severteen hundred jen, came up again on May 6th when judgment was delivered:—
1.—The previous judgment is sustained.
2.—Defendant is therefore ordered to pay

plaintiff the amount claimed and to bear the costs.

It may be remembered that the case was brought in the Court on March 17th when judgment was given in favour of plaintiff on account of the absence of defendant and that defendant lodged a protest on May 4th against the judgment.

CLAIM ON SHARE TRANSACTION.

The case brought by Mr. R. J. Ward against B. Sho claiming 12th 8 515.60, came up again on May 7th in the Yokohama District Court before Judge Danno, when judgment was delivered dismissing the protest of defendant as to the juris diction of the Court,

THE CAPTURED SHIPS.

The hearing of the petition lodged by Mr. K. Goki, a Tokyo lawyer, representative of the Kamtchatka Commercial and Industrial Company, asking that the steamer *Kotik* and the sailing vessel Bobric be released, and contending that the ships did not participate in any hostile action, began on May 5th in the Yokosuka Prize Court. given within a week.

OBJECTION TO SEIZURE OF BUSINESS BOOKS.

In the Yokohama District Court before Judge Danno, the case filed by Mr. H. V. Gielen against Mr. J. H. Jewett petitioning for the cancellation of the order given on Aug. 8th, 1903, to seize temporarily the business books belonging to Messrs. Bavier & Co., came up again on May 7th, when judgment was rendered in favour of the plaintiff.

SELLING HER SON.

Iida Shige (32), Ishikawa-machi, Yokohama, who was charged with having sold her adopted son to a Chinaman for filty yen, has been sentenced in the Yokohama District Court to one year's imprisonment with hard labour.

It appears that a few years ago she adopted a It appears that a few years ago she adopted a boy from a poor woman, whose name was not mentioned and whose present abode was not known. She registered the boy at the City Office as a natural child. She subsequently lodged an action in the Yokohama Local Court against a Chinese, Tien-Sang, No. 132, Yamashita-cho, who was her accomplice in the crime, and who purchased the boy, petitioning for affiliation as the father of the lad. This case was only a means of concealing their cruel conwas only a means of concealing their cruel conduct.

AMERICAN TOPICS.

Advices from Nome, Alaska, say that the spring clean-up of gold on the Nome peninsula will be greatly in excess of any previous season. Conservative estimates place the clean-up at \$1,250,000.

Mr. John D. Rockefeller has given \$500,000 to the Johns Hopkins Hospital at Baltimore, and the money has been accepted by the Board of Trustees of that institution. The income of the hospital was seriously affected by the destruction of many houses belonging to it in the recent fire. nospitat was seriously anected by the destruction of many houses belonging to it in the recent fire, upon which there was no adequate insurance. The expressed purpose of Mr. Rockefeller's gift is to restore that income to its original propor-

The insurance loss by the big Baltimore fire of February was \$35,000,000, the value loss \$45,000,000, the net loss \$10,000,000. These figures, based on the adjustment already made, are the maximum, and the belief is that the total insurance loss will not be more than \$30,000,000 insurance loss will not be more than \$30,000,000 and the net loss not more than \$7,500,000. On the basis of total insurance loss of \$30,000,000, those burned out only carried 80 per cent insurance, but in a number of instances many business men of Baltimore were insured for 100 per cent of the value of their property.

According to a consular report, the larger part of the diamond output of South African mines is taken by the United States. The direct importation from South Africa in 1903 was \$3,403,222. But a large proportion of the diamonds are first sent in the rough to Amsterdan, Antwerp and London, to be cut and polished, and reach the United States in a finished state. The total importation of stones finished and in the rough in 1902 amounted to \$17.687.195. The fact that in 1902 amounted to \$17,687,195. the demand for these gems is growing is proof that the country at large continues prosperous.

In a recent address delivered by Dr. Victor C. Vaughn before the Michigan Municipal League he estimated the annual loss to the United States by typhoid fever at \$90,000,000. His estimate was based on the assumption that the annual number of typhoid cases in the country reached 500,000 and the deaths 50,000. Estimating the value of each life at \$1000, the deaths created, a loss of \$50,000,000. Then he assumed that each patient was incapacitated from labor for forty days and thus lost time worth \$40 while the cost of medical attendance, nursing and medicine another \$40 each, making an additional of \$40,000,000. Thus, he concluded, "the began on May 5th in the Yokosuka Prize Court, total of \$40,000,000. Thus, he concluded, "the The proceedings having been concluded on that people of the United States are paying an annual day, the Court announced that judgment will be tribute of \$90,000,000 because of their ignorance, through the existence of a disease, which if every Unimak island the revenue cutter steamed into a

man did his duty would not exist at all." Presented in this light the simplest sanitary regula-tions have a financial value entirely independent of any other consideration, which is usually lost sight of entirely.

Speaker Cannon of the House of Representatives has been decided upon for permanent chair-man of the National Republican convention which will meet in Chicago on June 21. Mr. Elihu Root has been selected as temporary chairman. He will make the keynote speech and Mr. Cannon will occupy the chair and keep the convention in order. Another important matter which has not defiorder. Another important matter which has not den-nitely been arranged is that of choosing a chair-man of the Republican National Committee. Mr. Cornelius N. Bliss has decided that he cannot undertake the work. The President and his Republican advisers now are considering the ad-uisability of Covernor Murphy of New Jersey and visability of Governor Murphy of New Jersey, and it is thought that unless some unforeseen obstacle arises he will be asked to serve,

The St. Louis Real Estate Bulletin, in a recent issue, throws some light on the remarkable advance in rents in that city due to the prospective opening of the World's Fair. It shows that houses which formerly rented for \$60 a month are now held at \$150, and that furnished houses of fourteen rooms which used to compared \$25 are now listed. rooms which used to command \$85 are now listed rooms which used to command \$85 are now listed at \$500 per month. These figures may not be accurate, but if they are not exaggerated they certainly show a design on the part of some St. Louis people to rob the visitors to the fair. The management of the exposition should see to it that rooms and board are furnished at about the same prices as at other times. If an efficient bureau is maintained, the sharks who wish to bleed the stranger will not do a heavy business.

The United States Department of Agiculture has just issued a bulletin on farm labor, giving the nas just issued a bulletin on larm labor, giving the results of twelve statistical investigations. Returns were received from over 23,000 persons for the investigation of 1902, and the author, Professor Blodgett, has evidently studied them carefully; but he remarks that "the extreme variety of conditions * * * is very perplexing in making fully; but he remarks that "the extreme variety of conditions * * * is very perplexing in making averages." The census shows that there were 2,044.761 hired agricultural labourers in the country, working under all sorts of conditions as to wages, time of service, etc. The first noteworthy fact is that wages have advanced materially since the first investigation made under prevailing money standards. In 1882 the average wage, without board, was \$18.94, in 1892 it was \$18.60 and in 1902 it was \$22.14.

A census bulletin just issued estimates the population of the United States for 1903 at 79,900,389 inhabitants, exclusive of Alaska and the insular possessions. There has been, according to these statistics, an increase of 3,905,814 since the census of 1900. The figures given are somewhat below those estimated by the Treasury Department experts, who, at the middle of last year, reached the conclusion that the population was over 80,847,000. There is nothing surprising in this, for it may be recalled that just prior to the census of 1900 the Treasury Department's population estimates were too high. According to the bulletin just issued, the largest city in population estimates were too high. According to the bulletin just issued, the largest city in the country, New York, had a population of 3,716,139 inhabitants, and those next in rank were Chicago, with a population of 1,873,880, and Philadelphia, with 1,367,716. After them in order follow St. Louis, Boston, Baltimore, Cleveland, Buffalo, San Francisco, Pittsburgh, Cincinnati, Milwaukee, Detroit, New Orleans and Washington; the last mentioned city being the only one in the list below the 300,000 mark.

Captain McLellan, whose recent voyage to the Aleutian islands on the revenue cutter Manning has had such memorable results, found the streams of Attu and of the other islands crowded with salmon. On Buldir island, in 52 deg. 30 min. north, he found new fur seal rookeries. That this dishe found new fur seal rookeries. That this dis-covery may prove to be of great financial value may be realized when it is considered that the revenue from the rookeries of the Pribilov islands has amounted thus far to over \$50,000,000. At

harbor two miles long and three-fourths of a mile engaged upon the subject that is next to his heart, wide. So strongly convinced are some of the alert men of the Northwest that the Aleutians are now destined to assume great importance in the affairs of the Pacific that a company has been formed to colonize the archipelago. Wharves and storehouses are to be built and trading stations extablished. Stock be some formed to colonize the storehouses are to be suited and trading stations. and stolenouses are to be built and trading stations established. Stock raising is to begun first on Akun island. There, it is estimated, 50,000 head of cattle can find abundant pasture the year through. It is claimed that, on account of the mollifying influence of the Japan current, the Aleutian islands have a more desirable climate than any part of the Atlantic seaboard north of Cape Hatteras. Aside from stock raising, general agri-culture is to be inaugurated. It is stated that copper, gold, oil and coal are found on the islands and that there is a great abundance of water power, as in Japan. One town, called Jarvis, has already been started in Lost Harbour. The problem of transportation will not have to be solved, as in the interior of Alaska, for steamers to and from the Orient, Siberia, St Michael and Nome now pass daily within a few miles of some of the best harbors in the archi-

For the first time in the history of the country a United States Senator has been convicted in a criminal court of offences in his official capacity but the action does not meet with such expressions of surprise from the press as might be expected under the circumstances. The Senator, Joseph Ralph Burton (Rep.), of Kansas, who was charged with accepting fees from the Rialto Grain and Securities Company, of St. Louis, for using his influence with the Post office Department to prevent the issue of a fraud order against the company, was found guilty on March 28, in the United States District Court at St. Louis, of violating the law forbidding any member of Congress to accept compensation for rendering services before a federal department in a matter in which the United States is interested. The penalty is imprisonment for not more than two years, or a fine not exceeding \$10,000, or both. Furthermore, any one so convicted is rendered forever incapable of holding office under the United Stales Government. The case is to be taken to the United States Court of Appeals.

It long ago came to the notice of the Senate officials that every State in the Union has its own individual style for credentials to United States senators. In beautiful execution and display of exquisite crimson ribbon Ohio surpasses them all. A few weeks ago the credentials of the late Senator Hanna arrived and were presented in due form by Senator Foraker. They were bound within the most costly morocco, and the boards that enclosed the parchment, white and pure as the driven snow, were tied with ribbons. Not long afterward an exact duplicate of those credentials was presented again by Senator Foraker, but this time in behalf of Senator Dick, who is Hanna's successor. But Senator Dick's credentials Korean Government. ranna, because they were for exactly seven years service. Senator Dick has one year to serve before the regular six-year term begins. Senator Foraker occupied himself several minutes untying the beautiful ribbons, inspecting the parebreat the beautiful ribbons, inspecting the parchment, and tying the ribbons again. The credentials and tying the ribbons again. The credentials were eventually read by the clerk and placed

Commander Robert E. Peary, who announces Commander Robert E. Peary, who announces his intention of again undertaking a hunt for the North Pole, is tall, straight, muscular and lithe. He has a long bony face, straight nose, well-defined jaws and square chin. His eyes are deep set, large and gray. He has a long, tawny moustache and, for a young man, unusually bushy eyebrows. At one moment one might take him for a lang sinewy Scottish Highlander, at another for a lean, sinewy Scottish Highlander; at another moment he has the appearance of a Norseman. His face is intelligent, rather heroic, and oc-Owing to strong winds, twelve unoccupied cars of the near future consequent on the presence of a Russian resident at Lhassa would have been the atouch of courtliness. He impresses one for ing damage to the track. The traffic was reopenthe most part as a cold-blooded engineer; but of the near future consequent on the presence of a Russian resident at Lhassa would have been the mineral exploitation of Tibet.

engaged upon the subject that is next to his neart, he is almost sure to break out into a boyish enthusiasm, and then, behind all talk of geography and hydrography, is revealed the pure adventurer with the love of glory glowing in his soul. In the parlor of his simple little woodembowered cottage in Washington, says Outing, are lovingly treasured bits of meteorite ore, wooden models of Eskimo images, the skin of a white polar bear, and a stuffed baby seal, also white; and if his interest is aroused in a visitor he may display the touch of good fellowship by serving a glass of wine that has been in the polar circle and a cigar that aged on the shore of the central polar sea.

A number of Russians captured at Kiulienching, including twenty-five officers, arrived on May 11th at Shimonoseki by the steamer *Colombo*. They were to leave for Matsuyama the same

During April, 17 kwanme bar gold (1 kwanme = kilos 3,7565) and 5 kwanme bar silver were imported from Korea to Osaka. These were coined at the Osaka Mint the aggregate result being yen 85,629.

The stock of raw silk in Yokohama is 8,146 bales filature; 509 re-reels; 281 Orikaishi, and 23 sundries, making a total of 8,959 bales. Of this, 1,188 bales were sold but not delivered, so that the real stock is 7,771 bales.

Mr. S. Kurino, formerly Japanese Minister at St. Petersburg, who recently returned, was receiv-ed in audience on May 10th by the Emperor. He is expected to be entertained to-day (the 12th) at luncheon in the Palace, when the Premier, the Minister for Foreign Affairs and high officials of the Imperial Household will be present.

An audacious attempt was carried out on May 11th in the train on the Naniwa railway, Nara prefecture. It is reported by the Jiji that a coolie attempted to break open a strong box which was in the conductor's car in order to steal the money contained therein, while the train was in motion. Having inflicted injuries on the conductor with a hatchet, the robber jumped from the car.

The Minister for Agriculture and Commerce has decided to grant a subsidy of yen 35,000 to the Central Tea Guild for this year instead of the subsidy of ven 70,000 paid annually for five years past. He also ordered the Guild to prepare for the Department an estimate of the expenses of the branches in New York, Chicago, and Montreal branches in New York, Chicago, and Montreal which were established in the first year that a subsidy was given in order to investigate tea business in America. The committee of the Guild met on May 5th with a view to considering the distribution of the new subsidy. According to the staff of the Yokohama Tea Guild, a portion of the previous subsidy was also used to defray the expenses of the tea examining offices at Yokohama, Kobe and Nagasaki.

A "wild man" from the Arctic Circle is causing a great sensation in Nome, Alaska. The man was captured at Cape Prince of Wales, and it is considered wonderful that a human being could live as this one apparently has on the coast of the Arctic Ocean. His beard and hair reach to his waist, his finger and toe-nails are twisted, and he wears strange and scant garments. Around his neck are two crucifixes. There is little doubt that the man is a Russian convict who escaped years ago, possibly from Siberia. He is apparently fifty years old or over and cannot speak an intelligible word. He is being held in the Nome city jail, where hundreds of people have visited him. During the years of his wandering the wild man has apparently sought neither shelter nor food from the Esquimaux. Enquiry among them fails to show that they had ever seen him. How he escaped from the polar bears is considered another mystery.

A British traveller, who is stated to have an intimate knowledge of Tibet, writes:—Tibet is destined to become the California of the future. The regions into which the British Mission is now penetrating is one of the richest in the world. In fact, its mineral wealth is simply fabulous. Gold abounds in all directions, and nuggets as large as hazel nuts are found within a foot of the surface with no other mining implement than the shovel. British soldiers are, indeed, advancing into one of those ancient treasure houses of the genii, where one has but to scratch the soil and all is gold that glitters. Nor is gold the only wealth that is stored within these enchanted mountains. Iron, borax, salt, quicksilver, and lapis-lazuli are there in abundance, only waiting the touch of an en-lightened and civilising energy to reveal their hidden treasures to an astonished world. Of set policy both Chinese and Tibetan authorities have opposed the mineral development of the country, but it is undoubted that one of the contingencies

MEDICAL RESEARCH.

Sir Francis Lovell, C.M.G., Dean of the London School of Tropical Medicine, delivered Malaia), Institute of Medical Research. He first read the following passages from an address given before the London School recently by its head, Sir Patrick Manson:

EDUCATION AND RESEARCH.

I now pass to the more immediate subject on I now pass to the more immediate subject on which I am called upon to address you. It naturally falls under two headings:—Education and Research. As regards the former, I would state that since the School opened on October 3rd, 1899, no fewer than 354 students have passed through its portals. Our first session we had 27 students; our first two years, that is to say during six sessions, we had an aggregate of 149 students; our last two years, also during six sessions, we had 178 students. These figures show a steady increase in the numbers attending the School but this increase in number does not quite express or adequately represent the increasing express or adequately represent the increasing popularity and usefulness of the Institution, for whereas in the earlier days of the School's existence

many of the students came for one or two months only, in these later times a large proportion of the Students remain with us during the full course of

Students remain with us during the full course of three months.

So far as figures go, this is a most satisfactory state of affairs. It is hardly for me to say what the value of the teaching may be, but this I feel justified in saying—that every student who has entered the School has had an opportunity of acquainting himself with the more important facts of tropical pathology, with the practical methods of diagnosing tropical disease, and with the practical methods of treating tropical disease. When they leave us, a large proportion of the students, if not all of them, have a genuine practical grasp of their subject. have a genuine practical grasp of their subject. They have been in actual touch with the raw material, so to speak, the germ causes of disease, and the pathological effects of the operation of these germs on the human body. They have seen, and most of them have applied for themselves, the most recent methods of diagnosis. They have seen in operation the methods of treatment of best repute. So far as teaching and opportunity can ensure, they have left we considered for actual practice in the tenging the considered for actual practice in the tenging the second considered the second considered the second considered the second considered the second considered the second considered the second considered the second considered considered the second considered the second considered considered the second consi us qualified for actual practice in the tropics.

This essentially practical education cannot fail to be of vast service to our students in their future work, to increase their usefulness as practitioners, and to increase their value to their employers. It is and to increase their value to their employers. It is impossible to gainsay the value of such training. But, over and above this, our Students in most instances have been sent out with a knowledge of the theory of the subject, thoroughly abreast of the times, knowing what has already been done, and thoroughby apprehending what still requires to be done; in other words, they have gone forth qualified not only to practice the art, but also to advance the science of Tropical Medicine. So it has come about that at the present day, instead of the two or three men who took a more or less languid interest in Tropical Disease some five or six years ago, a whole army of eager investigators has arisen, mainly composed of men educated or inspired by the Liverpool and London Schools.

ACHIEVEMENTS OF LONDON SCHOOL

This multiplication of investigators, and therefore

This multiplication of investigators, and therefore chances of discovery, has already borne remarkable fruit. Without alluding to what our friendly rivals in Liverpool have done, I could point to not a few notable triumphs by men from our London School. Let me enumerate some of these, and as I do so, please bear in mind that we have been in existence for only a few months over four years.

First:—Let me point to an observation by our present Superintendent, Dr. Low, an observation made in our laboratory. For the first time he showed in what manner the blood-worm responsible for an important group of Tropical Diseases represented by the hideous and disabling disease known as Elephantiasis, gains access to the human body. He showed that this worm at an early stage of its existence, like the germ of Malaria, is introduced into the human tissues by the proboscis of the mosquito. This important discovery has a very practical bearing, for it indicates with precision the way by which Elephantiasis and its congeners may be avoided.

Second:—Dr. Sambon and Dr. Low, sent by the School with the aid of funds partly supplied by the

School with the aid of funds partly supplied by the Colonial Office, clearly demonstrated by an experi-Colonal Office, clearly demonstrated by an experiment, which might very well have proved to the experimenters a serious matter, that man can live in vestigation in contemplation. For one of these we the midst of malaria if he only employs simple and have a certain amount of money in hand, and shall practical measures against mosquito bite. These presently proceed with it. For the other we must gentlemen, Signor Terzi and their servants, lived for, wait for money, and for what is even more difficult three or four months during the most unhealthy place in I think I have said sufficient to prove that the Europe, and, thanks to the measures I have men-

tioned, not with injury, but with positive benefit to their health.

their health.

Third:—The School, by importing infected mosquitoes from Italy and then setting them to bite healthy individuals in this laboratory, and thereby promptly conferring malarial disease to those so bitten, gave the final and most telling proof hitherto obtained that malaria is conveyed by the mosquito. Fourth:—A pupil of the School, Dr. Frode, who had learned here the value of the microscope in the diagnosis of Tropical Disease, discovered in the Gambia Colony the presence in the blood of a mof a new parasite, a parasite which was subsequently

Gambia Colony the presente in the blood of a new parasite, a parasite which was subsequently recognized by Dr. Dutton of the Liverpool School of Tropical Medicine, as belonging to a group of germs responsible for many and grave diseases among the lower animals. This discovery is already bearing remarkable fruit.

Fifth:—Only last year Dr. Castellani, another pupil of the School, demonstrated the association of this same parasite, called a trypanosoma, with one of the most terrible diseases to which tropical humanity is liable, viz.:—Sleeping Sickness, Subsequent investigation by Col. Bruce and others has wholly endorsed the truth and importance of Dr. Castellani's discovery.

FINDING PROOF.

Sixth:-Until a fortnight ago it could not be affirmed Sixth;—Until a formight ago it could not be affirmed with certainty that this parasite—this trypanosoma—was really the cause of Sleeping Sickness. The presumption that it was so was strong, but there remained the possibility that its presence in cases of Sleeping Sickness might be merely a matter of more or less accidental concurrence. In consequence of the opportunities for study that our School and Hospital provide, this possibility has now been finally disposed of. Last year a patient, in whose blood it was conjectured that this new parasite—this trypanosoma—was present, was admitted to our wards for treatment and observation. Our late Superintendent, Dr. Daniels, after a lengthened search confirmed the conjecture by finding the parasite in the patient's for treatment and observation. Our late Superintendent, Dr. Daniels, after a lengthened search confirmed the conjecture by finding the parasite in the patient's blood. Unfortunately, though we gained much in knowledge by our observation of this case, our efforts at treatment proved futile. The patient left the Hospital in March last, but we kept in touch with her, examining the specimens of her blood which were sent to the laboratory from time to time, and watching the progress of the symptoms. Some two months ago the patient began to show symptoms of Sleeping Sickness and died of that disease on the 26th of last month, two years and three months after receiving the deadly infection through the bite of an insect, a species of Testee Fly, common in the place where she had resided on the Upper Congo. Until we have absolute assurance as to the validity of a discovery, responsible action is half-hearted, or is delayed; and very properly so, as a few fiascos, bred of pseudo-discoveries, have shown in recent years. Assurance gives confidence. Knowing that the trypanosoma cause Sleeping Sickness, we know how to proceed, if not in curing, at any rate in preventing this terrible disease which, I am sorry to say, is rapidly spreading, not only in the Congo Free State, but in Uganda and elsewhere in Africa. For this knowledge the world is mainly indebted to the London School of Tronical Medicine in Africa. For this knowledge the world is mainly indebted to the London School of Tropical Medicine This knowledge will in the end result, if not in our being able to cure, at least in our being able to ent Sleeping Sickness.

There are other discoveries which might be accredited to the School, but those I mention suffice to show that our existence has not been unproductive in this line, nor altogether in vain. That the few thousand pounds the establishment has cost the country, has been more than well invested, who can gainsuy? These permanent additions to human knowledge, which, as the years roll on, are bound to accumulate around them additional knowledge—indeed they are already doing so—will yield a huge compound interest, and do more than justify our compound interest, and do more than justify our

INVESTIGATION OF BERI-BERL

I may mention that, by arrangement with the Government of the Federaled Malay States (where Government of the Federaled Malay States (where Beri-Beri is rampant), our late Superintendent, Dr. Daniels, has been placed in charge of the very complete Research Laboratory at Kuala Lumpur. Here, with abundant material at his disposal, with a certain amount of leisure, so necessary for scientific investigation, this highly accomplished and experienced pathologist will undoubtedly, even if he does not unveil the mystery of Beri-Beri, add to the lustre of our School. of our School.

WHAT THE SCHOOL REQUIRES.

work, is doing good work, and hopes to do more good work—that is to say, we are fulfilling our func-tion and to this extent we are a prosperous Institution having a distinct claim on the public.

PREVIOUS MISSION.

Sir Francis then went on to refer to his previous mission to the East in 1902, relating his experiences in India and elsewhere, and drawing special atten-tion to the magnificent donation to the School of a

in India and elsewhere, and drawing special attention to the magnificent donation to the School of a lakh of rupees by Mr. Bomanji Petit, in India. Continuing, he said:—

When I think of my former experience of the Chinese, of their great interest in public charities, and their generosity in supporting the charities, when I think of the wealth that so many of them have accumulated under the ægis of the British flag, in the Straits of Malacca and elsewhere, I do not despair of finding a Chinese rival to Mr. Bomanji Petit. Perhaps no country in the world is so likely to benefit by the advance in Tropical Medicine which have been made in recent years as the British Colonies and Protectorates in the Malay Peninsula. One of the diseases I have alluded to—Beri-Beri-is not only a deadly disease, but it is a terrible drag on the mining and agricultural industries here. Now Beri-Beri is a subject to which the School has given much attention. It is a disease that we hope some day to find out the cause of, and perhaps thereby be able to see our way to an effective treatment, and also to appropriate means of prevertion, and I think we do not appropriate means of prevertion, and I think we to appropriate means of prevertion, and I think we do not appeal in vain to our Chinese follow subjects when we ask them to contribute something out of when we ask them to contribute something out of their wealth to enable us not only to relieve (as regards this disease, men of their own race, but to equable them indirectly to add to their health and wealth and general prosperity. Could we but remove Beri-Beri from the Malay Peninsula, we would add enormously to the prosperity of the country. The Chinese, who are those most interested in the matter, should take a special interest in fostering our efforts to unravel the mystery of this disease, and I hope I do not appeal to them in vain for funds for this and similar objects. We have received liberal support from many business houses and Corporations trading with the East. It is unnecessary to point out to them the importance of our work, and we feel sure that they too will come forward in the future as they have in the past, each forward in the future as they have in the past, each according to his means.

THE KOBE HERALD" AND THE NAVAL REGULATIONS.

The trial of Alfred W. Curtis, Editor and Publisher of the Kobe Herald, who was charged with having violated the Naval Instruction and Press Law, took place in the Kobe Court on May 5th. Mr. Curtis appeared in person, Mr. Kojima acted as official translator. We reproduce the Herald's report of

the case.
Public Procurator Akiba having read the charge, The Judge asked the following questions: What is your name?—Alfred W. Curtis. What is your age?—46.

What is your age?—46.
What is your nationality?—English.
What is your residence in Japan?—No 76-a, Klotachi, Kobe.
What is your profession?—A journalist.
Are you editor and publisher of the Kobe Herald?

Yes, I am. The Judge thereupon announced that Mr. Curtis

ras to be tried on a charge of having violated the

was to be tried on a charge of having violated the Naval Instructions.

The Public Procurator said that the accused, who is the editor and publisher of the Kobe Hendl, a journal published at the office at 76A Kio-machi, Kobe, Hiogo-Ken, issued an article on the 27th April, 1904, in the said Kobe Herald, No. 5341, in its 2nd column of page 4, under the heading "The News from Gensan." The article relates to the movements of the Japanese fleet, it is a description of Japanese tactics and indirectly points out the anchorage of the fleet. and indirectly points out the anchorage of the flect. It is a violation of the Naval Instruction of the 5th Ianuary, 1904, and is liable to be punished according to the Imperial law. This was translated to the accused by Mr. Kojima and the former said he admitted having issued an article under the heading "News from Gensan"! but he denied that anything had been said about the archerge of the Impared. had been said about the anchorage of the Japanese

iquadron.

The Public Procurator said he mentioned that the unchorage had been indirectly revealed.

The Judge asked the accused the following

Do you admit that you have inserted the article in puestion?—Yes, I wrote it myself. I admit the in-sertion of the article; but I deny that it can rightly be held to contravene the regulations. I question very much if there is a single paper published in this country which does not contain references to the movements of warships. Under the regulations as they stand it would be possible to prosecute every spaper.

Do you admit that you have stated in the article

"Vice-Admiral Kamimura's fine homogeneous squadron of six armoured cruisers is somewhere in the Japan Sea—it was reported to have left Chinhai-wan six or seven days ago, presumably for Vladivostock or the near neighbourhood, it being obviously necessary that the enemy's squadron at Vladivostock should be either bottled up or smushed up? Yes, but it is not a definite statement of the movements of the Japanese Navy and there is nothing therein which can by any possibility be regarded as a statement of tactics, and that is what the Regulations

Do you admit giving the classification and number of war ships?—I do not perceive that the article can be held to be a violation of the Naval Instrucions.

be held to be a violation of the Naval Instrucions. The Public Procurator addressed the Court, and pointed out that the accused had admitted inserting the article. The clause which reads "Vice-Admiral Kamimura's fine homogeneous squadron of six armoured cruisers is somewhere in the Japan Sea," and another clause which reads: "It was reported to have left Chinhaiwan six or seven days ago, etc.," reveal Naval movements and anchorage, mention of which is prohibited in the Naval Instruction. There is no direct mention to the effect that Chinhai-wan is an anchorage of the Japanese Navy; but the departure of the warships from May; but the departure of the warships from the place indirectly reveals it as an anchorage. However, the tenour of the whole article reveals great sympathy with the Japanese Navy, and as this is this the accused's first offence the punishment great sympathy with the Japanese Navy, and as this is this the accused's first offence the punishment should be as light as possible, according to the provision for a fine in Art. 31 of the Press Law, which provides punishment for offenders against Art. 22 of the Press Law, and clause No. 1 of the Naval

Asked if he wished to address the Court, Accused Asked if he wished to address the Court, Accused said he was surprised that proceedings in a Criminal Court should have been instituted against him in consequence of the article entitled "News from Gensan." He denied that anything therein was in any sense a violation of the Law. Article 22 of that Law provides that the Minster of State for War and the Minster of State for the Navy may issue Special Orders prohibiting the publication of matter relating to the movements of troops and war vessels, or to military secrits and tactics. What was there in the article which had occasioned his prosecution that could be considered a secre or a statement of tactics? There was nothing in the article to warrant such a charge. Had he imagined that there was any secret in the article, he would have first sought the permission of the authorities before publishing the permission of the authorities before publishing it. For the last thing he should think of doing would be to expose either naval or military plans. As to that, he stated that on various occasions since As to that, he stated that on various occasions since the outbreak of war he had declined to use translations of paragraphs, etc., published in Japanese newspapers about the transportation of troops, the concentration of rolling stock at some railway centre, etc., because in his opinion such matter, if published, might have apprised the country's enemy of an impending movement. Reverting to Art, 22, he reminded the Court that it related to the displacement of terrors, matters that were intended to be Art. 22, he reminded the Court that it related to the divulging of secrets, matters that were intended to be kept secret. Could the presence of Rear-Admiral Kamimura's squadron in the Japan Sea—a fairly large area of water—of the reported departure of the ships from Chinhai-wan 6 or 7 days before be said to be secret matters? Had he said Rear-Admiral Kamimura's Squadron had gone north, to Vladivosock or Possiet Bay, or Hakodate, or Gensan then he might have been reuealing military secrets, assuming of course that the ships had gone to the places indicated. Moreover, the article says it was reported. This qualification of the statement was used in the sense of "fubun." It was not a positive statement that the ships had left. Clause 1 of the Naval Instruction should be read in the light of Clause 2 and obviously the prohibition was of the Naval Instruction should be read in the light of Clause 2 and obviously the prohibition was intended to cover movements in future. The news in question regarded the past and it could not, by any conceivable means, be turned to account for the benefit of the enemy. That, in brief, was his view. He could enlarge on the subject for an hour or more in support of his contention, but he did not think it was necessary, and concluded with an earnest appeal the Court for the dismissal of the case.

Judgment was reserved to 1 o'clock in the aftermoon.

noon.

On the Court reopening in the afternoon, judgment was passed. Accused was found guilty, and sentenced to a fine of yen 20.

Notice of appeal was given.
The following is a translation of the judgment.
Alfred W. Curtis, British subject, 76, Kio-machi, Kobe, Hiogo Ken, Japan, Editor and publisher of the Kobe Herald.

The following judgment has been given in the case in which the foregoing party is charged with having been guilty of a violation of the Naval Instruction.

The accused is fined yen 20.

The copy of the newspaper placed in the hands of the Court will be returned to the party who presented it.

The accused is the Editor and publisher of the Kobe, Hiogo Ken, Japan. In No. 5341 of the journal, published on the 27th April, 1904, be insertjournal, published on the 27th April, 1904, be inserted an article in the 2nd column of the 4th page, under the heading "The News from Gensan" in which he stated that Vice-Adulral Kamimura's fine homogeneous squadron of six armoured cruiser is somewhere in the Japan Sea—it was reported to have left Chinhaiwan six or seven days ago, presumably for Vladivostock or the near nelghbourthood, it being obviously necessary that the enemy's squadron at Vladivostock should be either bottled up or smashed up, etc., etc., and mentioned the movements or the Japanese war-ships in the Sea of Japan and their number and classification. The accused admits having written the foregoing article himself. The copy of the journal in the Cont's hands contains the said article and the fact of the insertion of the article is established. The accused pleads that article is established. The accused pleads that these lines do not relate to military tactics or secrets, but the article mentions the movements, classification and number, and these items relate to military secrets and tactics as the lines themselves indicate. On these rounds the defence of the accused is rejected.

The offence of the accused is a violation of Art. 22 The offence of the accused is a violation of An. 22 of the Press Law and No. 1 of the Naval Instructions, and he is, therefore, to be punished according to Art. 31 of the Press Law. The copy of the paper in custody is to be disposed of according to Art. 22 of the Code of Criminal Procedure, and the foregoing judgment is therefore given.

DEATH OF SIR H. M. STANLEY.

The death of Sir Henry Morton Stanley, G.C.B., D.C.L. LLD., removes a world known figure. Born in 184t near Denbigh, Wales, he was when three years of age placed in the poor-house of St. Asaph, where he remained ten years, and received an education which enabled him to teach in a school.

an education which enabled him to teach in a school. At the age of fifteen he sailed as cabinboy in a vessel bound for New Orleans. Here he was adopted by a merchant named Stanley, whose name he took in place of his original one, which was John Rowlands. His patron died without leaving a will, and young Stanley was left to his own resources. He enlisted in the Confederate army, was made a prisoner, and subsequently joined the Federal navy, serving as acting ensign on the Ticonderoga. After the close of the war he went to Turkey as a newspaper correspondent, and in 1886-7 was sent by the New York Heruld as its correspondent with the British army in Abyssinia, and subsequently travelled in Spain and pondent, and in 1886-y was sent by the New York Heralda as its correspondent with the British army in Abyssinia, and subsequently travelled in Spain and elsewhere for the same paper. He was finally sent by the conductor of the Heralda to find Dr. Livingstone, of whom nothing had been heard for more than two years. Stanley sailed from Bombay in October, 1870, and reached Zanzibar, on the east of Africa, early in January, 1871, and on Nov. 10 found! Livingstone at Ujiji, on Lake Tanganyika, where he had just arrived from the southwest. Stanley furnished him with supplies, explored the northern part of Lake Tanganyika with him, and remained until February, 1872, when Livingstone started on the journey from which he never returned, and Stanley made his way back to Europe, reaching England in July, 1872. Here he was received with great enthusiasm, was publicly entertained, and presented by her Majesty with a gold snuff-box set with diamonds, and by the Royal Geographical Society (1873) with the patron's Gold Medal. The ècuta of his first expedition induced the conductors of the New York Herald and of the London Daily Telegraph to send him, at their own expense, on another Africa Expedition. He reached Zanzibar in the autumn of 1874 and, learning that Livingstone another Africa Expedition. He reached Zanzibar in the autumn of 1874 and, learning that Livingstone was dead, resolved to go north-westward and explore the region of Lake Victoria N'yanza. This, after many encounters with the natives and the loss by death or desertion of 104 men out of 300, he reached in February, 1875, and found it to be the largest body of fresh water on the globe, having an area of 40,000 square miles. He then pushed westward towards Lake Albert N'yanza, and was able to satisfy himself that it was not, as had been generally supposed, connected with Lake Tanganyika. Forced by the hostility of the natives to return to Ujiji, he determined to descend the great river discovered by Livingstone, and believed by him to be the Nile, but which others thought was the Congo (and Stanley which others thought was the Congo (and Stanley by this journey ascertained it was). It had been named by Livingstone the Lualaba, but by Stanley it was named the Livingstone. The descent, chiefly was named the Livingstone. The descent, chiefly by canoes, occupied him eight months, cost him the lives of thirty-five men, and was accomplished under the greatest difficulties and privatious. On reaching was named the Livingstone. The descent, chiefly by canoes, occupied him eight months, cost him the lives of thirty-five men, and was accomplished under the greatest difficulties and privatious. On reaching the greatest difficulties and privatious. On reaching the greatest difficulties and privatious. On reaching the greatest difficulties and privatious. On reaching the moral union which must be the foundation of any Pan-Mongol union. Interesting data on the special part of the vessel took him to St. Paul de Loanda, whence an English vessel conveyed the party to the Cape of Knowledge Among the Chinese." This society, by Good Hope, and thence to Zanzibar. Here his men adopting a broad-minded view of Chinese needs, is were left at their home; and Stanley reached

England in February, 1878. He published an account of his first expedition, under the title of "How I Found Livingstone," 1872. Of his second expedition an account is given in "Through the Dark Continent," 1878 (abridged edition, 1885). The President of the French Geographical Society presented the Cross of Chevalier of the Legion of Honour to Mr. Stanley at the Sorbonne, Paris, June 28, 1878. In 1879-82 he visited Africa again, sent there by the Brussels African International Association with a view to developing the great basin of the river Congo. The King of the Belgians devoted from his private purse £50,000 per annum towards this costly there by the Brussels African International Association with a view to developing the great basin of the river Congo. The King of the Belgians devoted from his private purse £50,000 per annum towards this costly enterprise. Stanley completed the work in 1884, having established trading stations along the Congo River from its mouth to Stanley Pool, 1,400 miles by river. A description of his labours in this field was published by him in 1885 under the title "The Congo and the Founding of its Free State." On Jan 13, 1887, he was presented with the honorary freedom of the City of London, just on the eve of his departure for a fourth time to Africa. This expedition was made for the purpose of relieving Emin Pacha, Governor of Equatorial Africa, whose condition was known in Europe to have become precarious. Stanley fulfilled his mission, succoured Emin and brought him and his followers safely back to Egypt, but only after the most severe hardships endured in any of his explorations, and with a loss of over 400 out of the 650 men he had taken with him. Nearly three years were occupied in the journey. Among the important geographical results of the expedition were the discovery of the Semliki River, of Mount Ruvenzori (thought to be 17,000 feet high), of Lake Albert Edward, and of the south-western extension of Lake Victoria. Lake Albert Edward proved to be the primary source of the White Nile, and it was shown that its waters connect through the Semliki with the Albert Nyanza. Stanley reached Cairo near the close of 1889, and remained there until the following spring in order to write a record of the journey. This was spublished simultaneously in England, France, Germany, and the United States in June, 1890, under the title of "In Darkest Africa" (2 vols.). His return to England was an unending ovation: The Universities of Oxford and Durham bestowed upon him the degree of D.C.L.; that of LL.D. was conferred upon him the degree of D.C.L. into of LL.D. ovation: The Universities of Oxford and Durham bestowed upon him the degree of D.C.L.; that of LL.D.
was conferred upon him by the University of Cambridge, and every institution and individual sought to
do him honor. On July 12, 1890, in Westminster
Abbey, he was married to Miss Dorothy Tennant, an
artist of considerable talent, and a lady well known.
in society. She is the daughter of Sir C. Tennant. A
controversy subsequently arose relative to certain
incidents mentioned in a "Life of Major Barttelot,"
which amounted to charges against Mr. Stanley. He
defended himself from these charges before undertaking a lecturing tour to America. On his return with
Mrs. Stanley in 1891, he lectured in many parts of the
United Kingdom, and in 1897 paida wisit to Australia.
On his return he settled in London and took out a
certificate of naturalisation. At the general election On his return he settled in London and took out a certificate of naturalisation. At the general election in July he stood as a Unionist for North Lambeth, but was not returned. During the controversy about Uganda he was strongly in favour of retaining that country. In November, 1893, appeared his book on "My Dark Companions and their Strange Stories." In 1898 appeared his "Through South Africa," being an account of his visit to the Cape. He was created G.C.B. at the Birthday, 1899.

THE YELLOW PERIL.

By Archibald R. Colquhoun, F.R.G.S.

There are many people who, despite an entire sympathy with Japan in her reasons for declaring war, are still possessed by a lurking fear lest any great degree of success might make her a dangerous factor in world politics. In a word, the "Yellow Peril," that bogy embodied by the German Emperor in a world-france scattern is a track among as seven in a world-famous cartoon, is at work among us, even among the people who have been first and foremost in urging the yellow peoples to adopt a Western civilization.

It may be said at once that these doubts and fears as to the aggrandizement of a yellow race are not, on the surface of things, without foundation. One of the principal aims of Japan in the present conflict of the principal aims of Japan in the present connect is to bind China to her, by fetters too strong to be broken, and there is a shrewd suspicion that in so doing she is actuated by something more than a mere desire to save the yellow races from domination by the white. To the conquering Slav, Teuton or Anglo-Saxon this may seem a dangerous doctrine, though he can hardly count it an unreasonable one.

work. It numbers some of the most distinguished Americans and Englishmen in China among its members, and although some of the ablest Christian missionaries are among them, the work of the society is quite as much secular as religious, its aim being enlarge the horizon of the Chinese and teach him to rise above the ignorant provincialism which is his

bane.

Among the most interesting details of the work accomplished is the fact that thirty-five complete sets of the "Encyclopædia Brittanica" were sold to Chinamen in Shanghai, and had there been a Chinese translation hundreds of copies could have been disposed of. Still more remarkable are the examples given of questions, taken from various provinces, of examination papers set for the Chu Jen. or M.A. degree. In Kiangsi the students were asked to explain Free Trade and Protection—a question which very few M.A.'s in Britain or the United States which very few M.A.'s in Britain or the United States would care to tackle at this moment. They were asked also, What is the bearing of the Congress of Vienna, of the Treaty of Berlin, and of the Monroe Doctrine on the Far East? Wherein lies the naval supremacy of Great Britain? What is the bearing of the Siberian Railway and Nicaragua Canal on China? In Shantung: Define the relations of land, labor and capital. How best to develop the resources of China by mines and railways? How best to modify the civil and criminal laws in order to regain authority over those now under extraterritoriality privileges? In Fukien: Which Western nations have paid most attention to education, and what is the result? What are the government, industries and education of Switzerland, which, though small, is independent of surrounding great Powers? In Kwangtung (Canton): How to promote Chinese international commerce, new industries, and savings banks, versus the gambling houses of China? In Hunan: What is the policy of Japan—only following other nations or what? In Anhui: How do foreigners get faithful men for their Government services? Government services

Some of these are taken from the pamphlets issued by the society, but that such subjects should appeal to the literati of China as worthy of study is in itself an eloquent commentary on the spirit which is at last

by the society, but that such subjects should appear to the literati of China as worthy of study is in itself an eloquent commentary on the spirit which is at last awaking in China. As regards this spirit the society speaks with evident diffidence, disclaiming any responsibility for having "stirred up reform." Reform is in the air; China is seething with it, they say, and we are but endeavoring to turn it into favorable channels. Whence has come this spirit, so long lacking, despite the labors of many Europeans in the missionary field? I have no hesitation in saying that it is Japan that has breathed a new life into the decaying civilization of China.

The Japanese reformer in China is, of course possessed of many advantages over his Western competers. One of the most powerful weapons he has wielded has been the press, of which, though so recently introduced in his own country, he had already learned the use in reaching people who would otherwise be outside the range of his possible influence. Before 1895 there were no newspapers in China save the English ones, one German, and a few missionary sheets in Chinese, issued for the purpose of religious propaganda. The Reform movement of 1896-98 gave birth to a large number of newspapers in Chinese, generally of a revolutionary character, followed by others in French, German and Russian, which, however, had little effect on public opinion. The Japanese opened a new era by publishing in Peking, Tientsin, Shanghai, and even in the interior, papers which, although in the Chinese language, gave a view of Japanese development and of Western civilization from an Oriental point of view. It is obvious that these papers were likely to achieve greater popularity than any previously issued, and their influence has no doubt been enormous.

The practice of sending Chinese students to Tokyo (of whom there are already more than

and their influence has no doubt been enormous.

The practice of sending Chinese students to Tokyo (of whom there are already more than 1,000 in Japan, some of them supported by provincial subscriptions) and of obtaining Japanese teachers in many branches of education has increased rapidly, and Japanese have replaced the British or American teachers in most of the colleges. The visits paid by Chinese princes to foreign countries have

paid by Chinese princes to foreign countries have inaugurated a new era in the history of the nobility. Formerly the reports of the Ambassadors abroad or of such Chinese officials as visited Europe or America were treated with indifference or Contempt by the ruling Manchus, but this will hardly occur again now that Prince Chun has visited Germany

unfortunate men who formerly, at great pains, acquired this knowledge. The most he could hope for quired this knowledge. The most he could hope for in the old days was to become interpreter to a vice-regal yamen, and he was persona grafa to neither his own people nor the foreigner.

Another powerful element in spreading knowledge has been the extension of the postal system throughout China. Newspapers, magazines and even books now penetrate to the remotest part of the empire—a

now penetrate to the remotest part of the empire—a reform due to the organization of Sir Robert Hart; so that Japan must not receive all the credit.

Can anything be more significant than one of the examination questions quoted: "Is Japan merely following other nations?" Here to my mind lies the secret of her success in fanning the embers of reform to a blaze. The intense pride of race which animates the Chinaman made it difficult for him to account the wide of impirators of the Western peoples. animates the Chinaman made it difficult for him to accept the rôle of imitator of the Western peoples, whom he regarded as barbarians, despite their superior equipment in practical matters. His first conception of Japanese renascence was that she was a mere pupil, to be tied to the chariot wheels of her teacher. Japan has now taught him otherwise. It is customary for us to speak as if Japan in adopting a Western civilization had, in fact, sunk her own personality; but it is becoming increasingly evident that this is not the case. Her views of Western affairs would probably surprise and scandalize a

evident that this is not the case. Her views of Western affairs would probably surprise and scandalize a good many of the people who have been wont to patronize her as an apt and intelligent pupil. Having grasped the world-conditions in which she was to play a part, she set about equipping herself for the rôle she desired to play; but her avowed ambition to be quit of leading strings at the earliest opportunity, the reticence and independence of her attitude and the steadiness of her aim have indicated clearly enough that she had no intention of becoming a mere Westernized ner am nave indicated clearly enough that she had no intention of becoming a mere Westernized appendage of the European or American continents. As a matter of fact, Japan, despite the adoption of Western dress by her Government, despite the organization of an army and navy on (improved) European standards—despite everything she has done to make herself efficient as a nation—has not adopted Western civilization et aloc. Her ideals adopted Western civilization en bloc. Her ideals her sympathies, her attitude toward the great central facts of life remain what they were. The Japanese is no travestied Westerner; he remains true to himself, to his race, to his traditions, while conforming to the demands of a dominant civilization.

demands of a dominant civilization.

He is teaching China this view of reform, and it is not a matter for wonder that some of the keenest foreign observers in China are rather uneasy as to the results of the lesson. It is certain that thus, and thus only, can the barrier of Chinese obstructiveness be overcome; but whether the results will be favorable to Western influences in extremely doubtful. From the point of view of the Christian missonary it is more than doubtful. Japanese influence makes rather for religious indifferentism than for any creed, but an association has been already formed of those who are professedly Buddhistic in religion and pro-Japanese in politics. It is the presentation of educational projects, either under the sanction of a common religion or from a purely scientific, utilitarian and frequently agnostic platform, which gives the Japanese their second stronghold upon the attention of the people.

The general opinion among the best informed on

istronghold upon the attention of the people.

The general opinion among the best informed on Chinese subjects is that the people are fast ripening for radical changes, and when we remember the extraordinary revolution wrought in Japan in a few years we need not be surprised at the quick growth of reform feeling in China. A large number of the older officials, particularly the nobles, are not in sympathy with the movement, which, they know, would be the death-knell to their pretensions and monopoly of political power. Nevertheless, they are to a growing extent pro-Japanese, being, indeed, between the devil and the deep sea, since foreign nations threaten them on the one hand and their own people on the other. In Japan they see the saviour of China from rapacious Europe, but at the same time they dread the revolution she is working up in the long-suffering Chinese.

A very notable change has recently been taking

tion she is working up in the long-suffering Chinese. A very notable change has recently been taking place in the sentiments of the Chinese Government and people toward Russia. The machinations of Japan have effected their object in opening even Manchu eyes to the true nature of the "friendship" on which Li-Hung-chang had taught them to lean. Occurrences in Mongolia and Thet have given them grave cause for alarm, for they are perfectly aware that in losing control of Lhassa and opening the door to Russia they were forfeiting something far more important than a mere outlying dependent state of little economic value. The present move of the British into Tibet—a technical violation of territory which we had on a previous occasion evacuated rather than offend Chinese susceptibilities—comes at an auspicious by the ruling Manchus, but this will hardly occur again now that Prince Chun has visited Germany (although on an unpleasant mission) and that Prince Chen has been to England to attend the coronation, has patronized the Usaka exhibition, and has inspected the various institutions of Japan. Even the Mongol Princes have taken to traveling, and Japan is the Mecca to which their footstepstend. We hear that a Chinese Prince is to go to the St. Louis Exhibition; so that East and West are indeed meeting at last! Several sons of high families have embraced the opportunity offered by the legations in Washington and London to gain acquaintance with the West and study the English language, and a very different late awaits them from that which used to befall the

against Russia. Nothing succeeds like success, and the opportunism which is the only policy left for a distracted China will lead her at a moment's notice

against Russia. Nothing succeeds like success, and the opportunism which is the only policy left for a distracted China will lead her at a moment's notice to reverse a policy which has led to the present imbroglio. Unfortunately for the aspirations of anti-Western Chinese reformers (an expression which would have been impossible a few years ago, when reform and Westernization were synonymous terms), there are in the vast Chinese empire too many points of contact with Western nations, more particularly with Russia, to permit her to work out her salvation on independent lines like insular Japan. It is for this teason that I am not by any means appalled by the prospect of the Yellow Peril. Were China a continent by herself, were there no great British empire in Asia, no vast American republic on the other side of the Pacific, no Holy Russian empire, no progressive Germany, no Suez or Transishmian canal—in short, could we put back world-conditions for many centuries—I could feel, as felt Western civilization, a genuine thrill at the prospect of invading Mongol hordes—innumerable, invincible sweeping across Europe like devouring locusts.

Personally, I consider the Japanization of China preferable to that partition which has so long been hanging over a moribund empire. If the Japanese can succeed in galvanizing China into life, it will be more to our advantage than if the European situation continued to reproduce itself, with alarming variations in the balance of power, in and around the Pacific. Whatever may be the ultimate trend of her civilization, we have no reason to believe that Japan's influence will be exerted to our detriment. An insular people, reproducing in many features the situation of Britain, she is still debarred by world-conditions from following the British path of colonization and world-empire. Her avowed policy to preserve China intact and to open her to the commerce of the world is precisely our own, only she endeavors to obtain her objects by strengthening China, whereas certain of the Western China, whereas certain of the Western Powers fried to achieve this by a process of exhaustion. The fears of an industrial invasion by the yellow man are better founded, but it must not be forgotten that the principal objection to Oriental labour will be done away with. Meanwhile, we are able to protect ourselves by extraneous measures, which, however lacking in logic, are still effective from our own point of view.

of view.

Notwithstanding this optimistic view of Japan's mission in China, it is my earnest conviction that the Anglo-Saxon peoples cannot afford to be quiescent in the near future, if they desire to preserve intact the interests they have created. Japan will not be their cat's paw. They will have to take a hand themselves to get their chestnuts out of the fire. At any moment the death of the Empress-Dowager, the outbreak of revolution or the fortune of war might create a situation of the greatest delicacy in the outbreak of revolution or the fortune of war might create a situation of the greatest delicacy in the Far East and in any case the conclusion of the war, whatever its issue, will leave a host of points to be settled, in which Britain and America are deeply interested. It would be well if both countries were agreed as to the main lines of policy in any contingencies which may conceivably arise, so that they shall be able, in cooperation, to take up a firm attitude on disputed points and thus to guard against dangerous regrettable eventualities.

TRADE OF JAPAN.

Summary of the foreign trade of Japan for April, 904, and comparison with the corresponding mo of the previous year :

EXPORTS. MANUFACTURED ARTICLES.

AMERICAN VIEWS OF THE BRITISH TIBET EXPEDITION.

With few exceptions, says the Literary Digest, the American press treat with satire and scepticism the British professions of high motives in their expedition into Tibet which killed 400 Tibetans and wounded 200 near Guru. Colonel Younghusband, political agent of the Indian Government, with an escort of 1,000 men under General Macdonald, was sent out last October to secure the Dalai Lama's obedience to the treaty of 1890, which grants the British of India certain trade privileges in Tibet. Great Britain claims that Tibet did not live up to its obligations, and sus-picions are entertained that this disregard of the treaty was due to Russian influence. The authorities in Tibet have been reluctant to discuss the subject, and the expedition was repeatedly told that it would have to return to the frontier before any terms would be considered. Near Guru an emissary of the Tibetan Government, at the head of a force of 1,500, ordered the expedition to travel no farther in the direction of the forbidden travel no farther in the direction of the forbidden city of Lhassa. Colonel Younghusband refused to withdraw, and General Macdonald conceived the idea of dispersing the Tibetans without the use of arms. As the Tibetans resisted the effort to disarm them, an engagement ensued, in which 400 Tibetans were killed, while the British suffered a loss of about a dozen, slightly wounded. A few rifles captured from the Tibetans bear the Russian imperial stamp, and the ammunition also is said to have been of Russian make. A British account says that "the whole affair was brought upon the Tibetans by themselves, as Colonel Younghusband and General Macdonald and the troops exercised the greatest possible forbearance Younghusband and General Macdonald and the troops exercised the greatest possible forbearance and patience." A number of our papers, however, think that the Tibetans had every right to protest against and resist the entry of an armed British force into their country; and General Macdonald's idea of "peaceably" disarming the native army, and then mowing them when they resisted, receives severe criticism. "It was sheer butchery, without palliation or excuse," declares the Philadelphia *Record*; and the Indianapolis *Sentinel* inquires: "What act of Russia, we ask, is as bad as this ruthless slaughter of an innocent

pastoral people on their own soil by the liveried brigands of the British Empire?"

The New York Evening Post condemns the expedition on the ground of hypocrisy. It declares that "what damns the Younghusband expedition is that it was administrated to the property of the declares that "what damns the Younghusband expedition is that it was solemnly organized in the name of the peace of the world and the betterment of relations between the Emperor of India and the Lama." The Philadelphia North American thinks that by this affair in Tibet "Great Britain has forfeited every moral right to protest against France or Germany or Russia doing a similar thing. She has strengthened Russia in the eye of the world, and she has made the formidable task of her ally, Japan, more difficult. No one can say when the reports of the rifles at Guru will cease to echo." "The old familiar methods of spreading light and truth and the rines at Guru will cease to echo." "The old familiar methods of spreading light and truth and charity of Christian civilization are still being employed," remarks the Boston Transcript.

On the other hand, the Providence Journal and Buffaio Express think England is about to do for Tibet what America did for Japan. But

The Journal adds that " what has stirred the British to action in this business is not so much the value of a Tibet open to trade as the usefulthe value of a Tiber open to trace as the useful-ness of a Tibet rescued from Russian influence and maintained as one more barrier to Russian advan-ces toward India. Of the Russian agencies at work in the land of Lamas the world knows little but suspects much." The Express, which, by the way, regards our Philippine policy as too imperialistic, says:

the way, regards our Philippine policy as the imperialistic, says:

"The combat between General Macdonald's expedition and a party of Tibetans marks the beginning of the end of isolation of Tibet. That country is now the least-known corner of the inhabited globe. It is the last remaining hermit nation. It is the one place closed absolutely to travelers and to trade. The British expedition is doing for it what Commodore Perry did for Japan. It was hoped that the opening of the country could be effected in the same peaceful manner as was the opening of Japan. But there was little expectation of such an outcome. The fanalticism of the Tibetans, their ignorance of foreign power and of modern weapons were too well appreciated to make it probable that they would permit their isolation to be disturbed without resistance. The British therefore, went prepared to fight, if necessary. And they have found it necessary.

"Whether the consequence is the eventual annexation of Tibet to the British Empire or the acceptance of a treaty similar to the one Commodore Perry forced upon Japan. Tibet must henceforth be strongly under British influence. The British Government has taken an opportune time to accomplish this when Russia is engaged in Manchuria. It has long been a question whether the British or the Russians would be first in breaking into Tibet. The British position in India will not be strengthened by the extension of British influence so far to the north. This fact may lead to a Russian domination finally, as has happened in other districts of Central Asia, but the opening of the country will be the work of Englishmen."

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

REPORTED JAPANESE LOAN.

London, May 5.

Negotiations are approaching a conclusion with several financial houses in London for the issue of a Japanese loan of five millions sterling at six per cent., the security being a first charge on the Customs.

RUSSIANS SEARCH ANOTHER ENGLISH MAIL STEAMER.

The Russian gunboat Krabri, after firing a blank shot, stopped the P. & O. mail steamer Osiris nine hours' off Brindisi and after two hours' detention the mails were sorted. The Russians demanded the Japanese mails, but the latter were untouched, being at the bottom. After examining the other mails, the Osiris was allowed to proceed.

THE JAPAN SOCIETY'S DINNER.

London, May 6.

At the annual dinner of the Japan Society of London, Baron Hayashi, Japanese Mini-ster to the Court of St. James, presided. Baron Suyematsu declared in the course

of his speech that the Japanese would never surrender before their blood was exhausted. Many thought that Japan was unable to carry on the war for economical reasons. He admitted that Japan's wealth was limited, but it was not so limited as outsiders supposed.

Baron Hayashi said the Emperor of Japan and the people of Japan would be much rejoiced at the warm manner in which England had shown her sympathy.

THE LIAOTUNG PENINSULA

London May

The Japanese forces have landed at Kinchow, forty miles from Port Arthur. Consequently the railway is closed and the investment of the town has begun.

MR. A. J. BALFOUR ON MACEDO-NIAN REFORMS.

Mr. A. J. Balfour, the British Prime

1903. Yen.

290,704 898,872

Minister, speaking at the great annual Habitation meeting of the Primrose League, dwelt on the difficulty of inducing the Porte to effect reforms, and declared that the Government would not allow themselves to be made the catspaw of the revolutionaries, who would rather have genuine reform fail than succeed if it did not go the whole length they desired. Mr. Balfour also referred to the enormous value of the Anglo-French agreement, which he believed would be permanent.

PORT ARTHUR SEALED AND ISOLATED.

London, May 8. Though not officially admitted, it is believed in St. Petersburg that Port Arthur is isolated and that the harbour is sealed. Viceroy Alexieff and Grand Duke Boris left hurriedly to escape being cut off. The smallest possible force has been left in Port Arthur, which is provisioned for one year.

ANOTHER TIBETAN ATTACK REPULSED.

The London Daily Mail states that 800 Tibetans attacked the British Mission at Gyangtse on May 5th but were repulsed with heavy loss.

FRANCE AND THE POPE.

The Pope has sent to France a formal strong protest against the head of a Catholic State visiting the Quirinal. France has replied refusing absolutely to entertain the protest.

BALKAN REFORMS DISAP POINTING.

London, May o Lord Lansdowne, replying to a question, confessed that the progress of reforms in the Balkans was disappointing. If it was not accelerated we might be confronted by a situation fraught with the gravest anxiety.

TO STRENGTHEN THE MANCHU-RIA ARMY.

Russia has ordered the mobilization of the Markoff and Moscow Army Corps and other troops to strengthen the Manchuria Army.

THE TIBET EXPEDITION. A company of Ghurkas and a company of Sikhs attacked 1,500 Tibetans on May 6th below Karko Pass. There was a six hours' fight during which the British had 25 casualties. Capt. Bethune was killed. The enemy fled, losing 200,

THE RUSSIAN CASUALTIES AT THE YALU.

London, May 10. It is officially stated that the Russian casualties at the Yalu battle were: officers and 2,324 men killed and wounded.

A BRILLIANT CAMPAIGN.

The London Telegraph says the campaign has been conducted with brilliance almost unparalleled in war. Japan's success has been due to a consummate combination of naval and military action which even England has never rivalled.

THE JAPANESE LOAN.

Later. The Japanese Loan, which was expected to be issued on the 8th instant, was quoted on Saturday at 2½ per cent. premium and yesterday at 3 per cent. Its unqualified success is assured.

ment for its pro-Russian attitude in the the advice of the local officials the farmers Egypt.

Petropavlovsk disaster did not in any their work and are engaged putting in their wise reflect the feeling of the nation, spring crops, so that no succour need be Count Buelow denied that the Kaiser's given to them. telegram was any departure from neutrality. He also expressed regret that a disaster to a neighbouring and friendly nation had been made the object of malicious articles and caricatures in the German press.

A REPORT FROM ALEXIEFF.

London, May 11.

A telegram from Viceroy Alexieff to the Tzar said that railway communication with Port Arthur was restored on Monday night.

JAPAN'S AIMS.

Baron Suyematsu in an interview of Reuter's representative in London, declared that Japan's first and chief aim was to push back Russia as far as possible. Russia must never be allowed to obtain political or territorial hold in Korea.

NEW JAPANESE LQAN.

A Japanese loan of five millions has been

GENERAL KUROPATKIN'S REPORT.

Saigon, May 6. The report of General Kuropatkin explains that the Japanese directed their principal attack against the Russian left wing, which was composed of only five to six thousand men, the rest of the army being dispersed over a wide expanse of territory. Thus confidence. The New York the Russian Army were compelled to fight against an enemy five to six times their superior in numbers. A Russian regiment spirit shown by the Russians. covered the retreat and combatted heroically against an entire Division and was decimat-Two batteries of Artillery were obliged to abandon their guns, the ground being impracticable, all their horses as well as nearly all their gunners being killed. The Russians nevertheless spiked their guns. The Japanese attempted pursuit in the direction of Fengwang-tien, but were check-

ed, losing 300 men.
Port Arthur reports that the Russians have successfully repelled a new attack of the Japanese. They sank eight steamers armed with artillery and two torpedo boats.

FRENCH NEWS.

Saigon, May 7.

The Ministers of the Powers are acting in perfect accord in Peking to maintain the strict neutrality of China.

Tokyo reports that the Japanese are com-mencing to debark on the Liaotung Penin-

M. Waldeck-Rousseau - former First Minister-has undergone a serious surgical operation.

FRENCH NEWS.

Saigon, May 10. General Kuropatkin estimates the total

losses at the Yalu at 70 officers and 2,324 soldiers killed, wounded or missing. In the general municipal elections which

have just taken place, the Ministerialists gained the majority in Paris and in several of the provincial councils. Their opponents triumphed at Marseilles, Lille, Bordeaux, and some other great cities.

(RECEIVED IN TOKYO.) KOREANS RESUME THEIR OCCU-

gram of sympathy on the occasion of the and Anju have for the most part returned to Petropavlovsk disaster did not in any their work and are specified.

(RECEIVED AT THE WAR OFFICE). COSSACKS AT ANJU.

On May 10th 200 Cossacks attacked the garrison at Anju, which held its ground until the arrival of reinforcements from Pyong-yang. There appears to be still some force of the enemy in Nyong-tyong.

(RECEIVED AT THE FOREIGN OFFICE.)

FOREIGN PRESS ON THE WAR.

The tone of public opinion in Paris has undergone a marked change in consequence of the rapidity and force of the military blows delivered by Japan. The newpapers, blows delivered by Japan. The heterparts, being still pro-Russian, do not yet predict the ultimate success of Japan, but have nevertheless conspicuously altered their manner of discussing the two belligerents. fully underwritten in New York at 93. It is quoted at a premium of 3.

(Received at the Legation of France.)

(Received at THE LEGATION OF FRANCE.)

(Received AT THE LEGATION OF FRANCE.)

The Temps, in discussing the Russian failure to offer any resistance to the landing of the Japanese, adopts a sarcastic tone and opines that Russia will begin her offensive action from Liaoyang on land and from the Baltic on sea. It ridicules Kuropatkin's grand policy of crushing patience. passive attitude, it says, does not inspire any confidence. The New York Herald, hitherto absolutely Russophil, now turns round and expresses astonishment at the want

(FROM THE " JIJI SHIMPO.") THE NEW JAPANESE LOAN.

London, May 10.
The new Japanese loan advanced to-day £3 over the issue price.

The quotations of other Japanese bonds also showed a remarkable rise

FIRE AT A RUSSIAN ARSENAL

Fire has broken out at the Cronstadt Arsenal. ammunition magazine in the neighbourhood of the outbreak narrowly escaped destruction.

Subsequently, all the foreign workmep employed in the Arsenal were dismissed. Military officers have been ordered to take the place of civilians.

U. S. NAVAL MOVEMENTS.

Two warships of the United States have been ordered to Chefoo.

DEATH OF A WELL-KNOWN EXPLORER. Sir Henry Morton Stanley, G.C.B., D.C.L., LL.D.,

(FROM THE "N.-C. DAILY NEWS.")

CONCEALMENT OF THE NEWS IN RUSSIA.

London, May 3.

No official announcement was issued at St. Peters-burg yesterday regarding the outcome of the battle on the Yalu, but alarming rumours were in circula-tion of the full retreat of the Russians and the loss of

RUSSIAN VOLUNTEERS TO THE FRONT.

The first detachment of St. Petersburg volunteers, one hundred and sixty in number, drawn from all classes of society, started for the front yesterday, in the midst of immense crowds and frantic enthusiasm.

IMPEACHING GERMAN NEUTRALITY.

London, May 4

The Socialist organs at Berlin affirm that the great German shipyards are building at extra pressure destroyers and torpedo-boats for Russia, and these are being exported in sections to Libau in order to conceal the breach of neutrality involved.

INDIGNATION OF THE PORTE.

GERMAN NEUTRALITY.

In the German Reichstag the Socialist leader, Herr Bebel, attacked the Govern-Japanese Commissariat Department, and of ment does not affect Turkey's rights of suzerainty in the format of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement, Great Britain declares that the Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement, Great Britain declares that the Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that it was not consulted in reference to the Anglo-French Agreement of the Porte that

THE SEAMY SIDE OF WAR.

London, May 6.

Ceneral Kuropatkin has asked the Red Cross
Society to send two thousand more beds for the
military hospitals at the front.

CHINECE VARIABLE OF THE PROPERTY AND

CHINESE LABOUR FOR THE RAND.

A motion for adjournment made by Major Seely in the House of Commons, on the ground of the ill-treatment of natives on the Rand, was negatived by 213 votes to 150.

(FROM THE "HONGKONG DAILY PRESS.") SOMALILAND,

London, April 28.

A naval force has captured Illig, on the Somaliland coast. Fighting took place at close quarters, the enemy attacking our zarebas. The British loss was slight, whereas the dervishes lost heavily.

GERMAN SOUTH-WEST AFRICA.

An outbreak of typhus has occurred among the German forces in South-West Africa. The mortality is as high as 50 per cent.

(From the "Singapore Free Press.") PROSPEROUS EGYPT.

The prospectus of a million and a quarter sterling bonds of the Agricultural Bank of Egypt, was issued yesterday. The issue was immediately quoted at three-quarters to one premium.

BRITISH ROYALTIES AT VIENNA

The Prince and Princess of Wales have left Vienna. The visit has made an excellent impression.

"CHESHIRES" RUN WILD.

Owing to the police arresting their comrades for minor offences, the recruits of the Cheshire Regiment about to embark on the troopship Assaye broke out from the Docks at Southampton and marched through the Town smashing the windows and rioting. The police drew their truncheons and drove the noters back to their barracks. Several of the soldiers were injured. The ringleaders have been extracted. arrested.

HOME POLITICS.

The general impression in political circles is that the position of the Government has become stronger. the position of the Government has become stronger. Though the Budget and the Licensing Bill were received with no enthusiasm, neither measure is likely to involve the Government in serious difficulties but much depends on the attitude of Mr. Chamberlain. Liberal circles believe that Mr. Chamberlain does not desire to press the fiscal question for the present. They regard the cancelling of the meeting which he intended to address in East London as significant. On the other hand Mr. Chamberlain in addressing the Tariff Commission expressed his gratification at the progress of the work, and the fact that the information supplied to the Commission by manufacturers indicated a widespread public interest.

THE FRANCO-BRITISH ENTENTE.

The Times, commenting on Lord Cromer's recent speech at Cairo expressing the belief that the Anglo-French agreement will constitute the foundation of a notable friendship between France and England, culogises warmly Lord Cromer and his patient, and vigorous administration, and the tact and skill wherewith he had gradually conciliated the French susceptibilities.

PLAGUE ON THE RAND.

There are 160 cases of plague in Johannesburg. SOMALILAND.

Earl Percy in the House of Commons stated that the three years' war in Somaliland resulted in mak-ing the re-establishment of the Mullah's power im-

A TAXATION ROW AT SMYRNA,

A TAXATION ROW AT SMYRNA,
The action of the Secretary of the Greek Consulate
at Symma in reference to the closing of Creek shops
for the non-payment of taxes, led to a serious
encounter between the Greeks and the Turkish troops.
The Secretary was slightly injured: he thereupon
fired on the Turkish troops. He was arrested but
was subsequently released at the instance of the
French Consul. It is reported at Athens that the
Greek fleet has sailed for Smyrna.

(FROM THE "HONGKONG TELEGRAPH.") NAVAL HOSPITAL AT WEI-HAI-WEI.

Work in connection with the construction of the Naval Hospital here has been stopped in accordance with orders received from the Admiralty.

RAW SILK.

There has been consideracle business doing in Spring Reelings of various chops. Prices are somewhat irregular, as is the quality also. In some cases a slight advance has been paid and there is an opinion in the market that we have seen the bottom. But this opinion is not shared by everybody. New crop accounts are good from every country which produces silk, whether in Europe or Asia, and if this state of things continues we may expect large crops of good quality and low prices ruling in the coming season.

Dry Thin and Falling Hair and Rough Hands Prevented by

'ILLIONS use Curicura Soar, assisted by Curicura Otherner, for preserving, purifying, and beautifying the skin, for cleans-ing the scalp of crusts, scales, and dandruff, and the stopping ing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rushes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. Cutacura Scap combines delicate emollient properties derived from Cutacura Cuntment, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated scap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic totlet scap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in One Scap and Price, the best skin and complexion scap, and the best toilet and PRICE, the BEST skin and complexion soap, and the BEST toilet and baby soap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleance the akin of crusts and scales, and softe chickened cuticle; CUTICURA CHATMERT, to Instantly allay techniq, indammation irritation, and sooties and heal; and CUTICURA RESULTERY I. Co.; Shanghai: J. Llewellyn & Co., Medical Hall; Fenang: Georgetown Dispensity; Bangrok: English Phatmacy; Singapore: Maynard & Co. (Ltd).

HOLLOWAY

Cure Indigestion,

Bile, Sick Headache, Giddiness,

Palpitation,

and all Internal Disorders.

THESE PILLS

ARE PURELY VEGETABLE;

they contain no deleterious matter, and may be taken by the most delicate.

Manufactured only at 78, New Oxford St. (late 533, Oxford St.) London. Hold by all Chemista and Medicine Vendors.

The Bovril Bottle

is familiar in the homes of Britishers the world over—in Great Britain itself Bovril is looked upon as the great national "stand-by" in case of failing strength. Bovril is the very embodiment of nourishment. It imparts strength in a most effective manner, and is, at the same time, extremely palatable.

THE Yokohama Specie Bank received a telegram on May 16th from London to the effect that subscriptions to the Japanese loan had reached £152,000,000. Other telegraphic intelligence received in Tokyo states that the subscriptions in New York were yen 250,000,000. In the former case, the loan was covered 30 times and in the latter 6 times over

THE BATTLE OF THE YALU.

(CONTINUED.)

Saturday, May 14 On the 29th of April the Twelfth Division made its dispositions for attack. It was divided into two columns, one under Major-General Kigoshi, the other under Major-General Sasaki, and the main body. It advanced toward Sukuchin and took a favourable position there. At 11 a.m. on that morning a force of Russians numbering about 400 was seen on the opposite bank, but wigorous fire from this side dispersed them. Meanwhile General Kigoshi led the 24th Regiment to a point above Sukuchin, where the regiment crossed in 10 iron boats and, marching down, occupied the position opposite Sukuchin so as to cover the crossing of the main body. A battalion of engineers now commenced to bridge the river at Sukuchin, and by working with the utmost assiduity and vigour, they succeeded in finishing the bridge by 3 a.m. on the 30th. The crossing then commenced, and the troops making their way through valleys and over hills, reached a position near the Ai, where they bivouacked for the night on high land. The march had been exceedingly arduous, some of the places scaled by the troops being almost precipitous. During the advance Major-General - Sasaki's column, which formed the left wing, came in sight of a force of Russians numbering apparently from 1,500 to 1,600, but no engagement took place. At 2 a.m. on the 1st the Division left its bivouac and by 4 had reached the position designated by the Head Quarter Staff. There it waited for the appointed signal, namely, the opening of artillery fire by the Guards Division and the Second Division. At 7 o'clock the booming of the guns was heard, and forthwith the Division set out. It marched in four columns, led by the 24th Regiment under General had the intention of constructing a bridge Kigoshi, and, dashing into the Ai, the men over the main channel of the Yalu from the crossed its 400 metres of depth almost at island Keumchong-do, but the enemy's charge pace, the shallowest parts being artillery posted on the Kiulien heights, up to the waist, the deepest up to the rendered the operation impossible. This shoulder. It was a splendid sight, and work fell to the Second Division, and was it seems by lave demoralized the Russians, essayed during three days—the 27th, 28th for they estrayed registly income the course. for they retreated rapidly through the passes and 29th. Not a day passed, however, without the opposite hills or in the direction out 40 or 50 Russian shells dropping on the of the opposite hills or in the direction of Kiulien-ching. Our men pushed up island, and whatever progress had been made the heights with the utmost vigour and with the work was rendered futile. We crowned them. On the right, however, have here the evident justification of the crowned them. General Kigoshi's column had a fierce strug- report made by the Russians that they had General Kigoshi's column had a fierce struggle with a body of the enemy posted in a commanding position. The brunt of the fighting fell upon the 3rd Company of the three contemplated destroy one of the three contemplated the fighting fell upon the 3rd Company of the bridges, but this failed to prevent the building of the other two. From this fire, however, the Japanese suffered few casualties. Russians took the Fenghwang road and rallied for another stand, but were again rallied for another stand, but were again driven back, this time by Sasaki's corps. They retired upon the Hohmutung position, which, being commanded by the surrounding hills, offered no facilities for defence. Three companies of Kigoshi's force, which had followed rapidly from Sihching (the place of the first stand), charged up one of these hills and, reaching the top almost in line, opened a destructive fire upon the enemy below. Just at this moment the Russians, retreating from Kiulien and Antung before the Guards and the Second Division, arrived at Hohmutung, moving at headlong speed, and re-inforced the Russians already there. With extraordinary rapidity 6 guns were

companies on the height never budged. Encouraged by Captain Makizawa they held their ground stoutly. Their faces were black with the powder from their own rifles. The fifth company under Captain Makizawa rushed forward and occupied another height at . distance of 60 or 70 metres, but forthwith a body of 1,500 or 1.600 Russians made their appearance on a hill on the left and were apparently about to charge, while a body of Cossacks, 300 or 400 strong, advanced with the evident intention of getting on the rear of the 3 companies. By this time Captain Makizawa, and nearly one half of the three companies' men had fallen. It became necessary to retreat to a height further back, but at this instant another body of Russians emerged from between the hills in the rear, and a fierce hand-to-hand fight, some using swords, others grappling, so that enemy and ally became indistinguishable, ensued. The Fitth Company was threatened with annihilation. Happily at this juncture General Kigoshi arrived with reinforcements and the Russians who had just been engaged in the hand-to-hand struggle found themselves surrounded. The Japanese had 46 killed and 214 wounded out of three companies (600 men). dead and wounded were piled in heaps, but the enemy were flying. The right wing of the Twelfth Division was now thrown forward to Talilangfang, cutting off the retreat of the enemy in that direction and the Guards and the Second Division were advancing on the other side. Russians suffered terribly and the remnant of them broke and fled along the Fenghwang road. They left over 300 prisoners in our hands, and had over 1,000 casualties. They also lost 28 guns and great quantity of small arms and ammunition.

Monday, May 16.

It would seem that originally the Japanese over the main channel of the Yalu from the Meanwhile the Japanese, on their side, refrained from using the heavy artillery that had been brought up and placed in position. They were anxious not to disclose the existence of these guns until the supreme moment came for employing them. On the 29th during the night, as already described a strong park of artillery was transported to Kenmchong, whence the Russians had been driven on the 26th. At 10.50 a.m. on the 30th a reconnaissance sent by the Second Division crossed the main channel from Keumchong and had nearly reached the opposite island of Cheunggang when the enemy opened fire from the Kiulien heights and a vigorous reply was made by the Japanese guns on Keumchong. lined up with 4 already on the ground, and For this the Russians seem to have been quite this battery of 10 pieces opened fire on unprepared. At 11.15 they ceased firing, after our men at short range. The Russians the artillery duel had lasted only 25 minutes. were rendered desperate owing to their They opened again, however, about an hour their left hands, holding their rifles over-line of retreat being menaced. The three later, but on the second occasion their effort head with the right. The Russians had

proved even more brief. It was in this duel on the 30th that the Japanese brought their heavy artillery into use for the first time, and it subsequently transpired that its effects had been most signal, the Russians then at length beginning to appreciate what kind of a foe they had to deal with. In these opera-tions the Second Division had 2 killed and 23 wounded, among the latter being 5 officers. The smallness of the Japanese casualties is ascribed to the precautions adopted for seeking cover. Most of the enemy's shells fell in the spaces between the willow-trees behind which the Japanese guns were placed. At 7 p.m. on the 30th the Second Division received orders to assemble on the east of Kiulien, and at 7.10 the movement commenced, the men being in light marching order, and the artillery being left on Keumchong-do. The programme was that the Twelfth Division should cross the river high up during the night, and march to an appointed place by 2 a.m. on the 1st, while the centre of the Guards Division and the left wing of the Second Division were to cross at the same time as the Twelfth. 9 p.m. the left wing of the Second Division crossed the main channel by the bridges, and then waded two streams beyond, the water not being above the fork. The men thus reached that side of the Yalu. At 1 a.m. the Guards, who had crossed at the same place, reached their appointed position on the Yulchawon heights and, having dug trenches there, left a small force to hold them, the main body moving down to the edge of the Ai and receiving the order to halt there not yield an inch of ground. The two Divisions were now extended over a front of 7½ miles, the left wing of the united force resting on the Wiju-Kiulien route. There was no sign of movement on the enemy's side, and though some 40 shells were fired at him from the Cheumchong park, he made no reply. Thus the remaining hours of darkness passed and day dawned. A Chinaman now reported that the Russians had probably retired, but when island Keumchong-do, but the enemy's artillery posted on the Kiulien heights, rendered the operation impossible. This advanced two or three hundred metres. The distance between the troops and the Kiulien position was then about 3,500 metres. The general commanding the Second Divi-sion now ordered it to advance upon Kiu-The second and fourth companies of lien. the 16th Regiment were the first to advance, but after moving about 200 metres they halted. The enemy was now firing hotly but his bullets fell short. His nearest position was on the top of a hill behind the town. There he was entrenched, the men being concealed almost completely and wearing gray over-coats, so that it was impossible to see them clearly, and the Japanese, without firing, resumed their advance. The Russians continued to discharge their rifles rapidly but without effect, until the distance separating the two forces had lessened to six or seven hundred metres, when the enemy's fire became hot. Still the Japanese, being unable to find a good mark, reserved their fire. The Ai River flowed in front of the Russian position at a distance of about 500 metres. Reaching this point the Japanese found themselves subjected to a furious fusillade. No time was to be lost. The men plunged into the A space of 100 metres had The depth varied from the water at once. to be waded. first button of the tunic to the neck. Some-times the men were almost carried off their feet by the current, and they had to help themselves through the water with

rightly judged that this would be a crucial moment. They poured in a hot fire, and many of the Japanese were killed or wounded, but they never paused except to help the wounded. Immediately on reachhelp the wounded. Immediately on reaching the other bank, they deployed and pushed on in open order. Throughout this time the batteries on Keumchong and Cheung-gang islands kept up a violent cannonade, and so accurate was their aim that a Russian battery which attempted to come into action had one or two of the Japanese rifles. The wounds on the Japanese side are more correspondent notes that the greatest kind-ness is shown towards the Russian wounded, and that they express unbounded gratitude.

Wednesday, May 18.

The two Lieut-Colonels, Rakofski (?) and of its guns disabled before it unlimbered. Nevertheless the advancing line had many casualties. It finally reached the base of the hill on the east of Kiulien whence the enemy were pouring their deadliest fire from behind epaulments. This the Japanese rushed without a pause, the Russians retreating to another point of vantage on the west of Kiulien. This again was carried by assault. The crossing of the Ai had taken only six or seven minutes. It was the Second Division that carried these two positions, and immediately on crowning them the Japanese flag was raised as a signal to the batteries on the islands. Major Nihira's battalion suffered greatly. It had 117 casualties. Apparently a number of these men were injured by a mine It is reported that after the fight Major Nihira was deeply affected by the loss of these gallant men. He declared that such soldiers could not be replaced, and that it were better a thousand like himself had fallen. The sight on the top of the first hill carried is said to have been terrible. Russians and Japanese were lying in heaps, many of them cruelly mutilated by artillery fire. The right wing of the attacking force, namely the Guards, arrived in time to complete the enemy's discomfiture. He abandoned the position at 8.30 a.m. The assault of the second position, which was about 3,000 metres west of Kiulien, did not take place at once. The force posted there was for covering purpose. It had 4 field-pleces and 5 quick-firers, and as the Japanese were armed with rifles only, they had to await the arrival of artillery. This had to await the arrival of artillery. This came at 1 p.m., and the two Divisions moved against the position simultaneously.

The enemy was driven off, and retreated in The enemy was driven off, and retreated in Kyongsong is away up on the north-eastern the direction of Fenghwang. A strong force, consisting of men of the Second Division and of the Reserves now moved towards doing there, as there is no Japanese garrison Antung.

A note may be added to the above. It

relates to a shocking deed attributed to the Russians. Our readers will have observed that after a small force of the Guards had obtained possession of Husan and Yulchawon, they were driven back across the river won, they were driven back across the river Saimachu and Lienshan, the Hunghutze by a strong body of Russians. On this having been driven off. These off-drivings occasion three Japanese fell into the hands do not appear to be very permanent. With of the Russians. The corpse of one of them, regard to the strong body of Hunghutze who Watanabe Tatsujiro, was subsequently were reported as having assembled at a point found caught in the branches of a tree. 60 versts west of Liaoyang, a body of Russian cavalry sent against them succeeded in legs were gashed all over and he was dispersing them and inflicting a loss of 25 legs were gashed all over and he was dispersing them and inflicting a loss of 25 disembowelled. It is conjectured that after killed, the Russian casualties being 2 killed killing him by this savage process the and 3 wounded.
Russians threw his corpse into the river but It would seem that the Hunghutze are it became entangled in the boughs of a tree. There is little doubt that his two comrades were similarly served. Such brutalities are almost incredible.

Tuesday, May 17.

The correspondent of the Asahi, writing from Antung on the 6th instant, says that the number of Russian dead buried by the Japanese up to that day was 1,362, and that the prisoners then totalled 613, of whom 138 were unwounded. If we estimate the

movement by which the Japanese placed themselves on the rear of the Hohmutang position, thus cutting off the Russian line of retreat. The march necessary to effect this led over ground so precipitous that its passage by soldiers carrying rifles and accourtements seemed. impossible. The easiest slopes are 70°, and the steepest are absolutely perpendicular. It is the opinion of the two colonels that if the Japanese themselves now inspected these places they would be astonished at the feat they performed in the heat of battle. That the Russians did not take steps to guard the position from that direction is therefore in no sense reprehensible.

It is a pity that some steps can not be taken to publish the names of the Japanese prisoners who fell into Russian hands on the 3rd instant. Nothing is known in this country as to their identity and the suspense of the families of the missing must be indescribable. We know one lady whose only brother is among the fumei list, and according to present appearances she may have to remain long in ignorance of his fate.

Thursday, May 19

General Floug, telegraphing from Mukden on the 16th instant, says that Captain Porchakoff reports having found 40,000 lbs. of powder at Kyongsong, which he destroyed. nor ever was.

The General further reports that the Japanese have again occupied Kwantien. What the "again" means we do not know.

He also announces that field-postal communications have been established between

very busy just now.

The Jiji Shimpo's correspondent at the front sends the following list of articles taken by the Japanese troops at the Yalu :-

Field-pieces	21	
Machine Guns		
Gun Ammunition Waggons	18	
Rifle Ammunition Waggons	. 80	
Rifles	1,500	
Commissariat Waggons	10

MARQUIS 170.

Marquis Ito invited about fifty leading politicians, statesmen and business-men to the Mitsui Chub in Yurakucho on the 15th instant, to partake of certain viands sent by the Sovereign to the Marquis. His Excellency explained to his guests that it seemed to him unbecoming to apply to his own uses alone the bounty of the Emperor and he therefore desired to share it with his friends. Marquis Saionji, on behalf of the guests, conveyed an expression of their gratitude and appreciation.

THE OPERATIONS AT LIAOTUNG.

Monday, May 16. General Floug reports that a train which left Wafantien reached Port Arthur safely, and that the locomotive and carriages have returned. The General does not tell us when this happened, but we must assume that it was on or about the 11th instant, for should have waited to be examined. The his telegram is dated at Mukden on that day Nichi Nichi, writing upon this subject, recalls (11.15 a.m.). Walantien is the first station the strong protest made by Russia about north of Pulantien, and the distance between the alleged destruction of a sanatorium on the two is 20 miles. The Japanese official the island Sanshan-tao by a Japanese squadreport says that they have cut the railway ron. There was no sanatorium, so far as at Pulantien. How did the train get past is known, but the Russians formally preferred Pulantien? We admire two things: one a complaint through the French Representa-is the splendid simplicity of General Floug's reports; the other is the grand courage of for their abuse of the red flag? If Viceroy

instant at 11.15 a.m. and another telegram dated the same day at the same place (Mukden) at 11.35 a.m. The former telegram says that the Russians are still in possession of Sushilipao, a station northward of Sanshilipao; the latter says that a Japanese force has reached a point 15 versts south of Sanshilipao, and that the body of Japanese which attacked the railway consisted of 3 companies. Pulantien is 29 miles north of Sanshilipao, and so we consisted of 3 companies. Pulantien is (or Blackeney Bay) on the north, and Kerr prevent them from falling into the hands of 29 miles north of Sanshilipao, and so we Bay on the south. The promontory of have the Japanese at Pulantien and the Hechitze, where the torpedo-boat met its His Excellency could give that he abandons Japanese at Pulantien and the Flechitze, where the toppedo-boat met its Japanese at Sanshilipao, while Russian trains terrible fate, separates these two bays. On are safely plying over the intervening line and Russian troops are holding an intervening line being near the head of Talien Bay, but the ing position. The 11.15 a.m. telegram ends with a phrase which is becoming habitual to General Floug:—"The belligerent situation that similar operations are to be undertaken, the same terrible fate, separates these two bays. On English maps Robinson's Point is shown as hope of defending the place. In itself Dalny has no great importance, for though the Russians have spentimmense sums there, the Ultimate attainment of the commercial object that similar operations are to be undertaken, the content of the commercial object that similar operations are to be undertaken. has not changed."

There is one change not noted by General Floug though reported to St. Petersburg by Viceroy Alexieff; namely that the Russians have blown up the dock and the piers at Dalny to prevent the Japanese from utilizing It does not look altogether formid able that the Russians should be destroying their valuable property lest it fall into the hands of the Japanese. Why not defend it? Chefoo reports that out of 5 locomotives hitherto available for service at Port Arthur, the Japanese captured 4 at Pulantien. From the same place we learn (Asalii) that the length of road destroyed by the Japanese at Pulantien was 5 Chinese li (1% miles).

A passenger from Harbin who passed

Liaoyang on the 7th instant says that he saw there 3 railway wagons pierced with bullets, and saw also a party of Russian tradesmen who had just left Pulantien.

An interpreter who has come to Chefoo

from Newchwang reports that on the 6th instant the Japanese occupied Wafantien and Pulantien, and that they probably wrecked the road between the two stations, which are 20 miles apart.

instant by flying the red-cross flag. The incident seems to have caused much indignation in Japan, and naturally so. If the train was a hospital train, it should have had the Russians, who calmly despatch trains to Alexieff was in the train—and the hour traverse lines said to be in the enemy's pos-coincided with that of his rumoured desession. There is here a mystery.

At the same time General Floug states Duke Boris—, the fact can not be finally that he has not yet any accurate estimate of the number of Japanese that landed at Pitsewo.

parture from Port Arthur in company with Duke Boris—, the fact can not be finally concealed, and he will stand disgraced. But we venture to suggest that there were probably more trains on the 6th than that We have already remarked that some of which carried Alexieff, and in the meanthese Mukden reports can be explained only while it is right to suspend judgment. by supposing momentous but unnoted things to have occurred in their intervals. A case sacred privilege, but that the Viceroy was in point is the above telegram dated the 11th directly a party to the abuse remains to be proved.

The bay in which Vice-Admiral Kataoka's operations were officially reported to have taken place on the 12th instant, lies immediately north of Talien Bay, being separated from the latter only by the promontory called Hooper Point. Two bays seem to be included in the Japanese report under the name of Tayin-wan. They are Deep Bay

Port Arthur was to commence in a few days. That is very interesting, but truly we fail to for such a statement. paper despatch-boat within sight of the however, the Japanese can land south of Japanese operations, or within a hundred the Isthmus, and will then be within miles of them. Chefoo rumour is probably 23 miles of Port Arthur. One imagines that the whole basis.

Floug restoration of communications. On account, namely, that he has entirely lost the contrary, Chinese who left Kinchow on command of the sea. Without ships it the 11th report that the Japanese were then would be a tough job to hold Dalny or to keep in possession of Pulantien and the two an enemy out of Talien Bay. So far as the southern stations and of the northern station Japanese are concerned, they too will have a

travelled from Port Arthur northwards. They allege that the train had on board As to the rumoured explosions in Port Arthur, the commander of a Japanese warship which was on guard in the offing 10 miles from Port Arthur on the 9th instant, is said to have stated (a round-about story) that he heard a tremendous explosion and observed a huge column of smoke ascend from the larbour. He believes that either a manofewar or some large building was blown up.

They allege that the train had on board Japanese squadron can thoroughly cover any craft it sends in to "sweep out" Talien Port Arthur, At about 9 a.m. Bay. Probably the work is going on at present, From Alexieff's telegram we infer upon by the Japanese, one of the drivers being hit in the leg. After a brief pause the train resumed its journey. This, the Chinese add, was the last train that the intends to rely on his last line of defences for holding Port Arthur, and that Dalny and Kinchow Isthmus will not be resolutely held.

They allege that the train had on board Japanese squadron can thoroughly cover any craft it sends in to "sweep out" Talien Port Arthur, and was there fired upon by the Japanese, one of the drivers being hit in the leg. After a brief pause the train resumed its journey. This, the Chinese add, was the last train that the intends to rely on his last line of defences for holding Port Arthur, and that the intends to rely on his last line of defences for holding Port Arthur, and that the intends to rely on his last line of defences for holding Port Arthur, and that the intends to rely on his last line of defences for holding Port Arthur, and that the intends to rely on his last line of defences for holding Port Arthur, and that the intends to rely on his last line of defences for holding Port Arthur, and that he intends to rely on his last line of defences for holding Port Arthur, and that he intends to rely on his last line of defences for holding Port Arthur, and that he intends to rely on his last line of defences for holding Port Arthur, and that he intends to rely on his last line of the drivers being his in the leg. A

It is conjectured that Viceroy Alexieff are now attempting to prefer a red cross was in the train which escaped on the 6th complaint. The train had on board over two hundred civil officials. It may also have had some wounded or sick. Very likely. But its use of the red-cross flag under such circumstances was an outrage. proper marks, as duly fixed by law, and at any rate after raising the red-cross flag it should have waited to be examined. The Nichi, writing upon this subject, recalls the strong protest made by Russia about picion whatever of attack. It was an attack and the strong protest made by Russia about picion whatever of attack. It was an attack and the strong protest made by Russia about picion whatever of attack. ordinary train with a miscellaneous mob of passengers, among them being some invalids. When fired on, recourse was had to the red flag as a means of escape. That would be had as a means of escape. That would be bad enough, but the attempt to turn the tables and convict the Japanese of an outrage is quite contemptible. The Japanese are not firing on red-cross flags. They are not murdering and mutilating Russian prisoners. They are behaving with marked humanity.

> Some Chinese who reached Chefoo on the 13th instant having left Dalny on the 8th, report that the Russians have withdrawn all their troops from Talien, have blown up the piers and have removed all the buoys marking the safe channels. According to the same informants trains are still running between Dalny, Port Arthur and Kinchow, which is very likely since none of those places is in Japanese possession. It is added, however, that on a hill called Makaku (?), to the west of Dalny, there is a fort armed with 4 guns, which fact is not consistent with the statement that all the troops have been withdrawn.

We have Viceroy Alexieff's telegram, however, announcing that he has blown up the dock and the piers at Dalny in order to come probable when the war broke out. But, and probably are now in progress, first off politically the loss of Dalny would be a very Hooper Point and subsequently in Talien severe blow, inasmuch as the place may justly Bay.

The Chicago Daily News' despatch-boat telegraphs that the landing of the Japanese Daily would be of the utmost moment. If the Japanese obtain possession of Victoria. 13th instant and that the advance against Bay, they can effectually turn the Kinchow isthmus position, which is of enormous strength and might be held for an indefinite see what authority the Chicago journal has time against an army operating from the for such a statement. There is no news-north alone. With Dalny in their hands, e whole basis.

Alexieff should strain every nerve to defend
Nothing more is heard of the Alexieff- Dalny, but here comes in the vital item of Walantien. The Viceroy and the General tough job to clear out the passive obstructions were evidently misled. From Chefoo comes a statement by Chin- merely a question of time and effort. Militese of whom 80 were in the last train that ary obstacles have no serious efficacy except as means of holding troops under fire. Japanese squadron can thoroughly cover any craft it sends in to "sweep out" Talien

not making any effort to clear the exit from Talien Bay, and a heavy task of clearing the harbour. There is a report that the still lies before it. blocking steamers were loaded with concrete which, of course, when left lying in the water, assumes very quickly the qualities of

Tuesday, May 17

Vice-Admiral Kataoka reports that early on the morning of the 14th the Fifth Squad-ron and the Second Torpedo Squadron proceeded to Tayin-kau and under protection of the fleet's fire, sent in the torpedo squadron to clear the bay.

Although the enemy appeared to have removed a look-out station on Robinson Point he erected a battery at a height of 63 feet on Takushan and mounted six fieldguns there. On the east of the same hill he built a parapet capable of sheltering a company and placed troops there. Throughout the whole day he carried on a vigorous defence from these points.

The clearing squadron was engaged throughout the day within the torpedo-mine area and exposed to the enemy's fire. It did its duty well, discovering and exploding 5 mines, 3 with guns and 2 with countermines. The Japanese fire also caused some loss to the enemy on shore.

But at 4.35 p.m. when the squadron was about to cease work and to proceed to the rendezvous a mine struck the stern of the Miyako and caused her great injury, killing and wounding 24; of whom 2 died, 1 was severely wounded and 21 were slightly wounded. The ship sunk in 23 minutes.

The Miyako was a torpedo gun-boat of 1,800 tons. She was built in 1897.

Wednesday, May 18.

There is no murmuring about the loss of torpedo-boat No. 48 and the despatch-boat Miyako. Tokyo journals observe that the operations upon which the Third Squadron is engaged are of the most perilous description, inasmuch as the Russian mines have not been laid systematically, but are scattered here and there without any order and without any method. The Jiji recalls the fact that the enemy's fighting force has been greatly diminished without any material loss on Japan's side; that the good fortune hitherto enjoyed can not be attributed wholly to good guiding, however excellent the latter may be, and that some measure of misfortune must be anticipated.

As we write (Tuesday morning) news reaches us vaguely that there has been another accident in the same field of operations but its exact nature is not yet disclosed. We believe, however, that it is of a more serious nature than either of the preceding catastrophes. Admiral Kataoka is to be commiscrated. The proverbial three misfortunes have all fallen to his lot.

The Second Army seems to be steadily approaching Kinchow. Whether a force is

to be landed in Talien Bay it is impossible now to predict, but inasmuch as the Bay abounds with mines we may reasonably doubt whether operations on shore will be suspended until the water-way can be cleared. The latter must necessarily be a long operation, whether the process of countermining, or of dragging, or both be adopted. The exact place where the Miyako met her fate can not be discerned from the official accounts, but the Third Squadron's field of operations throughout the 14th was evidently the bay known as Tayin-kau (Kerr Bay), so it may be presumed that Robinson Point or its immediate vicinity was the scene of the disaster. If so, the Squadron has not yet made any attempt to enter

A telegram received in Tokyo at 5.35 p.m. on the 16th instant from Vice-Admiral Kataoka, reports that on the 15th instant the Fifth War-ship Squadron and the Sixth Torpedo Squadron-less No. 56-proceeded to Tayin-wan, and under the protection of taken, the Kinchow Isthmus ceases to be an fire from the fleet, performed the clearing of obstacle. Our readers may remember that the Bay as previously arranged. There was no difference in the enemy's land subjects coming to Chefoo and Newchwang defences except that he had added 3 field-during March and April, allusions were pieces. He fired at us several times with made to the Tahosan fort, which was artillery. Judging from the position of less the Japanese will lose heavily in capturartillery. Judging from the position of less the Japanese will lose heavily in captur-these mines and those previously found, it ing it, but as to their success we entertain appears that the enemy has laid three irregular lines of mines within the arc from mate from the published reports how far Robinson Point to Shata Island. To render the obstacles at the Kinchow Isthmus have the sea safe, further operations of clearing will be necessary.

It is stated that the Russian troops on the west of the Liao at Sinming-tung and Tien-the 14th instant rank next to the Yalu chwantai have withdrawn in the direction of battle, though they differ from the latter in

Rumour says that the Russians are effectthat even from Liaoyang their forces are being steadily transported to the former place.

Thursday, May 19.
There are renewed rumours of stray buoyant mines cruising about in the course of ships. The steamer Yochou reports having seen one on the west of Wei-hai-wei, and the steamer Foochow sighted another on the

system, apparently persuaded that the task of removing the mines and restoring the maritime fair-ways of trade will never have seas has yet been destroyed by contact with mines that have broken away from defective moorings, it is a merciful chance. We may at any moment hear of hundreds of noncombatants, including women and children, being sent suddenly to their last account as a consequence of this criminal blundering. Perhaps the destruction of the Enissei was responsible for much of the trouble, but the Japanese seem to speak from what they have actually found in Kerr ployed can disclose their sites.

It is rumoured from Peking that the Russian garrison in Sungyuen had made all preparations to vacate the place before the in Newchwang that the Japanese have taken Tashikiao. It is also stated that placards have been posted in Newchwang, announcing the speedy arrival of Japanese troops and advising the inhabitants to go about their defends the outer world from the regions westward the outer world from the regions westward. business tranquilly as they will not be in any way molested. We can not believe that the Japanese have reached Tashikiao and we fail to see why they should go to New-

chwang.

the 18th instant is the key of the Dalny position. It is the fortified hill Tahoshan, lying eastward of Kinchow. The capture of this place by the Japanese in the war of 1894-5 decided the fate of Dalny. Once this hill is no manner of doubt. It is difficult to estibeen overcome, but judging from the list of Japanese casualties there has been tolerably severe fighting. In fact, the operations on the less signal character of their results. All that we can say is that Tahoshan caping their chief concentration at Harbin, and tured, the way lies clear to Dalny and Port Arthur. It will have been observed that the Russian force immediately confronting the Japanese is put at three or four battalions with 8 guns. That is to say, from three to four thousand men. The Kinchow Isthmus is less than two miles in width. It properly intrenched it should be capable of being held successfully by five or six thousand men against a big army. The next batch of news must therefore be awaited Japanese naval officers are represented as severely criticizing the carelessness shown the Russians in laying torpedo-mines. They seem to do this work without any solved.

General Floug's comment that the move-ments of the First Army are marked by indecision, seems to reflect his own perto be performed by themselves. In fact, plexity rather than any want of resolution not to put too fine a point on it, on General Kurcki's side. The fact is the Russians are not fit to be trusted with the use of such engines of destruction. If the steamers navigating the high patkin is paralyzed in so far as succouring Port Arthur is concerned. If he attempt to march from Liaoyang to the relief of the place, he will have to encounter and disperse the First Army—the hesitating army—by way of preliminary. We do not know what General Kuropatkin's plan may be, but we do know that a commander who sees the most important point in the whole field of action attacked and beleaguered by the enemy, and who nevertheless makes no effort whatever to succour it, such a commander Bay and Deep Bay where they say that the must be regarded as either incompetent or Russian method of laying mines takes no impotent. The fall of Port Arthur would thought whatever of the ultimate interests of peaceful commerce. They lay them at destruction or capture of virtually the whole such depths that no appliances hitherto emloss of the only harbours for whose sake the Manchurian railway exists. It would mean, also, that all idea of sending out naval re-in-forcements would have to be abandoned. advent of the Japanese, and it is rumoured Is General Kuropatkin going to look on idly while a drama of that kind is enacted under

the outer world from the regions westward of the known area of fighting. General Floug reports that a Japanese force has landed between Kaiping and Hiung-yohching; that is to say, on the west coast of the Liaotung Peninsula, a few miles eastward of Newchwang. This event is said to have taken place where the Russians were place on the 16th instant, and the Russian

ment took place between the Japanese and the Russians at a place called Dochojo (?), about 3 miles eastward of Newchwang, and that the Russians suffered a signal defeat, losing 50 guns. Then we have a telegram from Kinchow—the Shanhaikwan Kinchow, not the Liaotung town of the same name—, dated the 18th, speaking of a battle at Hiung-yoh-ching, in which the Russians were defeated with a loss of 2,000. Yet another telegram from Shanhaikwan to Peking, dated the 18th instant, recounts a statement that the Japanese have oc-cupied Kaiping, but adds that definite intelligence has not yet been received. The fiji has two telegrams. One is from Shanghai, which place it left on the 18th. This message says that the Japanese, having landed in the neighbourhood of Kaiping, were then marching upon Tashikao, en route for Newchwang. The other telegram is from the same place viâ Chefoo. It says that Kaiping has fallen into Japanese hands. Further, the Nichi Nichi reports that a German ship-master who left Newchwang. on the 18th instant, reports having heard heavy cannonading in the vicinity of that place.

Finally, at telegram to the Asahi from Kinchow (Shanhaikwan) says that on the 16th instant the Russian troops in New-chwang set out for Kaiping, where a force of ten thousand Russians is collected, its object being to check the march of the Japanese army so as to allow time for the completion of preparations at Liaoyang.

From all these accounts it would seem reasonable to infer that there has really been a landing near Kaiping, its object being to strike a blow at the Russian forces concentrated in the neighbourhood of that place and of Tashikiao. We have often had occasion to note that Tashikiao is a kind of centre of military distribution, since it is there that military distribution, since it is there that the Newchwang line joins the Mukden railway. It should of course be an ob-ject of Japanese strategy to cut off Russia from all access to maritime sources of supply. Newchwang must be a great help to her from a commissariat point of view, and she is to be driven from Newchwang. From Kaiping to Sungyuen where the van of General Kuroki's army now is, the distance is only 47 miles, so that a Japanese force landing in the neighbourhood of Kaiping could easily effect a junction with Kuroki. This strategy seems the best that could be adopted for effectually clearling the road of advance to Haiching and Liaoyang. If Kuroki marched direct from Sungyuen to Haicheng he would leave upon his left flank all the Russian force collected at Kaiping, Newchwang and Tashikiao and would thus expose his left flank to danger. One thing that he desires to avoid is the necessity of detaching large forces to guard his line of communications. Therefore he clears his flanks. The whole of the Japanese strategy seems to be un-folding intelligibly, and very thorough strategy it is. We presume that the force landed at Kaiping is a part of the First Army,

Repeated rumours of Hunghutze activity are coming. These free-booters appear to have awaited the advance of the Japanese armies, and to be now making things as unpleasant as possible for the Russians. We have awaited the advance of the Japanese armies, and to be now making things as unpleasant as possible for the Russians. We pleasant as possible for the Russians. We provided up the corpse of a Russian floating hear of an attack made by one of their bands upon a company of Cossacks at a point some 33 miles west of Liaoyang, and the Cossacks are said to have been driven off with loss. It

General speaks of 17 transports being seen. Is also stated that the Russians have retired Peking, however, anticipates the incident by declaring that on the 14th a violent engage-chwang and Shanhaikwan) in the face of

Hunghutze harrassing.
A Chinese junk which left Dalny on the 17th instant reports that all preparations had been made for blowing up the dock and the pier when suddenly a telegram from Port Arthur suspended the operation. Also the iron lighters and dredgers remain intact. About 50 Chinese subjects were carried by this junk to Chefoo, where they arrived on the 18th at 5 p.m.

An hour later (6 p.m. on the 18th) four

lighters from Dalny reached Chefoo, having on board 200 Chinese and 18 Russian fugitives. They reported that all the structures connected with the harbour had been destroyed but that the craft in the port were still intact.

It is observable that these fugitives though they left Dalny on the 17th instant, do not seem to have heard of the fighting at the Kinchow Isthmus on the 16th.

As we write an extra published by the Asahi (19th instant, 9 a.m.) reaches us.
It contains a telegram from that journal's special correspondent at Kinchow (Shanhaikwan) dated the 18th instant, which says that the Japanese have landed near Kaiping, and that on the 16th they captured that place, routing the Russians, who fled in confusion towards Tashikiao, throwing away their rifles. In consequence of this defeat, the Russian troops which were moving from Newchwang to Kaiping, have countermarched.

The same correspondent says that the Russians have a force of 1,000 men in Newchwang with 19 guns, 7 of which are outside

DEPARTURE OF MR. H. J. HOLM.

The German mail steamer last Saturday carried away from Japan a member of the mercantile community who will be greatly missed by a wide circle of friends. After a residence of 22 years in Japan, during which time he has taken but one trip to the Fatherland, Mr. H. J. Holm departs to take up his permanent residence in Hamburg. As the head of Messrs. Illies & Co. in Yokohama Mr. Holm has occupied for many years a commanding position in the foreign community and in the course of those speeding years won for himself an honoured name for sterling integrity, keen business acumen and farsightedness. Highly appreciated by his business associates and friends he has also been decorated by his Kaiser and by the Emperor of Japan. The poor and distressed ever found in him a ready helper and many a good deed has to be placed to his credit of which only the recipient and himself were privy. Many have been the positions of trust and responsibility which he has filled, but all his work, public and private, has been marked by the quiet unostentation which is the distinguishing characteristic of the man. We trust that many years of happiness and prosperity lie before Mr. Holm and his charming wife, and that Japan may welcome them both back to her shores again.

THE "SUMA."

OPÉRATIONS NEAR TALIEN.

(OFFICIAL REPORT.)

Vice-Admiral Kataoka, who commands the Third Squadron, reports as follows under date of the 12th instant: "At 7.45 a.m. the Squadron approached Tayiu-kau, the bay immediately north of Talien. The Itsukushima, Nisshin and Miyako opened fire on the shore positions to cover the operations of the torpedo squadron, which was charged with the duty of clearing away the mines. The torpedo-boats were four. Another torpedo squadron which had been on guard duty during the night of the 11th at Port Arthur, arrived outside Taiyiu-kau at 8.30 a.m. on the 12th, and pro-ceeded to survey the coast. A detach-ment of the enemy consisting of one company of infantry and 50 troopers was seen at Meiyin, and was fired upon, but did not reply, being apparently charged merely with duties of observation. By the afternoon our survey was completed. Two torpedo-boats, entering the bay of Tayiu-kau, reconnoitred while removing mines. They observed a line of telegraph near Takushan and sent a party by boat to destroy it, which was done. The people stated that there were 45 Russians at the base of Takushan, about 100 at Schkia-shan and 1,000 further inland. Fire was opened on them at a range of 2,500 metres, and about 200 were seen to advance, but our guns drove them to shelter. Presently eleven Cossacks appeared on the south-west of Meiyin at a range of 2,000 metres. They were dispersed without loss to us. The Miyako entered the bay and observing an outlook-station of the enemy's at point some 800 feet high on the southwest of Robinson Cape, destroyed it. About ten companies of Russians were

"At 8 a.m. as torpedo-boats Nos. 48 and 49 were surveying the east coast of the bay, they found a mine at Helichitze. Various efforts were made to explode it, without success. At 12.27 p.m. as one of the torpedo-boats was repeating the attempt, the mine exploded unexpectedly, and No. 48 was torn in two. She sank in 7 minutes. was forn in two. She sank in 7 minutes. There were 14 casualties, 7 killed and 7 wounded. Three other mines were found between Shata and Hehchitze. These were successfully exploded. At 6 p.m. the squadron returned to the base. It had accomplished its duties but unfortunately with the loss of a torpedo-boat. Midshipman Kageyama was the only officer among the killed."

PORT ARTHUR, DALNY, AND KINCHOW.

Saturday, May 14. Conjectures continue about the number of Russian troops in Port Arthur. It is now placed at 12,000. The question is will the Japanese attempt to capture the fortress by a coup de main or will they be content to simply invest it. We ourselves strongly incline to the former idea. The Japanese know, of course, that an assault must cost enormously in lives, but there are many imperative reasons for prosecuting this campaign with the utmost possible rapidity, and besides the present temper of the army and navy is not reconcilable with slow tedious processes. The men of the squadrons that have been delivering

were despatched from Port Arthur by train on the 8th instant. They conjecture that moment of the blocking operation or whethese may have been submarines. Quite ther they have since emerged. The latter recently it was reported from Port Arthur is doubtless the correct explanation. that the submarines sent from St. Petersburg had been successfully tried. It would be strange if the first thing done with them were to send them to Vladivostock. Besides, on the 8th instant the railway beyond Port Arthur was in Japanese possession and the Alexieff-Floug restoration had not yet taken place.

Under date of the 11th instant at 11.35 a.m. General Floug telegraphs to General Dessino that during the night of the 9th and 10th railway communications with Port Arthur were established. A detachment of Japanese troops consisting of infantry and cavalry was at a point 15 versts east of Sanshilipau. (A station 20 miles below Pulantien according to the railway schedule). The Japanese force that attacked the railway

was composed of some 3 companies.

The General further reports that the Japanese squadron approaches Port Arthur daily, battleships and cruisers steaming in during the day and torpedo-craft during the night. He adds that no report has yet been received as to the number

of Japanese troops that landed at Pitsewo. It will be observed that the Russian intelligence officer carefully avoids all explanation as to how this singular restoration of communications took place. We need operation on the morning of the 3rd. Natural-scarcely say that the Japanese newspapers ly the Port Arthur journal writes in somedo not attach the smallest credence to this what exultant tones, being at the moment story. They justly point out that if an evidently in ignorance that the harbour had incident of such importance had occurred, it been scaled. It says that 19 Japanese were must have been preceded by severe fighting, made prisoners. Two of them were officers, of which there is no indication whatever, severely wounded; the remainder seamen, General Floug and Viceroy Alexieff can 8 of them being slightly wounded. Twelve carcely expect the world to believe that others were also taken but they all died of baying seized and wreeked the reliance of the control of th having seized and wrecked the railway at their wounds. The wounded were put into Pulantien, which is a position of cardinal the hospitals on shore and on the Mongolia strategical importance, the Japanese not and treated with the greatest kindness only retired quietly until the Russians had They say that the blocking steamers set out leisure to repair the line, but also abandoned from some port on the Korean coast. the position.

General Floug's telegram is that the Japannese army—or at any rate a part of it—is reached a point 15 versts eastward of Fawan is given as authority, but as the Sanshilipau. This place is 20 miles south of Fawan is not allowed at present to go north—road runs north-east, crossing the Ai River ward of a line extending from the middle of and runs north-east, crossing the Ai River ward of a line extending from the middle of and runs north-east, crossing the Ai River An interesting statement contained in Pulantien and only 22 miles from Kinchou, which is the most important point on the Peninsula after Port Arthur itself. The Japanese are evidently moving rapidly. If they intend to attack Port Arthur by assault, the remaining days of this month will be a large. The capture of Kinchou, if it means the most of the remaining days of this month will be a large. The capture of Kinchou, if it means the most of the remaining days of this month will be a large. The capture of Kinchou, if it means the most of the remaining days of this month will be a large. The capture of Kinchou, again, another road runs nearly in a norther road runs nearly in a no the remaining days of this month will be a very pregnant period of the war.

As to the war-ships in Port Arthur and the detonations heard by Admiral Togo's squadron, it is suggested that the Russians may have been blowing up the ships sunk for blocking purposes. But it has to be remembered that this latter operation could easily be detected from the Japanese squad-

Tuesday, May 17. London reports (Reuter) that on t 14th instant the Japanese attacked Dalny, silenced the forts, landed men and are now bombarding the town. It is difficult to

reconcile this intelligence with Vice-Admiral Kataoka's report.

destroyers were recently sighted outside the its immediate objective at Haicheng, news

The Chinese report that two small vessels harbour, and people appear to be debating whether they happened to be outside at the moment of the blocking operation or whe-

> The story that the Russians had begun to blow up their ships in Port Arthur now takes the form that they attempted to destroy with gun-cotton two of the Japan-ese blocking steamers. That is a theory to which we have already alluded. Admiral Togo, however, was not likely to confound such an operation with an explosion inside the port. There are nevertheless independent stories that the Russians have managed to drag aside one or two of the steamers and have cut off the masts of all. That is not improbable.

> The Chinese say that seven Japanese subjects disguised as Chinese attempted recently to get into Kinchow but were apprehended and fusilladed. Since then Russians have been doubly vigilant. They employ Chinese at high wages to search every house in the district in order to detect the presence of concealed Japanese.

> On the 4th instant the Russians at Port Arthur buried the corpses of 26 Japanese who had perished in the blocking operation. All honours were paid to the bodies. These amenities are worthy of civilized nations.

> The Novy Krai says that rewards were freely distributed to the officers and men who defended the port against the blocking

Thursday, May 19. are concerned, and we can no longer look obtained from Chinese. to obtain from Russian sources any intelligence of what is going on there. Neither do the Japanese land-lines establish con-nexion throughout, since they can not yet have been carried across the interval beand we must be prepared for delays longer Wednesday, May 18.

It would seem that destroyers can get in therto our earliest information has been and out of Port Arthur but no larger craft can accomplish the feat. Even a destroyer That is now stopped. Exactly a similar has to navigate warily and dare not attempt situation occurred in the war of 1894-5. From favour the Japanese at the channel at full speed. Some Russian Katsura's army with its base at Takushanand of Russian ambushes.

was quickly and continuously received. in the case of Oyama's Army after its landing on Liaotung, a considerable interval elapsed before land communication was established along the littoral of the Yellow Sea.

We may take this opportunity of mentioning that there are two "Takushans," a fact which, if not recognised, may cause much perplexity. There is a Takushan on the northern littoral of the Yellow Sea, westward of the Yalu estuary, and there is a Takushan on Hooper Point, the promontory that divides Kerr Bay from Talien-wan.

The Fawan further reports that when passing in the vicinity of Port Arthur on the 16th instant, she heard three violent explosions in the direction of that place. Probably these indicate efforts to remove the obstructions from the harbour's entrance. officer in command of the Russian Squadron must be in a state of singular embarrassment at present. Doubtless he has much confidence in the ability of the garrison to hold out, but it is his duty to be prepared for all contingencies, and if the land-defences be overcome before he can provide an exit for his fleet, then there would be nothing for it except to destroy the latter, the alternative being the capture of the ships by the Japanese. Even supposing an exit provided, the necessity of emerging and attempting to retire to Vladivostock at the supreme moment, would involve meeting the whole strength of the Japanese fleet in the open without that assistance on which the Russians have so greatly relied hitherto, the assistance of the forts. There is every reason for the Japanese to rush forward the attack and there is every reason for the Russian naval commander to feel uneasy.

MANCHURIA.

Saturday morning. According to General Floug's latest offi-cial report, dated at Mukden on the 11th instant, the First Army is making some interesting movements. Our readers will ward of a line extending from the middle of and leading to Kwantien. From Fenghwang, the passage of the isthmus of that name, which would be a straightforward move-would be an operation of cardinal import-ment. He further says that another Diviance, and as the Second Army is evident-ly moving very quickly we see nothing improbable in the news. But Port Ar-and further that an advance column consistthur and the Liaotung Peninsula as ing of one battalion of infantry, 3 squadrons far as the Pulantien - Pitzewo line is of cavalry and one mountain gun has been now completely segregated from the seen on the Kwantien road. General Floug outer world so far as land communications announces that this information has been

General Mischenko reports, through General Floug, that the Japanese force confronting him has divided into two bodies, one of nexion throughout, since they can not yet which is taking a south-westerly direction, have been carried across the interval between the First and Second Armies. News river (probably the Tayang, which must be must come, therefore, by the maritime route, crossed in order to reach Sungyuen, a town en route for Haiching. The Japanese army, or a part of it, took this route in 1894, when marching to assault Sungyuen, which is about 45 miles from Fenghwang). General Mischenko adds that the Chinese inhabitants favour the Japanese and give them warnings

Saturday afternoon.

明務任玉泉三月卅日第三種都便物釋可

General Kuroki reports that on the 7th instant a detachment of his Army took possession of Kwantien-ching. On the 11th instant at 6 a.m. a body of Japanese infantry intercepted 300 retreating Russian troopers at Tsilitien (on the Liaoyang road beyond Fenghwang) and took prisoner a wounded Lieutenant and two troopers. These Cossacks belonged to the Trans-Baikal corps which is under the command of Colonel which can be held by a handful of troops Chichinsky. The Lieutenant is the son of against a whole army. It is there that the General Honwari (?) and belongs to the celebrated Motien-ling Pass defies an advanc-Guards, but came to the war at his own re-ing general. The Japanese never negotiated

With regard to the wonderful Cossack excursion against Anju, Colonel Haraguchi reports that the greater part of the 700 seem to be at Tokchhon, and that 200 passed the night of the 12th at Kaichhon. Both of these places lie eastward of Anju on the road leading through the hills to Kangke and ultimately to Wiwon on the Yalu. The Cossacks left 2 officers and 12 men dead upon the field. These have been duly buried. Their wounded numbered 35, and were carried away on stretchers. The these places lie eastward of Anju on the were carried away on stretchers.

Japanese had I combatant soldier, transport soldier and one tradesman killed; one soldier severely wounded and 4 slightly wounded. One labourer also was wounded. Two slightly wounded non-commissioned Russian officers were taken prisoners.

There seems to be no doubt that the Russians are evacuating, or have evacuated, Newchwang. Telegrams from the firms Newchwang. Telegrams from the firms there to their representatives in Chefoo and Shanghai announce the fact, say that business is recommencing, and desire that steamers should be sent. Telegrams from Chinese sources say that Alexieff has form-ally intimated to General Tseng Russia's intention of handing over the place, and Tseng has made arrangements for receiving it. Let us hope that this first step of evacuation may be the prelude of many others.

Sunday, May 15 A telegram to the Asahi Shimbun from Tientsin says that the First Army has occupied Sung-yuen. This town lies on the high-road from Fenghwang to Haiching, which, as our readers probably know, is the most important strategical position between Liaoyang and Kinchow. It was to Haiching that the Japanese under General Katsura directed their march in the China-Japan War, and they occupied Sung-yuen on that occasion just as they are reported to have done now. The Ta-yang River, which falls into the sea a little below Takushan, flows eastward of Sung-yuen, and it was Takushan that General Katsura's army used for a secondary base of opera-On the 11th instant General Floug telegraphed from Mukden that the Japanese were passing the Ta-yang, and thus the Tientsin news as to the occupation of Sung-yuen seems very credible. From Fenghwang to Sung-yuen is 45 miles and from Sung-yuen to Haiching the distance is 55 miles, while from Haiching to Liaoyang is 40 miles. The Japanese are moving with remarkable celerity. On the 1st they fought the battle of the Yalu. Some time must then have been needed to rest the men and organize arrangements for a new retired from the Yalu and from Fenghwang, advance. On the 6th Fenghwang was advance. On the 6th Fenghwang was occupied, a distance of 38 miles from the Yalu. And on the 11th Sung-yuen was entered, a distance of 45 miles beyond the mountain road, which presents tre-

soon as the Japanese advance from the in the face of Russian troops what his pre-Yalu became an acomplished fact. They decessors hesitated to essay in the case of doubtless retreated by the Sung-yuen-Haiching road.

The profoundly interesting strategical pro-blem will be the manner of attacking Liaoyang. On the direct road from Fenghwang to that town there are mountains it in 1894-5. Certainly they were never which strategists supposed to have disapseriously bent upon doing so. Will they peared finally from modern warfare, and attempt to turn it on this occasion, and if which could have been justified only by

As to the occupation of Kwantien, mentioned above, it may be regarded merely as a measure of flank protection. At Kwantien the roads from Changsong on the Yalu, from Kiulien, and from Fenghwang meet. The point is therefore of importance to an army advancing from the Yalu be-yond Fenghwang. It is very probable that the 700 Cossacks who delivered that extraordinary assault against Anju on the 10th instant, rode from Liaoyang by the Kwantien road. How they are to get back is a problem.

Tuesday, May 17.

Reports from Manchuria, coming through Chinese sources, suggest that the martial spirit is not high among the Russian troops and that at Liaoyang and Mukden many are taking drugs to get on the sick list or are disguising themselves in Chinese gar-ments or hiding in native houses. Very probably these stories are much exaggerat-ed, though the inactive role followed by the Russian army can not fail to sorely test the spirit of the troops. The public used to hear a great deal about the harrassing that the Japanese army was to undergo en route for the point in central Manchuria where its fate was to be scaled. We see no signs of this harrassing. Since the Yalu there has been no resistance on the part of the Russians. The left wing of General Kuroki's army is now within a few days' march of Haicheng, which is 30 miles north-ward of Tashikiao. This latter, as our readers know, is the point where the branch line to Newchwang joins the Mukden-Port Arthur railway. If the Japanese get pos-session of Haicheng, all Russian troops southward of it will be cut off. In fact it would seem at the present moment that Kuropatkin must rapidly concentrate whatever troops are immediately available and make a resolute stand at Haicheng. The time is coming indeed when he, in turn, may essay some coup against the communications of the army marching westward from the Yalu. But General Kuroki has evidently taken due precautions to guard his right flank by pushing his outposts as far as Kwantien, and the Second Army is operating on his left flank. The Japanese plans are well arranged.

The latest news is that the Russians are guarding Lieushankwan and Motienling. Ten thousand troops are said to be massed at the former place—chiefly troops that retired from the Yalu and from Fenghwang, Fenghwang, or 83 miles from the Yalu.

It would seem that the First and Second and offers extraordinary facilities to a delegislator who has been so imprudent as to Armies are now in communication. The fending army. Will the Japanese take this ask the awkward question is covered with

Russian outposts watching the littoral of the Yellow Sea were, of course, withdrawn so Kuroki is not likely, we imagine, to attempt decessors hesitated to essay in the case of Chinese. It has to be remembered, however, that the seasons are different. When the Japanese directed their march towards Liaoyang ten years ago, the time was mid-winter, and the mountain roads were almost impas-sable. They will be at the same places now in early summer, though still much snow and ice remain. Besides, there is no telling what Kuroki may attempt. He threw his men at the Kiulien heights in a manner success.

Wednesday, May 18.

It is stated that two Japanese were cap-tured by the Russians at a point north of Harbin on the 27th of April. They wore Mongolian garb and had in their possession 10 Murata rifles and a box of ammunition. It is supposed that they were engaged on a

railway-wrecking enterprise.

News comes indicating that the Hunghutze are still busy in the neighbourhood of Mukden. A collision between them and the Railway Guards is said to have taken place on the 2nd instant. Four Russians were killed and 3 wounded. This intelligence is published in a Harbin journal, and we learn that the Hunghutze disappeared without leaving any trace. The affair happened in the night.

M. DELCASSE.

Should the Combes Ministry be obliged before long to give up office-which seems a not unlikely event—it will be some consolation to Englishmen to know that M. Delcassé is pretty certain to be entrusted with the management of the exterior policy of France, no matter what combination of Ministers succeeds the present Cabinet. The Minister of Foreign Affairs—says the Paris correspondent of the Globe—who has played so large a share in the bringing about of the rapprochement between France and England is a typical Frenchman in many ways. He is a typical Frenchman in many ways. He is a vivacious, short-sighted little man, and for the last few years he has lived in the handsome palace which is his by official privilege on the Quai d'Orsay, fronting the Seine and next door to the Chamber of Deputies. When I first knew him he lived in a much less pretentious house on the Boulevard de Clichy, in a neighbourhood containing many artists and alleged poets and the Moulin Rouge. With all his geniality, M. Delcassé as Foreign Minister is prudent to excess, and is rarely caught napping. If a deputy springs an awkward question on him at an inopportune moment, the diplomatic Foreign Minister assums his wisest air, protests that the negotiations are still in progress, and that it would be most indiscreet on his part to consent to the discussion of a question which still forms the subject of pourparlers. Or he explains that reasons of State, questions affecting the national defence are at stake, and that he feels sure the honourable member would never for a moment suggest that he should jeopardise the welfare of the Republic in order to satisfy the curiosity of the honourable member. These tactics never fail. "Bravo! Bravo!" comes from

Monday, May 16.

confusion. If he has not been completely me at that moment. By and by a summons bereft of speech, he thanks the patriotic came; I hastened to the door, where I found Minister, says he has obtained complete myself under a dim light, face to face with satisfaction, and that he knows the interests a calm-looking gentleman who gave his of the country are in the best possible hands. hand to me and saluted in a most cordial M. Delcassé deigns to smile, and the incident manner. While I was running on with that China is about to throw in her lot with is declared to be at an end. When the compliments, half of which, I am afraid, were Minister has been warned beforehand, he Japanese to him, I was interrupted by does not mind, and when he does address a lady and gentleman who came to meet the House he delivers a speech which has him, and monopolized the precious moments. been carefully prepared at leisure. When But I had my wishes fulfilled. Two or three discussing matters of State with a foreign days later, I wrote to Stanley apologizing going to begin. Do they intend to take the diplomat, M. Delcasse's favourite artifice is for my rudeness in introducing myself in field at all or will they wait quietly to be to remove his pincenez and slowly rub the such a hasty way and expressing my joy at such a hasty way and expressing my joy at him time to think over what he has to say, and to study the man before him. Japanese nation. The opening part of the The Foreign Minister of France is ex-ceedingly well read, his memory is extraceedingly well read, his memory is extraordinary, and he has a special facility for remembering dates. M. Waldeck-Rousseau's
opinion of him may be judged from the
following sentence:—"Delcassé," he said,
"can say more in fewer words and less in
more words than any man I know." Some
dannog them that the people of each nation pay
life attention, they are capable of to their own more words than any man I know." Some ed among them that the people of each nation pay time ago, when there was trouble between all the attention they are capable of to their own celebrities rather than to those of other people. Therefore this keen love of knowledge in the Japan-esse shows high intellectual qualities, which must in quit the capital for a time. After things that been arranged with the help of a few French ironclads, Munir Bey came back, and made an official call on M. Delcassée, and made an official call on M. Delcassée. "I am delighted to see you again, Monsieur le Ministre." said Munir Bey. "I do not and made an official call on M. Delcassé.
"I am delighted to see you again, Monsieur
le Ministre," said Munir Bey. "I do not
doubt it in the least," was M. Delcassé's frank reply, as he smilingly wiped his goldrimmed glasses.

A REMINISCENCE OF STANLEY.

Less than two months after the death of Sir Edwin Arnold, Japan loses another admirer in the person of Sir Henry M. Stanley. A slight personal acquaintance with him has induced me to write this reminiscence of the illustrious dead.

May, 1899, that I first saw Stanley, of whom I few lines from a Japanese translation of had read much and whom I admired greatly.

Stanley's life, which I did to the amusement of the record now by her needless protests the afternoon, I was walking in the Peers' abashed to overhear the little son of Stanley, the afternoon, I was walking in the Peers' abashed to overhear the little son of Stanley, who kindly took me about the House, when black man (pointing to me) came from the House of Peers. My companion, Mr. personal acquaintance of Sir Henry Stanley, Charles Giles, told me that this gentleman whose life has had a lasting moral influence freely into the West-Liao districts, and has the House of Peers. My companion, Mr. personal acquaintance of Sir Henry Stanley, China's neutrality. She has sent better troops was the finder of Livingstone. I was surprised and unconsciously retraced a few deserves the proper appreciation of the paces to look back. He was about fifty-ination. As hinted in his letter above quoted, she is now loudly complaining that Chinaeight years old, and his hair and beard were is not this war with Russia the very opportance. Shows a disposition to depart from an attitude snow-white. His stature was of medium tunity for the Japanese to prove our right height—rather shortfor an Englishman. The to "a still higher opinion from the Western latter fact struck me forcibly, because I had world"? It is a matter of consolation to the world condemn China for "intending" to latter fact struck me forcibly, because I had imagined him a giant after reading the re-cords of his active life. I would have followed him from magnetic attraction, if I had been alone. My kind cicerone pointed out to me some of the renowned persons sitting in the House of Peers, such as Lord Salisbury, Mr. Chamberlain and others, but my perturbed mind was with the figure I had just seen. On leaving my companion, I hastened to the Strangers' Gallery of the House of Commons, and asked an official whether Stanley

letter ran :-

How modestly he speaks of himself! The great men of the world have always been modest, and Stanley was not an exception to the rule. A month later, he megotiations that preceded it we find the most astonishingly clumsy action on Rusinterview with him was at his house at Whitehall in November of the same year.

Lady Stanley and her aged mother received diplomacy which had converted the Manme no less cordially than he. I should have churian question from a sleeping dog to a remarked that Stanley's manner was very fighting beast, and her conduct when she anley. A slight personal acquaintance calm and gentle, with not the least indication received the first of the blows that her arbitrary and offensive acts had brought iscence of the illustrious dead.

It was just five years ago, on the 16th of to the "At Home." I was asked to read a expected from a brave nation. She continues

CHINA.

Saturday, May 14.

mons, and asked an official whether Stanley was sitting below. To my disappointment, I was told that he was not to be found there. Stanley was member for Lambeth. The official did not stop here, however, but suggested that he would take my card to him if I wanted to see him. I did as directed. The few minutes to follow were to me jumping into the dark; my heart beat high; my eyes swam in my head; in short, aid any way, and her interference would be I scarcely knew what was going on about productive of innumerable evils.

To my disappoint officials under his jurisdiction, calling their of the Chinese, or that their patience is attention to the successes won by Japan, thus deliberately subjected to tests which restore China's prestige. It is happily a far over the details may be exaggerated by core from Kwantung to Liaotung, but an incident like this increases the world's natural rumour, Russia's general charges against over the details may be exaggerated by the struggle. Japan does not desire her with insistence and with imperiousness high; my eyes swam in my head; in short, aid any way, and her interference would be to enrage China, can only be described as

Mr. Uchida, Japanese Representative in Peking, has addressed the Chinese Government, urging the great advisability of

avoiding everything calculated to suggest Japan, in defiance of her neutrality. It is pointed out that China's enemies are eagerly seeking some pretext to create such an

impression.

The wonder is, when are the Russians But it is quite a considerable time since (May 2nd) Kuropatkin himself was said to have left Liaoyang for Fenghwang at the head of 20,000 men. The Commander-in-Chief ought to have been heard of ere now if that were true.

Continued reports come from Newchwang of Russian activity in evacuating the place. They are moving away their big guns by yoking 20 horses to each piece—the animals being requisitioned from the farmersthey have sent away 450 carts full of ammunition.

It is said that at Dalny there are only 1,000 infantry, 50 cavalry, seventy or eighty junks and two small steamers.

Tuesday, May 17 At every stage of this war and of the

reflect that Stanley lived long enough to take Japan's part. M. Cassini and the see our successes so far achieved. reported to be exploiting this accusation for all it is worth, and General Linevitch is said to have officially threatened that unless General Ma's forces be withdrawn to a certain distance from the railway-300 versts is the alleged measure—, he, Line-vitch, will send a body of Russians to drive The Viceroy of Kwangtung is said to have them back. It is hard to believe that such addressed a circular to the military and local open defiance has been thrown in the teeth

supremely clumsy. There is no ostensible reason to assume that Russia wishes to draw China into the melée, unless, indeed, as the London Spectator has more than once suggested, the St. Petersburg statesmen think that in a universal conflict alone can Russia hope to find some partially honourable exit from her present difficulties. It is more than questionable whether France would be moved to action by China's interference, and even a Chinese army would add not a little to the embarrassments of the military situa-tion in Manchuria. The wisest course for Russia, one imagines, would be to sit quiet vis-à-vis Peking, and to avoid everything calculated to offend or defy China. On the contrary, she is taking a line which, if pursued much further, can not mean any-thing but a final rupture of neutrality.

The Chinese Government, on the 15th instant, addressed to the various Powers circular note renewing its previous declaration of neutrality and engaging that it shall be vigorously observed. This step is said to have been taken at the instance of Mr. Uchida, Japan's Representative in Peking, and it has been warmly applauded by all his colleagues, the Russian Minister excepted.

Thursday, May 19.
The Foreign Office in Tokyo announces that the Japanese Representative in Peking addressed, on the 10th inst., to the Chinese Government a note earnestly recommending the advisability of openly renewing the declarations of neutrality made by China at the commencement of the War. The Japanese Government has always considered that the peace of the world and the general interests of the nations would be best served did China abstain altogether from taking any part in the conflict. Advice in that sense was tendered in Peking from the beginning, and the Chinese Government maintained its neutral altitude faithfully. But of late there have been many rumours suggesting that the Chinese nation is anxious to join in the fight, and as these rumours have produced an uneasy feeling in the public mind, Japanese statesmen deem it advisable that some re-assurance should be

given. We know by telegraph that Japan's

counsels have been acted on in Peking, and

that China's Representatives in the various

Occidental capitals have repeated their as-

surances as to preserving strict neutrality.
In certain quarters in Tokyo there evident ly prevails a belief, suggested from Peking, that M. Lessar and M. Pavlow have been exerting all their strength to foster the above impression about China's inclination to depart from her neutral attitude, and have even been intriguing to inspire and strengthen such an inclination. These dip-plomatists see no hope of rehabilitating their country's reputation in Occidental opinion except by representing her in the light of the West's champion against the Yellow Peril, and to promote that fallacy nothing would be better than that China should throw in her lot with Japan. Much allowance must be made for Russia in her difficulties, but it might have been hoped by her friends that she was not yet reduced to an expedient so false and so shameless.

ALEXILFF.

tion, though if ever a man deserved disgrace, so far. it is Alexieff.

RUSSIAN PRISONERS.

Our contemporary alleges that 800 prisoners have to follow, among them being 170 wounded. These did not surrender during the battle, but were found in the groves and farm-houses near the field. It is stated that when this first batch of prisoners was sent back from the front, they were told by the Japanese Head Quarter Staff that they might feel perfectly easy as to the treatment they would receive in Japan. A sum of 50 yen was handed to each officer. They all—men and officers alike—presented the appearance of being very badly nourished. The officers were handsomely dressed, most of them wearing long boots lined with fur, but the garments of the men were in many cases meagre and greatly soiled. They all ate as though they had been famished, and their consumption of whiskey is said be frank. Among them is a medical man who was in the Russian service though not a Russian. He earnestly sought permission to-witness the treatment of the wounded and sanction was given. But it is a mistake to say, as has been said, that Russian surgeons were employed by the Japanese to tend the wounded. was nothing of the kind. The wounded are all said to be doing well. The Hochi states that although the officers felt quite confident about the treatment they would receive in Japan, some of the men imagined that when they reached these shores they would have their heads cut off. Among the officers there are two Colonels and one Lieut.-Colonel; the remainder being captains and lieutenants. One of the officers is said to be a man of 62. They are reported to have stated that the Russian troops on the Yalu were picked men, and that their quality was proved by the stand they made at Hohmutang, where only the rear attack of the Japanese finally discomfited them.

VLADIVOSTOCK.

Saturday, May 14.
Saseho reports that Admiral Kaminura's squadron recently exchanged fire with the Viadivostock forts. This occurred apparently just after the catastrophe of the Kinshu Maru. The squadron, on approaching the forts and, during a fog, was attacked by two Russian torpedo-boats which it beat off. The fog then lifting, the forts could be plainly seen and an interchange of shots took place. Several of the Russian shells fell in the neighbourhood of the Isumi. There do not appear to have been any casualties on the Japanese side, and as the fog settled down in a very short time, the Admiral steamed

Tuesday, May 17.

It is reported that on the 15th instant sounds of cannonading were heard in the seas near Iki and Tsushima, and there is a conjecture that the Vladivostock Squadron may have fallen in with Admiral Kamimura There is a rumour that Viceroy Alexieff somewhere in that vicinity. But nothing has been relieved of all military functions of seems less likely than that the Vladivo-suggest that some of the Cossacks who every nature. The batch numbered 16 succeeds day without the slightest symofficers—of whom 9 are wounded—and 436 ptom of activity on the part of the Port rank and file, of whom 285 are wounded. Arthur squadron. Viceroy Alexieff telegraphed that the last Japanese blocking essay had failed and that the entrance to the port was free. Either he was singularly mistaken—and what a mistake for a responsible officer to make!—, or he has received orders to keep every ship in harbour pending the arrival of Makaroff's successor-who can not now arrive except by balloon-, or he has lost all heart for fresh adventures. Can there be any doubt that the first explanation is the correct one.

KOREA.

Saturday, May 14. It is evident that the Cossacks who attacked Anju on the 10th instant must have made a very long ride. According to the statements of the two prisoners-one a noncommissioned officer-the force, 700 strong, set out from Liaoyang, whither it had been carried by train, and riding to the upper waters of the Yalu, crossed that river at Chhosan. They then took the Wiwon road, and travelled eastward and southward viá Kangke, Nyongwon and Kaichhon, an immense circuit. Altogether the distance covered before emerging at Anju must have been about 350 miles at least, and supposing that the Cossacks travelled 20 miles a day, it would have taken them 17 days to reach Anju. Thus they must have set out from Liaoyang on the 22nd or 23rd of April at latest, and it follows that they knew nothing whatever about the battle of the Yalu on the 1st of May. Who was responsible for sending these men out into space? A wilder manœuvre we do not remember to have read of in the pages of history. They could not possibly hope to accomplish anything tangible. It was a futile frittering of strength. When they did reach Anju, they made a very poor showing. We do not know what force the garrison of that place had, but presumably it was not more than two companies, or, say, 250 men. The two companies, or, say, 250 men. The Cossacks numbered 700, yet they failed to produce any impression, and finally retired after losing 13 killed and some forty wound-ed, while the Japanese casualties were four killed and six wounded. General Kuropatkin must have been privy to the despatch of these Cossacks, and the only interence we can draw is that the Russian Commander-in-Chief imagines himself to be fighting against savages. We trust that he may long cling to the delusion.

Meanwhile the Russians on the north-eastern coast of Korea are reported to have withdrawn to the Tumen, with the exception of a force of some 200 which remains at Kyongson. They are said to have swept the country clear of provisions. It remains to be seen what purpose the Russians hope to achieve by these isolated raids. To ordin-ary onlookers they seem to be merely frittering away their strength.

and are now heard of at Chhosan, Wiwon, and other places in that vicinity.

Monday, May 16.
It has been definitely decided that the Haginoura Maru was sunk by the Russians on the 25th of April, when the Vladivostock Squadron made its destructive exit. But the particulars of the incident are kept secret. We read in Japanese journals that the steamer belonged to Mr. Horikawa, not to Mr. Hori as previously stated.

The threatened resignation of the Korean Cabinet en bloc was averted for a moment but seems to have again come upon the tapis.

It is all a farce.

The Nichi Nichi Shinibun says that the question of fishery privileges for the Japanese has not yet been settled by the Korean Government. According to our contemporary's Seoul correspondent the raid of the 700 Cossacks at Anju has again thrown Korean ideas into confusion and perturbation. He adds that the anti-Japanese party is also agitating about the Seoul-Wiju railway, and insisting that if it be really a military line, it should be handed over when the war is

Tuesday, May 17. Harrowing reports are published about the doings of the 700 Cossacks who recently rode through the mountains of central Korca to attack Anju. Probably the small store of provisions they carried with them was exhausted by the time they reached Nyong-won, for their tracks were thenceforth marked with robbery and rapine of every description. Private property, the virtue of women, the persons of men, nothing seems to have been safe from their violence. It is said that their thefts extended to Yunsan, where the American mining concessionaires have their head-quarters. In this context we may quote the following from the last number of the Korea Review:

The Russians spread out over the southern portion of North Pyeng-an Province in a desultern porton of way. They must have known through their scouts that the Japanese were going north by the main road only but the Russians scattered far to the right and only but the Russians scattered far to the right and left of this road apparently bent upon forage. On March 15th they entered Yûng-byûn, the capital of the province, about a hundred strong and made a demand upon the governor for food. He could do nothing but comply, so he gave them orders on various prefects in the vicinity. These the Russians took and presented at various prefectures saying that the Russians were going to fight the Jangoese and on various prefects in the vicinity. These the Russians took and presented at various prefectures saying that the Russians were going to fight the Japanese and that the Koreans must aid them with food. They seem to have had the curious notion that this would be pleasing to the people, when in fact nothing could be more distasteful. The Russians gradually came to see their mistake when prefect after prefect announced that orders straight from Seoul were superior to the governor's orders and that they could furnish no provisions. The result was that the Russians had to take what they wanted. These provisions were not paid for even though the Russians may have offered Russian money. That money was worthless to the Korean and however much he received it could not be called pay. It is amply proved that they took things without leave, for they entered the grounds of American citizens in Sun-ch'un and were going to walk off with some fodder, and it was only by an appeal to the head officer that the theft was prevented.

prevented.

On the 22nd a Russian band, twenty-five strong, entered Ch'ût-san and took a hundred pecks of rice and five bullocks. A large majority of the people had run away leaving their houses empty. The Russians entered these houses and took whatever they needed. It was the same in all the towns along the main roads. The number of Koreans who fled from their homes in the north would mount up to thousands. Where did they go with their wives and children? It was bitterly cold. Winter had but just begun to break up. The imagination is taxed to the utmost to form even a faint conception of the terrible suffering those people must have endured. The number of actual deaths among those fugitives must have been ten times the number of Japanese and Russians who were killed or wounded in the various small rously dealt with.

engagements. We may smile and say that it was quite unnecessary for them to run away from their homes, that they were themselves to blame for their suffering; but we forget that they know of war only as rapine and plunder, the loss of property, of life and of honour more precious than life. They know nothing of "civilized" warfare.

Thursday, May 19.

Pyong-yang, reports that the 700 Cossack raiders buried 34 of their dead at Anju and carried off 14 wounded, of whom 4 died at Kaichhon. On the 12th these Cossacks

Wednesday, May 18.

The remnant of the Cossacks who on the 10th instant attacked Anju, have now raided the British mining settlement at Eun-They reached that place on the 14th instant, stole everything they could lay to be stealing and destroying wherever they hands on, and placed all the foreigners under pass. At Tokchhon they ravished over 20 restraint, except the Japanese who managed Eunsan does not lie in the line of retreat from Anju to the Yalu. It is on the south-east of Anju. Evidently the Cossacks diverged from the Sunchhon-Kaichon road expressly for the purpose of raiding this settlement. It remains to be seen whether Great Britain will tamely suffer the persons and properties of her subjects and their employees to be thus treated. The British Company is at Eunsan by right of Korea. They are compelling the unfortunate treaty. If Korea is a beligerent, all persons people to surrender anything needed or residing in Korea must of course be prepared desired by the soldiers, and such is the to take the risks attendant on war. But it terror their violence has caused that the is in no sense a legitimate operation of war farmers do not venture to un the news and to raid a British settlement and to steal the inhabitants are hiding in the hills. Taken in conjunction with the pillaging of That kind of work has nothing to do with war: it is pure brigandage.

These Cossacks seem to be heading for Hamyong-do province. If they follow their present route they will emerge at Wonsan (Yuensan), and perhaps they hope to carry their raiding performances all up the Korean coast via Songchin to the Tunien. Retreat by the road they traversed originally would take them to Kwantien, which is now in Japanese occupation. Of that, however, they probably know nothing. Indeed it may be doubted whether the news of the Yalu battle has yet reached them. They are just taking a big ride through regions where they know that there can not be any organized resistance. Of course it means that Russia now treats Korea as a belligerent, though not a Korean soldier has taken the field against her. Supposing that Korea should now declare war against Russia, would that constitute the "second Power" whose union with Japan would call for French intervention?

There is said to be some unrest in the province of Chhungchhong-do: The Tong-haks, the Sohaks and others of the same genus, to the number of 2,000, are reported to be plundering and burning. They are worthy associates of the Cossacks, and we should not be surprised to learn that the latter had joined hands with them.

The Jiji 'Shimpo's Seoul correspondent affirms that much trouble is caused by that old difficulty, the arbitrary conduct of foreign missionaries who belong to the Church of Rome and enjoy French protection. Treaty limits do not exist for them, it is said. They buy lands and houses wherever they please, and they encourage the people to claim in-dependence of territorial jurisdiction. The Korean Government is preparing a strong protest. We give the story for what it may

Some member of the Korean Government

Kaichhon. On the 12th these Cossacks retired to Tokchhon and on the 13th to Nyongpyong, evidently on their return journey to the Yalu. From Nyongpyong they may take either the route to Chhosan or that to Wiwon. Their escape from Korea will be an interesting episode. They are said women. The inhabitants are compelled to carry the wounded. In fact, from all accounts, these Cossacks are completely out of hand, and are behaving like a party of common bandits. But as to their having diverged from their path to raid the British mining settlement at Eunsan, no official

communication has yet been received. The Russians are reported to be behaving with the utmost lawlessness in north-eastern houses and the ravishing of women wherewith the Cossacks are beguiling their time in the adjoining province of Pyongyang-do, all these things constitute a fine picture of the civilization with which M. Doumer invites France to sympathise. A war of Western civilization against Eastern! What a gross insult the French statesman offers to Western civilization!

Friday, May 20. The Korean Government, according to a telegram from Seoul to the Asahi, published on the 18th instant an announcement that all treaties and conventions between the Korean and the Russian empires are abrogat-The Jiji Shimpo had already reported that this intention existed, but its execution did not appear likely to be so speedy. We can not be at all surprised at Korea's action. Russia has treated her as an open enemy. Even at this moment a band of some 600 Cossacks are riding through Korea committing all sorts of excesses against the persons and properties of peaceful Korean subjects.

This official declaration excepts, however, any concessions made by Korea to private individuals, so long as the carrying out of such concessions is not deemed injurious. But all privileges granted with respect to timber-felling or afforestation on the Yalu, the Tumen or Ulneung Island are explicitly

revoked on the ground that they have been grossly abused by their holders.

That is a disagreeable pill for Russia.

There is an immense quantity of timber collected by the Russians at Yong Ampho. It will do for building the Scoul-Wiju Railway. Such are the ways of fate.

THE ORIENTAL ASSOCIATION.

On the evening of the 18th instant this Association held a meeting in the Nobles Club. Mr. Kurino, recently Japanese Minifor promoting the conclusion of the KoreanJapanese Protocol. Mr. Hayashi has urged Ito, Count Okuma, Count Kabayama, Vistantial in view of the document having been count Enomoto, Mr. Akizuki, Secretary of internationally concluded and imperially the St. Petesburg Legation, and others, sanctioned, such complaints should be vigo-Marquis Kuroda acted as Chairman, Count Soyejima being absent.

Mr. Kurino, in returning thanks for his time. health which was cordially drunk, begged changes. to be excused from making any statement concerning Russian affairs as he deemed it more prudent to remain silent at present.

This declaration threw a damper on the proceedings and the meeting seemed likely to end in a fiasco when Mr. Sonoda rose and declared that having been invited to defer all other engagements for the purpose of attending, they really had a right to expect some speeches from the distinguished statesmen now pre-This brought Marquis Ito to his His Excellency said that Mr. Kuriwas an old friend of his and, main, a fellow-thinker. When last in Europe he (the speaker) had invited Mr. Kurino to meet him in Paris and had then discussed the Russian question Thereafter he had proceeded to St. Petersburg. It was unnecessary to recount what had occurred. Subsequently Mr. Kurino in St. Petersburg and he, the Marquis, in Japan had striven very earnestly to preserve the peace, but had not succeeded. They might each accept one half of the responsibility of failure.

Count Okuma said he had nothing special to speak about. He was an old men without any future and he wanted to see the young enterprising men take charge of events. Thus he had hoped to hear something from Mr. Kurino. But there appeared to be some obstacle to his speaking. Mr. Akizuki also kept silence. For his own part he thought there was plenty to talk about. There was above all the strange fact that whereas international morality was said to to have made great progress, the very Sovereign by whose instrumentality the Hague Tribunal had been instituted, was himself the first to break the peace. In such circumstances there was no need for over-circumspection. be made in speaking but they might also be made in silence. Marquis Ito himself had once been anti-foreign and had not hesitated It did not seem that reticence was had changed with them since the time when self of some marine pest by grating its body Viscount Enomoto was Minister in St. against the sand. Careful investigation, Petersburg and Sagitalien had been exchanged for the Kuriles. (Marquis Ito:—I suspect that Count Okuma himself had something to do with that). "Yes, I had which drives the fish madly on. If opened, are thing can be detected to show that it was suspect that Count Okuma muscul had pain arising from something to do with that). "Yes, I had something to do with it. I was a strong man in those days. But times have changed. Remember how we felt when a sword-slash prior to its death. Since the fish is found to the rest weather there seems good was given to the Russian Prince Imperial at Otsu. Were not we in trepidation lest the ground for assuming that it is the intense compliment should be returned in the shape cold which is accountable, in some mysteriof cannon shot at Hakodate? And now we ous way, for the seemingly irresistible imare fighting that very Russia. Even the big pulse which presses it shoreward, and which men of the Meiji era could not have looked forward to this. Marquis Ito looked very humble that evening. Habitually he never humble that evening. Habitually he never admitted that Japan had achieved anything big. But in his heart and on his face he showed that he thought differently, and also that he took the credit to himself." (Loud laughter. Marquis Ito:-How about yourself?) I, why of course I also take the credit. But everything moves with the times. The

take our places, young men such at Marquis harmony and there was no accident of any Kuroda and Mr. Kato Takaaki, our Chair-kind. man and Vice-Chairman. Their healths, gentlemen!"

NOTES ON CURRENT EVENTS.

In view of her new loan and her general financial condition, Russia's securities have fallen in Paris to 88.5.

-a large creature about four feet longwhich practically lays itself at the fishermen's feet high and dry on the shore on a frosty morning. The old-time belief, says the writer, that the fish pursued its prey too close to the shore and was left by the long swell during ebb tide, and the speculation put forward by Dr. R. von Ledenfeld in 1884 that the fish died from internal hemorrhage, following the bursting of the air bladder, merit no more than passing attention. We now know that the frost fish is neither stranded alive nor cast dead on the shore, but that it commits what appears to be a deliberate act of self-destruction. Selecting a spot where the water is smoothest and most shallow-from which it may be fairly inferred that the fish knows exactly where it is going—it ap-proaches the shore, preserving, as far as one is able to judge by the light of the stars a normal condition in its swimming. On it comes until its deep, narrow body touches however, has proved the beautiful outer skin to be free from parasites. Neither can it be pain arising from some internal disease only in frosty weather, there seems good cold which is accountable, in some mysteripulse which presses it shoreward, and which shows no abatement until the sands and death have been reached. Yet, if it be the frost which is fatal to its existence would not the return of winter instinctively cause it to abandon the inhospitable shores of the South Island for the warmer waters of the North? Moreover, it must be borne in mind that, bite the frost

Truly the times bring strange the 15th instant and made a wide circuit Yet the force that directs the through the city, stopping to cheer outside influence of the times, that force is man's the Palace. There are said to have been ability. It was because Japan had heroes twenty-thousand lantern bearers. Made like Ito that she had kept pace with the wise by the sad experiences garnered on a trend of the age. We have all to die, how-previous occasion, the processionists, the ever. We must look to the young men to onlookers, and the police worked in orderly
